You could take a look at www.bbc.co.uk/rd/pubs/reports/1991-15.pdf which on pages 9 and 10 has some details of a Lindenblad for 2.5 GHz, with patterns, that was made from semi-rigid coax and brass tube. The aim in that work was to achieve the best possible axial ratio in order to reject first-order reflections from the ground and nearby objects. If I remember correctly, phase rotation was tried but there really weren't enough variables to get the axial ratio good enough over the whole sphere, so the dipoles were driven in phase and the hole in the vertical radiation pattern at the bottom was 'embraced' as a good thing! In this application, if good axial ratio couldn't be achieved somewhere it was probably better to avoid radiating in that direction.

Another Lindenblad, but also arrayed vertically in four tiers, was used at High Hunsley transmitting station for FM radio. The older photos at http://tx.mb21.co.uk/gallery/high-hunsley.php show it (at the top of the structure) but they are rather distant. The modern replacements are basically crossed dipoles in front of reflectors. A significant challenge in the design of these (big) things is to get the horizontal radiation pattern to hand over cleanly from one element to the next around the structure, without lobes or nulls in either the vertical or horizontal component. In UK Band II broadcasting, the polarisation is usually said to be 'mixed' rather than intentionally circular. The Alan Dick company www.alandick.com/broadcast_antennas_product_004.htm still offers a Lindenblad array for Band II. Their 'FMAC' looks interesting!

As to your question, I'm not certain what you mean so perhaps you could amplify a bit. Certainly if the paths of currents, their relative amplitudes and their relative phases in time, appear the same from different directions then the polarisation should be the same in those directions. A short helix can operate as a broadside and end-fire antenna at the same time and I know the quadrifilar helix is a popular option for small L-Band satellite terminals. However, that radio-camera application imposed stringent demands for axial ratio and, obviously, the requirements for satisfactory reception of CP signals from satellites can be less demanding when CP is used simply to avoid loss on account of mismatched linear polarisations - when the other sense of CP isn't in use at the same frequency by the same satellite.

I believe what you are describing is Duco cement the kind that I used
to use to build model cars.
Is that stuff still around? I think they took it off the market
because of the glue huffers. If it is still around it should make
excellent coil dope.

Hi Chris

The Lindenblad antenna is fed to produce a null toward zenith. The
Lindenblad antenna as defined by Brown and Woodward in the mid 1940s for TV
transmission, has an omniazimuth radiation pattern.
The DCA has no zenith null.

If you consider an antenna with an overhead null to be the same as an
antenna with no null to be the same, I have no expectation that you and I
will agree.

The DCA offers little advantage over a Quad Helix when radiation pattern
is considered.
The DCA is slightly more sensitive toward the horizon than the Quad Helix.
.
The bandwidth of a DCA is far wider than a Quad helix.
The DCA is very insensitive to dimensional errors when built by an
amateur. The Quad Helix is extreemely demanding of prescission of
construction.

The original subject of this thread was related to building an antenna for
reception of Low Earth Orbiting satellites. I figured the OP could
appreciate knowing that a DCA will perform better than a Lindenblad and
needs no series matching transformors.

Duco Cement is made by the Permatex division of ITW/Devcon. It has not
been taken off the market, but in some communities its sale is restricted
to keep it away from children.

Duco Cement is cellulose nitrate dissolved in acetone. It is plasticized
by a small amount of camphor (probably for historic reasons, camphor was
the plasticizer used in celluloid and pyroxylin around the turn of the 20th
century).

As I stated in the post you quoted, cellulose nitrate is far from the best
radio frequency insulator. Fingernail polish performs slightly better as
an RF insulator but polyvinyl chloride is worse. I still recommend General
Cement commercial Q-dope which is polystyrene dissolved in toluene or
methyl-ethyl-ketone (GC has changed their formulation). You can make your
own inexpensively by dissolving Styrofoam shipping "peanuts" in toluene.
methyl-ethyl-ketone, or acetone. Of these three solvents, acetone is the
safest. Home Depot used to sell all three solvents in the past, but sadly
there is no store near me where I now live.

(...)

Argh. Is this really for an introductory (beginning) publication? I'm
either fatally obsolete (the most likely possibility) or materials
have progressed well beyond my 25 year old chemistry experience. Looks
like I'll be doing some more reading to decode the technical terms.
Don't change, as I prefer accurate and complete explanations even if I
don't initially understand them.

I'm partial to seat-of-the-pants testing for RF loss using a microwave
oven. In general, if it gets hot in a microwave oven, it's going to
be lossy. I haven't tried various coil coating formulations and
tapes. However, I have tried various common hardware store plastic
and fiberglass products to find something suitable for a 2.4GHz
antenna radome. The problem was that it was impossible to assign a
numerical value to the RF losses using the microwave oven test. Some
would be hotter or less hot depending on the color (doping). My IR
optical thermometer was also rather sensitive to surface reflectivity,
resulting in additional errors. Still, the stuff that didn't work,
was fairly obvious by the deformation, smell, and sometimes smoke.
Incidentally, I've lost count of how many microwave ovens and toaster
ovens (for glue curing) that I've destroyed.

Thanks much for taking the time to supply the technical detail on
various materials and techniques. I've learned more from your
postings than from the usual uninformed speculative rubbish (such as
what I tend to post).

Amazing. I can see it's possible to create a diode mixer junction
with electrolytic action between the aluminum foil and copper braid.
I've never seen broadband noise from coax cable. Usually the foil is
mylar or polyester coated and the copper is tinned or silver plated to
eliminate any points of contact. Most of the radio sites I've seen
are stuffed LMR-400 and LMR-600. Heliax is better, but also far more
expensive. Incidentally, if you want to generate RF noise and mixing,
there's nothing better than an abraided Heliax outer jacket, with the
copper shield touching the zinc galvanized tower.

If intermod were really a problem with foil shielded coax, then the
common residential CATV distribution system would have a big problem
with intermod and mixes. While the buried coax is semi-rigid with a
solid aluminum shield, the pole to house drops are usually quad
shielded RG-6/u (sometimes with a messenger wire) with foil and braid
shields.

>Bring a knife with you and inspect before you buy. Tinned Copper braid is
>better, Silver clad rigid is best.

Mylar or polyester coated aluminum foil is more important. Scrape the
insulation and see if it flakes loose from the foil. I've seen this
on very old 9913 and some new LMR-400 of dubious origin.

Slight change of topic.... do the commerical sties that ban foil
shielded coax also ban nickel plated connectors? Just curious.

If it gets hot in a microwave oven, it's going to be lossy at 2.4 GHz, but it isn't necessarily going to be lossy at HF or even VHF. However, if it *doesn't* get hot in a microwave oven, it's probably pretty low loss at any frequency up to 2.4 GHz.

There is, of course, a problem with reducing loss to a binary quantity of "lossy" or "not lossy". A relatively high amount of loss can easily be tolerated at points of low electric field strength, such as an insulator at the feedpoint of a half wavelength dipole. On the other hand, you need very low loss for some other applications like potting high Q inductors or for feedline insulators when the feedline has a very high SWR.

Report Of ï¿½People Planting Bombsï¿½ on 9/11
http://www.prisonplanet.com/report-of-people-planting-bombs-on-911.html

Why isn't Happy George Norry, Our Enemy, covering
this everyday as an important subject to defend
American life he holds truly in contempt?
Again, Alex Jones leaves every American to die
victim to his NWO, before he will acknowledge
TRUE evil in our world. George Noory, the evilest

ACTUAL Enemy of History, Alex claims is a good
guy for never allowing open discussion on 911,
Afghanistan, Iraq, and so on, without selling
his Zionist hate for our Humanity. Can you believe
that demon enemy co-ksucker Ian Punnet actually
preaches? The demon has told US more than once
he doesn't believe in God, so what do you think
that other "buddy" of Alex Jones has in store for
your life? Alex has said near a hundred times, that
Christ's disciples were all killed by the Romans
for believing - what a demon he is - for - what
Bible is his fans conceiving? Again, Alex Jones will never
encourage his listeners to demand open debate. Alex
would lose on all his lies like, he's been on with
George Noory a hundred times, or fifty times in
five years. Why does Alex lie to US all like that?
Because he doesn't really want Justice to prevail
where GREATLY wiser men or women would likewise prevail
through open dialog. Alex can't have that because
everybody MUST be under HIS NWO mind control.
Mind control on education, the Federal Reserve,
and FREEDOM. Alex figures having a gun to shoot
innocent Americans in the back is his brand of
loyalty to God and Country. Well, I, as Christ,
state it isn't mine. He would see every American
murdered, before allowing the notion that he, and
his likewise cult, might just have something to
learn about evidence being a REQUIREMENT to prove
someone's guilt or innocence. His godless commitment
is to escape Bush, and his zionist media controllers
with excuses that don't hold water in any Court of
Thee. Alex refuses to allow Americans to know why
the Constitutional protections are there to defend
yourself, because if you did, you'd demand the
arrest of Bush for treason, and call Ron Paul an
sell out loser who pocketed the millions conned for
being Alex's loyal fans. Alex doesn't like this Truth
because he's gotta be leading Earth's "Truthers"
at the pinnacle of his spear as a liar, where all
of History, is one badly drawn Alex Jones cartoon - a
dickhead. A true dickhead illiterate on the bible,
on Justice, on Life.

I must be on crazy pills
http://www.uruknet.de/?p=m51615&hd=&size=1&l=e

/ / Well, why haven't the banks just returned
the money?... \ \

People who know they defeat all "Conservatives"
in seconds with indisputable simple logic, will

eventually rule the Universe, if CNN, CBC, and
Alex Jones allow open communications on what is
understood by all as high acts of treason openly
committed without a defense of smart people
explaining why/how we are being rooked as idiots
on purpose. Crazy man, crazy. Oh.. anda..
justwondrin', would be the first name Reza be that
of the feminine or, echem.. masculine? Just
curious on language that's all..

Oh, logic like, "Buying in bulk is cheaper."

-

Godsmack - I Fucking Hate You
http://www.youtube.com/watch?v=FiPtHkfDXus

Hey! Johnny's new theme song playing when
I be bagging the bushite zionist whores of
the demon antichrist, Our Mr. Bush Jr. Bush
closed 911 investigations, Bush lied about
Saddam not letting inspectors in, Bush never won an
word fairly in his entire war crime life of
game rigging with naked deceit and betrayal to
the cause of Man, die bushite die. Rock on
my friends, rock on.

"Army deserter deported from Canada, now in U.S. jail"

This is a for real war crime. Why? there was/is
no cause for the Iraq war. Truly. Example: why
bomb if you can go anywhere without delay? To
only murder innocent People INCLUDING SOLDIERS
to thieve from ourselves as war criminals is what
any rational person comes to understand. When you
destroy bushite grunts who war God for rape, torture,
and enslavement of our species, you save the
innocent lives of their next victims. To hunt
the godless bushite enemy, is to love Justice
as our glorious Humanity winning over the lawless
nazi grunts of the Third Infantry - who'll shoot
anybody, blindly as cowards, led by a Saudi, Buford
Blount. Their "leader" who left Iraqi's largest
weapons depot undefended for looting. Qaqaa. Killed
many a bushite nazi grunting lawless coward by his own
treasonous brand. And mumbling bushite nazi grunts have
what to say about American teens made valueless
victims for Neocon bounties? "whore yay" That's
about it..

LIFE IN PRISON FOR AMERICAN VICTIMS

LETTERS NOW RELEASED PROVE-Bush Intervened-To Suppress Torture
Evidence
http://www.democraticunderground.com/discuss/duboard.php?az=view_all&address=389x4994330

This is called ungodly nazi war crimes against
innocent Human beings.

Obama Gets Tough to Shield Bush Torturers
http://chris-floyd.com/component/content/article/3/1694-protection-racket-obama-gets-tough
-to-shield-bush-torturers.html

Who does Obama think we are as 'United' together
on pro lawless torture against innocent 'others'?
Wake up people, we are under attack by those
who refuse US Justice to win Freedom for
anyone. "Conservative" retards are completely
lost here, because they do not have the
intellectual skills necessary to understand:
a person accused of a criminal offense without
any evidence is innocent. Or, how about, No one
deserves to be tortured for confessions on
crimes left then unresolved for actual
retribution. [Aegis OPENLY murders innocent
families for more American paying for zionist
monies - P2OG - YOUR Spouse, YOUR Child, YOUR
family].

Following the crime scene leads of 911 to nab
the actual evil doers is beyond the will of the

deaf, dumb and blind? with lawlessness gaining
for monetary loses due America as corporate
cheaters. We are Brilliant, of that much I am
certain. Conservatives are minimally, idiots.

-

Israelis forced mother to choose which of her children would die
http://www.daily.pk/world/middle-east/9374-israelis-forced-mother-to-choose-which-of-her-c
hildren-would-die.html

/ / the soldiers told her she had to choose five of
her children to ï¿½give as a gift to Israel.ï¿½ As
she screamed in horror they repeated the demand
and told her she could choose or they would choose
for her. Then these soldiers murdered five of her
children in front of her. \ \

Funded by the American tax payers as a gift to
God as our stolen Humanity. Equal rights for all,
especially the Taliban's position in defense of
America, demanding evidence to form our guilty
verdicts.

-

Obama Accused of Blackmail over Terror Trial Evidence
http://atheonews.blogspot.com/2009/02/us-accused-of-blackmail-over-terror.html

Again, Obama is taking a position to torture innocent
people here as a traitor to Just cause. Just cause to
live in a free society. Torture warrants the death
penalty under American STANDING Law.

Video: Cop Punches Woman In Face Four Times During Arrest For Riding A
Bike
http://www.liveleak.com/view?i=99c_1233639102

Top Cop Johnny Judge rules: Ten years in prison.
Maybe fifteen if the dumfuk grunt, back from the
war against Iraqi children as a traitor to American
values, shows no remorse for his crimes against an
American women either. Absolutely any cop or soldier
who disagrees as true contempt for our freedoms with
punishment against this nazi trash pirating our
police uniform, WILL WARRANT death sentences all
around to ACTUALLY defend liberty in my America.
Any American father who prides in killing innocent
Iraqis for the escape of the neocons for 911 is no
father. And a wife should get the hell away from
a male who enjoys murdering helpless innocent others.
Children in such families should be challenged
by relatives through the Courts to save the lives

of our endangered offspring. Again, without water
or food, Iraqi children are murdered by Neoconner
grunts irrationally everyday with nothing to say,
aka, without reason but as Satanic Bush whores, to
make our God as Humanity suffer further for their
escapes as actually selling freely, lawless zionist
savagery.

KILLING MORE OF THEM - reporting war crimes to the Police
http://www.youtube.com/watch?v=gB-KaIBDNJw

Again, a bushite has no commitment to defend
America, for it speaks nothing for the arrest of
the neocon traitors. traitors like themselves whom
will murder innocent folks like your Self to steal
our common values. Wouldn't you glory in seeing
these savage grunts who on video, indiscriminately
shoot innocent families, or bomb a city entirely,
executed by Christian Patriot firing squads? or
televised to fry in the electric chair for these
documented war crimes? I sure would. It would make
our world a much safer place to raise a family
secure in knowing, bushite grunts as enemies of
everyone, were hunted to extinction for their
crimes against our Humanity. Hunted by Johnny Law,
the True Spirit of America.

Johnny Law for Coast to Coast radio Host!

yaahhh im a real person! Wow eh? Now,
let US bag some bushite scum for the Gipper.

UK judges accuse Obama Administration of suppressing torture claim
http://www.timesonline.co.uk/tol/news/uk/article5661291.ece

Yeah really. What kinda world does Obama take US
for here? Does he actually believe we hold no
interest in being attacked as ourselves, the
innocent forsaken? A reminder: an American was
executed under Iraqi law without any evidence
brought against the accused, while the grunts
were offered an excuse to seek not the culprits
at the terror scene. The case was lightly reviewed
at democracynow, a year or two ago, and can be
found by searching for a grunt pretending to be
an ambassador to Romania. A case where the Judge's
life was threatened by a "General", where if he
didn't order the death of the innocent American
citizen, the grunt with the General would murder
US all right then and there. The Innocent American
was murdered as forsaken for value shared by
free men.

-

(pet bed cat trees...)
http://www.petbed-cattree.com/cat.html

Hey! this stuff for cats and dogs looks pretty
coool. Check it out if your a pet lover!

Near Impossible to believe!

/ / "similar themes go through all our streams. And it all
comes back as Confucius says, "Do unto others, as you would
have them do unto you." And Christ said that, Hillel said
that, Buddha said that, everybody says that, cause that's all
it is. But bushite, he wants to accuse People of criminal
offenses without any evidence, and indiscriminately slaughter
everybody in countries, for no good reason but to be OUR
ENEMY, an ENEMY OF ALL PEOPLE." \ \

-

AG Holder-- First, Jail All Bush's Lawyers
http://www.consortiumnews.com/2009/020309.html

For actual documented criminal actions against
American interests in defending ourselves from
indiscriminate robberies, tortures, or mass murder.

"Judges Bribed by Private Contractor to Sentence More Kids to Juvie
Detention"
http://www.philly.com/philly/opinion/inquirer/20090128_Editorial__Judges_Sentenced.html

Christ speaks!! Echem.. This is called a criminal
action to falsely imprison American children for
more stolen money. Will the contractor be arrested,
tried, then executed in America to defend American
children? Unlikely, because it isn't as important
as how fat Oprah is today, or as Alex Jones the
bigot would say, on how daily, the hidden NWO elites
are responsible for every criminal action against
Liberty in America, not war crime dictating LIAR
Bush who told US Saddam wouldn't let the inspectors
in without corporate news correction, Bush, who
closed Police investigations on 911 for Enron, KBR,
and the Kissinger associates. And certainly not
Bremer for personally stealing tens of billions,
no no no, "just puppets" "just puppets" as instead,
the Illuminati in other words not allowed spoken
understood with Alex Jones NWOers. I want a free to
speak arena where 50 percent of what Alex spews is
truly dumber than stupid. Why? because he is controlled
through his personal weakness of bigotry, to actually
believe foolish things as factual. Examples are
truly endless when we discuss Alex Jones'

dumminess, but here is one example. Alex states
911 truthers were attacked in a TV show as NWO mind
control- but, the "truther" he referred to
talked in the drama on there being NO PLANES!
A dis-info bushite stooge if ever was one depicted
with special effects. We suffer with his bullshit
every day, knowing if we tried to phone, would
not be granted a minute because I, in support
of Freedom for America, make all bigots look truly
dumb as fascists lashing out at nothingness to
divide our masses. And apparently, he can't have
America becoming greater for defending ourselves
fairly through Judicial actions.

-

which side are YOU on? by REBEL DIAZ
http://www.youtube.com/watch?v=8Dr05tXktSo&e

The side where a person accused of a criminal
offense without evidence is innocent, and in the
case of capital accusation, the false accuser
deserves severe punishment as an enemy to my
Humanity.

U.S. partner, not Hamas, firing rockets into Israel
http://www.palestinianmothers.com/profiles/blogs/us-partner-not-hamas-firing

/ / The probe found the Islamic Jihad rockets were
actually fired by Fatah. \ \ Whom Israel in response
to the confessed by all to be true facts, murdered
innocent Christian children in Gaza as war criminals.
Actually claimed it was regardless who shot the tin
can rocket that struck no one harmlessly. Again,
Nazi Israeli responded by murdering innocent Christian
children as war criminals with "disproportionate"

force. War criminals who murder Humanity to steal
our shared values.

-

Dennis Kucinich "Israel is Killing Children With Your American Tax
Dollars"
http://www.youtube.com/watch?v=HrtPpk6nhF8&feature=related

Israeli openly admitted that they targeted those
innocent Christian children for MURDER - as -
continuing "disproportionate" force in our names
as enemies of God and Humanity. They are not Jews,
but of the evilest group of lawless nazi savages
pirating the government of Israel away from US Jews.
I demand open debate in America, and Americans refuse
me by not likewise demanding international coverage
on the Coast to Coast radio networks. Let's change
this by communicating.

Ceasefires, Israeli-Style
http://sjlendman.blogspot.com/2009/02/ceasefires-israeli-style.html

They admit TODAY, as yesterday, and last week, month,
year, decades, that they target completely innocent
people for murder to punish Humanity for believing
in God as Just, or real freedom understood as practiced.
Libertarian couldn't give a shit on a issue such as this,
that they keep everyone ignorant of through hypnosis. Israeli
openly admit to thieving innocent peoples homes, to them
be sent at gun point, to live in a concentration prison
death camp.

http://www.davidduke.com/

/ / ..the Israel Prime Ministeri¿½s speech in which he
actually boasted of his power to order the U.S. President
as one would a dog. \ \ and all American men can't for
some god forsaken reasons, can't for their lives, phone
George Norry to be hung down on. George Noory is a "good
guy" for aiming to go ballistic against every American
who refuses criminal orders to destroy themselves.

Obama set to allow Bush-era ï¿½torture flightsï¿½
http://timesofindia.indiatimes.com/Obama_set_to_allow_Bush-era_torture_flights/articleshow
/4067338.cm

What the fuk eh? Doesn't Obama know this
crime warrants death in America according
to the war crime act? Does he believe America
just will never have a chance to speak for the
interests of US as innocent Human beings he is
planning to torture as an enemy to Life?

Refusing to Defend American Values

Yoo: Bush okayed torture to outwit defense lawyers

This is why it warrants the Death sentence. Remember
corporatist Amerikan citizen, these torture victims
that include children as younger than a hundred, had
not been alleged to have ever committed a crime in
their entire lives. Victims tortured to death for the
pleasures of those Satanic, such as General Geoffry
Miller, who tell US today as confidenced, they do it
because, patsy wasted American soldiers will just refuse
to hunt them down for formal executions. Let's change
this for our Humanity in this future, to look back,
and know, American males were men of the World, who
stood for the principles enshrined within every living
Constitution. A free man shall not be jailed, or
tortured by anyone in our names as Governed, without
the perpetrator tried publicly for execution as our
Love of real Justice. As first degree mass murderers
warranted death sentences under the War Crime Act
ushered by Reagan!, all done in for our protections
of their next innocent victim - ourselves. Or
die a death in corporate tyranny worthy the title,
cowardly traitors to God and Liberty. Blackwater,
CACI, AEGIS, KBR and the like will all be hunted to
extinction for refusing to quit their lawless Rape
and mass murder, murders done for more stolen money
as America's name high-jacked. The Lawless enemies
shall be prosecuted by the honorable Soldiers of
the Good old, Red White, and Blue. Count me at
our words on this, I am,

King Johnny

-

Ungodly Israeli Nazi LIARS Continue to Murder Children after "Truce"
http://www.youtube.com/watch?v=-HQO0774lx4&feature=PlayList&p=4199C9262539936D&index=0&pla
ynext=1

A truce means nothing to Hamas?, who states
much of no complaints as in support of Israeli
Nazi lies, why? Have you seen where a blimp is
traveling about five miles an hour, fire bombing
thousands, and none have even a pullet gun, never

mind an Iranian rocket launcher to shoot the Satanic
demons down for God as Love? Why doesn't Hamas
at least admit, like an Israeli General has,
to be funded by Zionists for cash gains paid for
by Zionist Amerika? Why? Why is it that Hamas
suffered near no loses, but all the Cops who
voted who knows, died murder victims trying to
defend our family from Texan child rapists?
Along with thousands of others targeted as
innocent Peoples? Targeted. Why? Nazi Israeli
broke the truce!! THINKTHINKTHINK Demand coverage!
Hamas certainly isn't. ..maybe because they're
illiterates on the Cause of God's Will being
Just?

Monkey Business

http://houston.indymedia.org/uploads/2008/07/monkey_business.mp3

Bushwhoring Enemies of the American Police

What a demon enemy of life these bushwhore enemies
of American Liberty are eh? No concern whatsoever,
for all the teen soldiers conned to die for those
who committed 911 in NYC. The millions of bombing
victims, the tortures, the rapes of American women,
STILL, TO THIS DAY, left undefended by "the law".
Evil enemy of everyone these demon fuks are. How
difficult is it, to understand the facts they feign
complete blindness on? They WANT to con you as the
coward to life they are, willing to kill America to
make their antiChrist lawless enemy Mr. Bush happy.

From years after the fact still demanding Justice now:
http://groups.google.co.uk/group/alt.military.uk/browse_frm/thread/ca0e34fb32caeb0a?hl=en&
scoring=d&

Huh? "at last been disarmed..." ? How does he figure?
The equation hasn't changed. Example: The same
unaccounted anthrax, (that was disintegrated into ash),

still is not able to be measured as completely accounted for, (never could be), but this bushwhoring war crime apologist, tells US, it was only though the lawless murder of our good friends and family for countless generations, that he now attests without reason, or evidence, to find Iraq in "fact" disarmed of it's still nowhere to be found, weapons of mass destruction. (An irrational reason he pronounced previous in corporately broacasted public support of instigating heinous war crimes against our humanity under the leadership skills of the evil lying demon antiChrist, our Mr. bush Jr..)

Ron Paul defeats 5 TV 'experts' in 10 minutes
http://www.youtube.com/watch?v=0k92fTDReHg&e

Ron Paul is a traitor. They stole the cash Ron. And, the Iraq war is a war crime. But Ron, the Fascist, doesn't want THESE FACTS uttered. Why? Because wiser men would prevail, wiser men like me who understand buying in bulk is cheaper. Those like Christ who understand, who KNOW, the banker doesn't cover our loans - so why give them as much as a taxed red penny?, let alone trillions as officially unaccounted for? They are stealing the cash Ron. Ask yourself: Why has Alex Jones forbidden his bushwhore cult from understanding Bush doctored the NIE?, or of iron flowing like water from the towers? Because wiser men would prevail and he can't have that. He called shooting innocent men in the back, an act of liberty. I, an actual god, unlike Alex, lie near never, but maybe to myself when I'm lonely. Alex yes will tell you rapists are free to do what they will in Texas to American children, un-arrested, but he won't mention it when the police chief is with him on air, talking about how he'd like to be exempt from traffic tickets for being so popular. NO MENTION of the rapists walking away without arrests made, no mention of Bush's documented treasons on 911. Where are Alex's priorities? In selling YOU out so he can be wealthy like a bankster?, and have special rights over everyone else that drives drunk, or speeds? a big hero standing over our dead soldiers yelling, I told you so, I told you so, I was right, I was right. Again, understand: It is not by my will to deny open debate with America, it is Alex, and his demon buddy George Noory that denies out Humanity this right. And when people try, like Peggy, or Black men on Jewry, Alex lies cheats and steals our wills for further thefts. Ron Paul's family has

millions taken from loyal Alex Jones fans. MILLIONS! Does Ron do commercials with that money highlighting the bushmob's plan to invade Afghanistan, dated two days prior to 911 for Enron? Of course not, wiser men would prevail to expose him as the charlatan charity raider he is regarding Health Care, Social Security, Public Schooling, earmarks.. It is unfair to measure Ron against corporate nazi zionist whores of MSNBC who willing, openly, kill American teen soldiers for criminal neocon gains, as an honorable gentleman's talk. Half honest People like Ron are extremely ignorant on the workings of our world. EXTREMELY. I joke here not. Evil is the deceived disguised - translated - evil people are always dumb.

Corporate America says no, Charlie Manson was a genius, but not, that most Americans are prone too easily to suggestive states where they can be made to believe anything blindly. Think: what does, "bin Laden did 911" mean anyway? You should know of what I'm trying to teach you here. That is how
Alex knowingly or otherwise, steals our rights, by beating off he knows everything already. And some, if not most, actually believe him without knowing squat either. It's sooo easy that way - no study required!! LIBERTARIAN HELL! Everything is not on the Internet, where it near should be, but regardless, a Libertarian can't be bothered to read anyway. "Free Talk Live" is the best example for this: the two hosts are unbelievably ignorant on just about every single subject under the sun, but beat CONSTANTLY, on how greatly wise they are as drop-outs. You wouldn't believe any of them when they speak on Freedom, if you simply understood, an innocent man does not deserve to be in OUR prisons, or tortured. Under any circumstances that Obama has excepted for our excuses. Magna Charta. But in Alex's 'genius' mind, he doesn't need to actually understand he is a for sure bigot, (measures another unfairly in a group HE concocts from blind hate or personal fear - typical CONSERVATIVE and/or racist) who has no problems with that at home, or at work. Provable in seconds by OPEN DEBATE, but Alex ain't gonna take our calls because, he can't for the lives of every People person thought of here, admit he could have something to learn, therefore, the NWO is unstoppable in his brain washed cult of indifference to Justice practiced for the benefit of all treated fairly. Why? He's not wise enough to respect the great minds of the audience, and I personally believe,

he doesn't even have the good judgment to own
a gun. (I mean, why wouldn't Alex find my stories
of OUR Justice system triumphing by my single hand at least
minimally beneficial to his blind cult followings? to not
hang up on me immediately while spewing lie after lie
on how I'm top secretly a dis-info NWO artist working
for Bush? or whose voice sounds too friendly to trust?
like he has done the last four times I've phoned -
Hey! I can be an asshole if you want - no prob.)
Perhaps it's near because, Alex Jones is blind, and
as such, could actually be found guilty in Texas for
murdering those two innocent black men shot
in the back with his approval to release the murderer
from a RIGHTFUL death sentence prosecution. "law of
Parties". He is a party to the crime, for he worked to
support the release of the FOR SURE, FIRST DEGREE MURDERER.
Sound like an America you could live with? I didn't
think so either. I wanna be Alex's Attorney. Texas is
a State of massive lawless corruption, as dire
incompetence in legal affairs where they OFFICIALLY
plan executions against innocent People not established
to have harboured criminal intent! With Jury Trials!!!!
!!!!!!!!!!!!FINING THEMSELVES GUILTY!!!!!!!!!!!!
While Alex does express murderous criminal intent,
and the Police chief calls him a good man for no
scary pressures. What the fuck is wrong in Texas
where they mess themselves like this regularly?
Imagine, while Bush with the Neocons escape, and
Zionist Israeli target to murder Christian School
girls OFFICIALLY, Alex doesn't want to have to pay
traffic tickets like the rest of US. What a douche bag
to tell he LEADS our Truth movement I say. Now, I'm
not saying he shouldn't contribute with the truths
WE SHARE, far from it, it's just he can't have our
cut off switch to silence our objections to his exposed
foolishness, and/or blatant criminality. I'll give him
a chance, for starters, to criticize any position I take
while we all publically call on ourselves for
assistance internationally. Like on his "buddy",
George Noory, deserving to be tried Publicly for the
traitor he is, and be formally executed after his day
in Court. Our Courts. Teen soldiers have been conned
to die by George Noory for the escape of the neocon
terrorists who committed 911 with Condi, Runsfeld,
Bush, Myers, Tommy Franks, and General Ahmad. AND
HAPPY GEORGE NOORY KNOWS IT - and cons with lies
naked to the ear of any who can listen or hit record.
A NAKED traitor to the cause of Liberty if we ever knew
one regarding the War Crime facts of Iraq. .And
Ian Punnet is an evil godless enemy Bush whore who

lies too to get YOU killed as the innocent soldier
forsaken so don't forget.. It's YOUR life. It's God's
Gift. Now support our rise for popular international
debates to get these Neoconners behind bars
awaiting Public Trials! "Public"thatsoyu!! Get to
the Phone to call someone to care man.. Johnny
Jesus has arrived! Justice Will Be Done in this,
Our Kingdom to Come.

Justice to the war criminals of
indiscriminate warfare would better serve ourselves
to halt for our safety. The bushmob did 911.

1. The ISI's General, Mahmoud Ahmad funded 911's Atta

2. We have video of iron flowing like water from the towers

Humanity Under Attack by the Zionist Enemy of Life

GAZA APPEAL THE BBC & SKY REFUSED TO SHOW
http://www.youtube.com/watch?v=c9kwpxlZorI

Not only that but the BBC argued that to show
innocent Human Beings suffering, in CRITICAL
life threatening need of desperate food and
water that Israeli nazi stole, (because they are
unlawful murderous thieves), would have them look
like they were partial to serving Humanity's
interest in compassion for US humans. Over the
Israeli terror Nazi tactics of indiscriminate
slaughter for more Amerikan welfare. Wicked evil
nazi bastards who too, DO NOT THINK IT BEST to
report Peter Powers committed the London bombing.,
Oh yeah, and mercury is neural toxic, anti-psychotics
make us crazy, and sodium fluoride makes us
stoopider while weakening your body for big cash
surgeries - ultimately leading to a profitable
death for dah' winnahs.. So, they, the BBC-NWOers
just needed to avoid the bath or shower,
humidity, Pepsi's purified bottled water product
lines, koolaids, swimming pools, Jacuzzi, Hot Tub,
Sauna, private Whirl Pools, and.. blh blh blh

/ / the FBI says no.. There is not a thread of
fact a zionist offers to form YOUR own mind in
respect for your rights being equal to ours. \ \

Who is the guy who keeps writing such things,, and
shouldn't he be recognized as Promotional to raise
all spirits towards a better future? I'm with him.

The U.S. Is Required To Bring George W Bush & Donald Rumsfeld Before A
Court! U.N. War Crimes

http://www.youtube.com/watch?v=BRAlqkPbjP0

Olbermann | Bush Years: 8 in 8 Minutes
http://www.truthout.org/011809Z

Bush and Cheney are traitors to the cause of
American Liberty. To leave them free, is to leave
America un-guarded from further transgression.

The bushmob doctored
the NIE. Conned Congress, and Soldiers. Did 911,
by closing criminal FBI investigations immediately.
Alex and George don't seem to want US to know
these FACTS that demand arrests of the culprits
responsible for high treason against Johnny's
America. Alex wants your money, and EVIL George,
our enemy, wants your soul stolen for Satan.

Turley: Obama 'accessory' to war crimes if no prosecution
http://rawstory.com/news/2008/Turley_Obama_accessory_to_war_crimes_0127.html

Understand, Alex Jones doesn't want Justice
for Americans because he loses out to better
men that usher a greater life. He doesn't want
the evidence of George W. Bush made public to
defend American teen soldier's lives. The true
fascist Alex Jones, who in silence supports the
escape of Bush for treason, will fail our true
voice for Justice in our times. WE DO NOT rule
the truth we share equally committed to defend
ourselves from lawlessness. And you'll never
rule my right to speak freely over your intent
to sell us all out for monetary swindles, just
like Ron Paul did. Understand: Ron Paul doesn't
even acknowledge 911 was an inside job, or, that
Bush gave zero evidence to form Your opinion.

Alex Jones, the Slave, told US today that
he challenged Bush for eight years - Bushite
lying nazi traitor. Not only that, but he
also ridiculed those who wish to blame Bush
now for anything! Again, he doesn't want
Justice where bad guys can't steal from
ourselves unrepresented. Ron Paul is a
multi-millioniare, made rich by charitable
aid conned from Alex Jones' NWOers! Alex
Jones doesn't have a problem with that, we
do.

King Johnny Guest Caller on Free Mind Radio!

Israel to be Judged - Universal Petition
http://www.tlaxcala.es/reponse_signataires.asp?lg=en&ref_campagne=10&Page=1

The demon LIAR zionist Israeli is a godless enemy
of Humanity, much like everyone at Foxnews, CNN,
BBC, and the CBC. Our revolution against the godless
bushite shills, will not allow our revolution
through speaking honestly, (to become of ourselves
something greater), a chance to be televised for
our benefits. Bush closed criminal investigations
immediately after 911. According to the FBI and
Senator Dashle. CNN says you have no power, Foxnews
says you have no power, the BBC says you have no
power, the CBC, the same, like Alex Jones NWOers...
but well, don't believe it. YOU Do have the Power.

http://www.iran-daily.com/1387/3324/html/east.htm#s359247

/ / International attorneys have filed war crime
charges against 15 Israeli political and military
officials including Ehud Olmert, Tzipi Livni and
Ehud Barak. \ \

-

We must demand open communications to bring back
values WE ALL would agree to through polite debate.
"Conservatives" don't want this Freedom idea
expressed in general terms because, a "conservative"
is universally, minimally. a bigot. Why? Life isn't
like, their way, - then- all other opinion under
the sun on how things actually get done. (Aka
"socialist" traffic light repair men, or "liberals"
who want to treat The People fairly). Or who we are
as equals to our laws fairly practiced. Pay attention
to what I am saying here. Liberals can be Dicks with
a capital D too of course. But a Hannity couldn't
survive 2 minutes with me speaking on his very real
treasonous behavior in OUR public arenas. Behavior
done to escape the 911 culprits from the long arm of
the Law, with his conscious will of criminal deceit
exposed, we all learn to better defend ourselves.
And Shawn Hannity can't have that for ourselves, he
takes too much money from ourselves as talentless by
keeping US in the dark dying needlessly for traitors
never elected publicly.

Who am I you ask? Johnny Law. at your service. Look
me up with usenet to discover, we live in a world of
idiots everywhere pretending to be somebody by lying.
While I want US all to truly improve our condition by

actually understanding how bad off we are by failing
to respect ourselves for correction. Too many, know
it alls, with not enough to know you need evidence to
form a guilty verdict against an accused man or woman.
Not according to CNN, CBC, MSNBC, Foxnews and the like
however. Let's change this by supporting my challenge
for top billing at the Coast to Coast radio show hosting.
Look for me coming soon!!

-

Unseen Gaza High Quality: Part 1 of 6
http://www.youtube.com/watch?v=UeezoWRu1FU&eurl=http://whatreallyhappened.com/

Why is it that numerous visits don't change the
view count? What is this business of a=a+1, the
top secret, I'll go rhythm, that is way beyond
our comprehension in it's scientific complexity?
For Americans, okay, but the Human species just
isn't this dumb.

While Zionists OFFICIALLY target Christian school
girls for mass murder, CNN instead reports that
bushite grunts attacked girls in Afghanistan, posing
as Taliban. I WILL every celeb at CNN to be arrested,
tried and executed for the reporting they have done
today without facts. Remember: the Taliban played no
part on escaping those responsible for 911, and opened
schools for girls, and were brought together on the
single purpose to defend women. Death to CNN reporters
to LIE for killing OUR school girls. I HATE zionist
enemies of Humanity and God I am.

The Torture Ban that Doesn't Ban Torture
http://atheonews.blogspot.com/2009/01/torture-ban-that-doesnt-ban-torture.html

/ / Obama's Executive Order bans some -- not all -- US
officials from torturing but it does not ban any
of them, himself included, from sponsoring torture
overseas. \ \

Is America a nation of Law to Live freedom?
Because this SPECIFIC deviant action of Obama warrants
the death sentence under Reagan's "War Crimes Act".
SPECIFICALLY. Or, is it you falsely believe Obama
can do no wrong against innocent people here, where
an illiterate nazi grunt, maybe from South Africa,
will kidnap YOUR children, and torture them to
death for sadistic pleasure, with as they did using
power tools caught in Iraq, according to Iraqi
government official(s), and several soldiers from
Oregon, all because Obama has given an ILLEGAL!

"excuse" to NOT support following the crime scene
leads at our REAL murder scenes? Again, death to the
bushite dumfuk enemy of God, death to the enemies
of a freeing Humanity striving for a just society.
Obama needs to be arrested for this under the Law
as it stands I'm sorry to say my friends. Why?
Torture is illegal in all 50 states, (as Reagan
directly planned), no matter where you ship the
innocent victim to, or from! Read the War Crimes
Act, then demand Justice today, otherwise, it's
YOUR funeral. Obama wants to secretly torture
Peoples here, while lying to US ALL that he doesn't!
A TRAITOR! Who also wants to give bankers 100s of
billions of dollars more to disappear, that WE pay
for, out our door, never to be seen as our own
again.

-

http://www.gcnlive.com/pubpod/what_really/pcast.php

Don't miss this..

-

Jack Blood interviews Richard Andrew Grove, an AIG insider and
whistleblower
http://video.google.com/videoplay?docid=6546044203900048624

Alive We Say

And Alex Jones gives us the same guy twice
a week that blames the Illuminati, while
encouraging that YOU TOO! can get money
for nothing like the banksters. Just give
the Alex Jones', NWOers, the "truthers" money
money money money. No time for affording the
explanation that the TREASONOUS bushmob
doctored the NIE. That Saddam wasn't in
violation of 1441. That a NEOCON is
identifiable for it's demonic LIES
against God and Man. Never to tell, the
private bankers don't cover OUR loans,
that Bush PERSONALLY worked to close
Police investigations immediately after
911 (obstruction), or that WE have video
of iron flowing like water that PROVES,
without doubt, bin Laden couldn't have
single handedly placed the explosives
in the buildings, or stole the black boxes.
Because someone surely would have spotted
him dragging his dialysis machine what with

all the professionalism of corporate news
media coverage regarding our horribly
suffering worlds. Alex Jones ignores the
treasons of Bush, as a Bushwhore, and
instead, tells US of how Obama is Bush on
steroids. He only wishes. What about
Justice for Americans Alex? Why for do you
forsake ourselves? For money? What about
the lives lost to mass murder, that you
allege to champion OUR TRUTH without saying
much of anything on real Freedom?, on real
Justice like your deviant election rigger,
Ron Paul? Well, no wonder, Alex told US he's
into shooting innocent American People in
the back as a tyrant of evil, a white Devil
if you will. Kids too if you dare look in
his back yard for a copper. See? Now if Alex
doesn't allow US to speak, more and more will
understand to know why. I am a defender of
all that is right and just in this world,
because I don't need to lie like Alex does on
a huge host of issues. I'm more like Jessie
Ventura, in where I don't need/want to lie.
If I end looking foolish, (of which I like
never truly am), it's a benefit, because that
way, I've learned something. Alex knows
everything already, and 'is always right'.
Like I say Retarded. You weren't right by not
understanding that the banker doesn't cover
the loan. One example of easily hundreds. He's
a typical, he knows it all, know nothing dumduk
American. Hear him on health care speak as
Ron Paul does, and know, I defeat them in under
ten seconds. TEN SECONDS. This is why he hasn't
in years, allowed me to speak more than five
or six words. He's rather all America die, than
admit he does NOT rule our 'Ocean of Truth'.
I want the challenge of opposition through debate
to PROVE my skills beyond reproach. Alex,
every time, just hangs up on anyone who tries
to improve our communications by factually
speaking. Why? Because he IS TRULY deeply
ignorant on what freedom or Justice means. Why
we have law. What a consensus is. Allan Watt is
severely disabled in this regard, another Alex
Jones favorite. And this is why, Allan can't
take calls openly either. He has jerked off
with himself too long to quit now learning
super basic precepts, for like Alex, he "knows"
the inner workings of the 'genius' NWO elites.

Not Law 101, not Bush, not Rumsfeld, Not Condi, not Torturers, not bank robbers, rapists, or even petty thieves. Allan Watt isn't a bad guy, he's just a chauvinist pretending he actually knows something, when his real disability is directly related to his absence in understanding understandings. Doubt is a near foreign concept. A challenge for Allan: can you get your 'genius mind' around the fact that Peter Powers did the London bombings, and not the Illuminati of 1463? and if not, why are we so dumb to our present plight that way? Don't get me wrong, Allen has much to offer, it just isn't the issue right now on saving our dying futures. Maybe I was too hard on Allen, he is really actually kinda cool. Alex Jones too has many incredible moments of ecstatic clarity increasing in all they joy of seeking enlightenment. .. Ok - but this is serious business that requires little dilly dally with what we'll have as a side dish in Paradise Lost. We are talking Human Lives have been destroyed by our inaction to remedy these failures to communicate effectively. and.. Jeeze, the weight of my responsibilities, as just plain John, being a/the Legos Man - for like the Family and everythings, get's me never forgetting, all we got are these words left dormant from the power they truly possess in the minds of the wise asses. And.. here I am. I'm a Talker of Words looking to make a break in the NewZbiZ. Zzzz... Alive We Say! Alive!

King Johnny, from Earth, has come for talks.

-

The Zionist enemy, the most evil nazi sons-of-bitches who openly advocate tyranny and oppression through mass murder of ourselves as the innocent left targeted defenseless. Enemies of Jews everywhere, the Zionist cares not for facts on who's Life it destroys for stolen gain by lying. That's why they target Jews, for fear the Light of Truth would expose them as the Nazis they are.

Hamas doesn't have a military though, so, why not demand the arrests of those who broke the truce, and murdered innocent people indiscriminately, on plans more Jews would die for cash profit? Profit paid for by zionist amerika? - the false imprisoning

torture and rape center for Neocon
Freedom.

The self-defence defence
http://www.guardian.co.uk/commentisfree/2009/jan/23/israelandthepalestinians-gaza

/ / This has been a central theme of the war in
Gaza: not that hundreds of innocent people were
killed, not that over 5,000 were horribly injured
and not the sky-high human and monetary cost of
wrecking homes or razing infrastructure. \ \

Court petitioned to arrest Livni upon arrival in Brussels
http://nawaat.org/portail/2009/01/23/belgian-court-petitioned-to-arrest-livni-upon-arrival
-in-brussels/

"We believe there were dozens of IRGC
personnel in the Gaza Strip during the
war," an Israeli source said. "Some were
killed; others went into hiding, and
others escaped."

See? the demon enemy of God speaks no
evidence as a TRAITOR to every Jew. A terrorist
nation that still steals humanitarian aid in
our public realm of left defenselessness. The
false allegation deserves a death sentence
by Jews against the war monger Zionist enemy.
A cause that Iran should champion, if in fact!,
this allegation by OFFICIAL WAR CRIMINALS WHO
TARGET FOR MURDER OUR SCHOOL GIRLS, is on it's
face, unsubstantiated as patently, demonically
false. As typical from any godless Zionist.

Where are the Americans asking for the
formal arrest of Bush for high treason?
Whoring for Alex Jones's contempt for REAL
Justice? The ignorance of all American
talk radio hosts speaks for itself. NO
knowledge on why acts of high treason, are
crimes against every American. The bushmob
doctored the NIE, and Alex doesn't want
Americans to know, because if they did,
they ask, why does Alex do everything he
can to escape those personally responsible
for 911, while then asking for money to
continue his fight against freedom in
America. Again how much money do we have to
pay Ron Paul or Alex Jones before they
will allow the knowledge of the Iraq war
against Human will is criminal? How much?

Obama! feel free to call
on me to help out with a plan for judicial
actions. That offer goes out to everyone in
Palestine, Canada or Britain too. Russia,
let's help out these fools by freely
communicating, what say you? Justice
for all is freedom to be. The Israeli cop
killers must be brought to justice for war
crimes. Those cops, were cops. And I,
am a man.

Alex Jones Rocks!

Now Alex has problems in "my" mind because I am
an ACTUAL genius, and he is generally, an idiot.
Today, he did one of his usual commentaries, however
this time, he was pretty honest with himself, and
his love for Ron Paul. Ron Paul sells incompetence,
and Alex corrected correctly!. that a.. sorry Ron
but these banksters know they're robbing us as
undefended blind men essentially. That's what I'm
talking about!! Look, Ron Paul can be a dumb Ass,
although, he's still not all that bad a guy. A Dumb
guy on things like economics sure, Justice, warfare,
Health Care, Social Security, ect. ect. but still.,
like a child learning of why the sky is funny
blue, isn't all that bad a guy really. He's
certainly not a war criminal, like Bush or
Rumsfeld are. Doing 911 then sanctioning torture.
While Neocons Champion sending illiterate American
teens for death as war criminal. Think about it.
Maybe he is..

-

ï¿½We have all these documents that are now
publicly available that prove that these
methods of interrogation were intentionally
ordered by Rumsfeld,ï¿½

Let us understand. These actions "give" a guy
like Willie Brand "the right" to RANDOMLY kidnap
men, women, or children, and torture them to
death for sadistic pleasure with his faggot
Capt, Christopher Beiring. (I think that's
how it's spelt). But anyway, this is the truth.
A bushite is a godless Zionist whore of Nazi
evil, an enemy of America, who wars YOUR Freedom
with criminal "excuses", for refusing to support
the arrest of those responsible for 911. A
TRAITOR, and could be wannabe rapist, robber, or
911 mastermind ringleader. Torture is illegal,
and warrants the death sentence, according to,

Reagan's "War Crimes Act". Some only suggest,
that this was why someone tried to kill him as
honorable. Death to the torturers of our
innocent families, torture they do without
apology as Zionist Military "Judges". Instead
today, where they get salaries paid in the
billions by the zionist giving nation of,
a-mirror-kay, echem, America. Johnny's America.
A nation where Justice will rule for the favors
of all treated equitably with or without you.
Honor me in company my friend. We have no rivals.

"they do not understand, the private banker
never covers the loan. Never does a private
banker reach into it's pocket to borrow US
to begin with - so as a consequence, the
bankers have just pocketed all the 'free'
loot for nothing, TRILLIONS, and are not
saying why should they help anyone else
up with charity?" Then went on to say, it
wasn't any of our business with what they
did with the money. (But for to cover criminal
fraud in the derivatives market, where
the true value of said commodities were
backed by ZERO capital. ZERO DOLLARS. WORTH
NOTHING. So, think about who's truly giving
it always here until Johnny, the man who
came out of nowhere, arrived to explain
everything in five or six minutes.

Support Johnny America for Coast to Coast
Radio Host!

-

Gaza: 'I watched an Israeli soldier shoot dead my two little girls'
http://www.independent.co.uk/news/world/middle-east/gaza-i-watched-an-israeli-soldier-shoo
t-dead-my-two-little-girls-1452294.html

Getting away with murder as 'God's Chosen' chosen
for death by war crimes trial more like. Death to
the criminal zionist enemies of Humanity. Zionists who
falsely accuse without evidence to respect our rights,
like TV corporated Americans who treasonously LIE,
'bin Laden did 911'. Enemies of Freedom for our
Humanity.

[JEWISH!] Arrest warrant: Ehud Barak
http://www.wanted.org.il/ehud_barak_en.htm

/ / For violations of the Rome Statute
& 4th Geneva Convention \ \

They are murdering Cops

2-Bombings target house of Abu Ubaida El Jarah,
Police Director in Sheikh Ridwan area.

3-Airstrike targeting Al Zaytoun police station.

Nazi Israeli are murdering Police Officers,
and the families that live in the areas near
them as once defended from criminals.

It's like saying, every Cop in America deserves
a death sentence by thousand pound radio-active
waste based uranium/plutonium war shells because
Bush stole the election, then committed 911 with
the Neoconned Partners of Public Crimes, Cheney,
Rumsfeld, Condi with General Ahmad and Myers. Now,
I ask all Cops, does that make sense to you as
still remaining silent? You can be a man too, why
don't we all just give it a try. To the Telephone
Robin! Israeli are attacking prisoners held
criminally in their own Death Camps!! GET ALEX
JONES ON THIS! and.... the ADL! er.. JDL.. er..
let US join forces for the common good of all,
as so we will benefit everyone. That means
Justice for all, especially the Taliban for
defending American Freedom by demanding evidence
to form a conclusion of capital accusation,
regarding an unsolved case of mass murder.
Taliban blamed it on concern for life draining,
!AMERICAN ENTERTAINMENT TV! sports, weather,
Music, and news about some, who knows war we are
committed to now die you for, for better or worse,
of mass death and suffering against innocent
Peoples all for glorious Neocon tyranny of inter
national private banker IMF enslavement plans!
in some far off distant places. America! I am
King Johnny.. I am from the Planet Earth, I've
come to share the knowledge of Justice in our
times on behalf of this, Our Future Great
Triumph over Evil. We come in Peace with
a sword for War Mongers, and a choice for
'lawless' grunts of ungodly action against
Life as we live it. Targeting school kids
deserves death sentences, don't you think this
value is what every soldier should hold proud
with Johnny in America? In Israel? In
Everywhere?

Chief Israeli Nazi Rabbi "All civilians living in
Gaza are collectively guilty for Kassam attacks"

ï¿½In spite of rising the blue flag of UNRWA on
our schools, the Israeli army has been targeting
those schools by missiles and tanks shells.ï¿½

U.N. special rapporteur on torture calls on U.S. to prosecute Bush and
Rumsfeld.

[SATANIC ENEMY] Israeli warplanes attack Gaza during Truse
http://www.presstv.ir/detail.aspx?id=83073&sectionid=351020202

Satanic Enemies of Humanity Kill 8 Yr Old Girl During Fake 'Ceasefire'
http://uruknet.info/?p=m50983&hd=&size=1&l=e

A MEMORANDUM OF UNDERSTANDING TO KILL MORE
http://desertpeace.wordpress.com/2009/01/20/a-memorandum-of-understanding-to-kill-more-pal
estinians/

/ / Dr. Condi was very smart when she declared
at the outset of the most brutal Israeli war on
Gaza that it was the Palestinian side which
is held responsible for violating the six
-month truce. \ \

She lies, Innocent Christians die.

Nazi argues it's good to get killed Jews by
breaking truces with prison camp.

They shoot Peoples indiscriminately telling US
that's how evil they are to argue it's Your
fault though.

This post was passed to near everyone in our Secret
Service defending Obama. Let US demand Justice for
the Victims of 911, by warranting for the arrest of
every Neocon Nazi Zionist pirate of OUR Jewish faith
for Public trial on LYING for War Crimes against
our dying Humanity. War Crimes against God.

A ZIONIST LIAR'S TRUCE

/ / live images of an Israeli helicopter hovering
above the city and dropping its white phosphorous
bombs on the city \ \

Again, the Zionist deserves to die by public trial
today to defend the Jewish faith. Look at usenet.
These demonic enemies go, 'yeah, Hamas broke the
truce', they do it to kill you. To steal the lives
of innocent Peoples to profit off our deaths as
victim.

Zionists are Satanic Demon Liars of Satan

FIGHTBACK

/ / Israeli forces demolished the house of the
Sammouni family in Gaza City after ordering
them to remain in it for safety. \ \

Palestinian Children found with bullets lodged in their head
http://jnoubiyeh.blogspot.com/2009/01/palestinian-children-found-with-bullets.html

/ / Israeli officials continued to deny on Saturday
that their soldiers had deliberately targeted
civilians, \ \

The Zionist is an
enemy to the God of Love and Justice, of Beauty, and
Children. A zionist LIES with a hatred unmatched in
Satanic hatred for the survival of our species. I
beg you, hunt to bill the zionist war criminal who
charges we will not succeed to see every last war
criminal on this planet hunted down to complete
extinction, by public trial, then Jewish firing
squads. The Zionist has bombed US, The People
indiscriminately with out cause. It was Nazi
Israeli that broke the truce to get killed
Jews for money. They starve Jews in Israel
to attract more charitable aid they can use
elsewhere. They, as Nazis, will continue to
murder Jews for money unless WE DEMAND, their
formal trials and public executions. They have
murdered our families, and they will pay will
their lives for it as the directly responsible,
and in no way, will escape our rages against
them as the enemies of every Human Being
Living for Freedom. Every Human that loves
children. They HAVE ADMITTED to targeting the school
girls for murder with lies they were caught
doing. THEY DON'T GIVE YOU EVIDENCE. And when we
get the facts, it's near always exactly the same
thing: they steal our Homes, they STEAL our
lives. God calls the Zionist Jew Enemy of
the Synagogue to Satan!!

"We also need a massive overhaul in Our news channel
prioritizing, including to add censorship free, open line
public communications. Done to gain value in learning from
the art of conversations. We need still to appreciate the
values of a free society where Justice is above all, the
measure of our success to communicate openly."

The Ungodly Murder of Innocent Men by Israeli Nazis
http://atheonews.blogspot.com/2009/01/summary-execution-in-southern-west-bank.html

/ / At noon an Israeli military jeep with four
soldiers entered Tameiziï¿½s land. After 15
minutes the man was thrown, blindfolded and

still handcuffed, into the back of the jeep. \ \

Let us not lose the focus of fact, that these
people of ourselves live in a concentration,
prison death camp, robbed of everything.
in Curfew near anywhere in "peace time". And
still, to this day, do Nazi Israeli CONTINUE
TO THIEVE the Homes of god loving folks in the
region, guilty of no crime but to have been
born into such brutal ungodly oppression
against Civilization. And to see, face no TV
opposition as American tax payers continuing
to fund such war crimes in our absent names,
is a crime on to ourselves if allowed to go
unchallenged. Johnny for Coast to Coast radio
host. Free the Slaves! Free the Slaves!

Binding U.S. law requires prosecutions for those who authorize torture

The ugly secret of Barak and Livni, the truth about the Gaza rockets
http://www.youtube.com/watch?v=8rqDzXeA-PQ&feature=channel_page

[HEY WHAT THE.. THE LINK IS GONE ABOUT GODLESS
ZIONISTS MURDERING JEWS IN ISRAEL FOR MONEY!]

See my Jewish friends, these zionist liars
will never escape our love for Truth in this
our new age. Killing Jews for money is as
evil as found, negligently criminal, agreed?
Agreed.

Gaza: lives in ruins
http://www.youtube.com/watch?v=OFWxEtWcT8w

'Ungodly Enemies of Life is the only way
to describe it from here Tom. They again,
are attacking People indiscriminately for
murder as sadistic Satanic enemies of God'

Someone should ask what King Johnny, The
King of the Jews has to say on this subject
of a Zionist's complete absence of morality,
as inhumanly bereft any common decency among
our brothers and sisters. I mean for Christ's
sake Tom, THEY ADMIT to sadistically
targeting our children for MURDER - as some
kinda Satanic demon whore to Pure Evil - aka.
Wanted War Criminals for Public Trial. Just
as the Nazis were for similar outrages. Let's
hope men of America are least half they were

then, but we are suspecting, they will as of
usual, balk as cowardly slaves to the private
banker man ruling their minds, it's a, no
wonder. Where is there that purpose striving
for a greater future living in a just society?
Where is the Christ in their Christianity?
to financially support the arming of such
unlawful Zionist killings in silence against
Innocent Christians?

Free Radio International Broadcasts Alive!

Johnny Justice for Coast to Coast radio host.

BBC argues with Israeli Spokesman over UN School Bombing
http://www.youtube.com/watch?v=VPGP1xWEkkk

Where is the evidence to form any person's
verdict, if none is offered as in respect
for yourself as worthy the title of free
men? I ask as your self? Or are you as
the cowards of most in the American military
who refuse to speak for the arrest of those
who did US wrong on 911.?

King vs Obama on Gaza - Christian vs Zionist

-

For the Popular Will?

Alex Thomson shuts-up Israeli spokesman!
http://uk.youtube.com/watch?v=zIQZ1-RFq6A

Wow. The demon LIAR will also say Hammas broke
the truce, and Israeli started this by stealing
innocent peoples homes, then imprisoning
ourselves, the victims, in a death camp for
indiscriminate slaughter. While they continue
to STEAL OUR CHARITY by breaking truces. What
is it that YOU can't picture?

"The view from the other side, that the Qassams
are a retaliation for the siege that starves the
one and a half million inhabitants of the Gaza
Strip, [a prison death camp,] was not mentioned
at all."

Masada legend galvanises Israel
http://news.bbc.co.uk/2/hi/middle_east/7830416.stm

/ / they committed collective suicide - men killing
their own families, afterwards each other, until

one [evil zionist liar] remained to kill himself. \ \

ISRAELI IS A THIEF WHO CAN'T SPEAK OPENLY IN DEFENSE OF OURSELVES IN OTHER WORDS? That is right. They, as documented criminal, lose every debate personally since before the dawn of Civilization because their position is clearly unsound. They are criminals who murder People in hate for a freed Humanity. They OFFICIALLY steal Peoples homes in that country didn't you know they proudly proclaim it so? And steal humanitarian aid from starving children. Targeted to murder children specifically as publicly confessed, 'it is Hamas WE blame', not them as demonic child murderers. Hideously evil as ungodly sadistic savages. Enemies of YOU, enemies of them, and enemies of me, the King of Jews Christ fellow from beyond the grave. They are so evil to God and Man, they tarnish everyone of US to not win justice sooner by blaming the actual bad guys. Justice is Freedom.

/ / Those white phosphorus shells used on the Gazans are made in the USA according to Jane's Defense. \ \

Again, these peoples are not Jews. Being Jewish is a religion. These thieves of God are Satanic in their LIES to betray the common trust in our words, that bind all worlds to victory, called freedom universal. Even tales of the Devil have him keep his word, with verses specifically condemning the self to damnation for targeting the innocent for death. God's the Word. Every word inside a fool's paradise. Including the periods. Not as like, I'm playing a word game, but that it in wonder, is all strangely here. Example: The Universe as it has existed always, is not separate from our 'pauses', or faulty drawn conclusions. The universe, in one sense, was as good as anytime, created 6000 years ago. AS TOO 50 billion. You say, impossible, I say no, study quantum physics, and know, I live this.. our existence is not scientifically separate from the timeless nature of consciousness, proven as not only theoretical, but actual. That is a first step at developing a REAL relationship with the living Universe if you want to as like an artist does - that

TOO! can be just as thought static in it's
orderly constructions for Atheists. (An
Atheist is still mostly a fool here however.)
Overall, for any, it's sorta simple: Life has
left YOU in charge of YOUR fate. Now, do well
to make something of this being as eternal Life
reaching for balance, as your body does, and
good cops do when bringing the bushmobsters to
Justice. By Israeli calling for more murder
against the innocent of your mind as racists
and bigots they are openly, is still shadows
of YOUR mind, YOUR WORLD.. get it, got it? God
is in genius to set Life as this, as like,
nowhere existing, but for as yourself within.
Will you speak out for the Justice denied
Humanity?, or not you? Atheists can be Just
too!, but generally lose it on not
understanding the intelligence of order is
way beyond what they dream up with
assumptions. All anyone has to do is ask
themselves, who do you mean "God"? Atheists
are ridiculous!, but, to each his or her
own, we are on a path here, believe what
you want to believe. This is not a faith
initiative I'm bringing by keeping this real,
I DEMAND JUSTICE BY OUR WILL BE DONE.

A zionist cabal of criminal pirates who murder
Jews around the world for stolen money is
seriously evil as criminal. What do you think?
Let US have a open line discussion on this
indivisible matter of rights to all as equals
before who ever we proclaim, I AM.

I mean you right? Say it with me... "I" "AM"
we are good to go.

-

George Galloway "The West has DOUBLE STANDARDS when it comes to
Israel"
http://www.youtube.com/watch?v=IIpvrOJQ0J0&eurl=http://whatreallyhappened.com/

ï¿½Main actions: Israel targets hospitals, United
Nations premises, Press offices, theaters and densely
populated buildings in west of Gaza. Additionally,
people are being used as human shieldsï¿½

A Zionist Nazi Being

See? A zionist Nazi argues it's good to get killed
Jews by breaking truces with a prison death camp,

cause look at all the free American Welfare money
we can steal through kicking-back AIPAC members in
Congress.

-

Harper complicit in Israeli war crimes
http://onlinejournal.com/artman/publish/article_4246.shtml

Canadians! Please war with words for open line
calls on the war crime enemy propagandist,
The Chorus Radio Network. CJOB STEALS millions
from Manitoba each year, and refuses all calls
for honesty in governing. They are actual
CRIMINALS.

Canadians Stand Alone
http://www.thestar.com/article/569872

Harper the proven war criminal
who will be going to prison, is the only person
on Earth that has publicly okayed Israeli Nazi
to target murder Christian school girls. Canada,
join me in demanding Harper's Public trial as a
war criminal. Prison for Harper who took a
honorable soldier who stated he refused to commit
war crimes against innocent civilians, and placed
him without trial in prison. Without warrant for
arrest. Harper, the Nazi Appeaser, is a War
Criminal standing against the Queen.

"Or is this another, popular amerikan past time,
of, who cares for the facts, we are at war with
God and Christ now?" Die bushite die Christ always
says against lawless torturers as mass murdering
thieves of Humanity.

shreveport man gets 15 years for stealing $100.00
http://wesawthat.blogspot.com/2009/01/shreveport-man-gets-15-years-for.html

Again, Americans need to demand the arrest
of the Judge and prosecutor for being openly
evil demons, as TRUE enemies to freedom in
America. But guess what? Americans will refuse
to even phone Alex Jones, or George Noory
to be hung up on. Just refuse as brain dead
zombies - as known in this circle, McCainiacs.
Did you hear Alex's NWOer yesterday state he
doesn't want anyone to speak as Justice for
Americans because to learn even the most basic
of precepts for Justice, he can't pretend he is
a Freedom Fighter begging US for more money?
Like multi-millionaire Ron Paul, who gave the

fixed election up to take our money and walk
away. How much money in the millions do we have
to pay them at GCN, before they will acknowledge
the Iraq war is a war crime? THEY NEVER WILL,
because the faggot owner has a son who's into
raping American women as lawless enemy of Life.
Americans are indeed, selfish, like all the plane
crash survivors telling US how they couldn't care
less that Israeli nazis are openly targeting our
Christian children for murder with their tax
money, as unimportant, to how long they stood on
a plane wing, now approaching it's third day, of
wall to wall coverage. Telling us again of how
Christ saved your life as a lifeless degenerate.
I, as Christ, am really starting to hate all
Americans in total now. How difficult is it to
pick up their phones? They don't, and I'm beginning
to believe it's because, like GCN, they really
don't care for the future of our Humanity being
left for dead as continuing victims to EVIL liars.

Nazi Israel Broke Ceasefire as Satanic:
The Bush Administration and The New York Times v. Amnesty
International
http://uruknet.info/?p=m50870&hd=&size=1&l=e

UN sites shelled with WPh after GPS coordinates given

Livini was reported to say today that, 'every
innocent person targeted by Israeli, as such
driving in ANY car, or on ANY bike, or walking
down the street as then directly murdered, Hamas
will be blamed for. Heil Hitler' Well, I made
that last part up, but do you have the ears to hear
the screams for mercy given by Humanity?, while
this, the evilest of JEW KILLERS in the known
universe, (targeted, and murdered countless Jews
in Lebanon as one example), believes no man or
woman living can speak directly against her wanting
to MURDER even more as ungodly... 'Until the tin
can rockets stop falling on Jews' standing in their
detention centers, or living at the garbage dump
BUT.... THEY BROKE THE TRUCE! THEY BROKE THE TRUCE.
They will rob and kill US all my INNOCENT friends
as LIAR Satanic if you, YES YOU continue to refuse
to support my/our demands for OPEN COMMUNICATIONS
for Justice ourselves. Johnny Dazzler for Coast
to Coast Radio Host!

'Secretary General outraged at shelling of UN building in Gaza'

"I conveyed my strong protest"

Not good enough. Public War crime charges warranting
Death by Jewish firing squad, is what is demanded of
our Humanity. Death to the zionists liar war criminal
enemies of Humanity, instead of US, who they target
for mass murder.

Google have attacked US again as Evil doers..
They have again destroyed my writing with war
criminal intent to deny these truths as men they
could never face me, because they are not. They
STEAL our voices.

They are jewish criminals, not criminals because they are Jewish.

HERE IS WHAT GOOGLE IS:

"End the illegal Human occupation of Jewish land in Gaza!"
http://stoptheism.com/

HUMAN

These war criminals need to be arrested for Murdering
LIES against the lives of every innocent Christian
and Jew. Godless zionist nazi bastards are as evil
as they are dumb. Get every man who defends freedom
truly to hunt down these satanic demon ENEMIES for
thee True Jewish Cause, to ask it why it lies as an
enemy to HUMANITY, to murder innocent others as
evil doing thief to Freedom. A thief of Jews
everywhere to know truly God as Love and Justice.
Not only will Americans celebrate these neocon criminal's
freedom to call for the murder of innocent Christians,
as he does without arrest, "Americans" too, will as
Satanic refuse to hunt the ungodly enemy of the Jewish
faith down as Nazi hunters. No, Americans, cowardly, are
committed to dying with the Nazi Elite, as such
to escape of the Neocon terrorists who participated
in the mass murder of America for more stolen money
as war criminals.

THESE ARE SERIOUS WAR CRIMES

Israeli soldiers say they have OK to KILL Innocent People
http://www.mcclatchydc.com/251/story/59704.html

Israelis 'shot at fleeing Gazans'
http://news.bbc.co.uk/2/hi/middle_east/7828536.stm

They'll murder anyone human to steal our homes.

-

We battle injustice by demanding the public
arrest, and trial for execution of proven
war criminals. Now, who disagrees?

Israeli using Palestinian Kids as Human Shields
http://uk.youtube.com/watch?v=rXq57XK2L0A

Israeli Soldiers using Palestinians as Human Shields
http://uk.youtube.com/watch?v=FjEd4hJNVCE

Why do you as an American, refuse to contribute
to Just cause?

These monster enemies of Hillel are inhuman
to their prisoners, prisoners who had their
homes stolen and are denied freedom for being
born to Nazi tyranny. Demand Justice for
yourself as a Human.

Some Serious Evil Jarg in Dishonest Reporting
http://www.aish.com/jewlariousMultiMedia/jewlariousMultiMediaDefault/Israel_Unfair_and_Unb
alanced.asp

Forgetting about the truce given to those in
a concentration prison camp? Where they are denied
food and water? In curfew prior to near half the
days of the year, for years? How could they not
to claim such self righteousness? They don't bother
because they'd rather YOU were made innocent victim,
then them, Zionists who would screw you out of a house
called home. Did you know: they openly steal Peoples
homes in that criminal nazi state labeled godly?
Of whom openly thieve? Officially? Yes, and they try
to thieve the title of Jew from the Messiah too,
but I'm not going to a slave prison death camp
for innocent humans, I'm fighting back to demand
open communications to rule true Justice concerned.
Freedom is paramount. 911 perpetrators will be
brought to Justice by King of Jews Johnny Dazzler.

-

Israeli Murders Officer to make it look better

israel-fakes-rocket-fire-fatalities-in
http://stevenwarran.blogspot.com/2009/01/israel-fakes-rocket-fire-fatalities-in.html

/ / And we may assume that he was a non-Jewish
member of the IDF, given [...] \ \

Lawless evil doing for neocon lying criminals
really sucks man. Our friends are dying murder
victims. They are robbing our humanity of common
decency.

Neocon Enemies of the Jew do not Care for Truth

ElBaradei says Iranï¿½s nuclear program is legal: report
http://www.tehrantimes.com/index_View.asp?code=184534

But Neocon enemies of the Jew do not care for Truth.
They lie as enemies to God, on hopes to murder Jews
like they did in Lebanon with millions of land mines.
What kind of "Human" would commit such crimes against
Life? Cheating Liars for Satan Johnny tells YOU.

When Bush asked about his errors in judgement:

/ / you know, could I have done something
differently, like land Air Force One
either in New Orleans or Baton Rouge. \ \

Would have been better PR he means? Likely.
He walks away looking good, your family is
dead, or dying due to criminal neglect for
cash profit. Did I tell you that the private
bankers don't even cover our loans yet?
Trillions given by Americans, now Obama is
asking for more to disappear. THEY DON'T
even tell US what they've done with the
eight trillion already taken. Desperately,
Life Begs, THINK ABOUT THAT. King Johnny
for Coast to Coast radio host.

/ / So what is Ron Paul saying about Ron Paul?
I'd wager, he doesn't know himself, and fears
like FOXNEWS from open debate \ \

Excellent! if I do say so myself.

-

The Queen Shall side with The Great Nation

You can not hand over a prisoner for the crime
of refusing to commit a war crime. Otherwise,
YOU'D be a war criminal like now Harper is.
A Zionist appeaser. The government of Canada
already decided on this issue, and the vote was
137 Patriot to 110 neoconned bushite dumfuk.
The Iraq War is a war crime. These be demons
that steal our democratic voices, by denying
freedom from a man who's capital offense, is
that he tried to be fair for all parties. See?
War criminals.

The Queen Shall side with The Great Nation of
Canada Vs. S. Harper on this. Ask her.

God Bless the Queen.

-

/ / destroying Hamas terror infrastructure \ \

As Satanic, they TARGET TO MURDER Christian
School girls, and claim, none on Earth will demand
their public trials for executions as War Crimes
against God, because to the Satanist LIAR, (and
many "American" "Christians") God doesn't exist
within YOU to demand Justice for our Times.
YOU change that.

Evil on Parade

43,000 FoxNews Zionists in America, sign petition
in YOUR INNOCENT BLOOD calling for censorship of
Gaza conflict across all America

http://www.iraq-war.ru/article/186735

Stressing that Israel was "the first to stand
up against pure evil." [See? A zionist Nazi argues
it's good to get killed Jews by breaking truces
with a prison death camp, cause look at all the
free American Welfare money we can steal through
kicking-back AIPAC members in Congress.]

"I demand that the use of images and headlines
that misrepresent current events to the detriment
of the State of Israel be stopped immediately,"
the petition went on. [and the 'judge' judges
anything detrimental misrepresents the constant
LYING nature of the Nazi Zionist thieving pirates
of the Jewish Faith?]

This is detrimental to Zionist war criminals
because it exposes their TRUE EVIL NATURE..

Israeli Forced to Admit in League with Satan
http://uk.youtube.com/watch?v=zfFMZ7Y-s_c

Israeli forced to admitting, it lied as a demon
enemy of Life about tin can rockets falling
into the head of a good Jew, prior to the
Neocon LIAR's ungodly criminal attack for
senseless war against Humanity in the region.
When Jews die, these Zionists really take
everything like bandits., Peace where smarter
People speak freely for Justice? not so good.

The Other Side of the Story!

Simple Common Sense for Mankind

/ / Israel has admitted HAMAS kept the cease
fire; and that Israel broke it, then unleashed a
total starvation blockade on Gaza followed by
flaming death from the sky aimed at schools,
hospitals, ambulances, and children, and you
dare call the people opposed to such barbarity
a "mob?" \ \

Zionists are evil people who pretend they
are honest, when lying directly to everyone.
Blitzer reports Hammas broke the truce, he
is lying to continue the murder of innocent
peoples. Understand: Israeli Nazi state they
will continue to murder our innocent Humanity
until the rockets stop falling on Jews. Yet,
they broke the truce, and murder Jews routinely
with reckless abandon. Jews from the Bible as
of "nigger" Ethiopian, are what the Zionist
hate when warring GOD for apartheid, apartheid
that is Humanity in Gaza. A zionist is a war
criminal who speaks not against the neocon,
but against Innocent Humanity as YOUR enemy.

Livni: Gaza truce would give Hamas legitimacy

As they always do because they are dishonorable
murderous nazi thieves of God as Just cause is.
I am, and YOU are, you just maybe don't know it
yet, or if ever. A zionist serves Satan to escape
the neocon terrorists from their ungodly crimes
on 911.

http://desertpeace.wordpress.com/2009/01/12/gazatoon-of-the-day-blaming-the-victim/

Ron Paul:
US Will Be Rightly Blamed for Israeli Killings
http://www.youtube.com/watch?v=6C756NOPyDA

Not the Nazi Israeli?

The guilty party are those who advocate these
mass murderers of innocent peoples with
deliberate lies, like from Blitzer. Blitzer
will be tried, and executed a war criminal
for stating Hamas broke the truce., Where,
only two minutes earlier, he learned, that
it was his Nazi partners. DEATH SENTENCE.

It was on TV. BUT SEE? Ron Paul, the Libertarian,
ain't going to be honest here. He'll lie cheat
and steal Humanity's voice for Justice - like
he did with OUR money. A typical Libertarian
like Alex Jones who wants to blame "socialists",
"Liberals", aka, all of innocent America.
Blitzer is war criminal, who makes his own
discussions. As is Ron. What an enemy to not
mention the truce. THINK: IT IS THE ISSUE. But
Ron plays the dummy to kill more with contempt
for Freedom. Ron Paul, the bigot, asked,
'should we be doing this'? SEE? it's not first
degree mass murders, no, according to Ron Paul,
it's argumentative that indiscriminate mass
killing is a good thing really. Remember,
Ron Paul does not support arresting those
who committed mass murder on 911 either.
Or those who STOLE TRILLIONS. Or lawless Bush,
the ACTUAL AntiChrist enemy of God. Ron Paul
will watch America die for a stolen dollar.
And Alex Jones will refuse all calls to label
him good guy like himself warring order
to our universe for it.

Israel is [NOT?] responsible for these childrens death
http://uk.youtube.com/watch?v=Y9PIZQqIep4&feature=email

Ron Paul "When we pick sides, we make it worse"

He also took our millions donated for freedom
fighting away for his family, but not our own
as dying innocent victims giving. Pick a side.

Remember: Sadistic authoritarian George Noory
is a very real DEMON of Satan, who again,
openly tells US, he wants to murder our
species as the innocent forsaken, and Alex
Jones doesn't hear a problem with that
either. Love the bushite blindly, and
they'll kill US for a dollar sukka.

Alex Jones is like the retarded brother we
can't help but love because we're human. He
is still retarded. And George Noory is still
seriously evil as a traitor to the cause of
Freedom in America. And Ron Paul is still
slamming Ron Paul.

Ron Paul "Israel can not act without
Washington's approval"

So, it is Ron's fault then by not mentioning
the truce?, or as that, innocent People are being
indiscriminately murdered in a death camp that
he figures is argumentative? that innocent
People are dying as targeted for mass genocide?
Or is it the Ron who states YOU are to blame
instead of himself for being there, not saying
anything? HEY RON! Can you hear me now!

-

Contribute to our rise for the popular will

Alex Thomson shuts-up Israeli spokesman!
http://uk.youtube.com/watch?v=zIQZ1-RFq6A

Wow. The demon LIAR will also say Hammas broke
the truce, and Israeli started this by stealing
innocent peoples homes, then imprisoning
ourselves, the victims, in a death camp for
indiscriminate slaughter. While they STEAL OUR
CHARITY. What is it that YOU can't picture?

Hi. My name is King Johnny.

TALK IN AMERICA
http://www.mediafire.com/?mxw3nzi4nzf

-

/ / The targeting of civilians, whether
by Hamas or Israel, is a war crime. \ \

They are targeted by Obama who suggests
there is an argument to be made here. There
isn't. Nazi Israeli DEMON LIARS broke the
truce to kill Jews for money. They are godless
enemies of Humanity. So it isn't that we are
pro-Palestinian, it is that we are pro-Human.
Zionists DESERVE to die, before US, the innocent,
they target for murder for stolen cash gain.
Like Obama has promised to do for AIPAC. But
what about the rest of US 6 billion plus Obama?
Who is it of US innocent folks do you wish to
MURDER, or torture next as a Zionist war criminal
for Satan Obama? Torturing kids is popular in
Israel, tell US Obama, which American father will
have his children tortured, or murdered
sadistically by yourself as a whore for Nazi
Israeli? tell us, we're not waiting.

The Chosen Bad Example

Zionists Destroy Our Homes as Satanic
http://www.youtube.com/watch?v=mo2HW4T7wK4&feature=related

When I see the women and her child, left outside
while they sadistically destroy her meager gains,
I grow weary with ourselves for not speaking right.
Nazi Israeli are committed to deny US our God given
rights as Innocent persons to speak freely for Justice
realized. All because they STEAL our Lives for monetary
gain. It is our reality, give it or take it, YOU LOSE.

Then.. Hammurabi founded Civilization.

I go concerned for any hesitations of condemnation by
Obama. It's like, he's talking some jive about
how now he'll NOT let the words of Hamas reach
his ears. Being against war criminals, doesn't make
you pro-Hamas, necessarily, it means your against
war crimes to defend the lives of ourselves respected.
Remember: He told US earlier during the campaign that
he wouldn't fear speaking to anyone, Hamas especially,
because he was confident he could win the discussion on
Liberty, by principles that unite all free men. Now,
he has promised the FBI's Most Wanted AIPAC, he will
pretend to not hear any calls for fairness as all
parties united by common cause. Johnny Who? Where did
you go Obama? You were here, then.. pooof! you
vanished into the loving shackles of convicted/ing
criminals is a mass, "WE ARE TRAITORS TO JUST CAUSE"
organized war crime outfit, dedicated to deceiving the
Public by lying. I am not Lying. I'm not saying I hold
his associations as a measure of himself, I am concerned
with him stating, he will not hear our cries for Justice,
as then AIPAC cheered. I was as freaked out about it as
you maybe yourself now, believing it as possible. Check it
out for yourself, and wonder, just "who" is this person
they tell us they're are going to take for as dying fools?
I mean look at what happened to what's his name, when he
sided similarly the same in error as hugely criminal? Come
on be honest with us son, "Are you on drugs?". Maybe he's
just been stressed with all of everything he is heaped
to follow on, NOT to know by Blitzer, that Israeli broke
the truce to kill more Jews for money, and, also STEAL
innocent Peoples Homes while saying, "they are God's
Chosen". Yeah, chosen for, "The Bad Example", of how
Jews are left undefended by these grave robbing war
criminal nazi forces. As the King of Jews, I call for
Public War Crimes trials of the entire bushmob as
terrorists, and their supporters for lawless tyranny.

People are Coming to Town. Justice for All Coast
to Coast radio broadcasts all, until we have secured
the neocons in a prison cell awaiting the treason trials.

We are Good to Go. Rise Up for innocent Life,
or don't and see where it'll get you in the end.

TALK IN AMERICA
http://www.mediafire.com/?mxw3nzi4nzf

Nazi Israeli STEAL Peoples Homes without
apology, as a function of their SATANIC
government, while collectively bombing the
INNOCENT victims who die because of it.

Gaza 2009 - Operation Cast Lead
http://www.youtube.com/watch?v=hFEiOfLUfzY

Again, they are Satanic here because
they THREAT to tell you, yeah, Zionists
are casting the leads for the real mass
murder scenes - Justice denied Humanity.
God doesn't exist to defend yourselves
from war criminals for Satan.

War crimes trials with public executions
will commence against ever GUILTY zionist
living to lie that Hamas broke the truce,
that Georgia was attacked without provocation,
(again, CNN are not 'accidentally' conning
US here). And trials for every last living
bushite bomber, rapist, and torturer -
death to the bushite, the true traitors who
war against freedom for America, traitors who
war Innocent Humanity for the escape of the
neocon zionists.

-

Both parties cheerlead loudly for Israel's war Against Humanity
http://www.salon.com/opinion/greenwald/2009/01/08/israel/index.html

Death sentences MUST be willed by Christians for war crimes.
Death to the bushite, death to the enemies of God and Man.

-

For the Great Truths. We Stand United

/ / This option is also regarded
as a non-runner as the US would certainly veto that
suggestion. \ \

No no no no. What you do is investigate who this
the "US" person is as the GUILTY party my friends.
The facts have spoken for ourselves without contention.
And while we're at it, try to figure who that "Army
says.." person is too, we need to know who these
traitors are who hide their names backing war crimes

to continue. The Enemies of Civility, they are
enemies of US all my innocent friends, enemies of US
all.

white phosphorus shells on Gaza
http://www.youtube.com/watch?v=HPY2M6IxDRA&feature=related
listen to the inflection of voice near the end of this..
the mind of a delinquent 7 or 8 year old.. This phenomenon
is pervasive, and illustrates some cognizant short coming in
Calcium or Zinc somethings. However, IT IS THERE. Normally, as
an Expert on Psychiatry, I dismiss the whole notion of
Psychiatry as I intimately know it as pure bunk wacky,
however the study of something here is needed if we're
ever going to convince ourselves dying indiscriminately
this way sucks. As the innocent for profit we pay for,
with lies sold without Public defense of mass murdering
demon traitors to the cause of US falling victims. God
says their Satanic, I just say they are criminals. War
criminals easily convicted for murdering our loved families.
They have no remorse for all that have been murdered
already.. Livini should be on her knees begging our
forgiveness, but she's not because she couldn't care
less for any Jews, especially those she don't have
imprisoned under threat in Israeli 'society'.

It's a 'bad' thing. nnNo.

Israel bomb attack Gaza Civils Palestinians 27/12/2008 launches
missile attacks on 27 Dec 08
http://www.youtube.com/watch?v=tQLDBujnwEE&feature=related

This was what Israeli did as a legitimate murder
scene, committed after the Nazi Israeli Jew HATERS
broke the truce. More dead Jews, more money to be
rich with. and we'll blame it on that God nonsense.
We must demand war crimes trials from Obama, and
everyone else down there who is appalled at this
indiscriminate mass murder continuing in your name.
We need arrests of Zionist infiltrators within
the American military who have been shipping
weapons to nazi Israeli to murder more defenseless
innocent People as targeted. Obama must demand
death sentences against these ungodly Zionist
vermins for treason, warranting execution for the
war crimes of accessory to mass murder, or genocide.
For the Great Truths. We Stand United.

-

Here on a Mission

/ / after dropping leaflets warning residents it was
about to "escalate" its offensive against Hamas. \ \

SEE! This is AFTER fire bombing the whole community.
Satanic evil enemies of Life. Who admit to targeting
any one who has ever so much as swept our streets,
warranting bombs dropped on their Block(s). SEE! they
are ENEMIES OF EVERYONE. EVERY LAST ONE OF US.
INCLUDING GOD.

Riddle me Dumb

Hamas Workers and/or Troops? Out hiding in the mountains
of Afghanistan you mean right? Satanic enemies of all
Humanity I tell you. The most evil nazi sons-of-bitches
who openly advocate tyranny and oppression through mass
murder of ourselves as the innocent left targeted
defenseless. Enemies of Jews everywhere, the Zionist
cares not for facts on who's Life it destroys for stolen
gain by lying. That's why they target Jews, for fear the
Light of Truth would expose them as the Nazis they are.
It's a prison death camp, brought about by Israeli STEALING
OUR Homes as ungodly thieves. Thieves who leave a Jew
to starve to death in a garbage dump because, it'll
attract more charitable aid The Zionist can use
elsewhere. It's not a Jewish thing, it's a criminal
matter. They STEAL innocent Peoples Homes in that
country. God's Country? God would will such criminal
offense? Which God? Not the God of Abraham, nor by
the teachings of Hillel, Christ, Mohammad, or
Confusion? So which absent God do you speak where WE
can't speak as ourselves openly for Just Cause?
Cat got your tongue? How come your not saying anything?
The Israeli Zionist ENEMY wants US ALL in slave
labor prison death camps silenced away that's why!

Israeli War Crimes
http://bothwell.typepad.com/whos_your_nanny/2009/01/israeli-war-crimes.html

Well, maybe I'm wronger on Ron Paul than I needed to.
Hey, don't you EVER forget, I am a man also. We need
to meet on common grounds, to demand the start of
formal arrests for the bushmob crimes of 911, Iraq,
Afghanistan, South Osettia, and Palestine, as a group
together united by agreement for this one cause, and
then... we can later argue about how your ideas are
better than mine because I actually know of which
your speaking.. Hey! you could call me Daddio if you
wanted! To the telephones we go.

-

Israeli are attacking prisoners held criminally
in their own Death Camps!! GET ALEX JONES ON THIS!

Hmm... why wouldn't Alex? to support his fictions
over Our Rights to Live Free perhaps? A Hero adapting
to the deaths scene?, or, a Bush whore committed to
enslaving Humanity, all so he can say, he told US so.
Big hero or big hero. Your NOT powerless to his vision
of complete control over information. He refuses 911
info, Iraq war info, Israeli info. All so he doesn't
have to look the fool, while Humanity dies with his
insults against our wills to make something better
of ourselves. Justice is what I will. Masturbate on
your own time Mr. Alex Jones.

If he states again about how he knows everything,
and is always right, and those that criticize
him on ANYTHING are delusional, it's going about to
make everyone further sick with this obscene take on
what life means as Alex takes it. If I truly state
two nickels make a dime, does that mean therefor
they make a quarter also? If I say so like Alex
would? He is an idiot. Truly. George Noory figures
Hamas broke the truce, and that the Mideast solution
is that Jews should be separated with special rights,
as oppressors over the freedom of every Palestinian
Prisoner, and what's Alex Jones gonna say about
his 'truth telling freedom fighter' George to actual
'lame ass evil nazi traitor' George?, to YOU about
how George is just trying to murder millions of
helpless people as an offer for the final solution?
We can expect Alex now to claim, Zionists should
have special rights over Jews, all to maintain
his FICTIONS on Noory being anything but the
monster to Humanity he is. Just because Noory
doesn't growl when talking about murdering all
children in around the age of 15, or against
soldiers who refuse criminal orders, does still
make him a true fascist nazi enemy laughing at
your murderers escaping to live freedom in
our dying forsaken worlds. The bushmob doctored
the NIE. Conned Congress, and Soldiers. Did 911,
by closing criminal FBI investigations immediately.
Alex and George don't seem to want US to know
these FACTS that demands arrests of the culprits
responsible for high treason against Johnny's
America. Now, who's with yourself. I am! I am!
I am!

Alex Jones doesn't know squat of Social Security, but
pretends he does, like Ron Paul does when speaking
of the Federal Reserve, Health Care, IMF, World Bank

blahblahblah.. I mean even the expert of experts
Alex has on near twice a week, EVERY WEEK, to talk
all about how the Illuminati are doing everything,(give
me your money now for whatever), DOESN'T SAY TO KNOW,
it was Chris Cox who changed Investment Banker rules,
to cover instead one tenth of WORLD INCOME loans,
to one twentieth. MORE THAN DOUBLING THE ENTIRE GLOBAL
MARKET FOR LOOTING WITH HIS SIGNATURE! (And. that isn't
even a fifth of the TRUE trillions dollar fraud story.!)
Now, granted, I wouldn't expect one tenth of one percent
of America to have even a distant clue of which I am
speaking, but importantly, Alex's expert of experts has
never mentioned it. EVER. Why? He don't give a fuck, but
how much money he can get you to give him for investing
in things that are un-important to our struggles, but
for the fact, he states, you'll get free money for
nothing!! OUR ACTUAL PROBLEM. It reminds me of those
Ron Paul dollars... where Ron'll fix everything, cause
we, as a private company, are going to make YOUR money
instead... holy fuk mon.. Talk about the kettle calling
American racists. Thank God the FBI stepped in. (The
answer unfortunately is not nowhere as easy as Alex
would blindly lead you) - again, so I guess it will be,
Americans were just too far gone as illiterate
chauvinists, who cared too little for your freedom as
themselves degenerating. Why? To battle tyranny they
knew not Justice wins the day, and blamed innocent
groups gathered wherever, instead of following the crime
scene leads at the real murder scenes - like was once
done on TV and at the Movies. But even that was too
far above their doped down heads, to raise their finger
to dial a phone number.

How about stating "A lawless bushite enemy wars America
as a traitor, to escape the neocons from the crimes of 911."

Then Alex states the head of GCN is giving out gold
at less than it's value as a special treat, every
second or third week. Below wholesale. Now, really
think this thru. Do you think Alex is trying to con
you here? you bet. That is the Gold Racket. Diamonds
are another thing - where I've personally seen,
about a decade ago, a huge press that makes Diamonds
out of coal. Swear to God it's true. Costs to make
diamonds are pennies to the thousands paid to Zionists
who live in Israel calling for the murder of all
innocent Peoples. Where is the rich Zionist, grave
robbing Jew hater to demand Justice for our times?
Where? Pressing coal into diamonds, while advocating
the murder of our entire Human species. THEY WANT
TO KILL GOD AS SATANIC ENEMIES OF LIFE. While I am

last known to Life's enemies as Jesus Christ, the Zionist's end every time. I'll have brought more Zionists to their rightful dooms, than any other, of any time, anywhere. I HATE Zionist bushite LIARS to death, all because I Love Humanity too much, to watch US die undefended as the innocent forsaken. They can change their evil ways, but till now, often not, benefiting off our suffering as war criminals who simply lie as demons to steal our Human values. Let's change this for our betterments. I mean the Halo is a dead give away..

The head of GCN has a son warring God to rape American women as lawless enemy in Iraq for the Neocon - again NEVER mentioned as something worth fighting against for Freedom in America - soldiers are suppose to REFUSE criminal orders - but not when Alex is at the mike. He will never mention the Bushmob doctoring the NIE to con America for death as exampled, because it doesn't fit his fictions, where all the bad guys escape because they are geniuses headed by secrets so powerful, nobody can ever know'em, except Alex. He tells us near every day, he knows everything already, and is never wrong, therefore you can't criticize him. Bullshit. It's like he wants to be wise like Johnny Gawd is, without doing anything like studying for a test where the teacher actually does know the issues. He told US today, the British came up with concentration camps, from the Indians - who spent all their lives murdering themselves. The British 'invented' false imprisonment? The British came up with the, Jews Killed Jesus? The British invented Pope Gregory VII? I suppose Alex has never heard of Ghettos. SEE? he just pulls shit out of his ass, and calls it like it's truly pure gold you'd wanna buy. Those, like your typical American have no clues, so they figure, Life must be sorta so that History is all one big Alex Jones NWO cartoon. What? that the NWO did 911, and everything else that use to instead, require criminal investigations to nab the actual evil doers? Alex Jones IS the NWO he tells US all we should be concerned about never stopping, like it was in the DARK AGES. Justice Alex, why is that hard for you as a "Conservative" to figure? Is it because you are cowardly in the face of true Liberty? Afraid that some People, on some Issues, ACTUALLY know a great deal better than you could even imagine presently? Don't like that do you?, where you don't rule this Universe as a lawless tyrant desperate to live in an illusion at the expense of

everyone else dying victims to censorship? Does he try
to find wise men or women? rarely. "Ron Paul [MUST]
leads our truth movement" - like, fuck off already
with the Ron Paul, The Truther, Bullshit Alex Jones.
1% is what YOU get on Social Security deposits - 1%.
And.. Bush stole 700 billion. 700. Billion. That's 700
BILLION. It's a "Trust" account. A "Trust" Account. It's
being held in "Trust" Alex. Ron Paul is asleep at the
wheel. As, so are the rest of all you other fools..
I want Justice, and I want it now for all the victims
of 911. Americans be damned, we want Justice, and We
want it Now.

In Texas, child rapists are given the right to
freely move about without fear that Texans will stand
as armed Men in defense of their very own offspring.
And Alex wants this for the rest of America. That some
how to own a gun, means an American would kill a cop
who beat a women near to death for pleasures that
he could never be Publicly arrested for, as a
sadistically evil nazi bushite fuck. Look, if YOU DID
kill that particular DEMON COP after the Chief
refused to arrest him, you couldn't possibly go to
jail in Johnny's America, because the truth would win
out in a fair verdict. And REAL cops would honor you
with great big, thank you. Nothing worse than a
cop (or bushite grunter) who believes the Law doesn't
apply to him while he drives drunk, tazers someone for
nothing, abuses Women, or kids, to sell drugs, or
kills good cops, who are good men. (Like mercs do in
Iraq officially for Rumsfeld's P2OG. Coming to an
American city near you!)

Again, the two Laws of Johnny:

1. No evidence, person innocent.

2. Torture? fuk you and die then

"Rice says it is 'hard' for Israel to spare civilians in Gaza"

We KNOW they are ONLY targeting innocent People,
the ungodly zionist Satanic enemies say so..

"Israel Rejected Hamas Cease-Fire Offer in December"

Livni has declared her country "is not going to show restraint"

"Her" country?

It's like she's admitting here, that they DO NOT
target the IDF's Hamas, but only our innocent lives
as a threat to LIFE and GOD. Remember: the Zionist

LIARS broke the truce.

THIS NAZI ZIONIST FUCK BREATHES THE AIR OF US
http://www.youtube.com/watch?v=lMxfEsooM5M&NR=1

/ / So, Hamas decides it's time to end the
cease fire and has begun shelling Israel again. \ \

This guy even sounds like the Satanic false
accusing enemy of God he is. Let US, as Humanity,
hunt these real devils down, try them, and have
them executed publicly for the benefit of God and
Man. Understand: this REAL DEMON knows he's lying,
no living man on Earth could spew the vile lies he
does to excuse indiscriminate mass murder, or starvation,
as this Zionist enemy of life sells to STEAL Your
HOME, your Family, YOUR LIFE. An open enemy of God
trying to STEAL the Title of Jew from Christ. EVIL
ENEMY OF LIFE. See, when a bushite dies, you served
Life well in defending their next INNOCENT target.
BILL HIM FOR STATING ISRAEL WAS STRUCK THOUSANDS OF
TIMES. BILL HIM FOR STATING HAMAS BROKE THE TRUCE.
BILL HIM FOR STATING bin Laden DID 911. BILL ANY
Zionist FOR THIS TREASONOUS LIE. Why God asks? Because
there isn't any evidence to support that Satanic lie.
According to the FBI. And according to God, Zionists
are not Jews, but of Satan as enemies of every life
form in this Galaxy, Hunt him down, and bill him
today for the love of God. You can 'hear' it in his
voice.. how he lies TO YOU as a DEMON of a Hatred
for Truth and Humanity. Facts, that are easily
available, are not what he works to mislead others,
others he hates, and wishes to murder for as ungodly
sadistic pleasures as YOUR enemy. Bill him under
American law for being pro-torture too while we're
at it. Death to bushite, death to the murdering
enemies of God's Love for Mankind, and enemies of
TRUE Justice for Americans. The fuking demon enemy
lies to you, as a con to STEAL your life, or just
as soon, the life of another innocent other. Now,
what are you going to do about it? Except his lies
as exceptable, as he tries his hardest blatantly
LYING to kill God and Justice in our Worlds? Not
in mine, but perhaps Yours.

' In Civil-Contempt Cases, Jail Time Can
Stretch On for Years for Americans, without Ever
seeing a day in Court. '

Where are the arrests?, then firing squads for
the Judges who 'judged' such criminality against
freedom for US, the Peoples in America?

' Where Did Taxpayer Money Go? Panel Slams Treasury
[FOR STILL REFUSING TO SAY] '

Where are the arrests?, they stole eight trillion
and counting.. And Congress 'slams' them for
disappearing OUR MONEY. Slams with what?, a,
don't do that again please butt sqeeze? It should
be massive slammer time, with a return of all
STOLEN monies.

' THEREFORE, those pro-Israel politicians in Congress
won their seats in part using stolen money. '

Where are the arrests? Amerikan bushite nazi grunts
are assisting in the mass murder of innocent Christians
in Palestine. War crimes demanding death sentences. It
isn't an argument that can be turned around. Nazi Israeli
STEAL Peoples Homes without apology, as a function of
their SATANIC government, while colectively bombing the
INNOCENT victims who die because of it. It's a prison
camp! they are denied water, food, shelter.. since four
or five truces over that they've broken, every one. These
are Satanic enemies, willing War Crimes against God,
a God NOT loved by zionist American Nazis. And a Son
as powerful as the four winds, ridiculed by Zionists,
and American know nothings, for the continued debasement
of YOUR soul worth here dying.

Israel Attacks Iran News Station

Why does not Iran DEMAND arrests, and death sentences
for these blatant war crimes against Humanity committed
by Amerikan Nazi Israeli Zionists? Along with the
perpetrators of 911? WHYWHYWHYWHY. Russians! Can you
help US out?

-

THE NAZIS SHELLED THE HOUSE WHERE THEY HELD
INNOCENT CHRISTIAN PRISONERS
http://uruknet.info/?p=m50596&hd=&size=1&l=e

Rise up for Justice American Christian, or
die innocent victim the Son of God does say.

-

Pictures of Alex Jones masturbating
"we were right about it all."

It's the NWO! The Illuminati! Not Bush, Cheney,
Neocons Gone Wild, or any of many other REAL
criminals, for the war criminals are just
puppets to his EVIL fictions. Forget about
Bush escaping.. Socialists who design traffic

lights, and Liberals who will to share fairly are Alex's enemy, because he's fearful the FACTS would escape his denouncements against truth tellers. George Noory, one of the most despicable individuals on the face of our great Earth - is exactly the kinda guy he wants returned to send his wannabe Patriots nowhere but to die. What about Justice America? The bushmob doctored the NIE. TREASON. There is video of iron flowing like water from the towers, seconds prior to the collapse. Alex ain't there to help US, for that is where TRUE Patriots fight for real Justice. When WE phone with indisputable facts, on Ron Paul the bush whore sell-out for example, he lies to all (GOD), then hangs up on US. Is that the kinda freedom you think the Founding Fathers had in mind to give Your rights to speak for Alex who blames anyone but the criminals directly responsible for your funeral? The private banker never covers our loans, so why give them trillions without questions offered without answered as, never mentioned by the guy who is 'right all along on everything under the sun', and.. he 'rules the Ocean of truth' too don't you know YOU have a steak going all rotten to hell here also? You'd think Alex would take our call just for the challenge on where we stand? I'm free!

He is not. And George Noory tells us openly, he's into killing innocent kids for profit. George's profit is that apparently, by murdering all children in around the age of 15, will stop them from getting a clue at anytime in the future, to take him out as an ENEMY of EVERYONE for censoring our cries for Justice. Why is it that Alex would invite obstructionist, Steve Quail, or Alan Watt, on to lead you nowhere while they jerk off, but where we gotta go to actually defend ourselves? Steve has been on with Noory more than a hundred times, and, we'd figure, Alex will soon be delving into the Alien questions also. Answerable by me in seconds, but ahhh.. like Noory, doesn't want the truth of such a subject uttered, just endless streams of illiterate bushite dumfuk losers sucking on each other. While they wrest from US the wonder; just why we can't stop criminals from robbing ourselves, while murdering our families? Alex wants to blame the unstoppable NWO, while I, want to blame those actually

responsible, like Bush and the proven treasonous,
Neocon terorist liars who are pro-torture.
With arrest warrants. All of them. I'll do it for
Reagan's, War Crimes Act, as an act of respect
for my Great America, that's isn't always been
dying dead wrong under the leaderships of
criminals.

Israel hits Gaza after UN truce resolution

/ / AP Israel and Hamas responded to a UN peace
demand by hammering away at each other with bombs \ \

The IDF's Hamas is hammering away with what at who?
Is the AP referring to the tin can rockets that
travel usually several miles, but in one case,
22 miles? To kill a Jew standing outside in his
yard, thinking on how he would defeat true evil in
his time? Tin can rockets that contain no explosive
charge? Have no mistake, if it hits you in the head,
your dead, but really, what do you think the odds
are on that? E=mcï¿½. Or is this another, amerikan
past time, of, who cares for the facts, we are at
war with God and Christ now? Joe is an American Zionist
"Plumber", who has amassed a multi-million dollar
fortune in the competitive industry by shit eating.
Every bushite death is a mercy given to God in defense
of all that is right and Just in this Universe. A
lawless bushite enemy wars America as a traitor to
escape the neocons from the crimes of 911.

1. The ISI's General, Mahmoud Ahmad funded 911's Atta

2. We have video of iron flowing like water from the towers

The strongly polar chlorine atom in the polymer backbone or polychloroprene
will make your cement lossy at radio frequencies.

I don't think those cases (commercial/repeater and CATV) are
comparable.

As I understand it (anecdotal report and discussions with other
repeater owners/builders), the problem with LMR-400 and similar cables
occurs when the cable is used in a duplex application, with RF
transmit power and the incoming receive signal being carried on the
same cable simultaneously.

Under these conditions, it doesn't take very much broadband noise
generation at all (from the cable, connectors, or nearby
metal-on-metal contacts) to cause a problem. The transmitter might be
pumping 50 volts RMS of power into the cable, while the receiver is
trying to pick off a signal of less than a microvolt at a frequency
only 600 kHz away. That's a rather critical environment which really
can't tolerate more than a tiny percentage of noise generation in the
cables, connectors, or duplexer.

I don't think there's any problem with using these sorts of cables in
commercial or amateur service in *simplex* applications... they can
handle transmitting, or receiving, just fine. It's only when you try

to do both, simultaneously, through the same cable. that the noise generation can become a problem.

The same can be true of some classes of antenna problems. The repeater system I help maintain developed a serious desensitization problem, due to internal corrosion/oxidation which occurred in the antenna after several years up in the weather. I doubt that the corrosion/oxidation effect would ever have been noticed if the antenna were in service as a normal (simplex) base antenna - it didn't affect the transmit SWR or the receive sensitivity at all,

I believe that CATV distribution is a rather easier situation for the cable to handle, since the signals being carried are all of a fairly similar and moderate power level. The downstream carrier levels delivered to the home seem to be around 1 millivolt... that's more than 60 dB higher than what a repeater's receiver has to be able to pick out when it's receiving a just-usable signal from the outer edge of its service area.

Having read Roy's impressive measurement results, I would like to
interject a word of caution about the use of RTV's in electronic
applications.

As Roy states, many RTV sealants and adhesives use a curing process that
releases acetic acid (vinegar).
These should be used with care in electronic applications as the acetic
acid can, and does, cause corrosion on metallic surfaces in the vicinity
of the curing RTV.

Coils constructed with a medium to heavy gauge of wire are unlikely to
suffer from this but any inductors employing fine gauge wire can fail
due to corroded (broken) turns resulting from contact with the acetic
acid. The effect is not immediately apparent and can take months or
years before a problem arises.

Application of acid curing RTV should also be avoided to any component
in an assembled electronic device that has switch contacts or plug and
socket contacts in the immediate vicinity, for the same reason.

Electronic grade RTVs do not use an acid curing process and have been
developed to avoid the above problems.

Derek (ex Dow Corning employee)

You got it. Only hardline is authorized on the tower. Hardline doesn't have the problem because it doesn't have a braid to flex in the wind. Braid is less than satisfactory for RF Ground and lightning protection too. Copper ribbons and sheets are preferred for grounds, but regular large copper cable can be substituted in some cases. On a repeater system, corroded or old braided coax hoses your own receiver and others nearby on the tower or the next building with noise. Especially in the wind. You won't hear that on simplex because the receiver is muted when you transmit.

I don't know if you have seen CATV hardline with a tank strapped to the utility pole. That keeps water out by pressurizing the hardline. CATV systems DO have problems with corrosion all the time. With all that cable though, the cost to get it up and running is enormous, and they would rather be complaint driven instead. They also use circulators so that the stuff people do in their house doesn't feed back into the system and screw all the other customers up.

The 2m people, most business PLMR and the Cops don't get it so they complain about jammers so you get irate service calls. But you can't talk to them because if you talk technical, they cover their ears, scream LALA LALA!! accuse you of lying, and they won't pay for the cure anyway (remember, if you have to think about the answer, you're lying). We do use LMR and 9913 for cheap simplex ground level base station installs because it is cheaper and easier to route. Don't use it around your rotor though. The foil will tear up.

Just how good does this antenna have to be. It's not like it's being
used as a probe to measure randomly polarized signals, where AR=1 is
really important.

Quad helix antennas have a reputation for being demanding, but that's
where the performance requirements are demanding. Considering that quad
helix antennas are made by the millions for GPS and by the thousands for
WxSat use on boats, they aren't all that picky, because conventional
mass production tolerances are "good enough".

Relax the performance requirements and the helix is no more or less
difficult than a turnstile or Lindenblad or CP patch. Before the advent
of modern modeling tools, *designing* a quad helix was a huge chore,
especially if you didn't want to use a quad hybrid in the feed network,

but wanted to do the "one a bit long, one a bit short" to get the 90 degrees.

But, returning to the original question, why not a turnstile (crossed dipoles fed 90 degrees out of phase)? For LEO satellites, you don't really want a hemispherical pattern anyway. You want something with more gain at the horizon where the slant range is much greater (thousands of km) than at zenith (where the range is hundreds of km).

And, for that matter CP is probably not worth worrying about. The loss from a perfect CP to a perfect linear is 3dB. If you're in a situation where 3dB is going to kill you, you've got other problems to worry about.

Where CP is really, really nice is when you want to kill multipath from close by reflectors. Or in deep space applications, where you don't know the linear orientation of the transmitter/receiver (and you also ARE worried about eke'ing out the last tenth or hundredth of a dB of performance)

Heh. You haven't met the senior hardware guy (Scott N6NXI) on our
2M/220/440 repeater project. He's the staunchest opponent of using
foil/braid cable on a repeater that you're ever likely to meet, and
insisted on all of our stuff being done to solid commercial-grade
standards (circulators, bandpass filters on the auxiliary radios,
etc.). Most of the cables inside the rack are custom-cut/routed .25"
heliax.

It was a lot of work (and more money) but it has paid off in
reliability. We've got 3 repeaters and their duplexers in a single
rack, right next to one another, and no crosstalk or intermod or
desense problems... and we share the site with a powerful
paging-service transmitter and a bunch of public-service radio gear.

> We do use LMR and 9913

Good point - thanks - I'll remember to use a braid-cable jumper when I
put up a hexbeam later this year.

I have seen hams use silicon sealant to fill a UHF connector before screwing it together. The idea is to keep out water. (The connection is also taped or sealed with Coax seal). Is this a good idea?

Ever open up a cable amp that has had leaky (water type leaky) coax
dripping into it? Yikes, they usually keep working for a while, with all
kinds of electrolyzing going on. It's a pretty sad sight.

1012. The digital rip-off: your help needed

Newsgroup: rec.radio.amateur.antenna
Date: 2009-02-11 19:03:31 UTC
From: Bill Wright <insertmybusinessname@f2s.com>
Message-ID: <sYednZwK8JuZvA7UnZ2dnUVZ8jWWnZ2d@pipex.net>
Source record: 17636
Cross-posted to:
rec.radio.amateur.antenna,rec.video.cable-tv,rec.video.satellite.misc,rec.video.satellite.tvro,sci.engr.television.advanced

Hello everyone,

Bill Wright here. Please have the patience

to read this! You could really help us achieve something worthwhile.

The digital rip-off: your help needed

There's a lot of public confusion about the switch to digital TV, and

many elderly and vulnerable people are getting fleeced as a result. The

official information campaign is trying hard to make sure that people

won't be left without TV when the analogue broadcasts finish, but we're

not convinced the right information is reaching those who need it most.

As a result some people are panicking and making rash buying decisions.

Of course there's always someone ready and waiting to take advantage

of people's confusion and make a killing. There have already been many

instances of people (mainly elderly) spending many hundreds of pounds

on unnecessary aerials or new TV sets.

In areas where analogue was switched off last year the rip-offs became

an epidemic and a lot of people subscribed to pay TV (£500 per year?), under

the impression that they had to do this or they would lose the BBC and

ITV channels.

A group of us have set up a website that attempts to correct some of the

misunderstandings and present the essential information in a way which

is simple and easy to understand. The website is totally non-commercial

and is designed so that people with internet access can print off the

information and hand it to those that might benefit from it.

After analogue switch off the majority of people will find that their

present aerial will work fine, even though it might not do so in the

lead-up period. This simple fact is being ignored. Our message is partly 'Don't spend money until you are certain you need to' and this contradicts the official message, which is 'you must act now'. It seems that a certain amount of rip-off has been deemed acceptable.

The main broadcast media are unlikely to address the rip-off problem seriously because this could detract from the 'you must be ready for digital' message. Of course we accept that people do need to be ready for analogue switch-off, but the official line is all about being ready, with little or nothing about avoiding rip-offs or unnecessary expense.

So, having set up the site, the problem now is publicising it. The task of spreading the word is enormous, and frankly we just can't do it alone. But if enough of you help us we could really achieve something.

Newsgroups like this one have readers all over the UK, and that is our strength.

Firstly, would you please send the letter (below) to the letters page of all your local newspapers? It's easy to do this by email. (But if analogue has already finished in your area it's probably too late.)

If you know of any local organisations in your area that could pass on the information to vulnerable groups such as the elderly or the adult mentally handicapped, please pass on this message, with the website address. What about the local Age Concern, Help the Aged, Derby and Joan, Townswomen's Guild, WI, and even the bowling club? What about the library or your place of worship? Do you have any contacts in Social Services or other relevant council departments?

Please email the message to your local radio station (including community stations). It could work to send the message direct to a presenter who does a 'topical talk' slot in between the music.

Please go through your email address list and send this message to anyone you know who is in a position to pass it on to where it's needed.

Finally, do you know anyone personally that is a rip-off risk? If so, please go

to the site and print off the information and give it to them.

The website address is

http://www.paras.org.uk/01-intro.shtml

Could you email Bill at

wrightsaerials (first part)

the 'at' symbol (second part)

f2s (third part)

dot com (last part)

to let us know which organisations you have contacted?

Cheers,

Mike Brown

Mark Carver

Bill Wright

LETTER TO EDITORS, RADIO STATIONS, ETC (areas that still have analogue)

The digital rip-off: your help needed

Some time soon our analogue TV signals will disappear forever. The official information campaign is trying hard to make sure that people won't be left without TV, but unfortunately this can come across in a slightly panicky way and it is causing some people to make rash decisions. Elderly people, especially those who are housebound, are very reliant on television and many are really scared that they will be cut off. Of course, there's always someone ready to exploit these fears. The result is that a lot of money is being wasted by those who can least afford it. There have already been many instances of people (mainly elderly) spending many hundreds of pounds on unnecessary aerials or new TV sets.

Crooked aerial installers are having a field day, and unscrupulous TV salesmen are telling people that they have to buy an expensive new set or they will have no reception. A lot of people have already subscribed unwillingly to pay TV (£500 per year?), under the impression that they have to do this or they will lose the BBC and ITV channels.

There is now a website - http://www.paras.org.uk/01-intro.shtml - that tries to cut though all

the guff. It's been set up by trade insiders who are sickened by the

rip-offs. Its totally non-commercial and the idea is that people with

internet access can print pages and hand them to those that might need

them. It would be great if your readers would take a look at the site

and pass on the information to any vulnerable people they know.

Yours faithfully,

Xxxxxxxxxx

Hi Jim

It isnt clear to me that you read Howard Kowall's original post. He intends to build his own antenna to communicate with low earth orbiting satellites. I have information that will allow Howard to design and build his own antenna that performs better than the design he chose (Lindenblad). Do you disagree that a DCA will perform better than a Lindenblad?

I have read many of your post and recognize that you are a smart guy with lots of information about antennas. Thats why I wonder why you'd write something as stupid as " And, for that matter CP is probably not worth worrying about". You know that 3dB *is* normally something to try to achieve while building an antenna. The reason you write that the circular polarization is minimally significant seems to be that you are attempting to minimize the value of the DCA. I wonder if you have any facts or data, measured or calculated, to demonstrate that you know of any antenna that performs better than a DCA for ground based reception from LEOs

I agree with you that a Turnstile is a good antenna for LEO satellite communication from Earth. But, I also claim that a DCA will perform better than a Turnstile. Do you disagree?

Can you tell me more about why you wrote "For LEO satellites, you don't
> really want a hemispherical pattern anyway. You want something with more
> gain at the horizon where the slant range is much greater (thousands of
> km) than at zenith (where the range is hundreds of km). That is precisely

> to build , unlike the Quad helix.

Again, do you know of any antenna design that performs better than a DCA for communication with LEOs from earth and doesnt require pointing?

NO!

The silicone will impair the connection, the dielectric, makes a fumbling mess and usually causes the tape to come off. Just tightly wrap with electrical tape and tie off the loose end. It will outlast the coax. Unless the antenna itself is prone to leak into the connector.

Probably not a good idea.

Silicone Grease would be much less harmful to the connector and be much
easier to undo, when the time comes.

Say R56 and it usually covers everything that matters. Check this out. Use
to take care of a bunch of UHF Micors here:

I've seen boxes of them. I wish I had pictures of the Micor mobile that was
parked in a supervisors car in the middle of a river for 3 days. The
battery went dead making green slime. The only money they had in the budget
was for repair, so we bid them to replace every board. The Mastr Exec had a
Relay and worked fine after drying it out. Things like that are hard to
explain.

thread, maybe it was your reply that was misdirected to this one rather
than the one you had intended.

>
> hardly vauge at all

I assume that English is your primary language, right? Does your news
reader have a spelling checker on/in it? Have you ever used such a
subprogram? If not I'd like to suggest that you become familiar with
its use. Your spelling is absolutely atrocious, your syntax is worse,
and this combines to make your posts nearly unreadable. Its not really
a difficult concept to grasp, and the program is quite intuitive. Its
built for those who cannot spell, in other words for someone just like
yourself (and I to be honest, but I have learned to use my spell-checkers).

How so? Are you the worlds foremost user of code? If so then I dearly
hope you spell better in code than you do here. Imagine the bad name
you give to other HAM's with your spelling.

Honest, not insulting. Please, review your posts to me in this thread.
Read them one word at a time and then get back to me. Can you
honestly say that they make sense? That the spelling is above par for
an individual who's primary language is reported to be English?

>> Kindly allow the individual to whom I posted the original "post" to
>> answer.
>
> alow myself to post? how could I stopp anyone form posting indeed If I
> had that power I would used it
> and if I had the power to stop someone from posting no one would
> need remeinding

Actually, unless you use more than one name/account to post with, the
original individual I was posting to goes by the name of
"dloydlavies@gmail.com". The current account you are posting from is
"k3vr@hotmail.com". Significant difference there, don't you think?

Assuming that your account name here corresponds to a HAM call, then it
would be even more simple to assume that anyone named Brian, residing in
Florida, speaks English as his first language.

> Do you disagree that a DCA will perform better than a Lindenblad?

Nope.. haven't actually looked at it. BUT.. the thing I was pointing out
is looking at the overall system design, (for which design complexity
and tolerances are factors that need to be considered), it might not matter.

>
> I have read many of your post and recognize that you are a smart guy with

> achieve while building an antenna.

Not if you've got plenty of link margin already, or if there's an easier
way to get the margin (e.g. rather than get 3dB more on the antenna,
shorten the feedline from 100 ft, etc.). Howard didn't say which 2m
satellite he's looking to listen to, or what kind of receiver he's using.

The reason you write that the circular
> polarization is minimally significant seems to be that you are attempting to
> minimize the value of the DCA. I wonder if you have any facts or data,
> measured or calculated, to demonstrate that you know of any antenna that
> performs better than a DCA for ground based reception from LEOs

Nope, that's not what I said. What I said was that sometimes, striving
for perfect axial ratio isn't worth it. A linear antenna will have 3dB
loss against a perfect CP, and that's a worst case. It might well be
that 3dB is ok (for receiving WESAT on 137 MHz, for instance, where they
have pretty big EIRP, it wouldn't matter)

>
> I agree with you that a Turnstile is a good antenna for LEO satellite
> communication from Earth. But, I also claim that a DCA will perform better
> than a Turnstile. Do you disagree?

No, I don't disagree or agree. Don't know how well a DCA does or
doesn't do.

>
> Can you tell me more about why you wrote "For LEO satellites, you don't

>> to build , unlike the Quad helix.

My comment was general, on what sorts of patterns one might want for a satellite antenna in a fixed position to communicate with LEO.

And, yes, your DCA is easy to build and probably non-critical in dimensions and tolerances (have you checked this? either by modeling or measurement?) But so is a turnstile or a turnstile with reflector or a Lindenblad or even a quad helix, depending on how much variability you're willing to tolerate

I will readily concede that building a quad helix for VHF is a mechanical problem, compared to say, 1.5 GHz for GPS. It's going to be a physically large structure (about the size of two gallon paintcans stacked), but if you have a cookbook design (as in, buy X feet of aluminum rod or copper wire, wind it around a plastic trash can, etc.)

I've built monofilar and quad helixes (and Lindenblads and turnstiles) using copper foil tape on plastic buckets, rolled up paper, and all sorts of things. Some work better than others, but mostly, it's mechanical issues that are important. The "RF performance" is pretty much the same for a given physical size. After all, for an "omni" sort of antenna close to the ground, there's lots of other factors that probably have a bigger effect. (which was where I started..)

>
> Again, do you know of any antenna design that performs better than a DCA
> for communication with LEOs from earth and doesnt require pointing?

How does one define "better"?

Is your article in QST posted somewhere? Got a NEC deck? (Can't get it from ARRL because it's too new). Or, heck, rough dimensions and angles, and I can build the NEC model. (googling KD6JDJ DCA doesn't turn up anything useful.)

As you know, it's very challenging to get CP with good axial ratio in all directions (sort of an extension of the hairy ball theorem). For that matter, the axial ratio of the signal you're receiving may not be all that hot.

Taking GPS as an example, the SVs have a spec that the axial ratio is no worse than 1.2dB within 14.3 degrees of boresight for L1, and 3.2 dB for L2.

I couldn't find any convenient data on ham satellite antennas. I think AO51 uses some variant of a turnstile with separate ports for the two transmitters, so one is LHCP the other RHCP. I did find a rough link

budget for AO51 (aka Echo) that shows path loss varying by about 8-9 dB from zenith to horizon.

If we look at state of the art (at least in the 70s) for deep space exploration, the Low Gain Antenna on Galileo (CP for 2.3GHz) had an axial ratio of 2dB on boresight, and 11dB at 90 degrees off boresight. See Bill Imbriale's book at
http://descanso.jpl.nasa.gov/Monograph/mono.cfm?force_external=0
(Volume 8)

for more details and lots and lots of measurements.

I like to grease the threads with silicon dielectric grease to keep
water from wicking up the threads but I have seen people pack N
connectors full of it before screwing them together and cant say it
did any harm. I am am a big fan of wiping down a connector with Deoxit
before puting it together.

I heard that Marvel Mystery Oil works as well as Deoxit. Has anyone
else ever heard of this?

Hi Jim

I wont interlace my reply so that it might be easier for us to read.

You wrote that "it might not matter that a DCA performs better than a Lindenblad" Well it does perform better for contact with a LEO satellite and I'd expect that be enough to make the DCA worth considering. Maybe I am missing something. Why would you *not* try making DCA for LEOs??

What (exactly is your point in writing about eliminating line loss when the discussion is antenna sensitivity??? Why is it pertinent what LEO he is interested in or what receiver he uses??? He asked about coax for an antenna harness. I thought I was helping Howard when I pointed him toward the DCA. Jim, if you dont need the DCA design concept there is no need for you to consider it. But, please dont diminish the value of the DCA for LEO use unless you have facts or data to show where I'm wrong about how well the DCA performs.

Jim, are you writing that antenna sensitivity "doesnt matter" when receiving NOAA weather satellite signals at 137-138 MHz? If so you are

completely wrong. Oh, you personally may have no interest in reception from the NOAA satellites (APT) as low elevations. but, when recording images of the Earth from NOAA satellites (APT) there is *no* antenna that performs better than a DCA. And, that extra sensitivity using the DCA is highly desired by most APT imagers.

Yes, I have made lots of measurements of the DCA. I made my own slotted line so I could know the antenna's impedance. I have hundreds of actual (measured) radiation patterns. I have plenty of EZNEC models of the DCA. As I posted earlier, Patrik Tast posts lots of fundamental design information on his Web Site http://www.poes-weather.com/index.php .
Clearly, I am proud of the results I have realized with this DCA antenna design project, so I'm always happy to share it with anyone interested. Anyone interested in the DCA has always received answers to any/all questions sent to me.

I define better performance as greater sensitivity to signals from LEO satellites. But, the DCA has a much wider impedance match than a Quad Helix.

I was pleasantly surprised that the axial ratio of the DCA radiation is exceptionally good at most angles. EZNEC gives good prediction of AR at all angles. Patrik Tast's Signal Plotter records the antenna sensitivity at 1 second intervals while the NOAA satellite is above the horizon. As I remember, you acknowledged that I have developed a method of recording actual radiation patterns using the program Patrik developed for me (SignalPlotter).
I submit to you that, if you ever have need to develop a hemispheric coverage antenna for CP signals, you could benefit from learning about the DCA. It works.

Jerry KD6JDJ (who sincerely wants to know
facts about the flaws in the DCA design)

All metallic contacts are potential problems. For years I did Navy
electronics, including a couple hundred EMI inspections. Where "topside
housekeeping" was neglected, broadband noise (BBN) was sure to be a problem.
(All topside metallic objects need to be either insulated or firmly
connected -- no incidental contact.)

As little as a hundred watts would excite some junctions to generate BBN
that could be detected throughout the HF band on other antennas. More power
would generate BBN up to several hundred MHz. Been there.

And I've used the acetic acid-curing variety many times on bare copper (wire and PC board traces) and aluminum, and not a hint of corrosion when it was cut off long after. Besides the wide variety of formulations, there may be other factors at work causing the corrosiveness to vary so much.

Please people, use the correct spelling. Silicon is an element with
a melting point of 1410 to 1414i¿½C (2570 to 2577i¿½F) depending on the
reference. Silicone grease is a low molecular weight polydimethyl
siloxane polymer. It is hydrophobic (does not wet with water) and
is often used to lubricate rubber and other items that are
incompatible with hydrocarbon greases. Its main use with electrical
connectors is its lubricating properties and water repellency.

> I heard that Marvel Mystery Oil works as well as Deoxit. Has
> anyone else ever heard of this?

DeOxit is 95% petroleum naphtha with 5% of a proprietary
ingredient. Caig tends to try to keep the secret ingredient
secret. I cannot say for sure but I suspect it might be tocopherol
(Vitamin E). Marvel Mystery Oil is a mixture of naphthenic
hydrocarbons (motor oil), mineral spirits (naphtha), and 1,2-
dichlorobenzene (a chlorinated solvent). From the smell, it is
likely to contain a small amount of methyl salicylate (oil of
wintergreen). So I would say they are quite different. Besides,
the chlorinated solvent is not the best thing to use around
polyethylene and is especially bad around vinyl.

Report Of ï¿½People Planting Bombsï¿½ on 9/11
http://www.prisonplanet.com/report-of-people-planting-bombs-on-911.html

Why isn't Happy George Norry, Our Enemy, covering
this everyday as an important subject to defend
American life he holds truly in contempt?
Again, Alex Jones leaves every American to die

victim to his NWO, before he will acknowledge
TRUE evil in our world. George Noory, the evilest
ACTUAL Enemy of History, Alex claims is a good
guy for never allowing open discussion on 911,
Afghanistan, Iraq, and so on, without selling
his Zionist hate for our Humanity. Can you believe
that demon enemy co-ksucker Ian Punnet actually
preaches? The demon has told US more than once
he doesn't believe in God, so what do you think
that other "buddy" of Alex Jones has in store for
your life? Alex has said near a hundred times, that
Christ's disciples were all killed by the Romans
for believing - what a demon he is - for - what
Bible is his fans conceiving? Again, Alex Jones will never
encourage his listeners to demand open debate. Alex
would lose on all his lies like, he's been on with
George Noory a hundred times, or fifty times in
five years. Why does Alex lie to US all like that?
Because he doesn't really want Justice to prevail
where GREATLY wiser men or women would likewise prevail
through open dialog. Alex can't have that because
everybody MUST be under HIS NWO mind control.
Mind control on education, the Federal Reserve,
and FREEDOM. Alex figures having a gun to shoot
innocent Americans in the back is his brand of
loyalty to God and Country. Well, I, as Christ,
state it isn't mine. He would see every American
murdered, before allowing the notion that he, and
his likewise cult, might just have something to
learn about evidence being a REQUIREMENT to prove
someone's guilt or innocence. His godless commitment
is to escape Bush, and his zionist media controllers
with excuses that don't hold water in any Court of
Thee. Alex refuses to allow Americans to know why
the Constitutional protections are there to defend
yourself, because if you did, you'd demand the
arrest of Bush for treason, and call Ron Paul an
sell out loser who pocketed the millions conned for
being Alex's loyal fans. Alex doesn't like this Truth
because he's gotta be leading Earth's "Truthers"
at the pinnacle of his spear as a liar, where all
of History, is one badly drawn Alex Jones cartoon - a
dickhead. A true dickhead illiterate on the bible,
on Justice, on Life.

I must be on crazy pills
http://www.uruknet.de/?p=m51615&hd=&size=1&l=e

/ / Well, why haven't the banks just returned
the money?... \ \

People who know they defeat all "Conservatives"
in seconds with indisputable simple logic, will
eventually rule the Universe, if CNN, CBC, and
Alex Jones allow open communications on what is
understood by all as high acts of treason openly
committed without a defense of smart people
explaining why/how we are being rooked as idiots
on purpose. Crazy man, crazy. Oh.. anda..
justwondrin', would be the first name Reza be that
of the feminine or, echem.. masculine? Just
curious on language that's all..

Oh, logic like, "Buying in bulk is cheaper."

I be bagging the bushite zionist whores of
the demon antichrist, Our Mr. Bush Jr. Bush
closed 911 investigations, Bush lied about
Saddam not letting inspectors in, Bush never won an
word fairly in his entire war crime life of
game rigging with naked deceit and betrayal to
the cause of Man, die bushite die. Rock on
my friends, rock on.

"Army deserter deported from Canada, now in U.S. jail"

This is a for real war crime. Why? there was/is
no cause for the Iraq war. Truly. Example: why
bomb if you can go anywhere without delay? To
only murder innocent People INCLUDING SOLDIERS
to thieve from ourselves as war criminals is what
any rational person comes to understand. When you
destroy bushite grunts who war God for rape, torture,
and enslavement of our species, you save the
innocent lives of their next victims. To hunt
the godless bushite enemy, is to love Justice
as our glorious Humanity winning over the lawless
nazi grunts of the Third Infantry - who'll shoot
anybody, blindly as cowards, led by a Saudi, Buford
Blount. Their "leader" who left Iraqi's largest
weapons depot undefended for looting. Qaqaa. Killed
many a bushite nazi grunting lawless coward by his own
treasonous brand. And mumbling bushite nazi grunts have
what to say about American teens made valueless
victims for Neocon bounties? "whore yay" That's
about it..

LETTERS NOW RELEASED PROVE-Bush Intervened-To Suppress Torture
Evidence
http://www.democraticunderground.com/discuss/duboard.php?az=view_all&address=389x4994330

This is called ungodly nazi war crimes against
innocent Human beings.

Obama Gets Tough to Shield Bush Torturers
http://chris-floyd.com/component/content/article/3/1694-protection-racket-obama-gets-tough
-to-shield-bush-torturers.html

Who does Obama think we are as 'United' together
on pro lawless torture against innocent 'others'?
Wake up people, we are under attack by those
who refuse US Justice to win Freedom for
anyone. "Conservative" retards are completely
lost here, because they do not have the
intellectual skills necessary to understand:
a person accused of a criminal offense without
any evidence is innocent. Or, how about, No one
deserves to be tortured for confessions on
crimes left then unresolved for actual
retribution. [Aegis OPENLY murders innocent
families for more American paying for zionist
monies - P2OG - YOUR Spouse, YOUR Child, YOUR
family].

Following the crime scene leads of 911 to nab
the actual evil doers is beyond the will of the
deaf, dumb and blind? with lawlessness gaining
for monetary loses due America as corporate

cheaters. We are Brilliant, of that much I am
certain. Conservatives are minimally, idiots.

Worst Person in American Broadcast Journalism
http://www.youtube.com/watch?v=ll2YW32bqi4&feature=channel

This is like, so profound. Gibson's condemnation
is directly aimed at his own ideas of the subject
he has no grasp of. Wow. profound. See though..
this "popular" FoxsNews celeb has zero interest in
helping America succeed to defend freedom through
lawful actions, because he has no sight of a better
world blindly destroying itself. Hey Gibson! why
don't you try and be a good guy for a change! No
joke. Wow. Profound.

-

Israelis forced mother to choose which of her children would die
http://www.daily.pk/world/middle-east/9374-israelis-forced-mother-to-choose-which-of-her-c
hildren-would-die.html

/ / the soldiers told her she had to choose five of
her children to ï¿½give as a gift to Israel.ï¿½ As
she screamed in horror they repeated the demand
and told her she could choose or they would choose
for her. Then these soldiers murdered five of her
children in front of her. \ \

Funded by the American tax payers as a gift to
God as our stolen Humanity. Equal rights for all,
especially the Taliban's position in defense of
America, demanding evidence to form our guilty
verdicts.

-

Obama Accused of Blackmail over Terror Trial Evidence
http://atheonews.blogspot.com/2009/02/us-accused-of-blackmail-over-terror.html

Again, Obama is taking a position to torture innocent
people here as a traitor to Just cause. Just cause to
live in a free society. Torture warrants the death
penalty under American STANDING Law.

Video: Cop Punches Woman In Face Four Times During Arrest For Riding A
Bike
http://www.liveleak.com/view?i=99c_1233639102

Top Cop Johnny Judge rules: Ten years in prison.
Maybe fifteen if the dumfuk grunt, back from the
war against Iraqi children as a traitor to American
values, shows no remorse for his crimes against an
American women either. Absolutely any cop or soldier

who disagrees as true contempt for our freedoms with
punishment against this nazi trash pirating our
police uniform, WILL WARRANT death sentences all
around to ACTUALLY defend liberty in my America.
Any American father who prides in killing innocent
Iraqis for the escape of the neocons for 911 is no
father. And a wife should get the hell away from
a male who enjoys murdering helpless innocent others.
Children in such families should be challenged
by relatives through the Courts to save the lives
of our endangered offspring. Again, without water
or food, Iraqi children are murdered by Neoconner
grunts irrationally everyday with nothing to say,
aka, without reason but as Satanic Bush whores, to
make our God as Humanity suffer further for their
escapes as actually selling freely, lawless zionist
savagery.

KILLING MORE OF THEM - reporting war crimes to the Police
http://www.youtube.com/watch?v=gB-KaIBDNJw

Again, a bushite has no commitment to defend
America, for it speaks nothing for the arrest of
the neocon traitors. traitors like themselves whom
will murder innocent folks like your Self to steal
our common values. Wouldn't you glory in seeing
these savage grunts who on video, indiscriminately
shoot innocent families, or bomb a city entirely,
executed by Christian Patriot firing squads? or
televised to fry in the electric chair for these
documented war crimes? I sure would. It would make
our world a much safer place to raise a family
secure in knowing, bushite grunts as enemies of
everyone, were hunted to extinction for their
crimes against our Humanity. Hunted by Johnny Law,
the True Spirit of America.

Johnny Law for Coast to Coast radio Host!

yaahhh im a real person! Wow eh? Now,
let US bag some bushite scum for the Gipper.

UK judges accuse Obama Administration of suppressing torture claim
http://www.timesonline.co.uk/tol/news/uk/article5661291.ece

Yeah really. What kinda world does Obama take US
for here? Does he actually believe we hold no
interest in being attacked as ourselves, the
innocent forsaken? A reminder: an American was
executed under Iraqi law without any evidence
brought against the accused, while the grunts
were offered an excuse to seek not the culprits

at the terror scene. The case was lightly reviewed
at democracynow, a year or two ago, and can be
found by searching for a grunt pretending to be
an ambassador to Romania. A case where the Judge's
life was threatened by a "General", where if he
didn't order the death of the innocent American
citizen, the grunt with the General would murder
US all right then and there. The Innocent American
was murdered as forsaken for value shared by
free men.

-

(pet bed cat trees...)
http://www.petbed-cattree.com/cat.html

Hey! this stuff for cats and dogs looks pretty
coool. Check it out if your a pet lover!

Near Impossible to believe!

/ / "similar themes go through all our streams. And it all
comes back as Confucius says, "Do unto others, as you would
have them do unto you." And Christ said that, Hillel said
that, Buddha said that, everybody says that, cause that's all
it is. But bushite, he wants to accuse People of criminal
offenses without any evidence, and indiscriminately slaughter
everybody in countries, for no good reason but to be OUR
ENEMY, an ENEMY OF ALL PEOPLE." \ \

-

AG Holder-- First, Jail All Bush's Lawyers
http://www.consortiumnews.com/2009/020309.html

For actual documented criminal actions against
American interests in defending ourselves from
indiscriminate robberies, tortures, or mass murder.

"Judges Bribed by Private Contractor to Sentence More Kids to Juvie
Detention"
http://www.philly.com/philly/opinion/inquirer/20090128_Editorial__Judges_Sentenced.html

Christ speaks!! Echem.. This is called a criminal
action to falsely imprison American children for
more stolen money. Will the contractor be arrested,
tried, then executed in America to defend American
children? Unlikely, because it isn't as important
as how fat Oprah is today, or as Alex Jones the
bigot would say, on how daily, the hidden NWO elites
are responsible for every criminal action against
Liberty in America, not war crime dictating LIAR
Bush who told US Saddam wouldn't let the inspectors

in without corporate news correction, Bush, who
closed Police investigations on 911 for Enron, KBR,
and the Kissinger associates. And certainly not
Bremer for personally stealing tens of billions,
no no no, "just puppets" "just puppets" as instead,
the Illuminati in other words not allowed spoken
understood with Alex Jones NWOers. I want a free to
speak arena where 50 percent of what Alex spews is
truly dumber than stupid. Why? because he is controlled
through his personal weakness of bigotry, to actually
believe foolish things as factual. Examples are
truly endless when we discuss Alex Jones'
dumminess, but here is one example. Alex states
911 truthers were attacked in a TV show as NWO mind
control- but, the "truther" he referred to
talked in the drama on there being NO PLANES!
A dis-info bushite stooge if ever was one depicted
with special effects. We suffer with his bullshit
every day, knowing if we tried to phone, would
not be granted a minute because I, in support
of Freedom for America, make all bigots look truly
dumb as fascists lashing out at nothingness to
divide our masses. And apparently, he can't have
America becoming greater for defending ourselves
fairly through Judicial actions.

-

which side are YOU on? by REBEL DIAZ
http://www.youtube.com/watch?v=8Dr05tXktSo&e

The side where a person accused of a criminal
offense without evidence is innocent, and in the
case of capital accusation, the false accuser
deserves severe punishment as an enemy to my
Humanity.

U.S. partner, not Hamas, firing rockets into Israel
http://www.palestinianmothers.com/profiles/blogs/us-partner-not-hamas-firing

/ / The probe found the Islamic Jihad rockets were
actually fired by Fatah. \ \ Whom Israel in response
to the confessed by all to be true facts, murdered
innocent Christian children in Gaza as war criminals.
Actually claimed it was regardless who shot the tin
can rocket that struck no one harmlessly. Again,
Nazi Israeli responded by murdering innocent Christian
children as war criminals with "disproportionate"
force. War criminals who murder Humanity to steal
our shared values.

-

Dennis Kucinich "Israel is Killing Children With Your American Tax
Dollars"
http://www.youtube.com/watch?v=HrtPpk6nhF8&feature=related

Israeli openly admitted that they targeted those
innocent Christian children for MURDER - as -
continuing "disproportionate" force in our names
as enemies of God and Humanity. They are not Jews,
but of the evilest group of lawless nazi savages
pirating the government of Israel away from US Jews.
I demand open debate in America, and Americans refuse
me by not likewise demanding international coverage
on the Coast to Coast radio networks. Let's change
this by communicating.

Ceasefires, Israeli-Style
http://sjlendman.blogspot.com/2009/02/ceasefires-israeli-style.html

They admit TODAY, as yesterday, and last week, month,
year, decades, that they target completely innocent
people for murder to punish Humanity for believing
in God as Just, or real freedom understood as practiced.
Libertarian couldn't give a shit on a issue such as this,
that they keep everyone ignorant of through hypnosis. Israeli
openly admit to thieving innocent peoples homes, to them
be sent at gun point, to live in a concentration prison
death camp.

http://www.davidduke.com/

/ / ..the Israel Prime Ministeri¿½s speech in which he
actually boasted of his power to order the U.S. President
as one would a dog. \ \ and all American men can't for
some god forsaken reasons, can't for their lives, phone
George Norry to be hung down on. George Noory is a "good
guy" for aiming to go ballistic against every American
who refuses criminal orders to destroy themselves.

Obama set to allow Bush-era ï¿½torture flightsï¿½
http://timesofindia.indiatimes.com/Obama_set_to_allow_Bush-era_torture_flights/articleshow/4067338.cm

What the fuk eh? Doesn't Obama know this
crime warrants death in America according
to the war crime act? Does he believe America
just will never have a chance to speak for the
interests of US as innocent Human beings he is
planning to torture as an enemy to Life?

Refusing to Defend American Values

Yoo: Bush okayed torture to outwit defense lawyers

This is why it warrants the Death sentence. Remember
corporatist Amerikan citizen, these torture victims
that include children as younger than a hundred, had
not been alleged to have ever committed a crime in
their entire lives. Victims tortured to death for the
pleasures of those Satanic, such as General Geoffry
Miller, who tell US today as confidenced, they do it
because, patsy wasted American soldiers will just refuse
to hunt them down for formal executions. Let's change
this for our Humanity in this future, to look back,
and know, American males were men of the World, who
stood for the principles enshrined within every living
Constitution. A free man shall not be jailed, or
tortured by anyone in our names as Governed, without
the perpetrator tried publicly for execution as our
Love of real Justice. As first degree mass murderers
warranted death sentences under the War Crime Act
ushered by Reagan!, all done in for our protections
of their next innocent victim - ourselves. Or
die a death in corporate tyranny worthy the title,
cowardly traitors to God and Liberty. Blackwater,
CACI, AEGIS, KBR and the like will all be hunted to
extinction for refusing to quit their lawless Rape
and mass murder, murders done for more stolen money
as America's name high-jacked. The Lawless enemies
shall be prosecuted by the honorable Soldiers of
the Good old, Red White, and Blue. Count me at
our words on this, I am,

King Johnny

-

Ungodly Israeli Nazi LIARS Continue to Murder Children after "Truce"
http://www.youtube.com/watch?v=-HQO0774lx4&feature=PlayList&p=4199C9262539936D&index=0&playnext=1

A truce means nothing to Hamas?, who states
much of no complaints as in support of Israeli
Nazi lies, why? Have you seen where a blimp is
traveling about five miles an hour, fire bombing
thousands, and none have even a pullet gun, never
mind an Iranian rocket launcher to shoot the Satanic
demons down for God as Love? Why doesn't Hamas
at least admit, like an Israeli General has,
to be funded by Zionists for cash gains paid for
by Zionist Amerika? Why? Why is it that Hamas
suffered near no loses, but all the Cops who
voted who knows, died murder victims trying to
defend our family from Texan child rapists?
Along with thousands of others targeted as
innocent Peoples? Targeted. Why? Nazi Israeli
broke the truce!! THINKTHINKTHINK Demand coverage!
Hamas certainly isn't. ..maybe because they're
illiterates on the Cause of God's Will being
Just?

Bushwhoring Enemies of the American Police

What a demon enemy of life these bushwhore enemies
of American Liberty are eh? No concern whatsoever,
for all the teen soldiers conned to die for those
who committed 911 in NYC. The millions of bombing
victims, the tortures, the rapes of American women,
STILL, TO THIS DAY, left undefended by "the law".
Evil enemy of everyone these demon fuks are. How
difficult is it, to understand the facts they feign
complete blindness on? They WANT to con you as the

coward to life they are, willing to kill America to
make their antiChrist lawless enemy Mr. Bush happy.

From years after the fact still demanding Justice now:
http://groups.google.co.uk/group/alt.military.uk/browse_frm/thread/ca0e34fb32caeb0a?hl=en&
scoring=d&

Huh? "at last been disarmed..." ? How does he figure?
The equation hasn't changed. Example: The same
unaccounted anthrax, (that was disintegrated into ash),
still is not able to be measured as completely accounted
for, (never could be), but this bushwhoring war crime
apologist, tells US, it was only though the lawless
murder of our good friends and family for countless
generations, that he now attests without reason, or
evidence, to find Iraq in "fact" disarmed of it's still
nowhere to be found, weapons of mass destruction. (An
irrational reason he pronounced previous in corporately
broacasted public support of instigating heinous war
crimes against our humanity under the leadership skills
of the evil lying demon antiChrist, our Mr. bush Jr..)

Ron Paul defeats 5 TV 'experts' in 10 minutes
http://www.youtube.com/watch?v=0k92fTDReHg&e

Ron Paul is a traitor. They stole the cash Ron.
And, the Iraq war is a war crime. But Ron, the
Fascist, doesn't want THESE FACTS uttered. Why?
Because wiser men would prevail, wiser men like
me who understand buying in bulk is cheaper. Those
like Christ who understand, who KNOW, the banker
doesn't cover our loans - so why give them as much
as a taxed red penny?, let alone trillions as
officially unaccounted for? They are stealing the
cash Ron. Ask yourself: Why has Alex Jones
forbidden his bushwhore cult from understanding
Bush doctored the NIE?, or of iron flowing like
water from the towers? Because wiser men would
prevail and he can't have that. He called shooting
innocent men in the back, an act of liberty. I,
an actual god, unlike Alex, lie near never, but
maybe to myself when I'm lonely. Alex yes will
tell you rapists are free to do what they will
in Texas to American children, un-arrested, but
he won't mention it when the police chief is with
him on air, talking about how he'd like to be
exempt from traffic tickets for being so popular.
NO MENTION of the rapists walking away without
arrests made, no mention of Bush's documented
treasons on 911. Where are Alex's priorities?
In selling YOU out so he can be wealthy like a

bankster?, and have special rights over everyone
else that drives drunk, or speeds? a big hero
standing over our dead soldiers yelling, I told
you so, I told you so, I was right, I was right.
Again, understand: It is not by my will to deny
open debate with America, it is Alex, and his
demon buddy George Noory that denies out Humanity
this right. And when people try, like Peggy, or
Black men on Jewry, Alex lies cheats and steals
our wills for further thefts. Ron Paul's family has
millions taken from loyal Alex Jones fans. MILLIONS!
Does Ron do commercials with that money highlighting
the bushmob's plan to invade Afghanistan, dated two
days prior to 911 for Enron? Of course not, wiser men
would prevail to expose him as the charlatan charity
raider he is regarding Health Care, Social Security,
Public Schooling, earmarks.. It is unfair to measure
Ron against corporate nazi zionist whores of MSNBC who
willing, openly, kill American teen soldiers for
criminal neocon gains, as an honorable gentleman's
talk. Half honest People like Ron are extremely ignorant
on the workings of our world. EXTREMELY. I joke here not.
Evil is the deceived disguised - translated - evil
people are always dumb.

Corporate America says no, Charlie Manson was a genius,
but not, that most Americans are prone too easily to
suggestive states where they can be made to believe
anything blindly. Think: what does, "bin Laden did 911"
mean anyway? You should know of what I'm trying
to teach you here. That is how
Alex knowingly or otherwise, steals our rights, by
beating off he knows everything already. And some,
if not most, actually believe him without knowing
squat either. It's sooo easy that way - no study
required!! LIBERTARIAN HELL! Everything is not on
the Internet, where it near should be, but regardless,
a Libertarian can't be bothered to read anyway.
"Free Talk Live" is the best example for this: the
two hosts are unbelievably ignorant on just about
every single subject under the sun, but beat
CONSTANTLY, on how greatly wise they are as drop-outs.
You wouldn't believe any of them when they speak on
Freedom, if you simply understood, an innocent man
does not deserve to be in OUR prisons, or tortured.
Under any circumstances that Obama has excepted for
our excuses. Magna Charta. But in Alex's 'genius' mind,
he doesn't need to actually understand he is a for
sure bigot, (measures another unfairly in a group HE
concocts from blind hate or personal fear - typical

CONSERVATIVE and/or racist) who has no problems with
that at home, or at work. Provable in seconds by
OPEN DEBATE, but Alex ain't gonna take our calls
because, he can't for the lives of every People
person thought of here, admit he could have
something to learn, therefore, the NWO is
unstoppable in his brain washed cult of indifference
to Justice practiced for the benefit of all treated
fairly. Why? He's not wise enough to respect the great
minds of the audience, and I personally believe,
he doesn't even have the good judgment to own
a gun. (I mean, why wouldn't Alex find my stories
of OUR Justice system triumphing by my single hand at least
minimally beneficial to his blind cult followings? to not
hang up on me immediately while spewing lie after lie
on how I'm top secretly a dis-info NWO artist working
for Bush? or whose voice sounds too friendly to trust?
like he has done the last four times I've phoned -
Hey! I can be an asshole if you want - no prob.)
Perhaps it's near because, Alex Jones is blind, and
as such, could actually be found guilty in Texas for
murdering those two innocent black men shot
in the back with his approval to release the murderer
from a RIGHTFUL death sentence prosecution. "law of
Parties". He is a party to the crime, for he worked to
support the release of the FOR SURE, FIRST DEGREE MURDERER.
Sound like an America you could live with? I didn't
think so either. I wanna be Alex's Attorney. Texas is
a State of massive lawless corruption, as dire
incompetence in legal affairs where they OFFICIALLY
plan executions against innocent People not established
to have harboured criminal intent! With Jury Trials!!!!
!!!!!!!!!!!!FINING THEMSELVES GUILTY!!!!!!!!!!!!
While Alex does express murderous criminal intent,
and the Police chief calls him a good man for no
scary pressures. What the fuck is wrong in Texas
where they mess themselves like this regularly?
Imagine, while Bush with the Neocons escape, and
Zionist Israeli target to murder Christian School
girls OFFICIALLY, Alex doesn't want to have to pay
traffic tickets like the rest of US. What a douche bag
to tell he LEADS our Truth movement I say. Now, I'm
not saying he shouldn't contribute with the truths
WE SHARE, far from it, it's just he can't have our
cut off switch to silence our objections to his exposed
foolishness, and/or blatant criminality. I'll give him
a chance, for starters, to criticize any position I take
while we all publically call on ourselves for
assistance internationally. Like on his "buddy",
George Noory, deserving to be tried Publicly for the

traitor he is, and be formally executed after his day
in Court. Our Courts. Teen soldiers have been conned
to die by George Noory for the escape of the neocon
terrorists who committed 911 with Condi, Runsfeld,
Bush, Myers, Tommy Franks, and General Ahmad. AND
HAPPY GEORGE NOORY KNOWS IT - and cons with lies
naked to the ear of any who can listen or hit record.
A NAKED traitor to the cause of Liberty if we ever knew
one regarding the War Crime facts of Iraq. .And
Ian Punnet is an evil godless enemy Bush whore who
lies too to get YOU killed as the innocent soldier
forsaken so don't forget.. It's YOUR life. It's God's
Gift. Now support our rise for popular international
debates to get these Neoconners behind bars
awaiting Public Trials! "Public"thatsoyu!! Get to
the Phone to call someone to care man.. Johnny
Jesus has arrived! Justice Will Be Done in this,
Our Kingdom to Come.

Justice to the war criminals of
indiscriminate warfare would better serve ourselves
to halt for our safety. The bushmob did 911.

1. The ISI's General, Mahmoud Ahmad funded 911's Atta

2. We have video of iron flowing like water from the towers

Humanity Under Attack by the Zionist Enemy of Life

GAZA APPEAL THE BBC & SKY REFUSED TO SHOW
http://www.youtube.com/watch?v=c9kwpxlZorI

Not only that but the BBC argued that to show
innocent Human Beings suffering, in CRITICAL
life threatening need of desperate food and
water that Israeli nazi stole, (because they are
unlawful murderous thieves), would have them look
like they were partial to serving Humanity's
interest in compassion for US humans. Over the
Israeli terror Nazi tactics of indiscriminate
slaughter for more Amerikan welfare. Wicked evil
nazi bastards who too, DO NOT THINK IT BEST to
report Peter Powers committed the London bombing.,
Oh yeah, and mercury is neural toxic, anti-psychotics
make us crazy, and sodium fluoride makes us
stoopider while weakening your body for big cash
surgeries - ultimately leading to a profitable
death for dah' winnahs.. So, they, the BBC-NWOers
just needed to avoid the bath or shower,
humidity, Pepsi's purified bottled water product
lines, koolaids, swimming pools, Jacuzzi, Hot Tub,
Sauna, private Whirl Pools, and.. blh blh blh

/ / the FBI says no.. There is not a thread of
fact a zionist offers to form YOUR own mind in
respect for your rights being equal to ours. \ \

Who is the guy who keeps writing such things,, and
shouldn't he be recognized as Promotional to raise
all spirits towards a better future? I'm with him.

The U.S. Is Required To Bring George W Bush & Donald Rumsfeld Before A
Court! U.N. War Crimes
http://www.youtube.com/watch?v=BRAlqkPbjP0

Olbermann | Bush Years: 8 in 8 Minutes
http://www.truthout.org/011809Z

Bush and Cheney are traitors to the cause of
American Liberty. To leave them free, is to leave
America un-guarded from further transgression.

The bushmob doctored
the NIE. Conned Congress, and Soldiers. Did 911,
by closing criminal FBI investigations immediately.
Alex and George don't seem to want US to know
these FACTS that demand arrests of the culprits
responsible for high treason against Johnny's
America. Alex wants your money, and EVIL George,
our enemy, wants your soul stolen for Satan.

Turley: Obama 'accessory' to war crimes if no prosecution
http://rawstory.com/news/2008/Turley_Obama_accessory_to_war_crimes_0127.html

Understand, Alex Jones doesn't want Justice
for Americans because he loses out to better
men that usher a greater life. He doesn't want
the evidence of George W. Bush made public to
defend American teen soldier's lives. The true
fascist Alex Jones, who in silence supports the
escape of Bush for treason, will fail our true
voice for Justice in our times. WE DO NOT rule
the truth we share equally committed to defend
ourselves from lawlessness. And you'll never
rule my right to speak freely over your intent
to sell us all out for monetary swindles, just
like Ron Paul did. Understand: Ron Paul doesn't
even acknowledge 911 was an inside job, or, that
Bush gave zero evidence to form Your opinion.

Alex Jones, the Slave, told US today that
he challenged Bush for eight years - Bushite
lying nazi traitor. Not only that, but he
also ridiculed those who wish to blame Bush
now for anything! Again, he doesn't want
Justice where bad guys can't steal from
ourselves unrepresented. Ron Paul is a

multi-millioniare, made rich by charitable
aid conned from Alex Jones' NWOers! Alex
Jones doesn't have a problem with that, we
do.

Israel to be Judged - Universal Petition
http://www.tlaxcala.es/reponse_signataires.asp?lg=en&ref_campagne=10&Page=1

The demon LIAR zionist Israeli is a godless enemy
of Humanity, much like everyone at Foxnews, CNN,
BBC, and the CBC. Our revolution against the godless
bushite shills, will not allow our revolution
through speaking honestly, (to become of ourselves
something greater), a chance to be televised for
our benefits. Bush closed criminal investigations
immediately after 911. According to the FBI and
Senator Dashle. CNN says you have no power, Foxnews
says you have no power, the BBC says you have no
power, the CBC, the same, like Alex Jones NWOers...
but well, don't believe it. YOU Do have the Power.

http://www.iran-daily.com/1387/3324/html/east.htm#s359247

/ / International attorneys have filed war crime
charges against 15 Israeli political and military
officials including Ehud Olmert, Tzipi Livni and
Ehud Barak. \ \

-

We must demand open communications to bring back
values WE ALL would agree to through polite debate.
"Conservatives" don't want this Freedom idea
expressed in general terms because, a "conservative"
is universally, minimally. a bigot. Why? Life isn't
like, their way, - then- all other opinion under
the sun on how things actually get done. (Aka
"socialist" traffic light repair men, or "liberals"
who want to treat The People fairly). Or who we are
as equals to our laws fairly practiced. Pay attention
to what I am saying here. Liberals can be Dicks with
a capital D too of course. But a Hannity couldn't
survive 2 minutes with me speaking on his very real
treasonous behavior in OUR public arenas. Behavior
done to escape the 911 culprits from the long arm of
the Law, with his conscious will of criminal deceit
exposed, we all learn to better defend ourselves.

And Shawn Hannity can't have that for ourselves, he takes too much money from ourselves as talentless by keeping US in the dark dying needlessly for traitors never elected publicly.

Who am I you ask? Johnny Law. at your service. Look me up with usenet to discover, we live in a world of idiots everywhere pretending to be somebody by lying. While I want US all to truly improve our condition by actually understanding how bad off we are by failing to respect ourselves for correction. Too many, know it alls, with not enough to know you need evidence to form a guilty verdict against an accused man or woman. Not according to CNN, CBC, MSNBC, Foxnews and the like however. Let's change this by supporting my challenge for top billing at the Coast to Coast radio show hosting. Look for me coming soon!!

-

Unseen Gaza High Quality: Part 1 of 6
http://www.youtube.com/watch?v=UeezoWRu1FU&eurl=http://whatreallyhappened.com/

Why is it that numerous visits don't change the view count? What is this business of a=a+1, the top secret, I'll go rhythm, that is way beyond our comprehension in it's scientific complexity? For Americans, okay, but the Human species just isn't this dumb.

While Zionists OFFICIALLY target Christian school girls for mass murder, CNN instead reports that bushite grunts attacked girls in Afghanistan, posing as Taliban. I WILL every celeb at CNN to be arrested, tried and executed for the reporting they have done today without facts. Remember: the Taliban played no part on escaping those responsible for 911, and opened schools for girls, and were brought together on the single purpose to defend women. Death to CNN reporters to LIE for killing OUR school girls. I HATE zionist enemies of Humanity and God I am.

The Torture Ban that Doesn't Ban Torture
http://atheonews.blogspot.com/2009/01/torture-ban-that-doesnt-ban-torture.html

/ / Obama's Executive Order bans some -- not all -- US officials from torturing but it does not ban any of them, himself included, from sponsoring torture overseas. \ \

Is America a nation of Law to Live freedom?
Because this SPECIFIC deviant action of Obama warrants the death sentence under Reagan's "War Crimes Act".

SPECIFICALLY. Or, is it you falsely believe Obama
can do no wrong against innocent people here, where
an illiterate nazi grunt, maybe from South Africa,
will kidnap YOUR children, and torture them to
death for sadistic pleasure, with as they did using
power tools caught in Iraq, according to Iraqi
government official(s), and several soldiers from
Oregon, all because Obama has given an ILLEGAL!
"excuse" to NOT support following the crime scene
leads at our REAL murder scenes? Again, death to the
bushite dumfuk enemy of God, death to the enemies
of a freeing Humanity striving for a just society.
Obama needs to be arrested for this under the Law
as it stands I'm sorry to say my friends. Why?
Torture is illegal in all 50 states, (as Reagan
directly planned), no matter where you ship the
innocent victim to, or from! Read the War Crimes
Act, then demand Justice today, otherwise, it's
YOUR funeral. Obama wants to secretly torture
Peoples here, while lying to US ALL that he doesn't!
A TRAITOR! Who also wants to give bankers 100s of
billions of dollars more to disappear, that WE pay
for, out our door, never to be seen as our own
again.

Jack Blood interviews Richard Andrew Grove, an AIG insider and
whistleblower
http://video.google.com/videoplay?docid=6546044203900048624

Alive We Say

And Alex Jones gives us the same guy twice
a week that blames the Illuminati, while
encouraging that YOU TOO! can get money
for nothing like the banksters. Just give
the Alex Jones', NWOers, the "truthers" money
money money money. No time for affording the
explanation that the TREASONOUS bushmob
doctored the NIE. That Saddam wasn't in
violation of 1441. That a NEOCON is
identifiable for it's demonic LIES
against God and Man. Never to tell, the
private bankers don't cover OUR loans,
that Bush PERSONALLY worked to close

Police investigations immediately after
911 (obstruction), or that WE have video
of iron flowing like water that PROVES,
without doubt, bin Laden couldn't have
single handedly placed the explosives
in the buildings, or stole the black boxes.
Because someone surely would have spotted
him dragging his dialysis machine what with
all the professionalism of corporate news
media coverage regarding our horribly
suffering worlds. Alex Jones ignores the
treasons of Bush, as a Bushwhore, and
instead, tells US of how Obama is Bush on
steroids. He only wishes. What about
Justice for Americans Alex? Why for do you
forsake ourselves? For money? What about
the lives lost to mass murder, that you
allege to champion OUR TRUTH without saying
much of anything on real Freedom?, on real
Justice like your deviant election rigger,
Ron Paul? Well, no wonder, Alex told US he's
into shooting innocent American People in
the back as a tyrant of evil, a white Devil
if you will. Kids too if you dare look in
his back yard for a copper. See? Now if Alex
doesn't allow US to speak, more and more will
understand to know why. I am a defender of
all that is right and just in this world,
because I don't need to lie like Alex does on
a huge host of issues. I'm more like Jessie
Ventura, in where I don't need/want to lie.
If I end looking foolish, (of which I like
never truly am), it's a benefit, because that
way, I've learned something. Alex knows
everything already, and 'is always right'.
Like I say Retarded. You weren't right by not
understanding that the banker doesn't cover
the loan. One example of easily hundreds. He's
a typical, he knows it all, know nothing dumduk
American. Hear him on health care speak as
Ron Paul does, and know, I defeat them in under
ten seconds. TEN SECONDS. This is why he hasn't
in years, allowed me to speak more than five
or six words. He's rather all America die, than
admit he does NOT rule our 'Ocean of Truth'.
I want the challenge of opposition through debate
to PROVE my skills beyond reproach. Alex,
every time, just hangs up on anyone who tries
to improve our communications by factually
speaking. Why? Because he IS TRULY deeply

ignorant on what freedom or Justice means. Why we have law. What a consensus is. Allan Watt is severely disabled in this regard, another Alex Jones favorite. And this is why, Allan can't take calls openly either. He has jerked off with himself too long to quit now learning super basic precepts, for like Alex, he "knows" the inner workings of the 'genius' NWO elites. Not Law 101, not Bush, not Rumsfeld, Not Condi, not Torturers, not bank robbers, rapists, or even petty thieves. Allan Watt isn't a bad guy, he's just a chauvinist pretending he actually knows something, when his real disability is directly related to his absence in understanding understandings. Doubt is a near foreign concept. A challenge for Allan: can you get your 'genius mind' around the fact that Peter Powers did the London bombings, and not the Illuminati of 1463? and if not, why are we so dumb to our present plight that way? Don't get me wrong, Allen has much to offer, it just isn't the issue right now on saving our dying futures. Maybe I was too hard on Allen, he is really actually kinda cool. Alex Jones too has many incredible moments of ecstatic clarity increasing in all they joy of seeking enlightenment. .. Ok - but this is serious business that requires little dilly dally with what we'll have as a side dish in Paradise Lost. We are talking Human Lives have been destroyed by our inaction to remedy these failures to communicate effectively. and.. Jeeze, the weight of my responsibilities, as just plain John, being a/the Legos Man - for like the Family and everythings, get's me never forgetting, all we got are these words left dormant from the power they truly possess in the minds of the wise asses. And.. here I am. I'm a Talker of Words looking to make a break in the NewZbiZ. Zzzz... Alive We Say! Alive!

King Johnny, from Earth, has come for talks.

-

The Zionist enemy, the most evil nazi sons-of-bitches who openly advocate tyranny and oppression through mass murder of ourselves as the innocent left targeted defenseless. Enemies of Jews everywhere, the Zionist cares not for facts on who's Life it destroys for stolen gain by lying. That's why they target Jews, for fear the

Light of Truth would expose them as the Nazis they are.

Hamas doesn't have a military though, so,
why not demand the arrests of those who
broke the truce, and murdered innocent people
indiscriminately, on plans more Jews would
die for cash profit? Profit paid for by
zionist amerika? - the false imprisoning
torture and rape center for Neocon
Freedom.

The self-defence defence
http://www.guardian.co.uk/commentisfree/2009/jan/23/israelandthepalestinians-gaza

/ / This has been a central theme of the war in
Gaza: not that hundreds of innocent people were
killed, not that over 5,000 were horribly injured
and not the sky-high human and monetary cost of
wrecking homes or razing infrastructure. \ \

Court petitioned to arrest Livni upon arrival in Brussels
http://nawaat.org/portail/2009/01/23/belgian-court-petitioned-to-arrest-livni-upon-arrival
-in-brussels/

"We believe there were dozens of IRGC
personnel in the Gaza Strip during the
war," an Israeli source said. "Some were
killed; others went into hiding, and
others escaped."

See? the demon enemy of God speaks no
evidence as a TRAITOR to every Jew. A terrorist
nation that still steals humanitarian aid in
our public realm of left defenselessness. The
false allegation deserves a death sentence
by Jews against the war monger Zionist enemy.
A cause that Iran should champion, if in fact!,
this allegation by OFFICIAL WAR CRIMINALS WHO
TARGET FOR MURDER OUR SCHOOL GIRLS, is on it's
face, unsubstantiated as patently, demonically
false. As typical from any godless Zionist.

Where are the Americans asking for the
formal arrest of Bush for high treason?
Whoring for Alex Jones's contempt for REAL
Justice? The ignorance of all American
talk radio hosts speaks for itself. NO
knowledge on why acts of high treason, are
crimes against every American. The bushmob
doctored the NIE, and Alex doesn't want
Americans to know, because if they did,
they ask, why does Alex do everything he

can to escape those personally responsible
for 911, while then asking for money to
continue his fight against freedom in
America. Again how much money do we have to
pay Ron Paul or Alex Jones before they
will allow the knowledge of the Iraq war
against Human will is criminal? How much?

Obama! feel free to call
on me to help out with a plan for judicial
actions. That offer goes out to everyone in
Palestine, Canada or Britain too. Russia,
let's help out these fools by freely
communicating, what say you? Justice
for all is freedom to be. The Israeli cop
killers must be brought to justice for war
crimes. Those cops, were cops. And I,
am a man.

Alex Jones Rocks!

Now Alex has problems in "my" mind because I am
an ACTUAL genius, and he is generally, an idiot.
Today, he did one of his usual commentaries, however
this time, he was pretty honest with himself, and
his love for Ron Paul. Ron Paul sells incompetence,
and Alex corrected correctly!. that a.. sorry Ron
but these banksters know they're robbing us as
undefended blind men essentially. That's what I'm
talking about!! Look, Ron Paul can be a dumb Ass,
although, he's still not all that bad a guy. A Dumb
guy on things like economics sure, Justice, warfare,
Health Care, Social Security, ect. ect. but still.,
like a child learning of why the sky is funny
blue, isn't all that bad a guy really. He's
certainly not a war criminal, like Bush or
Rumsfeld are. Doing 911 then sanctioning torture.
While Neocons Champion sending illiterate American
teens for death as war criminal. Think about it.
Maybe he is..

-

ï¿½We have all these documents that are now
publicly available that prove that these
methods of interrogation were intentionally
ordered by Rumsfeld,ï¿½

Let us understand. These actions "give" a guy
like Willie Brand "the right" to RANDOMLY kidnap
men, women, or children, and torture them to
death for sadistic pleasure with his faggot

Capt, Christopher Beiring. (I think that's how it's spelt). But anyway, this is the truth. A bushite is a godless Zionist whore of Nazi evil, an enemy of America, who wars YOUR Freedom with criminal "excuses", for refusing to support the arrest of those responsible for 911. A TRAITOR, and could be wannabe rapist, robber, or 911 mastermind ringleader. Torture is illegal, and warrants the death sentence, according to, Reagan's "War Crimes Act". Some only suggest, that this was why someone tried to kill him as honorable. Death to the torturers of our innocent families, torture they do without apology as Zionist Military "Judges". Instead today, where they get salaries paid in the billions by the zionist giving nation of, a-mirror-kay, echem, America. Johnny's America. A nation where Justice will rule for the favors of all treated equitably with or without you. Honor me in company my friend. We have no rivals.

"they do not understand, the private banker never covers the loan. Never does a private banker reach into it's pocket to borrow US to begin with - so as a consequence, the bankers have just pocketed all the 'free' loot for nothing, TRILLIONS, and are not saying why should they help anyone else up with charity?" Then went on to say, it wasn't any of our business with what they did with the money. (But for to cover criminal fraud in the derivatives market, where the true value of said commodities were backed by ZERO capital. ZERO DOLLARS. WORTH NOTHING. So, think about who's truly giving it always here until Johnny, the man who came out of nowhere, arrived to explain everything in five or six minutes.

Support Johnny America for Coast to Coast Radio Host!

-

Gaza: 'I watched an Israeli soldier shoot dead my two little girls'
http://www.independent.co.uk/news/world/middle-east/gaza-i-watched-an-israeli-soldier-shoot-dead-my-two-little-girls-1452294.html

Getting away with murder as 'God's Chosen' chosen for death by war crimes trial more like. Death to the criminal zionist enemies of Humanity. Zionists who falsely accuse without evidence to respect our rights,

like TV corporated Americans who treasonously LIE,
'bin Laden did 911'. Enemies of Freedom for our
Humanity.

[JEWISH!] Arrest warrant: Ehud Barak
http://www.wanted.org.il/ehud_barak_en.htm

/ / For violations of the Rome Statute
& 4th Geneva Convention \ \

They are murdering Cops

2-Bombings target house of Abu Ubaida El Jarah,
Police Director in Sheikh Ridwan area.

3-Airstrike targeting Al Zaytoun police station.

Nazi Israeli are murdering Police Officers,
and the families that live in the areas near
them as once defended from criminals.

It's like saying, every Cop in America deserves
a death sentence by thousand pound radio-active
waste based uranium/plutonium war shells because
Bush stole the election, then committed 911 with
the Neoconned Partners of Public Crimes, Cheney,
Rumsfeld, Condi with General Ahmad and Myers. Now,
I ask all Cops, does that make sense to you as
still remaining silent? You can be a man too, why
don't we all just give it a try. To the Telephone
Robin! Israeli are attacking prisoners held
criminally in their own Death Camps!! GET ALEX
JONES ON THIS! and.... the ADL! er.. JDL.. er..
let US join forces for the common good of all,
as so we will benefit everyone. That means
Justice for all, especially the Taliban for
defending American Freedom by demanding evidence
to form a conclusion of capital accusation,
regarding an unsolved case of mass murder.
Taliban blamed it on concern for life draining,
!AMERICAN ENTERTAINMENT TV! sports, weather,
Music, and news about some, who knows war we are
committed to now die you for, for better or worse,
of mass death and suffering against innocent
Peoples all for glorious Neocon tyranny of inter
national private banker IMF enslavement plans!
in some far off distant places. America! I am
King Johnny.. I am from the Planet Earth, I've
come to share the knowledge of Justice in our
times on behalf of this, Our Future Great
Triumph over Evil. We come in Peace with
a sword for War Mongers, and a choice for

'lawless' grunts of ungodly action against
Life as we live it. Targeting school kids
deserves death sentences, don't you think this
value is what every soldier should hold proud
with Johnny in America? In Israel? In
Everywhere?

Chief Israeli Nazi Rabbi "All civilians living in
Gaza are collectively guilty for Kassam attacks"

ï¿½In spite of rising the blue flag of UNRWA on
our schools, the Israeli army has been targeting
those schools by missiles and tanks shells.ï¿½

U.N. special rapporteur on torture calls on U.S. to prosecute Bush and
Rumsfeld.
http://thinkprogress.org/2009/01/21/un-bush-rumsfeld-torture/

[SATANIC ENEMY] Israeli warplanes attack Gaza during Truse
http://www.presstv.ir/detail.aspx?id=83073&sectionid=351020202

Satanic Enemies of Humanity Kill 8 Yr Old Girl During Fake 'Ceasefire'
http://uruknet.info/?p=m50983&hd=&size=1&l=e

A MEMORANDUM OF UNDERSTANDING TO KILL MORE
http://desertpeace.wordpress.com/2009/01/20/a-memorandum-of-understanding-to-kill-more-pal
estinians/

/ / Dr. Condi was very smart when she declared
at the outset of the most brutal Israeli war on
Gaza that it was the Palestinian side which
is held responsible for violating the six
-month truce. \ \

She lies, Innocent Christians die.

Nazi argues it's good to get killed Jews by
breaking truces with prison camp.

They shoot Peoples indiscriminately telling US
that's how evil they are to argue it's Your
fault though.

This post was passed to near everyone in our Secret
Service defending Obama. Let US demand Justice for
the Victims of 911, by warranting for the arrest of
every Neocon Nazi Zionist pirate of OUR Jewish faith
for Public trial on LYING for War Crimes against
our dying Humanity. War Crimes against God.

A ZIONIST LIAR'S TRUCE

/ / live images of an Israeli helicopter hovering
above the city and dropping its white phosphorous

bombs on the city \ \

Again, the Zionist deserves to die by public trial
today to defend the Jewish faith. Look at usenet.
These demonic enemies go, 'yeah, Hamas broke the
truce', they do it to kill you. To steal the lives
of innocent Peoples to profit off our deaths as
victim.

Zionists are Satanic Demon Liars of Satan

FIGHTBACK

/ / Israeli forces demolished the house of the
Sammouni family in Gaza City after ordering
them to remain in it for safety. \ \

Palestinian Children found with bullets lodged in their head
http://jnoubiyeh.blogspot.com/2009/01/palestinian-children-found-with-bullets.html

/ / Israeli officials continued to deny on Saturday
that their soldiers had deliberately targeted
civilians, \ \

The Zionist is an
enemy to the God of Love and Justice, of Beauty, and
Children. A zionist LIES with a hatred unmatched in
Satanic hatred for the survival of our species. I
beg you, hunt to bill the zionist war criminal who
charges we will not succeed to see every last war
criminal on this planet hunted down to complete
extinction, by public trial, then Jewish firing
squads. The Zionist has bombed US, The People
indiscriminately with out cause. It was Nazi
Israeli that broke the truce to get killed
Jews for money. They starve Jews in Israel
to attract more charitable aid they can use
elsewhere. They, as Nazis, will continue to
murder Jews for money unless WE DEMAND, their
formal trials and public executions. They have
murdered our families, and they will pay will
their lives for it as the directly responsible,
and in no way, will escape our rages against
them as the enemies of every Human Being
Living for Freedom. Every Human that loves
children. They HAVE ADMITTED to targeting the school
girls for murder with lies they were caught
doing. THEY DON'T GIVE YOU EVIDENCE. And when we
get the facts, it's near always exactly the same
thing: they steal our Homes, they STEAL our
lives. God calls the Zionist Jew Enemy of
the Synagogue to Satan!!

"We also need a massive overhaul in Our news channel
prioritizing, including to add censorship free, open line
public communications. Done to gain value in learning from
the art of conversations. We need still to appreciate the
values of a free society where Justice is above all, the
measure of our success to communicate openly."

The Ungodly Murder of Innocent Men by Israeli Nazis
http://atheonews.blogspot.com/2009/01/summary-execution-in-southern-west-bank.html

/ / At noon an Israeli military jeep with four
soldiers entered Tameiziï¿½s land. After 15
minutes the man was thrown, blindfolded and
still handcuffed, into the back of the jeep. \ \

Let us not lose the focus of fact, that these
people of ourselves live in a concentration,
prison death camp, robbed of everything.
in Curfew near anywhere in "peace time". And
still, to this day, do Nazi Israeli CONTINUE
TO THIEVE the Homes of god loving folks in the
region, guilty of no crime but to have been
born into such brutal ungodly oppression
against Civilization. And to see, face no TV
opposition as American tax payers continuing
to fund such war crimes in our absent names,
is a crime on to ourselves if allowed to go
unchallenged. Johnny for Coast to Coast radio
host. Free the Slaves! Free the Slaves!

Binding U.S. law requires prosecutions for those who authorize torture
http://www.salon.com/opinion/greenwald/2009/01/18/prosecutions/index.html

The ugly secret of Barak and Livni, the truth about the Gaza rockets
http://www.youtube.com/watch?v=8rqDzXeA-PQ&feature=channel_page

[HEY WHAT THE.. THE LINK IS GONE ABOUT GODLESS
ZIONISTS MURDERING JEWS IN ISRAEL FOR MONEY!]

See my Jewish friends, these zionist liars
will never escape our love for Truth in this
our new age. Killing Jews for money is as
evil as found, negligently criminal, agreed?
Agreed.

Gaza: lives in ruins
http://www.youtube.com/watch?v=OFWxEtWcT8w

'Ungodly Enemies of Life is the only way
to describe it from here Tom. They again,
are attacking People indiscriminately for
murder as sadistic Satanic enemies of God'

Someone should ask what King Johnny, The
King of the Jews has to say on this subject
of a Zionist's complete absence of morality,
as inhumanly bereft any common decency among
our brothers and sisters. I mean for Christ's
sake Tom, THEY ADMIT to sadistically
targeting our children for MURDER - as some
kinda Satanic demon whore to Pure Evil - aka.
Wanted War Criminals for Public Trial. Just
as the Nazis were for similar outrages. Let's
hope men of America are least half they were
then, but we are suspecting, they will as of
usual, balk as cowardly slaves to the private
banker man ruling their minds, it's a, no
wonder. Where is there that purpose striving
for a greater future living in a just society?
Where is the Christ in their Christianity?
to financially support the arming of such
unlawful Zionist killings in silence against
Innocent Christians?

Free Radio International Broadcasts Alive!

Johnny Justice for Coast to Coast radio host.

BBC argues with Israeli Spokesman over UN School Bombing
http://www.youtube.com/watch?v=VPGP1xWEkkk

Where is the evidence to form any person's
verdict, if none is offered as in respect
for yourself as worthy the title of free
men? I ask as your self? Or are you as
the cowards of most in the American military
who refuse to speak for the arrest of those
who did US wrong on 911.?

King vs Obama on Gaza - Christian vs Zionist
http://www.youtube.com/watch?v=oegClx-t20U

-

For the Popular Will?

Alex Thomson shuts-up Israeli spokesman!
http://uk.youtube.com/watch?v=zIQZ1-RFq6A

Wow. The demon LIAR will also say Hammas broke
the truce, and Israeli started this by stealing
innocent peoples homes, then imprisoning
ourselves, the victims, in a death camp for
indiscriminate slaughter. While they continue
to STEAL OUR CHARITY by breaking truces. What
is it that YOU can't picture?

"The view from the other side, that the Qassams are a retaliation for the siege that starves the one and a half million inhabitants of the Gaza Strip, [a prison death camp,] was not mentioned at all."

Masada legend galvanises Israel
http://news.bbc.co.uk/2/hi/middle_east/7830416.stm

/ / they committed collective suicide - men killing their own families, afterwards each other, until one [evil zionist liar] remained to kill himself. \ \

ISRAELI IS A THIEF WHO CAN'T SPEAK OPENLY IN DEFENSE OF OURSELVES IN OTHER WORDS? That is right. They, as documented criminal, lose every debate personally since before the dawn of Civilization because their position is clearly unsound. They are criminals who murder People in hate for a freed Humanity. They OFFICIALLY steal Peoples homes in that country didn't you know they proudly proclaim it so? And steal humanitarian aid from starving children. Targeted to murder children specifically as publicly confessed, 'it is Hamas WE blame', not them as demonic child murderers. Hideously evil as ungodly sadistic savages. Enemies of YOU, enemies of them, and enemies of me, the King of Jews Christ fellow from beyond the grave. They are so evil to God and Man, they tarnish everyone of US to not win justice sooner by blaming the actual bad guys. Justice is Freedom.

/ / Those white phosphorus shells used on the Gazans are made in the USA according to Jane's Defense. \ \

Again, these peoples are not Jews. Being Jewish is a religion. These thieves of God are Satanic in their LIES to betray the common trust in our words, that bind all worlds to victory, called freedom universal. Even tales of the Devil have him keep his word, with verses specifically condemning the self to damnation for targeting the innocent for death. God's the Word. Every word inside a fool's paradise. Including the periods. Not as like, I'm playing a word game, but that it in wonder, is all strangely here. Example: The Universe as it has existed always, is not separate from our 'pauses', or faulty drawn conclusions. The universe, in one sense, was

as good as anytime, created 6000 years ago.
AS TOO 50 billion. You say, impossible, I
say no, study quantum physics, and know, I
live this.. our existence is not scientifically
separate from the timeless nature of
consciousness, proven as not only theoretical,
but actual. That is a first step at developing
a REAL relationship with the living Universe
if you want to as like an artist does - that
TOO! can be just as thought static in it's
orderly constructions for Atheists. (An
Atheist is still mostly a fool here however.)
Overall, for any, it's sorta simple: Life has
left YOU in charge of YOUR fate. Now, do well
to make something of this being as eternal Life
reaching for balance, as your body does, and
good cops do when bringing the bushmobsters to
Justice. By Israeli calling for more murder
against the innocent of your mind as racists
and bigots they are openly, is still shadows
of YOUR mind, YOUR WORLD.. get it, got it? God
is in genius to set Life as this, as like,
nowhere existing, but for as yourself within.
Will you speak out for the Justice denied
Humanity?, or not you? Atheists can be Just
too!, but generally lose it on not
understanding the intelligence of order is
way beyond what they dream up with
assumptions. All anyone has to do is ask
themselves, who do you mean "God"? Atheists
are ridiculous!, but, to each his or her
own, we are on a path here, believe what
you want to believe. This is not a faith
initiative I'm bringing by keeping this real,
I DEMAND JUSTICE BY OUR WILL BE DONE.

A zionist cabal of criminal pirates who murder
Jews around the world for stolen money is
seriously evil as criminal. What do you think?
Let US have a open line discussion on this
indivisible matter of rights to all as equals
before who ever we proclaim, I AM.

I mean you right? Say it with me... "I" "AM"
we are good to go.

-

George Galloway "The West has DOUBLE STANDARDS when it comes to
Israel"
http://www.youtube.com/watch?v=IIpvrOJQ0J0&eurl=http://whatreallyhappened.com/

ï¿½Main actions: Israel targets hospitals, United Nations premises, Press offices, theaters and densely populated buildings in west of Gaza. Additionally, people are being used as human shieldsï¿½

A Zionist Nazi Being

See? A zionist Nazi argues it's good to get killed Jews by breaking truces with a prison death camp, cause look at all the free American Welfare money we can steal through kicking-back AIPAC members in Congress.

-

Harper complicit in Israeli war crimes
http://onlinejournal.com/artman/publish/article_4246.shtml

Canadians! Please war with words for open line calls on the war crime enemy propagandist, The Chorus Radio Network. CJOB STEALS millions from Manitoba each year, and refuses all calls for honesty in governing. They are actual CRIMINALS.

Canadians Stand Alone
http://www.thestar.com/article/569872

Harper the proven war criminal who will be going to prison, is the only person on Earth that has publicly okayed Israeli Nazi to target murder Christian school girls. Canada, join me in demanding Harper's Public trial as a war criminal. Prison for Harper who took a honorable soldier who stated he refused to commit war crimes against innocent civilians, and placed him without trial in prison. Without warrant for arrest. Harper, the Nazi Appeaser, is a War Criminal standing against the Queen.

"Or is this another, popular amerikan past time, of, who cares for the facts, we are at war with God and Christ now?" Die bushite die Christ always says against lawless torturers as mass murdering thieves of Humanity.

shreveport man gets 15 years for stealing $100.00
http://wesawthat.blogspot.com/2009/01/shreveport-man-gets-15-years-for.html

Again, Americans need to demand the arrest of the Judge and prosecutor for being openly evil demons, as TRUE enemies to freedom in America. But guess what? Americans will refuse to even phone Alex Jones, or George Noory

to be hung up on. Just refuse as brain dead
zombies - as known in this circle, McCainiacs.
Did you hear Alex's NWOer yesterday state he
doesn't want anyone to speak as Justice for
Americans because to learn even the most basic
of precepts for Justice, he can't pretend he is
a Freedom Fighter begging US for more money?
Like multi-millionaire Ron Paul, who gave the
fixed election up to take our money and walk
away. How much money in the millions do we have
to pay them at GCN, before they will acknowledge
the Iraq war is a war crime? THEY NEVER WILL,
because the faggot owner has a son who's into
raping American women as lawless enemy of Life.
Americans are indeed, selfish, like all the plane
crash survivors telling US how they couldn't care
less that Israeli nazis are openly targeting our
Christian children for murder with their tax
money, as unimportant, to how long they stood on
a plane wing, now approaching it's third day, of
wall to wall coverage. Telling us again of how
Christ saved your life as a lifeless degenerate.
I, as Christ, am really starting to hate all
Americans in total now. How difficult is it to
pick up their phones? They don't, and I'm beginning
to believe it's because, like GCN, they really
don't care for the future of our Humanity being
left for dead as continuing victims to EVIL liars.

Nazi Israel Broke Ceasefire as Satanic:
The Bush Administration and The New York Times v. Amnesty
International
http://uruknet.info/?p=m50870&hd=&size=1&l=e

UN sites shelled with WPh after GPS coordinates given

Livini was reported to say today that, 'every
innocent person targeted by Israeli, as such
driving in ANY car, or on ANY bike, or walking
down the street as then directly murdered, Hamas
will be blamed for. Heil Hitler' Well, I made
that last part up, but do you have the ears to hear
the screams for mercy given by Humanity?, while
this, the evilest of JEW KILLERS in the known
universe, (targeted, and murdered countless Jews
in Lebanon as one example), believes no man or
woman living can speak directly against her wanting
to MURDER even more as ungodly... 'Until the tin
can rockets stop falling on Jews' standing in their
detention centers, or living at the garbage dump
BUT.... THEY BROKE THE TRUCE! THEY BROKE THE TRUCE.

They will rob and kill US all my INNOCENT friends
as LIAR Satanic if you, YES YOU continue to refuse
to support my/our demands for OPEN COMMUNICATIONS
for Justice ourselves. Johnny Dazzler for Coast
to Coast Radio Host!

'Secretary General outraged at shelling of UN building in Gaza'

"I conveyed my strong protest"

Not good enough. Public War crime charges warranting
Death by Jewish firing squad, is what is demanded of
our Humanity. Death to the zionists liar war criminal
enemies of Humanity, instead of US, who they target
for mass murder.

Google have attacked US again as Evil doers..
They have again destroyed my writing with war
criminal intent to deny these truths as men they
could never face me, because they are not. They
STEAL our voices.

They are jewish criminals, not criminals because they are Jewish.

HERE IS WHAT GOOGLE IS:

"End the illegal Human occupation of Jewish land in Gaza!"
http://stoptheism.com/

HUMAN

These war criminals need to be arrested for Murdering
LIES against the lives of every innocent Christian
and Jew. Godless zionist nazi bastards are as evil
as they are dumb. Get every man who defends freedom
truly to hunt down these satanic demon ENEMIES for
thee True Jewish Cause, to ask it why it lies as an
enemy to HUMANITY, to murder innocent others as
evil doing thief to Freedom. A thief of Jews
everywhere to know truly God as Love and Justice.
Not only will Americans celebrate these neocon criminal's
freedom to call for the murder of innocent Christians,
as he does without arrest, "Americans" too, will as
Satanic refuse to hunt the ungodly enemy of the Jewish
faith down as Nazi hunters. No, Americans, cowardly, are
committed to dying with the Nazi Elite, as such
to escape of the Neocon terrorists who participated
in the mass murder of America for more stolen money
as war criminals.

THESE ARE SERIOUS WAR CRIMES

Israeli soldiers say they have OK to KILL Innocent People
http://www.mcclatchydc.com/251/story/59704.html

Israelis 'shot at fleeing Gazans'
http://news.bbc.co.uk/2/hi/middle_east/7828536.stm

They'll murder anyone human to steal our homes.

-

We battle injustice by demanding the public
arrest, and trial for execution of proven
war criminals. Now, who disagrees?

Israeli using Palestinian Kids as Human Shields
http://uk.youtube.com/watch?v=rXq57XK2L0A

Israeli Soldiers using Palestinians as Human Shields
http://uk.youtube.com/watch?v=FjEd4hJNVCE

Why do you as an American, refuse to contribute
to Just cause?

These monster enemies of Hillel are inhuman
to their prisoners, prisoners who had their
homes stolen and are denied freedom for being
born to Nazi tyranny. Demand Justice for
yourself as a Human.

Some Serious Evil Jarg in Dishonest Reporting
http://www.aish.com/jewlariousMultiMedia/jewlariousMultiMediaDefault/Israel_Unfair_and_Unb
alanced.asp

Forgetting about the truce given to those in
a concentration prison camp? Where they are denied
food and water? In curfew prior to near half the
days of the year, for years? How could they not
to claim such self righteousness? They don't bother
because they'd rather YOU were made innocent victim,
then them, Zionists who would screw you out of a house
called home. Did you know: they openly steal Peoples
homes in that criminal nazi state labeled godly?
Of whom openly thieve? Officially? Yes, and they try
to thieve the title of Jew from the Messiah too,
but I'm not going to a slave prison death camp
for innocent humans, I'm fighting back to demand
open communications to rule true Justice concerned.
Freedom is paramount. 911 perpetrators will be
brought to Justice by King of Jews Johnny Dazzler.

-

Israeli Murders Officer to make it look better

israel-fakes-rocket-fire-fatalities-in
http://stevenwarran.blogspot.com/2009/01/israel-fakes-rocket-fire-fatalities-in.html

/ / And we may assume that he was a non-Jewish
member of the IDF, given [...] \ \

Lawless evil doing for neocon lying criminals
really sucks man. Our friends are dying murder
victims. They are robbing our humanity of common
decency.

Neocon Enemies of the Jew do not Care for Truth

ElBaradei says Iranï¿½s nuclear program is legal: report
http://www.tehrantimes.com/index_View.asp?code=184534

But Neocon enemies of the Jew do not care for Truth.
They lie as enemies to God, on hopes to murder Jews
like they did in Lebanon with millions of land mines.
What kind of "Human" would commit such crimes against
Life? Cheating Liars for Satan Johnny tells YOU.

When Bush asked about his errors in judgement:

/ / you know, could I have done something
differently, like land Air Force One
either in New Orleans or Baton Rouge. \ \

Would have been better PR he means? Likely.
He walks away looking good, your family is
dead, or dying due to criminal neglect for
cash profit. Did I tell you that the private
bankers don't even cover our loans yet?
Trillions given by Americans, now Obama is
asking for more to disappear. THEY DON'T
even tell US what they've done with the
eight trillion already taken. Desperately,
Life Begs, THINK ABOUT THAT. King Johnny
for Coast to Coast radio host.

/ / So what is Ron Paul saying about Ron Paul?
I'd wager, he doesn't know himself, and fears
like FOXNEWS from open debate \ \

Excellent! if I do say so myself.

-

The Queen Shall side with The Great Nation

You can not hand over a prisoner for the crime
of refusing to commit a war crime. Otherwise,
YOU'D be a war criminal like now Harper is.
A Zionist appeaser. The government of Canada
already decided on this issue, and the vote was
137 Patriot to 110 neoconned bushite dumfuk.
The Iraq War is a war crime. These be demons
that steal our democratic voices, by denying

freedom from a man who's capital offense, is
that he tried to be fair for all parties. See?
War criminals.

The Queen Shall side with The Great Nation of
Canada Vs. S. Harper on this. Ask her.

God Bless the Queen.

-

/ / destroying Hamas terror infrastructure \ \

As Satanic, they TARGET TO MURDER Christian
School girls, and claim, none on Earth will demand
their public trials for executions as War Crimes
against God, because to the Satanist LIAR, (and
many "American" "Christians") God doesn't exist
within YOU to demand Justice for our Times.
YOU change that.

Evil on Parade

43,000 FoxNews Zionists in America, sign petition
in YOUR INNOCENT BLOOD calling for censorship of
Gaza conflict across all America

http://www.iraq-war.ru/article/186735

Stressing that Israel was "the first to stand
up against pure evil." [See? A zionist Nazi argues
it's good to get killed Jews by breaking truces
with a prison death camp, cause look at all the
free American Welfare money we can steal through
kicking-back AIPAC members in Congress.]

"I demand that the use of images and headlines
that misrepresent current events to the detriment
of the State of Israel be stopped immediately,"
the petition went on. [and the 'judge' judges
anything detrimental misrepresents the constant
LYING nature of the Nazi Zionist thieving pirates
of the Jewish Faith?]

This is detrimental to Zionist war criminals
because it exposes their TRUE EVIL NATURE..

Israeli Forced to Admit in League with Satan
http://uk.youtube.com/watch?v=zfFMZ7Y-s_c

Israeli forced to admitting, it lied as a demon
enemy of Life about tin can rockets falling
into the head of a good Jew, prior to the
Neocon LIAR's ungodly criminal attack for

senseless war against Humanity in the region.
When Jews die, these Zionists really take
everything like bandits., Peace where smarter
People speak freely for Justice? not so good.

The Other Side of the Story!

I Want My Bailout Money by Michael Adams the Health Ranger
http://www.youtube.com/watch?v=dnT21hmlT4o

Breakdown Dead Ahead
http://www.youtube.com/watch?v=yFCnVC2C8As&feature=related

-

Simple Common Sense for Mankind

/ / Israel has admitted HAMAS kept the cease
fire; and that Israel broke it, then unleashed a
total starvation blockade on Gaza followed by
flaming death from the sky aimed at schools,
hospitals, ambulances, and children, and you
dare call the people opposed to such barbarity
a "mob?" \ \

Zionists are evil people who pretend they
are honest, when lying directly to everyone.
Blitzer reports Hammas broke the truce, he
is lying to continue the murder of innocent
peoples. Understand: Israeli Nazi state they
will continue to murder our innocent Humanity
until the rockets stop falling on Jews. Yet,
they broke the truce, and murder Jews routinely
with reckless abandon. Jews from the Bible as
of "nigger" Ethiopian, are what the Zionist
hate when warring GOD for apartheid, apartheid
that is Humanity in Gaza. A zionist is a war
criminal who speaks not against the neocon,
but against Innocent Humanity as YOUR enemy.

Livni: Gaza truce would give Hamas legitimacy

As they always do because they are dishonorable
murderous nazi thieves of God as Just cause is.
I am, and YOU are, you just maybe don't know it
yet, or if ever. A zionist serves Satan to escape
the neocon terrorists from their ungodly crimes
on 911.

http://desertpeace.wordpress.com/2009/01/12/gazatoon-of-the-day-blaming-the-victim/

Ron Paul:
US Will Be Rightly Blamed for Israeli Killings
http://www.youtube.com/watch?v=6C756NOPyDA

Not the Nazi Israeli?

The guilty party are those who advocate these
mass murderers of innocent peoples with
deliberate lies, like from Blitzer. Blitzer
will be tried, and executed a war criminal
for stating Hamas broke the truce., Where,
only two minutes earlier, he learned, that
it was his Nazi partners. DEATH SENTENCE.
It was on TV. BUT SEE? Ron Paul, the Libertarian,
ain't going to be honest here. He'll lie cheat
and steal Humanity's voice for Justice - like
he did with OUR money. A typical Libertarian
like Alex Jones who wants to blame "socialists",
"Liberals", aka, all of innocent America.
Blitzer is war criminal, who makes his own
discussions. As is Ron. What an enemy to not
mention the truce. THINK: IT IS THE ISSUE. But
Ron plays the dummy to kill more with contempt
for Freedom. Ron Paul, the bigot, asked,
'should we be doing this'? SEE? it's not first
degree mass murders, no, according to Ron Paul,
it's argumentative that indiscriminate mass
killing is a good thing really. Remember,
Ron Paul does not support arresting those
who committed mass murder on 911 either.
Or those who STOLE TRILLIONS. Or lawless Bush,
the ACTUAL AntiChrist enemy of God. Ron Paul
will watch America die for a stolen dollar.
And Alex Jones will refuse all calls to label
him good guy like himself warring order
to our universe for it.

Israel is [NOT?] responsible for these childrens death
http://uk.youtube.com/watch?v=Y9PIZQqIep4&feature=email

Ron Paul "When we pick sides, we make it worse"

He also took our millions donated for freedom
fighting away for his family, but not our own
as dying innocent victims giving. Pick a side.

Remember: Sadistic authoritarian George Noory
is a very real DEMON of Satan, who again,
openly tells US, he wants to murder our
species as the innocent forsaken, and Alex
Jones doesn't hear a problem with that
either. Love the bushite blindly, and
they'll kill US for a dollar sukka.

Alex Jones is like the retarded brother we
can't help but love because we're human. He
is still retarded. And George Noory is still
seriously evil as a traitor to the cause of
Freedom in America. And Ron Paul is still
slamming Ron Paul.

Ron Paul "Israel can not act without
Washington's approval"

So, it is Ron's fault then by not mentioning
the truce?, or as that, innocent People are being
indiscriminately murdered in a death camp that
he figures is argumentative? that innocent
People are dying as targeted for mass genocide?
Or is it the Ron who states YOU are to blame
instead of himself for being there, not saying
anything? HEY RON! Can you hear me now!

-

Contribute to our rise for the popular will

Alex Thomson shuts-up Israeli spokesman!
http://uk.youtube.com/watch?v=zIQZ1-RFq6A

Wow. The demon LIAR will also say Hammas broke
the truce, and Israeli started this by stealing
innocent peoples homes, then imprisoning
ourselves, the victims, in a death camp for
indiscriminate slaughter. While they STEAL OUR
CHARITY. What is it that YOU can't picture?

Hi. My name is King Johnny.

TALK IN AMERICA
http://www.mediafire.com/?mxw3nzi4nzf

-

/ / The targeting of civilians, whether
by Hamas or Israel, is a war crime. \ \

They are targeted by Obama who suggests
there is an argument to be made here. There
isn't. Nazi Israeli DEMON LIARS broke the
truce to kill Jews for money. They are godless
enemies of Humanity. So it isn't that we are
pro-Palestinian, it is that we are pro-Human.
Zionists DESERVE to die, before US, the innocent,
they target for murder for stolen cash gain.
Like Obama has promised to do for AIPAC. But
what about the rest of US 6 billion plus Obama?
Who is it of US innocent folks do you wish to
MURDER, or torture next as a Zionist war criminal

for Satan Obama? Torturing kids is popular in
Israel, tell US Obama, which American father will
have his children tortured, or murdered
sadistically by yourself as a whore for Nazi
Israeli? tell us, we're not waiting.

The Chosen Bad Example

Zionists Destroy Our Homes as Satanic
http://www.youtube.com/watch?v=mo2HW4T7wK4&feature=related

When I see the women and her child, left outside
while they sadistically destroy her meager gains,
I grow weary with ourselves for not speaking right.
Nazi Israeli are committed to deny US our God given
rights as Innocent persons to speak freely for Justice
realized. All because they STEAL our Lives for monetary
gain. It is our reality, give it or take it, YOU LOSE.

Then.. Hammurabi founded Civilization.

I go concerned for any hesitations of condemnation by
Obama. It's like, he's talking some jive about
how now he'll NOT let the words of Hamas reach
his ears. Being against war criminals, doesn't make
you pro-Hamas, necessarily, it means your against
war crimes to defend the lives of ourselves respected.
Remember: He told US earlier during the campaign that
he wouldn't fear speaking to anyone, Hamas especially,
because he was confident he could win the discussion on
Liberty, by principles that unite all free men. Now,
he has promised the FBI's Most Wanted AIPAC, he will
pretend to not hear any calls for fairness as all
parties united by common cause. Johnny Who? Where did
you go Obama? You were here, then.. pooof! you
vanished into the loving shackles of convicted/ing
criminals is a mass, "WE ARE TRAITORS TO JUST CAUSE"
organized war crime outfit, dedicated to deceiving the
Public by lying. I am not Lying. I'm not saying I hold
his associations as a measure of himself, I am concerned
with him stating, he will not hear our cries for Justice,
as then AIPAC cheered. I was as freaked out about it as
you maybe yourself now, believing it as possible. Check it
out for yourself, and wonder, just "who" is this person
they tell us they're are going to take for as dying fools?
I mean look at what happened to what's his name, when he
sided similarly the same in error as hugely criminal? Come
on be honest with us son, "Are you on drugs?". Maybe he's
just been stressed with all of everything he is heaped
to follow on, NOT to know by Blitzer, that Israeli broke
the truce to kill more Jews for money, and, also STEAL
innocent Peoples Homes while saying, "they are God's

Chosen". Yeah, chosen for, "The Bad Example", of how
Jews are left undefended by these grave robbing war
criminal nazi forces. As the King of Jews, I call for
Public War Crimes trials of the entire bushmob as
terrorists, and their supporters for lawless tyranny.

People are Coming to Town. Justice for All Coast
to Coast radio broadcasts all, until we have secured
the neocons in a prison cell awaiting the treason trials.

We are Good to Go. Rise Up for innocent Life,
or don't and see where it'll get you in the end.

TALK IN AMERICA
http://www.mediafire.com/?mxw3nzi4nzf

Nazi Israeli STEAL Peoples Homes without
apology, as a function of their SATANIC
government, while collectively bombing the
INNOCENT victims who die because of it.

Gaza 2009 - Operation Cast Lead
http://www.youtube.com/watch?v=hFEiOfLUfzY

Again, they are Satanic here because
they THREAT to tell you, yeah, Zionists
are casting the leads for the real mass
murder scenes - Justice denied Humanity.
God doesn't exist to defend yourselves
from war criminals for Satan.

War crimes trials with public executions
will commence against ever GUILTY zionist
living to lie that Hamas broke the truce,
that Georgia was attacked without provocation,
(again, CNN are not 'accidentally' conning
US here). And trials for every last living
bushite bomber, rapist, and torturer -
death to the bushite, the true traitors who
war against freedom for America, traitors who
war Innocent Humanity for the escape of the
neocon zionists.

-

Both parties cheerlead loudly for Israel's war Against Humanity
http://www.salon.com/opinion/greenwald/2009/01/08/israel/index.html

Death sentences MUST be willed by Christians for war crimes.
Death to the bushite, death to the enemies of God and Man.

-

For the Great Truths. We Stand United

/ / This option is also regarded
as a non-runner as the US would certainly veto that
suggestion. \ \

No no no no. What you do is investigate who this
the "US" person is as the GUILTY party my friends.
The facts have spoken for ourselves without contention.
And while we're at it, try to figure who that "Army
says.." person is too, we need to know who these
traitors are who hide their names backing war crimes
to continue. The Enemies of Civility, they are
enemies of US all my innocent friends, enemies of US
all.

white phosphorus shells on Gaza
http://www.youtube.com/watch?v=HPY2M6IxDRA&feature=related
listen to the inflection of voice near the end of this..
the mind of a delinquent 7 or 8 year old.. This phenomenon
is pervasive, and illustrates some cognizant short coming in
Calcium or Zinc somethings. However, IT IS THERE. Normally, as
an Expert on Psychiatry, I dismiss the whole notion of
Psychiatry as I intimately know it as pure bunk wacky,
however the study of something here is needed if we're
ever going to convince ourselves dying indiscriminately
this way sucks. As the innocent for profit we pay for,
with lies sold without Public defense of mass murdering
demon traitors to the cause of US falling victims. God
says their Satanic, I just say they are criminals. War
criminals easily convicted for murdering our loved families.
They have no remorse for all that have been murdered
already.. Livini should be on her knees begging our
forgiveness, but she's not because she couldn't care
less for any Jews, especially those she don't have
imprisoned under threat in Israeli 'society'.

It's a 'bad' thing. nnNo.

Israel bomb attack Gaza Civils Palestinians 27/12/2008 launches
missile attacks on 27 Dec 08
http://www.youtube.com/watch?v=tQLDBujnwEE&feature=related

This was what Israeli did as a legitimate murder
scene, committed after the Nazi Israeli Jew HATERS
broke the truce. More dead Jews, more money to be
rich with. and we'll blame it on that God nonsense.
We must demand war crimes trials from Obama, and
everyone else down there who is appalled at this
indiscriminate mass murder continuing in your name.
We need arrests of Zionist infiltrators within
the American military who have been shipping
weapons to nazi Israeli to murder more defenseless
innocent People as targeted. Obama must demand
death sentences against these ungodly Zionist

vermins for treason, warranting execution for the
war crimes of accessory to mass murder, or genocide.
For the Great Truths. We Stand United.

-

Here on a Mission

/ / after dropping leaflets warning residents it was
about to "escalate" its offensive against Hamas. \ \

SEE! This is AFTER fire bombing the whole community.
Satanic evil enemies of Life. Who admit to targeting
any one who has ever so much as swept our streets,
warranting bombs dropped on their Block(s). SEE! they
are ENEMIES OF EVERYONE. EVERY LAST ONE OF US.
INCLUDING GOD.

Riddle me Dumb

Hamas Workers and/or Troops? Out hiding in the mountains
of Afghanistan you mean right? Satanic enemies of all
Humanity I tell you. The most evil nazi sons-of-bitches
who openly advocate tyranny and oppression through mass
murder of ourselves as the innocent left targeted
defenseless. Enemies of Jews everywhere, the Zionist
cares not for facts on who's Life it destroys for stolen
gain by lying. That's why they target Jews, for fear the
Light of Truth would expose them as the Nazis they are.
It's a prison death camp, brought about by Israeli STEALING
OUR Homes as ungodly thieves. Thieves who leave a Jew
to starve to death in a garbage dump because, it'll
attract more charitable aid The Zionist can use
elsewhere. It's not a Jewish thing, it's a criminal
matter. They STEAL innocent Peoples Homes in that
country. God's Country? God would will such criminal
offense? Which God? Not the God of Abraham, nor by
the teachings of Hillel, Christ, Mohammad, or
Confusion? So which absent God do you speak where WE
can't speak as ourselves openly for Just Cause?
Cat got your tongue? How come your not saying anything?
The Israeli Zionist ENEMY wants US ALL in slave
labor prison death camps silenced away that's why!

Israeli War Crimes
http://bothwell.typepad.com/whos_your_nanny/2009/01/israeli-war-crimes.html

Well, maybe I'm wronger on Ron Paul than I needed to.
Hey, don't you EVER forget, I am a man also. We need
to meet on common grounds, to demand the start of
formal arrests for the bushmob crimes of 911, Iraq,
Afghanistan, South Osettia, and Palestine, as a group
together united by agreement for this one cause, and

then... we can later argue about how your ideas are
better than mine because I actually know of which
your speaking.. Hey! you could call me Daddio if you
wanted! To the telephones we go.

-

Israeli are attacking prisoners held criminally
in their own Death Camps!! GET ALEX JONES ON THIS!

Hmm... why wouldn't Alex? to support his fictions
over Our Rights to Live Free perhaps? A Hero adapting
to the deaths scene?, or, a Bush whore committed to
enslaving Humanity, all so he can say, he told US so.
Big hero or big hero. Your NOT powerless to his vision
of complete control over information. He refuses 911
info, Iraq war info, Israeli info. All so he doesn't
have to look the fool, while Humanity dies with his
insults against our wills to make something better
of ourselves. Justice is what I will. Masturbate on
your own time Mr. Alex Jones.

If he states again about how he knows everything,
and is always right, and those that criticize
him on ANYTHING are delusional, it's going about to
make everyone further sick with this obscene take on
what life means as Alex takes it. If I truly state
two nickels make a dime, does that mean therefor
they make a quarter also? If I say so like Alex
would? He is an idiot. Truly. George Noory figures
Hamas broke the truce, and that the Mideast solution
is that Jews should be separated with special rights,
as oppressors over the freedom of every Palestinian
Prisoner, and what's Alex Jones gonna say about
his 'truth telling freedom fighter' George to actual
'lame ass evil nazi traitor' George?, to YOU about
how George is just trying to murder millions of
helpless people as an offer for the final solution?
We can expect Alex now to claim, Zionists should
have special rights over Jews, all to maintain
his FICTIONS on Noory being anything but the
monster to Humanity he is. Just because Noory
doesn't growl when talking about murdering all
children in around the age of 15, or against
soldiers who refuse criminal orders, does still
make him a true fascist nazi enemy laughing at
your murderers escaping to live freedom in
our dying forsaken worlds. The bushmob doctored
the NIE. Conned Congress, and Soldiers. Did 911,
by closing criminal FBI investigations immediately.
Alex and George don't seem to want US to know

these FACTS that demands arrests of the culprits responsible for high treason against Johnny's America. Now, who's with yourself. I am! I am! I am!

Alex Jones doesn't know squat of Social Security, but pretends he does, like Ron Paul does when speaking of the Federal Reserve, Health Care, IMF, World Bank blahblahblah.. I mean even the expert of experts Alex has on near twice a week, EVERY WEEK, to talk all about how the Illuminati are doing everything,(give me your money now for whatever), DOESN'T SAY TO KNOW, it was Chris Cox who changed Investment Banker rules, to cover instead one tenth of WORLD INCOME loans, to one twentieth. MORE THAN DOUBLING THE ENTIRE GLOBAL MARKET FOR LOOTING WITH HIS SIGNATURE! (And. that isn't even a fifth of the TRUE trillions dollar fraud story.!) Now, granted, I wouldn't expect one tenth of one percent of America to have even a distant clue of which I am speaking, but importantly, Alex's expert of experts has never mentioned it. EVER. Why? He don't give a fuck, but how much money he can get you to give him for investing in things that are un-important to our struggles, but for the fact, he states, you'll get free money for nothing!! OUR ACTUAL PROBLEM. It reminds me of those Ron Paul dollars... where Ron'll fix everything, cause we, as a private company, are going to make YOUR money instead... holy fuk mon.. Talk about the kettle calling American racists. Thank God the FBI stepped in. (The answer unfortunately is not nowhere as easy as Alex would blindly lead you) - again, so I guess it will be, Americans were just too far gone as illiterate chauvinists, who cared too little for your freedom as themselves degenerating. Why? To battle tyranny they knew not Justice wins the day, and blamed innocent groups gathered wherever, instead of following the crime scene leads at the real murder scenes - like was once done on TV and at the Movies. But even that was too far above their doped down heads, to raise their finger to dial a phone number.

How about stating "A lawless bushite enemy wars America as a traitor, to escape the neocons from the crimes of 911."

Then Alex states the head of GCN is giving out gold at less than it's value as a special treat, every second or third week. Below wholesale. Now, really think this thru. Do you think Alex is trying to con you here? you bet. That is the Gold Racket. Diamonds are another thing - where I've personally seen, about a decade ago, a huge press that makes Diamonds

out of coal. Swear to God it's true. Costs to make diamonds are pennies to the thousands paid to Zionists who live in Israel calling for the murder of all innocent Peoples. Where is the rich Zionist, grave robbing Jew hater to demand Justice for our times? Where? Pressing coal into diamonds, while advocating the murder of our entire Human species. THEY WANT TO KILL GOD AS SATANIC ENEMIES OF LIFE. While I am last known to Life's enemies as Jesus Christ, the Zionist's end every time. I'll have brought more Zionists to their rightful dooms, than any other, of any time, anywhere. I HATE Zionist bushite LIARS to death, all because I Love Humanity too much, to watch US die undefended as the innocent forsaken. They can change their evil ways, but till now, often not, benefiting off our suffering as war criminals who simply lie as demons to steal our Human values. Let's change this for our betterments. I mean the Halo is a dead give away..

The head of GCN has a son warring God to rape American women as lawless enemy in Iraq for the Neocon - again NEVER mentioned as something worth fighting against for Freedom in America - soldiers are suppose to REFUSE criminal orders - but not when Alex is at the mike. He will never mention the Bushmob doctoring the NIE to con America for death as exampled, because it doesn't fit his fictions, where all the bad guys escape because they are geniuses headed by secrets so powerful, nobody can ever know'em, except Alex. He tells us near every day, he knows everything already, and is never wrong, therefore you can't criticize him. Bullshit. It's like he wants to be wise like Johnny Gawd is, without doing anything like studying for a test where the teacher actually does know the issues. He told US today, the British came up with concentration camps, from the Indians - who spent all their lives murdering themselves. The British 'invented' false imprisonment? The British came up with the, Jews Killed Jesus? The British invented Pope Gregory VII? I suppose Alex has never heard of Ghettos. SEE? he just pulls shit out of his ass, and calls it like it's truly pure gold you'd wanna buy. Those, like your typical American have no clues, so they figure, Life must be sorta so that History is all one big Alex Jones NWO cartoon. What? that the NWO did 911, and everything else that use to instead, require criminal investigations to nab the actual evil doers? Alex Jones IS the NWO he tells US all we should be concerned about never stopping,

like it was in the DARK AGES. Justice Alex, why is
that hard for you as a "Conservative" to figure? Is
it because you are cowardly in the face of true
Liberty? Afraid that some People, on some Issues,
ACTUALLY know a great deal better than you could
even imagine presently? Don't like that do you?, where
you don't rule this Universe as a lawless tyrant
desperate to live in an illusion at the expense of
everyone else dying victims to censorship? Does he try
to find wise men or women? rarely. "Ron Paul [MUST]
leads our truth movement" - like, fuck off already
with the Ron Paul, The Truther, Bullshit Alex Jones.
1% is what YOU get on Social Security deposits - 1%.
And.. Bush stole 700 billion. 700. Billion. That's 700
BILLION. It's a "Trust" account. A "Trust" Account. It's
being held in "Trust" Alex. Ron Paul is asleep at the
wheel. As, so are the rest of all you other fools..
I want Justice, and I want it now for all the victims
of 911. Americans be damned, we want Justice, and We
want it Now.

In Texas, child rapists are given the right to
freely move about without fear that Texans will stand
as armed Men in defense of their very own offspring.
And Alex wants this for the rest of America. That some
how to own a gun, means an American would kill a cop
who beat a women near to death for pleasures that
he could never be Publicly arrested for, as a
sadistically evil nazi bushite fuck. Look, if YOU DID
kill that particular DEMON COP after the Chief
refused to arrest him, you couldn't possibly go to
jail in Johnny's America, because the truth would win
out in a fair verdict. And REAL cops would honor you
with great big, thank you. Nothing worse than a
cop (or bushite grunter) who believes the Law doesn't
apply to him while he drives drunk, tazers someone for
nothing, abuses Women, or kids, to sell drugs, or
kills good cops, who are good men. (Like mercs do in
Iraq officially for Rumsfeld's P2OG. Coming to an
American city near you!)

Again, the two Laws of Johnny:

1. No evidence, person innocent.

2. Torture? fuk you and die then

"Rice says it is 'hard' for Israel to spare civilians in Gaza"

We KNOW they are ONLY targeting innocent People,
the ungodly zionist Satanic enemies say so..

"Israel Rejected Hamas Cease-Fire Offer in December"

Livni has declared her country "is not going to show restraint"

"Her" country?

It's like she's admitting here, that they DO NOT
target the IDF's Hamas, but only our innocent lives
as a threat to LIFE and GOD. Remember: the Zionist
LIARS broke the truce.

THIS NAZI ZIONIST FUCK BREATHES THE AIR OF US
http://www.youtube.com/watch?v=lMxfEsooM5M&NR=1

/ / So, Hamas decides it's time to end the
cease fire and has begun shelling Israel again. \ \

This guy even sounds like the Satanic false
accusing enemy of God he is. Let US, as Humanity,
hunt these real devils down, try them, and have
them executed publicly for the benefit of God and
Man. Understand: this REAL DEMON knows he's lying,
no living man on Earth could spew the vile lies he
does to excuse indiscriminate mass murder, or starvation,
as this Zionist enemy of life sells to STEAL Your
HOME, your Family, YOUR LIFE. An open enemy of God
trying to STEAL the Title of Jew from Christ. EVIL
ENEMY OF LIFE. See, when a bushite dies, you served
Life well in defending their next INNOCENT target.
BILL HIM FOR STATING ISRAEL WAS STRUCK THOUSANDS OF
TIMES. BILL HIM FOR STATING HAMAS BROKE THE TRUCE.
BILL HIM FOR STATING bin Laden DID 911. BILL ANY
Zionist FOR THIS TREASONOUS LIE. Why God asks? Because
there isn't any evidence to support that Satanic lie.
According to the FBI. And according to God, Zionists
are not Jews, but of Satan as enemies of every life
form in this Galaxy, Hunt him down, and bill him
today for the love of God. You can 'hear' it in his
voice.. how he lies TO YOU as a DEMON of a Hatred
for Truth and Humanity. Facts, that are easily
available, are not what he works to mislead others,
others he hates, and wishes to murder for as ungodly
sadistic pleasures as YOUR enemy. Bill him under
American law for being pro-torture too while we're
at it. Death to bushite, death to the murdering
enemies of God's Love for Mankind, and enemies of
TRUE Justice for Americans. The fuking demon enemy
lies to you, as a con to STEAL your life, or just
as soon, the life of another innocent other. Now,
what are you going to do about it? Except his lies
as exceptable, as he tries his hardest blatantly
LYING to kill God and Justice in our Worlds? Not
in mine, but perhaps Yours.

' In Civil-Contempt Cases, Jail Time Can
Stretch On for Years for Americans, without Ever
seeing a day in Court. '

Where are the arrests?, then firing squads for
the Judges who 'judged' such criminality against
freedom for US, the Peoples in America?

' Where Did Taxpayer Money Go? Panel Slams Treasury
[FOR STILL REFUSING TO SAY] '

Where are the arrests?, they stole eight trillion
and counting.. And Congress 'slams' them for
disappearing OUR MONEY. Slams with what?, a,
don't do that again please butt sqeeze? It should
be massive slammer time, with a return of all
STOLEN monies.

' THEREFORE, those pro-Israel politicians in Congress
won their seats in part using stolen money. '

Where are the arrests? Amerikan bushite nazi grunts
are assisting in the mass murder of innocent Christians
in Palestine. War crimes demanding death sentences. It
isn't an argument that can be turned around. Nazi Israeli
STEAL Peoples Homes without apology, as a function of
their SATANIC government, while colectively bombing the
INNOCENT victims who die because of it. It's a prison
camp! they are denied water, food, shelter.. since four
or five truces over that they've broken, every one. These
are Satanic enemies, willing War Crimes against God,
a God NOT loved by zionist American Nazis. And a Son
as powerful as the four winds, ridiculed by Zionists,
and American know nothings, for the continued debasement
of YOUR soul worth here dying.

Israel Attacks Iran News Station

Why does not Iran DEMAND arrests, and death sentences
for these blatant war crimes against Humanity committed
by Amerikan Nazi Israeli Zionists? Along with the
perpetrators of 911? WHYWHYWHYWHY. Russians! Can you
help US out?

-

THE NAZIS SHELLED THE HOUSE WHERE THEY HELD
INNOCENT CHRISTIAN PRISONERS
http://uruknet.info/?p=m50596&hd=&size=1&l=e

Rise up for Justice American Christian, or
die innocent victim the Son of God does say.

-

Pictures of Alex Jones masturbating
"we were right about it all."

It's the NWO! The Illuminati! Not Bush, Cheney, Neocons Gone Wild, or any of many other REAL criminals, for the war criminals are just puppets to his EVIL fictions. Forget about Bush escaping.. Socialists who design traffic lights, and Liberals who will to share fairly are Alex's enemy, because he's fearful the FACTS would escape his denouncements against truth tellers. George Noory, one of the most despicable individuals on the face of our great Earth - is exactly the kinda guy he wants returned to send his wannabe Patriots nowhere but to die. What about Justice America? The bushmob doctored the NIE. TREASON. There is video of iron flowing like water from the towers, seconds prior to the collapse. Alex ain't there to help US, for that is where TRUE Patriots fight for real Justice. When WE phone with indisputable facts, on Ron Paul the bush whore sell-out for example, he lies to all (GOD), then hangs up on US. Is that the kinda freedom you think the Founding Fathers had in mind to give Your rights to speak for Alex who blames anyone but the criminals directly responsible for your funeral? The private banker never covers our loans, so why give them trillions without questions offered without answered as, never mentioned by the guy who is 'right all along on everything under the sun', and.. he 'rules the Ocean of truth' too don't you know YOU have a steak going all rotten to hell here also? You'd think Alex would take our call just for the challenge on where we stand? I'm free!

He is not. And George Noory tells us openly, he's into killing innocent kids for profit. George's profit is that apparently, by murdering all children in around the age of 15, will stop them from getting a clue at anytime in the future, to take him out as an ENEMY of EVERYONE for censoring our cries for Justice. Why is it that Alex would invite obstructionist, Steve Quail, or Alan Watt, on to lead you nowhere while they jerk off, but where we gotta go to actually defend ourselves? Steve has been on with Noory more than a hundred times, and, we'd figure, Alex will soon be delving into the Alien questions also. Answerable by me in seconds, but ahhh.. like Noory, doesn't want the truth of such a subject uttered,

just endless streams of illiterate bushite dumfuk
losers sucking on each other. While they wrest
from US the wonder; just why we can't stop
criminals from robbing ourselves, while murdering
our families? Alex wants to blame the unstoppable
NWO, while I, want to blame those actually
responsible, like Bush and the proven treasonous,
Neocon terorist liars who are pro-torture.
With arrest warrants. All of them. I'll do it for
Reagan's, War Crimes Act, as an act of respect
for my Great America, that's isn't always been
dying dead wrong under the leaderships of
criminals.

Israel hits Gaza after UN truce resolution

/ / AP Israel and Hamas responded to a UN peace
demand by hammering away at each other with bombs \ \

The IDF's Hamas is hammering away with what at who?
Is the AP referring to the tin can rockets that
travel usually several miles, but in one case,
22 miles? To kill a Jew standing outside in his
yard, thinking on how he would defeat true evil in
his time? Tin can rockets that contain no explosive
charge? Have no mistake, if it hits you in the head,
your dead, but really, what do you think the odds
are on that? E=mcï¿½. Or is this another, amerikan
past time, of, who cares for the facts, we are at
war with God and Christ now? Joe is an American Zionist
"Plumber", who has amassed a multi-million dollar
fortune in the competitive industry by shit eating.
Every bushite death is a mercy given to God in defense
of all that is right and Just in this Universe. A
lawless bushite enemy wars America as a traitor to
escape the neocons from the crimes of 911.

1. The ISI's General, Mahmoud Ahmad funded 911's Atta

2. We have video of iron flowing like water from the towers

Traitors to the Cause

Bush and Cheney are traitors to the cause of
American Liberty. To leave them free, is to leave
America un-guarded from further transgression.

UN: Israel Admits Claims About Attacked School Baseless

US military re-supplying Israel with ammunition through Greece

House and Senate Compete To See Who Can be Most Pro-Israel

This warrants the Death Sentence to Republicans
who have committed America to these war crimes
- DEATH SENTENCES. Christ DEMANDS these trials
to start tonight on America's Coast to Coast
radio program. It's called first degree mass
murder.

Israel broke the truce on Nov. 4th, yet state they
will continue to murder Humanity indiscriminately
until a truce can be found that they will break,
as always, Being the Satanic enemies of God and Man
according to the Bible:

The Bible "I know the blasphemy of them which say
they are Jews, and are not, but are the synagogue of
Satan."

/ / UN Call for investigation into shelling of
Civilian shelter \ \

Investigate that evil does exist in the thieving
LIAR name of godless Zionism? The enemies of God
and Jews everywhere?

-

Freedom Granted by Americans for Neocon Liberators

"Americans are having their heads velcroed to chairs
and forced to take in nutritional supplements by a
tube forcibly inserted through their noses by US guards."

These are People not charged with any criminal
offense don't forget. Die bushite die you know is
what I recommend, as does Reagan. A dead bushite
means you've saved the life of their next victim,
an Innocent Human Being guilty of no crimes. The
war criminal enemy is the bushite, the Zionist,
the LIAR neocon traitor to Life as this Universe,
along with every dumfuk grunt who serves tyranny
for the bushmob at Guantanamo, Iraq, or Afghanistan.
It is a soldier's oath to obey lawful orders only,
but Cheney they don't take out with American Law -
how come? cowardly fascist nazi whores for Zionism's
evil as the ungodly that's why. Cowards dying for
the escape of the Neocons from the 911 scene as
reported publicly. - Vs. US. That's we whoever
you are.

Widespread Suffering and Death
http://www.youtube.com/watch?v=gVdee2iXSVk&feature=related

Notice no one shoots at the blimp fire bombing the
entire neighborhoods. And if it's phosphorous, that
smoke is already deadly toxic. That is why it warrants
the Death Sentence under International Law when used
against OUR Humanity, as the most evil of Nazi War
Crimes ever. The neoCON LIARS are the LIARS conning
you here on our TVs and Radio dramas, in where, they
don't want to openly take our public calls for real
Justice. Bush and Cheney are traitors to the cause of
American Liberty. To leave them free, is to leave
America un-guarded from further transgression. So,
them being "puppets" is even all the reason more to
insist in their capture for trial by Jury. A Public
Jury of our Peers. Now, who's in with You? You can
count me in. and I bet willed to action, we will find
others to be something of ourselves too.. Justice
and Liberty for All. Equal rights given is what true
freedom is as measured. Translated from the 'Alien'
dialectic to Amereeze jank vibe; where is the fucking
evidence here Neocon traitors who false accuse to lead
us off the straight and narrow? It leads to Bush,
Cheney, Rumsfeld, and Condi that's why I figure, you
figure, they figure, we figure, so... what are WE
going to do about this sacrificing for godless tyranny
further then as unrepresented?

Gaza Mosque Struck as Targeted by Israel Air Force 1 Jan. 2009
(Why so you may wonder they've had this string going
now where a secondary something, then there! that proves
something absolutely apparently, without the intellect
to fairly judge anything, particularly themselves honestly
as dishonorable thieves and murderers, targeting prisoners
held hostage to their own camps. Death camps. Nazis are
they.

Humans for Coast to Coast Radio Hosts as Frequent

Israel Attacks Jews,
Silence from Mainstream about Violation of Law
http://www.youtube.com/watch?v=K1kt8qi0M-M

They kill Jews for money. They bombed Jews in Lebanon
for money. They want to bomb the HUGE sacred Jewish
communities in Iran.. wonder why? Zionists are not
Jews, for Jews don't steal in God's good name. Nor
target innocent beings for stolen gains. A zionist is
a thief to life, and as such, needs to be formally
charged for their criminal offenses, given lawyers,
and upon a successful prosecution, rot in a prison
cell and/or pay restitutions. YES. why? so not another
innocent person must fall in their place as next
victim to a zionist's public commitment to lawless
tyranny for evil intentions.

Johnny for Coast to Coast Radio Host

-

Israel Phones 'Terrorists' Before they Bomb Homes
http://www.youtube.com/watch?v=K5wrwZlwAq8&feature=channel

Didn't the Nazis say something like, they weren't
there to take out Hamas directly? Well, after all,

it was founded by the Zionist IDF, so I guess that
must be why they target our children instead..

UN: "Israel knew they were bombing a school"
http://uk.youtube.com/watch?v=uWP0GU0wVSk

/ / The hospital, and other smaller hospitals and
clinics were previously shelled by the Israeli
warplanes and tanks, stressed Hassanein. He
also denied Israeli claims that medicine and
medical supplies had arrived to Gaza hospitals. \ \

The Zionist is a thief of Life as our enemy.

IDF VLOG UPDATE: IDF Hits Dozens of Hamas Terrorists
- Capt. Benjamin Rutland - 4 Jan. 2009
http://www.youtube.com/watch?v=q9Jt-pV5wuM&feature=related

This Zionist enemy of God speaks like a six year old.
"Hamas Terrorists", "4. Jan.", come on now, how evil
do you have to be to believe this ungodly demon sells
you righteousness. They STEAL our food. They are OUR
criminal enemies who torture innocent Peoples. A
godless criminal enemy who also steals Peoples Homes.
And drops millions of land mines to murder Jews
indiscriminately for decades. Commits war crime after
war crime against Humanity. Vile bile.

They killed our innocents, and unless we kill
theirs, they will go on killing ours.ï¿½

It is the crime of which they demand WE are outraged
against. Welcome to Humanity's suffering world due to
lacking communications skill. The term "they" are
referring to is YOU. Your innocent life Israeli
intend TO STEAL, TO MURDER, TO ROB YOU Your rights
here granted by God. These are ungodly acts of mass
murder, perpetrated by enemies of Life. They targeted
a UN Girl School for Christ's sakes. please fight back
by supporting my calls for open international dialog.
Justice must win our Freedoms back, for there is no
other lazy TV'ed ass, pop a pill to make it all go
away, plan 'b'. Look at me! I'm not crazhey! We can
handle this no prob.. I'm a perfect King for these
times of wonder and horror. equal rights are found
through open communications for a measured Justice
we do contain. Evil is the deceived disguised. And
i am a god... on a mission.. Ladies?

-

The Appropriate Response To Islamic Terror
http://revisionistreview.blogspot.com/2008/12/judaic-columnist-urges-kill-muslims.html

/ / an Orthodox Jewish Russian immigrant \ \

Let US never forget, the Zionists also would bomb
some locations, then later, drop the warnings
for the Jews to run for their lives. Didn't warn
them though if they get into a car or truck they would
be destroyed instantly by the Zionist flying the
America paid for Apache. I did a big show of shows
through that continued as, more 'un-resolved' crime
scenes perpetrated by the treasonous, neocon Zionist
terror merchants. It's like they think some dying
fools are going to keep going to save'em in the end
from ourselves as still suffering in Justice denied
as enslaving into ungodly tyranny eh? These Zionists
are not only the bad guys, but they're bad guys to
even the bad guys as there is no found honor among
murderous thieves. A Zionist will kill a Zionist for
a stolen nickel, as do bushites today. Hey! it's only
Your Life in the balance. Or are you one of those
who goes in America, it's okay, we're only murdering
innocent folks who don't live in Israel.

Doing what's right and just, or evil as dumb is
Your riddle. Get back to US on that.

We need People are Equals Power!

President and CEO of Shareware Earth Co.
King Johnny Wizard at your service me Lord.

-

/ / It is just unacceptable to apply two standards of
morality, one for Jews and another for non-Jews.
For if what Israel is doing in Gaza is right, as
Israel and her supporters maintain, then what the
Nazis did in Europe several decades ago must have
been right as well. And vice versa. \ \

The ungodly zionist enemies, are enemies of
God and Man. Don't think the NAZI Zionist like
Bolton doesn't know this, with his friends at
FoxNews.They WANT to rape, murder, and pillage
America all her freedoms for the bounties of
private banker frauds. The banker does not
ever cover our loans, we do. So, why give them
trillions of American worker waged dollars for
nothing?. THEY DON'T COVER LOANS. See? that is
what this war against God is all about. People
of Humanity just seem to truly hate a guy like
US as wise and Just. See, people hate US, because
they can't for their lives disagree with Facts.
Why won't YOU support these same rights and

champion our demands for open communications.
Johnny for Coast to Coast radio host.

US Again Stops UN Call for Gaza Truce

Who is this the "US" person?, and let's
put him to death with Bolton and Kalilazad
for the most serious of war crimes against
OUR Humanity. Remember, Bolton was NEVER
confirmed because, the Zionist could find
no man or woman to say a single kind thing
about him. FACT.

CNN: The Nazis Broke The Ceasefire!
http://www.youtube.com/watch?v=KntmpoRXFX4

Protest pictures from around the world (not on CNN)
http://www.rys2sense.com/anti-neocons/viewtopic.php?f=11&t=16496&start=0

Remember Israeli nazis to this day, insist as
DEMONIC LIARS, Hamas broke the truce - as Hamas
is responsible when they target school girls for
slaughter. They said the UN were secretly attacking
Jews, clearly a LIE as impossible to prove because
it didn't happen. But facts are the furthest thing
away from the godless false accuser Zionist con man
or demon witch LIAR like Livini. FoxNews calls the
demon witch a Jew! ANTISEMITES.

We can witness, Americans do not have the intellect
to understand what this means. See, LIAR Nazi Israeli
broke the truce to get killed Jews for money. A
regular fair for Nazi Israeli. Now, they state they
will continue to indiscriminately murder humanity
until the tin can rockets that travel miles stop
killing Jews who hate Zionists. But importantly,
it is Israel that wants Jews to die, so they can
make off as Satanic with our stolen values. Just
like the Bush family did with Hitler, that the
Nazi Nation has no probs working gun in hand to
wipe out Jews everywhere still to this day. Again,
Nazi Israeli MURDERED JEWS in Lebanon as targeted.
And leave Jews to starve to Death in Israel for
more charitable aid they can use elsewhere. Public
knowledge not disputed by any living soul on this
planet because, the Zionist government admits freely
to this. Israeli think being Satanic is worth it,
for all the money and lives they can steal as enemies
to Christ, Hillel, Mohammad, YOU, blahblahblah.

And, as demonic thieves, they steal homes from
innocent god loving folks. US. But see the McCainiac

HATES you as being a virtuous man or women, so they call for more indiscriminate carnage against Humanity, on failed hopes, that we as God are not going to come down to hunt them to the ends of this earth, try them, and have them executed for the war crimes of Torture, Rape, and mass murders committed for the neocons escape of 911.

Joe the Plumber to cover Gaza op

/ / Wurzelbacher says he'll spend 10 days covering the fighting and explaining why Israeli forces are mounting attacks against Hamas. \ \

Don't want an intellectual who might have a clue of what is transpiring with the forces of Satan, fuk, CNN'll likely hire him also. Don't you just hate this treasonous lying nazi demon? He has no journey man's license, never did, isn't a plumber, and doesn't have the millions of dollars he claimed he did to purchase a company that would have rolled over 250,000.00 a year for himself alone plumbing. Plumbers, as good as the job is, never generate that kind of money. Who cares though, right? A Nazi liar is what Zionist's want, and that is what America gets. TV'ed Americans couldn't care much less. Evil nazi McCainiac who's sworn existence, is to con teen soldiers for death to raise the fortunes on the un-elected Neocon bushmobsters now fancies himself a teacher on the struggles against evil. It's like that faggot at anotheruntoldstory.com, who's into murdering innocent Gays, while fucking his own brothers up the ass, who runs ads everyday at GCN, tells US now, all about how evil we all are for demanding Justice. How long do you think that'll run with the Alex Jones towners still raising no concerns? It's for the money as Ron Paul would say.. Again, it is to divide ourselves from true liberty, by demonizing the innocent on our radio and tv channels. Instead of Bush, Cheney, Rumsfeld, and Condi.

http://www.liveleak.com/view?i=ab0_1231290043

http://www.kuwaittimes.net/upload/img_pict/headline9637e7.jpg

Read of the bushite in my America who call this work of Satanic enemies, a good thing they support to war terrorism for the sadistically evil liars of the neocon. Then KNOW my friends, a bushite is the enemy of every living soul on this planet. Have no love for those in the Air Force, the enemies of Man who bomb our families without excuse, but to know, they hate

US as Christ to speak free for Humanity. That DEMON George Noory was so happy last night about all the good the bankers AND CHENEY are doing for their hatred they spoke of for all Russians. SEE? not to protect America, but to kill you with their true commitment to the demonization of innocent people, all to escape the neocon terrorists. I HATE George Noory more than anyone alive in America. He is so openly evil to ourselves, that only those who wished to lie to you, (like Alex Jones does about Ron Paul), would say otherwise as bushite dumfuk enemies. Cowards committed to escaping Bush and Cheney for treason against Freedom. They doctored the NIE on Iraq, highest of war criminality. Alex Jones has never mentioned it, but for MAYBE in passing. Hey because all the bad guys are just puppets to ignore over the elites, globalists, socialists, liberals, gays maybe, Blacks, Mexicans, and anybody else smarter than NWOer Alex. Ron Paul is a coward as rarely if never has a clue of which he is speaking on.

Israeli PM says to end offensive if Gaza ends rocket attacks

Sarkozy urges Syria to press Hamas for Gaza truce

How does the ungodly get away with this obscenity? Nobody can deny Nazi Israeli broke the truce, as they always have done as Satanic for the last 60 years. Killing Jews for money is popular with the Zionist Nazis don't you know us by now? FoxNews CONNED Americans for DEATH with the unmentioned, TREASONOUS doctoring of the NIE. To kill Americans for more neocon gains, which Alex Jones never mentions either. Do Americans even care enough to raise Humanity's call? Do they demand public executions of sadistic godless Zionist torturers? as the Standing Law of America - The War Crimes Act - brought to be by Reagan - DEMANDS by the Law of America? It is the Law after all, yet, CNN, CBC, and FoxNews calls the perpetrators of the most heinous evil against Mankind, heroes. America is
a nation of godless cowards willing to die murdering innocent Christians in Israel, all for the profits of the 'magical' zionistic private bankers. Bushite grunts are now supporting the indiscriminate carnage, serving as police services forbidding any of the prisoners in Gaza from fleeing the indiscriminate slaughter. Again, as Satanic, they don't arrest the "Suspects", for what could they truly charge them with?, no instead demand we die helpless murder victims by forbidding escape, as they did in Fallujah murdering more than three hundred thousand innocent

souls. Die bushite die screams to all men on Earth from the Son of God. Will you stand for YOUR life as truly worth something here? Like lawless enemies Policing your reality will bring you more happiness and prosperity with the great truth teller HAPPY George Noory? The demon who openly confesses the will to want to murder all children in around the age of 15? Too crazy for you to face such an enemy of huge demonic origin, so, go the cowardly way like Alex Jones as sell out slave instead, to cover the demon with endless praise on his treachery to not have our fight on everyday with open calls for understanding Justice is freedom. Instead of a constant stream of bushite dumfuk enemies of Living. This isn't complicated. Or it doesn't have to be.

Israeli nazis state they will murder humanity indiscriminately until rockets stop falling on their country. Yet, they broke the truce.

Alex Jones told US as a deceiver, he's been on Coast to Coast a hundred times. Not in these last eight years he hasn't. I demand Alex prove this, or be known by all far and wide a treasonous liar, trying to take US off the tracking of criminal action of his buddy, the demonic enemy LIAR George Noory. bin Laden didn't do 911, despite the facts that WE KNOW George Noory knows better of but LIES to con the American teen further for death at the profits of the un-elected bushmob. See Alex wants you to blame anyone but those directly involved in the crimes of 911, or Iraq, or those responsible for it's cover-up by Zionist propaganda. George Noory will have as invited guests whos only function there is to spread dis info as supporting more indiscriminate warfare for the escape of the neocon terrorists responsible for starting the illegal wars to begin US at. Or those whom often support torture, a war crime that only exists as irrationally held by those who's minds have only a blind hate for the indivisible rights of another innocent other. And often truly hate men and women for being Just as wise. The McCainiac Zombie video is a perfect example. When the Zombie is asked about the rights of Women, the McCainiac Zombie cried out for raping more Women. The position of authoritarian power, was only found with the bushite as oppressor, rapist, torturer, or Air Force Bomber, not liberation by freedom. The bushite McCainiac KNOWS it can't compete

openly to defend it's criminal treasonous
actions! Remember, Alex "the Conservative"
thought McCain was the choice if you had to make
one, earlier on, then changed his position,
sort of, later by calling them all puppets not
worth the effort, but .. Obama's idea's matter
not, it's that his Birth Certificate is, no war
too be fawned. Palin? who's she? McCain
firebombed Vietnam as "war hero" for France?
The Banker doesn't cover our loans? Matters
little.

Norwegian doctor: Israel intentionally targeting civilians
http://rawstory.com/news/2008/Norwegian_doctor_in_Gaza_Israel_targeting_0105.html

"All that is happening in Gaza here now is against
international law, it is against humanity and I
think it is against what it means to be a decent
person. You don't treat other people like this.
Even if you disagree with himï¿½ maybe even if you
fight with them, you don't treat civilians, children
and women like this."

Israel deliberately targeting civilians in Gaza
http://www.youtube.com/watch?v=Ev6ojm62qwA

It was almost acknowledged on CBC radio that
nazi Israelis, use the argument that a tin can
rocket traveled miles, to kill some innocent
Jew as a direct hit (likely a person who hated
godless NEOCON), all because that nazi state
has OPENLY, as PUBLIC policy, stolen water and
food including baby formula, along with a huge
list of other atrocities, to punish God and
Humanity since way back before three of four
truces. AGAIN, Nazi Israeli always, as ungodly,
break their truces. Why? Because YOU, or Christ
as any Jew's life means nothing, to all the
'free' billions they'll get from given American
worker wages. Look, Americans refuse to call
for the arrest of Bush on their national,
"truth telling" Coast to Coast radio program.
Why? Because, for one, George Noory, (Alex
Jones' best buds), has told US he's into
killing innocent kids as powerful, and that
'bin Laden did it', Is good enough for US.
You don't get a say here however how you will
live or die. George Noory calls all grunts
heroes, and those who refuse criminal orders,
those he wishes to go ballistic on. Yes, it's
true, George Noory is still alive and happy

as ever.

Rise Up for innocent Life, or don't and see
where it'll get you in the end.

Again, every soldier in the Air Force serving
for the neocon liar is a traitor warranting death,
to save the lives of their next innocent victims.
They have murdered more than two million people
in Iraq. They are pushing heroin into America
from Afghanistan. They are raping AMERICAN
women as officially "LAWLESS" (can't be arrested
but through Rumsfeld - who has not seeked any
prosecutions for the raping of American Peoples.
He, as Neocon, is TRYING to DESTROY FREEDOM
For all Americans in America - while paying
with American wages, South African death squads
to murder Black men) and TV'ed Americans refuse
to speak for Justice denied themselves. Zionist
amerikans only see US as innocent others, not
themselves to pay, but they do pay, they will pay.
God, nor John will not live in a world where
bushite grunts walk freely down our streets as
first degree mass murdering rapists, torturers,
and thieves. Celebrated by CNN, CBC, and FoxNews.
Especially when they DEMAND they have greater
rights than Human Beings. Mass Murderers deserve
immediate death sentence to defend ourselves
from their demon lies and betrayals to God and
Man. Every CBC and CNN reporter who reported
Russia attacked Georgia unprovoked will warrant
trial, then death sentences for their total
commitment to the Satanic NeoCON enemy war
criminals. Remember: they targeted for murder,
helpless innocent families. YOUR family. CNN
wants you to blindly believe, CNN personalities
like ENEMY George Noory are so happy, why would
we think they willed death against our great
Humanity by conning you for more stolen money
through the sacrifice of YOUR life for zionist
criminals who laugh at your powerlessness to
raise your voice for Justice.

Stealing the Title of Jew from Christ:

Fallujah by the Sea: Aping America, Israel Unleashes Chemical Weapons
in Gaza
http://uruknet.info/?p=m50412&hd=&size=1&l=e

Look at this picture of nazis indiscriminately slaughtering
our Humanity, while on MSNBC they reported that the Nazis
will continue to murder Humanity until a truce can be found,
A truce that the Satanic enemies of God will naturally break,
as they ALWAYS do. They are godless enemies of Life who wish
to steal the Title of Jew from Christ. They targeted Jews in
Lebanon with seven million land mines, and let Jews starve to
death in Israel for more charitable aid they can steal from
G-d's Good Will. When asked by Israeli newspapers why, it was
said to kill a Jew is rewarding for the godless Zionist.
Public record. Die bushite die.

http://lataan.blogspot.com/2009/01/israeli-zionists-guilty-of-deliberately.html

/ / In doing so, this makes Israel guilty of using
its own people as ï¿½victimsï¿½ for political purposes. \ \

-

What Israel Does Not want God or Humanity to See
http://www.kawther.info/wpr/2009/01/04/what-israel-does-not-want-you-to-see

Look at the comments from bushite grunts glorifing
in this indiscriminate slaughter of Innocent Human
Beings. Evil enemies of God do breath our air.
Die bushite die.

Israeli broke the truce knowing such action woud get
killed Jews in Israel, a cash bonus!

a-mother-from-gaza.blogspot.com

This web site is the winner of greatest interest internet site of the years 2000s.

Israeli plan to topple Hamas, re-instate Abbas
http://a-mother-from-gaza.blogspot.com/

/ / Breaking the truce Nov. 4, then, was Israel's way of getting the gears rolling for this whole sick game: the toppling of Hamas, and the re-instating of the impotent Abbas into Gaza so the "peace process" can remain forever in formaldehyde, to quote wiseass, er., Weisglass. \ \

Nov 4th! - perfect!. We are dealing with Nazi war criminals who refuse US, as a Species, Justice for everyone. Especially The Jew's Jew, Johnny America. Hint: they call us Love just to hide our complete agreement with this Living Universe to will Justice for God as every last bushite zionist freely moving. Once all the neocon zionists are rotting in a prison cell, or formally executed as godless war criminals, we all will have one joyous welcome in a heavenly future.. Until then, demand Justice for US. That's YOU too. Angels included. Who? I don't see no Johnny Wizard here anywhere, We are Good to Go. Rise Up for innocent Life, or don't and see where it'll get you in the end. The bushmob are traitors for closing official FBI investigations into 911, immediately after the mass murder of Americans occurred. Treason, of a, trust WE don't have it in US to stand for our common values as the Revolution will not be televised, Johnny Who. Man, are we or no? Be Somebody, then get on your phone to call in for Justice willed. Alive I Say! - this must be where you'd raise the dead and dying.. if you only could raise your finger to dial the phone numbers - well guess what? - I Command You Can! - snapoutofit - Speak for pursuing Justice on 911, and show serious concern for publicly paying private banker men trillions in worker wages for nothing. This is seriously disturbing, yes, but seriously important to address openly in our spaces to remedy with a Johnny Wizard World Wide Work of Wonder, Super CNN Special of Specials, with Your Host, the One and Only, President and CEO of Shareware Earth Co. John Himself. Hey everybody! Wow eh? So a.. when is the good guys showing up? Now. Justice. I want US to Host Coast to Coast for open Public communications, where things get solved because we know whats we're learning about. We of god, this way comes, then men and women with calculators to know: giving money to private bankers

on hopes they'll lend a small fraction some back
to ourselves at high interest is dumber than rocks.

I think you've been lucky (or are maybe mistaken about it being
acid-curing).

I have used silicone grease, but WD40 is more-readily available. It also
wets better, and creeps into the hidden nooks and crannies. I give
everything a good dowsing before and after assembly, assemble, wipe off
the surplus WD40, and seal with stretched self-amalgamating tape. Such
assemblies from over 30 years ago give every indication of lasting until
I am no longer in a position to be interested in amateur radio.

Hello All
Little scared here to post now about Velocity Factor (hihi)
I have all the parts I need to build the
EZ-Lindenblad Antenna For 2 MTRS

so I will build it and let you all know how I make out,the only test equipment I have is a MFJ 259 analyzer,and my good all trusty ears.I am very interested in the DCA antenna but I wont look at it until my antenna is built.Please all lets have some fun with this post and a learning and exercise.

Thanks to Everyone who posted

all the postings where very informative

Great point!
My worst problem was my TV antenna mast, 20' away from my Butternut.
Actually generated TVI until I replaced it all, including all brackets and
hardware. Most of my neighbors TV antenna systems look far worse for wear.
I have offered free labor to replace for surrounding neighbors and was taken
up on it by one who had never seen so many stations before. It seems to be
something that people don't do right anymore because no one will pay for it.

At one time I thought silicone grease would save wear on N connectors until I used the spray on wattmeter slugs and found it completely insulated the shell contact. I since found it caused an SWR hump on N connectors even if it were just a spot on the threads.

Trying to design a 13' vertical with a loading coil at 3'. It will be mounted on an aluminum tool box on a pickup. I modeled this on EZNEC and came up with loads to resonate on 14.2 and 7.2 mhz. Wind the coils with calculated inductance and it is way lower in frequency than predicted.

Tapped up the coils and eventially got matches, but was wondering why the design and real world are so far apart?

Hi Gary,

The devil is in the details. A more full description of the model,
like its file available from a web site, would be more productive than
a lot of guessing.

the real ground on the pickup truck is much more complex than you probably
modeled. what did you include for your ground model?

It sounds like the model of the pickup was inadequate -- it's at least
as important as the vertical. How did you model it?

You must have used the lumped inductance available in
EZNEC which assumes that the coil is zero degrees long.
I've found the helix option to be much more accurate.

Maybe you need to tell EZNEC a frequency in megahertz, not millihertz ;-)

(joke!)

I could see where the thin silicone coating might be an insulator to the low voltages from the wattmeter slubs, but I find the second statement exceptionally hard to believe. In type N (and even BNC) connectors, the threads (or the bayonet connection) are not in the RF path. Look close at either type of male connector and note that there is a coaxial shield around the center pin. This shield presses against the inside wall of the jack providing a continuation of the coaxial line. The threads (or the bayonet connection) merely provides a sturdy mechanical connection. This what gives the type N and BNC connectors a constant impedance, and what makes them far superior to UHF connectors. It also allows the use of a rubber washer to make the connector waterproof.

In one of my instrumentation applications, I had to use N connectors made of 304 stainless for corrosion resistance and high temperatures. Ceramic and glass insulation was used within the connectors. The female jacks were welded in place and rated to withstand pressures of up to 100 PSIG. Stainless is quite bad about galling, and these connectors cost plenty, so a silver paste was used to lubricate the threads. One day, I had to make an "emergency" repair in the field and did not have the silver paste; so I used PTFE thread seal tape instead. Going back to my lab, I tested a few connectors with the thread seal tape using a Tek 1502 time domain reflectometer. Even with several layers of PTFE tape, I was unable to see any difference in the impedance through the connector. Since the application was always less than 200ï¿½C, we quit using the silver paste.

And, when tightened threads *are* necessary for electrical contact, oil
or light grease often improves conductivity. Thread pressure is adequate
to squeeze the lubricant out from the contact areas, allowing good
metallic contact. And it prevents oxidation or other corrosion of the
contact surfaces when the contacts are moved or vibrate by excluding
air. This holds true for all contacts properly designed to wipe and
contact with sufficient pressure. Quite a few people incorrectly
attribute this improvement to conductivity or some mystical property of
the lubricant, but its real trick is simply to exclude air.

I would be surprised if a lubricant was sufficiently viscous and had
enough 'body' to act as an insulating layer between two parts of
well-tightened a connector.

However, I have personal experience that Araldite can. This was used to
ensure that a reducing bush (PG11 thread to 5/8"), in the wall of the
housing of a CATV amplifier, remained securely in place. On all four
ports, there was absolutely no continuity between the outers of the
connectors and the housing.

Araldite seems to be a trade name for a variety of adhesives. There are certainly materials other than the oil or light grease I was speaking of which will interfere with continuity, and some of those adhesives are apparently in that category. Kids, don't apply epoxy to your relay contacts. Honey and contact cement might not be too good either.

Hello, and that could well be it. After using NEC-4 to model USN HF antennas in their intended operating environment one finds that the local environment often requires beaucoup more wire segments (I never completely trusted patches) to model than the antenna itself. If conductive objects in close proximity can be excited by antenna currents then they are part of the antenna. A USN example would be the 2-6 MHz twin fan-type antenna that relies heavily on induced currents in the ship's stack for its feedpoint impedance and radiation characteristics. Sincerely, and 73s from N4GGO,

The real world and modeling are a lot different with vehicles than they
are with land mounted antennas. Your ground on your truck is very complex.

side question: Did you bond the bejabbers out of the truck? You
really should have hood, doors, tailgate, exhaust system in several
places, frame in several places, radiator, engine block, and any other
place of interest you can think of.

Rule of thumb is that you need at least one more bond than the maximum
amount you'd dare to place on the vehicle.

The vehicle bonding and grounding is more important than the aerial part
IMO.

The frame is the only substantial ground and certainly most effective for 40 meters. Use of the corners of the vehicle might actually get you a counterpoise on 20. What you really need is a trailing wire, dragging a cast iron stove.

I used to think that too. Good point about the inner shell, but I wonder if all N's are created equal. That might have tainted my results. The experiment was encountered in the process of tuning cavities, duplexers and other filters with a R2001D. I have used oils before but some will rot the gasketting. Grease or oils will migrate, but Stainless is a problem about galling. It was a regular thing to have to clean Silver dust and grunge from the bulkhead female with a q-tip and Isopropyl. The final answer was to add a sacrificial N male to female adapter to save wear on the Silver plating.

I also noticed Coffee doesn't make good contact cleaner either. Even with plenty of sugar (just trying to help).

1063. 40 meter groundplane questions

Newsgroup: rec.radio.amateur.antenna
Date: 2009-02-13 19:00:06 UTC
From: mat_62@netcommander.com
Message-ID: <2477b02a-bc76-4a0d-a04d-7e2438e2e6ea@h5g2000yqh.googlegroups.com>
Source record: 17687

I have a Rohn 30 foot telescoping mast that I'd like to use as the vertical element of a 40 meter ground plane. My idea is to add 3 feet of pipe to the top of it to make it the required 33 ft. long.
I want to elevate the bottom of it about 8 feet of the ground and run a couple of quarter wave wire radials out from it. This way they can be walked under.
My questions are these...
The ground slopes upward in one direction that I need to run a radial. The radial will have to have an upward sweep in order to maintain the clearance needed to walk under it. Will this be an issue?

The mast will be attached to my house to help support it. I can insulate it from the mounting bracket with no problem. What I'm wondering is with the fact of the mast being right up against the house and not in the clear, how much will the performance of the antenna be affected?

I have come up with this idea of a groundplane because I don't want to deal with burying a whole bunch of radials in the ground. Think it will work?
Tnx for any advice and suggestions and 73,
Michael, W4HIJ

> cast iron stove.

At HF, a vehicle isn't "ground" or a "counterpoise", but the bottom half of an asymmetric dipole. It radiates at least as much as the "antenna" due to currents flowing downward along the outside. Calling a vehicle "ground" or "counterpoise" doesn't impart magical properties -- it's a conductor carrying currents whose fields don't cancel. In other words, it's an integral, radiating portion of the antenna. You can't leave this significant part of the antenna out of a model and expect the model to give correct results.

And modeling a vehicle can be challenging because of the proximity of conductors, particularly the whip and vehicle. You have to follow the rules for closely spaced parallel conductors, and watch the average gain. You might need considerably more segments than normal where conductors are very close.

Roy Lewallen, W7EL

Yes Michael it will work fine. Keep the radials parallel to the ground under them and they will be fine.
A suggestion - keep it at 30 feet for simplicity. Make sure it is insulated where you attach to the house, the more the better.
Now the reason I say keep it at 30 feet is make it easier to build, because you have an unknown (how much the house is going to detune things). So the way you make up for this is with some matching at the base or with an antenna tuner in the shack. Since it will probably be too short because of the missing 3 feet, you will add some coil at the base which you make variable until you get the swr to a reasonable level, say around 2:1. Then just get on the air with it and make contacts. A 30 ft antenna works the same as a 33 foot one.

Rick

1066. Re: 40 meter groundplane questions

Hi Michael,

No more than any other design - which is to say it will fit into the
solution without any more effort or problems.

>The mast will be attached to my house to help support it. I can
>insulate it from the mounting bracket with no problem. What I'm
>wondering is with the fact of the mast being right up against the
>house and not in the clear, how much will the performance of the
>antenna be affected?

I would be more concerned with mechanical issues (like the moment arm
of the antenna ripping out a wall). Of course, this concern is rather
limited. As for the effect on performance - yes it will affect it. Do
you have any alternatives? If you do, those alternatives would
probably not bring any significant change (improvement or otherwise)
unless your home has metal siding (or metal mesh stucco). Wood is,
afterall, an insulator; and a house is largely filled with air,
another insulator.

>I have come up with this idea of a groundplane because I don't want to
>deal with burying a whole bunch of radials in the ground. Think it
>will work?

You are probably going to have to tune the antenna, or use a tuner.
Adding the "necessary" X feet to the top might do it, but simply plan
on building in a match or using a tuner and be done with it as a
problem. As for the radials, this is an issue of loss. If you can
put up with the loss, you don't need a "whole bunch." How much loss?
Probably less than the width of an S-Meter needle variation between
what you plan, and what you might do in a full scale elaboration.

From the responses I have gotten, that is the problem, I didn't model the pickup. I wanted a simple way to determine the L I needed to get the antenna resonant. I don't think it would be worth it to try and model the truck just to get that small amount of data. By the cut and try method I have determined the inductance I need is about 70% of the value I get on EZNEC. I guess that is not too bad, gives me a starting point. Thanks for the responses.

Check the name of the thread. "Re: an ontopic post about code"

>
>> Imagine the bad name
>> you give to other HAM's with your spelling.
>
> no you give a bad name to hams by showing youself to be an asshole

I freely admit I'm an asshole, and I don't have a problem with it. I
can be an asshole here and be amongst a great number of them, therefore
being nearly unheard. In the HAM world, well lets just say that in the
local crowd I am far more cordial that you have shown yourself to be here.

>>> indeed as the targt of the remarks that indicate the need for a
>>> reminder I am thealmost the only one in the world able to ntice

> no insulting the receiver gets to decide that

If you are willing to equate honesty with insulting then I cant imagine
what else you are willing to do to get your need to be the victim full
filled.

>
>> Please, review your posts to me in this thread.
>
> why?

Once again, I'd try and explain it but I don't think I could keep the

> yes

Maybe I'm wrong then, maybe English is not your native tongue. That
would explain your inability to write it coherently.

I'm sure "brain" does, but Brian is reported to be in Florida. And
lying to the FCC is a very bad idea. Specially if one wants to keep
one's HAM license.

>

Nothing ad-hominem about it. Accurate and to the point. Something you
have taken great pains to prove for me.

Ron

Hi Ken,

Very nice. All those R390s, R1051s, RBBs; but only one URC-32????? I
didn't see much familiar UHF/VHF either (SRC20/21).

Does any of this gear have power? Antenna access?

Welcome to the debate between Capitalism and Socialism!

Do you regulate the industry to keep free TV?!, or are we using
capitalism as a tool of communism once the industry is consolidated to
one or two world-wide corporations under republican control?

1078. Re: 40 meter groundplane questions

Newsgroup: rec.radio.amateur.antenna
Date: 2009-02-14 00:46:29 UTC
From: mat_62@netcommander.com
Message-ID: <2b40ffe2-346c-41e1-aca8-9bd32fc48393@v39g2000yqm.googlegroups.com>
Source record: 17502

Thanks Guys for the answers. I'm hoping to tune the antenna with the internal tuner on my radio. It's not a wide range tuner though so I may have to work with some type of matching solution at the base. What my reading on ground mounted quarter wave verticals makes me think is that I'd want about 16 radials. That qualifies as a bunch to me...hi hi... Easier in my mind to raise the base of the antenna 8 to 10 feet off the ground and use a couple of elevated radials.
I think the mast will be ok structurally speaking mounted to the house. It held up rotators and a small satellite array for years without pulling the wall down. It will still be attached at ground level with some type of non conductive support. The mounting bracket won't be the only thing holding it, in other words.
What I'm after here with this project is better low angle radiation for the purpose of working DX. My present 40 meter antenna is a dipole that is only about 20 feet of the ground. Not ideal as I'm sure you guys well know.

Hi Michael,

Your goal is admirable. Your goal shares the same aspiration of many
others who select a vertical antenna. We hear this goal quite often
as a reason for its choice. Unfortunately....

The greatest indicator of success in achieving low angle radiation for
a vertical antenna is actually found many wavelengths away from your
antenna - in the quality of the soil surrounding it at this distance.
The quality can be roughly determined by general descriptive
categories (like living next to a swamp or the ocean); or by reviewing
the FFC's ground charts.

Significant elevation of a vertical can reduce ground loss through
distance. It has been reported that the need for large numbers of
radials declines with this distance. You might think of hiking your
vertical higher. This reduction of loss translates into better
performance at lower angles, but it is not in its own right a solution
to better low angle performance as may be expected from simple
diagrams found in elementary discussion.

The best you can hope for is keeping both antennas, and trading from
one to the other for their diversity (when one won't work, the other
might). It serves no purpose to launch your RF off at 1 degree above
the horizon when it would only land in the Atlantic, skip a continent,
and land in the Indian Ocean. Propagation conditions will always
trump intention.

One of the locals found a site on which Mark claimed to be 40 yoa. That was in 2006.
He would have been born in 1966.
Which means that if Mark was in Nam, as he claimed, he'd have to have been 9 years old in 1975 when our troops pulled out. Seven years old if he were in the thick of things.
Maybe he WAS there...as a shoe shine boy.
How do you spell Liar?

Yup...caught Mark in yet another of his many lies.
He claimed that he was drafted into the Army as
1: A Lt. Colonel.
2. As a Second Lt.
3. Served in the Chemical Corp

the rest is pure bull hockey...

Now he claims to have served in Vietnam.

The last ten Marines were airlifted from Nam in 1975 as Saigon fell.

If Mark is 40 years old as he said in 2006, then that means that he was born
in 1966.
That would have made Mark NINE YEARS OLD when the last Marines were leaving
Vietnam.

And that, my friends, equates to Mark C. Morgan being one huge liar.

The better articles on radio reception:

"For instance, a registered nurse in Seattle was driving home from work at 2:00 a.m. listening
to a local program on her car radio. The station faded--a blackout--and was moments later replaced by country music from Omaha, Nebraska. On the US east coast, where dawn was breaking at the time, hams chatting locally suddenly picked up voice transmissions from distant parts of Canada. Strange.

These propagation effects, so much like those experienced during ordinary solar flares, quickly subsided. No harm was done. Nevertheless, the event made a deep impression on astronomers. From halfway across the galaxy, SGR 1900+14 had "touched" our planet."

Few month ago i had exactly the same effects on the mediumwave here. Thats the E.U.
It is best observed with a portable radio of the good sort.

As a kid, I had a 33-foot 40 meter groundplane of suplus aluminum
tubing, supported by the house and a few guy wires. There were 4 or 5
buried radials, and it worked nicely on 15 watts CW with the
pi-network output of a Heath AT-1 transmitter. I can't think of why
your proposed antenna shouldn't work. The main issue might be high rf
power playing havoc with your house electricals.

How many accounts has DeLorean stripped you of, Mark?

I know that you've lost quite a few of late.

You can't trust that darned DeLorean, Mark. He is always there, lurking and watching you. He has become your unwelcome shadow.

Just when you think that you have thwarted one of his Bots, he designs yet another and shows you to be an ignorant fool. DeLorean is light years ahead of you, Mark. But so are many others, too.

When will it finally dawn on you, Mark, that you are simply not wanted in these groups?

Does someone have to hit you over the head with a two by four to get your attention?

Mark is running out of accounts.
His floods are slowing to a trickle.

DeLorean is the reason, or so Mark says.

Damn those DeLorean bots!

Just when Mark thinks that he has a new account or two, DeLorean sneaks in and works his magic. Poof! Just like that, Mark loses another account.

Mark...live and please learn. You are not welcome. Nobody likes you. You are your own worst enemy.

1101. Digital TV Antenna Design

Newsgroup: rec.radio.amateur.antenna
Date: 2009-02-16 05:59:13 UTC
From: Bill Bowden <wrongaddress@att.net>
Message-ID: <47815aa5-80dc-48e2-8a75-1ca52ae8371a@e25g2000vbe.googlegroups.com>

Anybody have a good antenna design for the new UHF digital TV
stations?

I get reasonable results from my old VHF/UHF antenna (55% signal
strength) , but it's big and ugly, and I want to replace it with a
smaller, more efficient UHF design (maybe a Yagi) I can construct at
home.

Anybody know the dimensions of such an antenna, probabaly in the
frequency range of 400-800 Mhz ?

-Bill

Rule of thumb: The bigger and uglier the antenna, the better it works.

>Anybody know the dimensions of such an antenna,

Various commercial digital TV antennas:
<http://www.hdtvprimer.com/ANTENNAS/comparing.html>
with Eznec NEC2 files at:
<http://www.hdtvprimer.com/SIMS/>

>probabaly in the
>frequency range of 400-800 Mhz ?

There are going to be some DTV stations in the VHF range. You might
want to check the new channels for your area:
<http://hraunfoss.fcc.gov/edocs_public/attachmatch/FCC-07-138A2.xls>
List of frequencies:
<http://en.wikipedia.org/wiki/North_American_broadcast_television_frequencies>
Note that the upper end of the UHF TV band will be channel 51 at
698Mhz.

Many good all-channel antennas exist but the absolute best-performing
antennas are limited to covering one band, sometimes just a portion of one
band. (This idea started a lot of do-it-yourself antenna projects.)

If you determine that you have some stations on VHF and some on UHF,
consider having more than one antenna. In a home where I lived in the
pre-cable days, I had four different antennas.

Of note: The bigger the antenna, the more likely it will be highly
directional. If you expect to receive weak stations from more than one

direction, you'll probably need either a rotator or more than one antenna.
It's probably better to connect multiple antennas through an A/B switch,
rather than combining them.

You Hams seem to be very mean sprited toward my husband, Mark.

Most of you are extremely cruel.

Mark has done nothing wrong, not now, not ever.

Mark has been, and continues to be victimized by all of you. He is a wonderful husband, I may add.
He is not the best of providers, but he does the best he can on a limited income. I pay the utilities and he chips in a few dollars when he can.

Whether or not we live together is not your concern. Our sex life is also none of your business.
I have told Mark to keep me out of this and he paid the penalty for telling you that I am bisexual.

He slept in the back yard, in one of his junk cars for two weeks. He made up to me and gave me flowers and promised to never again compromise my personal information.

I love him even though I made him crawl on his knees like a whipped puppy.

Yes, I am domineering. I carry the whip and Mark knows how well I dole out discipline.

Let you learn from my warning, DeLorean, Roger, Lloyd and others. You do NOT want to see me, Gav, showing up on your doorstep with my whip in hand. I will be your worst nightmare come true.

By the way...did you read my book report on Amazon? It is worth reading.

And that photo of me on the KD8CTL blog is way outdated. I haven't looked like that since I was 24 years old. I dyed my hair and wear trifocal glasses now.
I used to be skinny in those days.

The coat hanger antenna is all the rage. Works better than a
store-bought Yagi.

I'm assuming that there is a capacitor formed by the car body being some
few inches away from the physical ground also?

Given my limited experience, it's gotta be very difficult to model. My
setup was worst case, as far a sensitivity to bandwidth goes, a
bugcatcher. Best of a bad lot, I guess, but that makes the tuning very
sharp and sensitive. I'm assuming that the antennas that have fixed
elements "work" and tune by being pretty inefficient.

Which makes me suspect that we won't find any Hi-Q HF antennas that
aren't manually tuned in some fashion.

You could just cut off the long VHF elements and use them, cut to UHF
size, to extend and increase the number of director elements.

Interesting article, it describes the Lindenblat array as a quartet of
coaxial horns. Not the same as a quartet of dipoles at all.

Sure. I can always trade bandwidth for gain. If you only watch one
DTV station, a single channel antenna is a good idea, especially if
it's distant and weak. If you don't like rotators, perhaps a
collection of single channel antennas pointed at each station might be
useful. I live in the mountains where reflections are a problem for
OTA reception. For a time, I was building and selling custom single
channel TV antennas, with built in preamps. They worked great, but
when Comcast started offering $13/month for local only TV, I gave up.

>If you determine that you have some stations on VHF and some on UHF,
>consider having more than one antenna. In a home where I lived in the
>pre-cable days, I had four different antennas.

Same here. Back in the 1970's, I lived in Israel for a while. In the
cities, everyone lived in big apartment complexes. Nobody watched the
official Israeli stations. The good programming was on the various
Arab stations, which were diverse, distant, and politically incorrect.
There was no cable TV (because the government didn't want to make it
easy to watch the Arab stations) so every apartment had its own
collection of antennas. Typical was a 3 meter pole with at least 4
yagis. Multiply that by at least 4 apartments per building and the
roof tops looked like an aluminum forest. Somewhat later, I lived in
Smog Angeles where everything is on Mt Wilson. Only one antenna
needed.

>Of note: The bigger the antenna, the more likely it will be highly
>directional.

<http://groups.google.com/group/rec.radio.amateur.antenna/msg/8535c986a167ac41>
"small - efficient - broadband: pick any two."
Roy Lewallen, W7EL

I've dealt with some rather monstrous log periodic directional
antennas. They cover the entire HF spectrum, but only have about 4dBi
of gain at any frequency. Directionality is about what you would
expect for a 4dBi antenna (about 80 degrees -3dB beamwidth). Just
because it's big, doesn't mean it has gain or a narrow beamwidth.

The same thing applies to TV antennas. If you compromise on the
bandwidth by reducing the number of channels it covers, then you can

get some more gain and narrower beamwidth (for a given size). That seems to be what's happening as the highest frequency goes from 900 to 700MHz. However, that's not going to make a huge difference is size of gain. More useful is ignoring the VHF channels and making the antenna UHF only. That really reduces the size of the antenna or increases the gain (for a given size antenna).

>If you expect to receive weak stations from more than one
>direction, you'll probably need either a rotator or more than one antenna.

True. I once was involved in building direction finders. I got greedy and decided to find a commercial application. What the world needed was a direction finder tied to a rotator and yagi. The yagi would automatically rotate to the direction of the strongest signal. I first tried it with a TV antenna and it worked. Unfortunately, my pre-microprocessor circuitry did not have any way to distinguish between multiple peaks in the signal strength as well as antenna side lobes. It would often pick the wrong lobe. Making a 360 degree scan would solve this problem, but that increased the complexity beyond acceptable limits.

So, I decided that perhaps it might be useful for commercial two-way radio. I installed one on a mountain top site on a UHF commercial frequency. Useful range was dramatically increased for the repeater. However, during a typical conversation, the antenna would rotate back and forth between each mobile and base. Commodity antenna rotators are not designed for near 100% duty cycle. It was also a dice toss as to whether a mobile could be heard, depending totally on the current antenna orientation. I could have improved things with a better and faster motor, but didn't. I know a bad idea when I design one.

I also built an omnidirectional TV antenna designed to be hung near the top of the local 50 meter redwood and fir trees. There was enough vertically polarized TV signal to make it usable. However, it also picked up reflections from every possible direction, resulting in multiple obnoxious ghosts. Bad idea, but fun to try.

>It's probably better to connect multiple antennas through an A/B switch,
>rather than combining them.

Yep. If the signals from multiple antenna could just as easily cancel as they could add. However, if you installed a band pass filter between the antenna and the combiner, the signals from one channel will only appear on one port, thus eliminating any chance of cancellation. I would filter and combine.

Yes. This alters the current distribution on the vehicle, and can make
it an even more effective radiator than the "antenna".

Yes again. Manufacturers discovered long ago that hams like antennas
that are small, broadband and quiet. No problem -- small coils, small
wire, and bingo -- the ideal antenna. Rotten efficiency, but I've heard
countless hams over the years fussing and bragging about low SWR, and
nary a one who said a word about efficiency. Fortunately most hams don't
realize how many QSOs you can have with a watt or two of radiated power,
otherwise they'd be more concerned that that's all they're getting with
their 100 watt rig.

Those days are gone, we have cable TV, DBS TV and streaming video on the Internet. In the cities the antennas remain, no one wants to pay the money to remove them. Eventually it will be necessary to repair the roofs under them and take them down.

We are also supposed to have digital terrestrial TV in a few months, but instead of each station having various programs, there will be multiple channels on the same frequency.

Hi Joseph

I sent an E-mail to the address shown as yours in this group. I use
EZNEC and have lots of files on various sizes and shapes of the DCA and
other OmniAzimuth and Hemispheric coverage antennas. I'd be happy to share
them with you if you E-mail me directly.
I figure it will benefit me to see the facts and data that shows where I
am mistaken about how the DCA better than the other hemispheric coverage
antennas for LEO use. It is likely that I have overlooked something.
maybe the DCA can be improved.

However a location such as" 5 miles east of town on the Interstate"
is good enough to aim the antenna, but may be obscure enough to prevent
vandalism, theft, etc.

Geoff.

1133. Hex Beam in QST

Newsgroup: rec.radio.amateur.antenna
Date: 2009-02-16 21:30:21 UTC
From: john Wiener <jawod@fuse.net>
Message-ID: <8f1c6$4999daf4$d8c4d49f$14935@FUSE.NET>
Source record: 17457

Anyone care to comment on the relative merits of the hex beam project in QST vs. the commercial hex beam offered by Traffie Technology?

I don't understand the means of feed for the multiband elements as shown in the QST article.

I also don't understand the $1100 plus price tag for a similar set up by Traffie.

The light weight and portability appeal to me. I've not done a homebrew beam but a kit at a decent price point would be welcome.

I haven't been able to compare my setup with one of the small systems, but I have to think that it was worth th eeffort. It's anecdotal of course, but signal reports have been pretty good.

I really must post a picture somewhere some time. It's a true monstrosity on a little Suzuki Vitara. My biggest regret is that a lot of people just *have* to come over to talk to me while I'm stopped and operating. Law enforcement is also interested - every one who has stopped to talk to me has been friendly but intrigued. A guy from the Fish and Game commission is going after his license now. The regret is that it can take away from operating time. 8^)

>and take them down.

Yes, I know. The real problem with the antenna clutter is that there was some shading of the ubiquitous solar water heaters also on the same rooftops. While trying to repair one of the antennas, I stepped on the glass collector and cracked it. Oops.

Incidentally, I recall that most of the roofs were poured concrete which could probably withstand a mortar attack. I doubt if they will require much repair.

While in Israel, I had the bright idea of starting a company to provide cable TV. I went to the Ministry of the Post (now called Ministry of Communications), asked about the regulatory details, and was immediately detained as some manner of spy or subversive. Apparently, CATV was rather unpopular with the government at the time. I had to be rescued by my relatives. Sometime in the 1980's, Israel established the Council for CATV and Satellite Broadcasting, who's primary purpose was to obstruct deployment. That changed after one of the changes of government, which suspected that there would be less rioting in the streets, if people stayed home and watched TV.
<http://www.moc.gov.il>

At the time, I had been in the US 2way radio biz, so I decided that Israel might benefit from a commercial radio company. I went back to the Ministry of the Post, inquired about licensing, and was again detained as a spy or something. I was again rescued by the relatives. At the time, during essentially a war time economy, there was no

commercial radio service. That also has changed, but at the time, the
only radio communications was government, military, and ham radio.

>We are also supposed to have digital terrestrial TV in a few months, but instead
>of each station having various programs, there will be multiple channels
>on the same frequency.

We have the same thing here. At this time (before the demise of
analog in June), TV stations are broadcasting one 6 MHz channel of
analog. They were also granted a 2nd 6Mhz channel for digital, which
carries 1 to 4 digital channels. Usually it's a clone of the analog
channel, a Spanish language version, continuous news, and something
else. For a while, one station had one channel with a DTV camera
scanning the scenery around their transmitter building. It was one of
the few things worth watching, but alas, it went away.

Sure. It's on the FCC page for the station.
Start here:
<http://www.fcc.gov/mb/video/tvq.html>
Inscribe the call sign in the call sign box.

For example, this is the results for KNTV:
<http://www.fcc.gov/fcc-bin/tvq?list=0&facid=35280>

Incidentally, I've tried to obtain transmitter locations, power line
routes, water line routes, location of telco central offices, and
other utility information from the operators at various times. After
2001, the standard answer is that it would compromise their security
if such information was disclosed. Sigh.

The Cavell Mertz web page does a much more elegant job than the FCC's:

http://www.fccinfo.com/CMDProEngine.php?sCurrentService=TV&tabSearchType=Appl&sAppIDNumber=1087036

The info is identical.

They used to be able to be found in the FCC database. I recall when a
digital station in Kingsport, TN, first went on the air several years ago,
I looked up the data on location. The FCC even had the antenna pattern on
file.

1143. Smith Chart Tutorial

Newsgroup: rec.radio.amateur.antenna
Date: 2009-02-17 03:33:09 UTC
From: bulegoge@columbus.rr.com
Message-ID: <85b9a2a9-652d-4871-a97b-c8e5b7edd1fa@m15g2000vbp.googlegroups.com>
Source record: 17467

Hi,

I have created a Smith Chart Tutorial located here:

http://www.fourier-series.com/rf-concepts/smithchart.html

It is comprised of flash programs with embedded audio. It allows you to learn the smith chart through the interactive nature of the flash program.

I have completed three flash programs on this subject, and intend to write two more. The tutorial explains the smith chart, allows for capacitive/inductive matching and introduces how a transmision line affects the reflection coefficient.

Good Luck with this

Brent

1144. Designing an antenna for the 5000m band

Newsgroup: rec.radio.amateur.antenna
Date: 2009-02-17 04:22:20 UTC
From: Frnak McKenney <frnak@far.from.the.madding.crowd.com>
Message-ID: <PLOdnWEeL_XhpgfUnZ2dnUVZ_qPinZ2d@earthlink.com>
Source record: 17468
Cross-posted to: sci.electronics.design,rec.radio.amateur.antenna

Back in December I posted a question about ways to receive LF/VLF radio signals. Based on the suggestions made by a number of people here I decided to use my existing Heathkit Mohican receiver and add this upconverter kit from Jackson Harbor:

http://jacksonharbor.home.att.net/lfconv.htm

The kit arrived and was half assembled before I turned on the Mohican, its first power-up in some years; the horrible squeal that erupted from the speaker put a bit of a damper on things. It now appears that replacing the two output transistors (Germanium, no less!) with NTE102As from Mouser will fix that, so I'm thinking about an antenna that might be a little more snesitive to LF signals than the Mohican's built-in whip.

Along those lines, I have a couple of (what I hope are) simple questions that I'm hoping someone can help me get started with.

First, the need for impedance matching between an antenna and a receiver. My understanding is that a resonant halfwave dipole will have an impedance around 73 Ohms; unfortunately, unless I can obtain research funding from the just-passed Congressional Economic Stimulus bill I'm going to have trouble paying for 2.5km of copper wire, some towers, a crateload or two of porcelain insulators,and the land to build it on. (Hey, I promise to dump it back into the economy ASAP. Really! <grin!>)

So any non-loop antenna I can construct will necessarily be a "short wire" or "electrically small" antenna (two useful search terms). But how does one go about calculating the impedance of a coat hanger or an extension cord ("short piece of wire")?

I've done Google seaarches and read what seemed like the relevant sections of the 2004 ARRL Radio Handbook and their Antenna Book; unfortunately, most authors restrict their discussion to quarter-wave or longer antennae. Any starting points, hints, or references on impedance calculations for less-than-1/10-wavelength antennas will be appreciated.

My other question has to do with how to interpret signal strength. The first "standard reference" transmitter I'll be attempting to receive will be WWVB out of Fort Collins, Colorado (60kHz/5000m). Per the NIST documentation at:

NIST Special Publication 250-67: NIST Time and Frequency Radio Stations: WWV, WWVH, and WWVB

http://ts.nist.gov/MeasurementServices/Calibrations/
Upload/SP250-67.pdf

figure 4.5 seems to say that I could reasonably expect to see a
signal of at least 100uV/m. Does this mean that I should expect to
see 100uV from any one-meter hunk of wire strung out horizontally in
the optimum direction? Or is there something more subtle going on I
need to be aware of?

I modelled this the other night over a 15-degree slope

Basically, the pattern will have only about a 10db null. The pattern will be good at low angles downslope and a bit raised upslope. The antenna will even be half decent for NVIS at medium distance downslope.

In short, go for it!

This thread got a little tangled. If, as I think, you're asking for
coordinates for a US station, try,

http://www.fcc.gov/mb/video/tvq.html

1. Enter the call letters for a known station. KLTV might be a good one.
2. Press <Enter> or scroll down and click <Submit Data>.
3. On the following page, click the station call letters. If a station has
more than one listing, click any of them, as they all lead to the same web
page.
4. On the next page, scroll down, observing the different documents issued
by the FCC for the station. They may have a "TV" license for analog, also
have a "DT" license and/or a DT Construction Permit. KLTV has seven irons
in the fire, those busy bees.
5 Each one of the entries for a different document provides specifics for
the installation (or proposal) document. You will see ERP, transmitter
location, antenna height above ground, above average terrain and above sea
level. There are links to area maps, including a coverage map.

(For an agency that wants its licensees to toe the mark, this FCC database
is not free of errors. If the given locations are, in fact, correct, your
desired coordinates are provided to the arc-second, about 100 feet.) Here's
a quick sample:

Licensee: KLTV/KTRE LICENSE SUBSIDIARY, LLC
Service Designation: DS Special Temporary Authority (digital)

Channel: 10 192 - 198 MHz Application
File No.: BSTA-20060217AAS Facility ID number: 68540
CDBS Application ID No.: 1115172

32° 21' 6.50 " N Latitude
95° 15' 59.20" W Longitude (NAD 27)

This website accepts data query in a variety of formats. Interesting to enter a LAT/LON and a distance (in km). The website returns all stations within that distance. (Some may be low-power translators aimed away from you, thus useless.)

Yes. I have a seven foot TV parabola on my roof, but my next-best antenna is an absolute piece of junk, literally. My neighbor was throwing out an all-channel antenna that was blown down in a storm and badly damaged. I clipped the connections between the UHF & VHF sections and hacksawed off the mostly undamaged UHF section (12 directors, I think). With a section of pipe rudely jammed into the boom as a counterweight, I'm pulling in stations 125 miles away almost as well as with the parabola.

Turning other people's discards into functional devices is an art. (I'm the guy who worked Hawaii on 20m with 100 Watts into an extension ladder. ... and no, I wasn't feeding it with ladder line.)

Hi Frank,

One doesn't try.

The simple solution is the conventional one - you use a tuner.

The tuner provides the matching (providing it has sufficient
inductance and capacitance - you will have to investigate designs) and
adjacent signal rejection (which could seriously de-sense your
received signals).

Your antenna doesn't need to be very big, but it might help to have it
very remote, if there are noise sources nearby (like motors, aquarium
heaters, bottle style TVs, ...); and the line sufficiently choked. A
good ground too, tying into the service ground through a separate wire
to reduce coupling of noise from shared grounds. This last may
introduce a ground loop if your Mohican is so vintage as to have had
relaxed design standards. A little research online reveals it is
battery operable. You may want to fully exercise that option.

For many people, the Cavell Mertz site beats the pants off the FCC site I
posted.

It must use the FCC raw data, since I see it has a long-standing FCC error,
KFMB-DT on Channel 55. They moved to Channel 7 (interim) last summer.

Multiple megabytes: too large to paste the text into a newsgroup
article, and I didn't think that appending it as an attachment would
be appropriate.

If you're limited to a dial-up connection, I can see that the size
might be a problem. I could download a copy for you and forward it
via e-mail if you think that would be any easier.

...Interesting. When I access a copy this morning, Adobe Reader 7.0
fetches _something_, but when I try to "Save a Copy" I get an I/O
error pop-up, and Reader's Find command gets hung at about page 17.
This is the same file I had no problems running a Find all the way
through (several times) last night... wish I had saved a copy then
(ain't hindsight wonderful? <grin!>).

Would you like for me to forward a copy to you once I'm able to
get a complete one?

fccinco.com is a third party front-end for the FCC Query database. When
you submit a search Cavell Mertz submits a query to fcc.gov. There is a
little report at the bottom of the page.

Hmmm, I could, but then again just about anyone who reads here is going to have issues trying to understand what it is you are attempting to write. Only those who have not gotten beyond third grade would be able to glean an infinitesimal portion of your meaning.

Now, since you obviously have little or nothing to contribute to any of the news groups to which you post your spam, maybe I can appeal to your limited sense of humanity and get you to "stfu".

A field strength measured in Volts/meter is just that, but the problem getting the energy out of the air and into a receiver.

A short linear antenna has a very low radiation resistance (<< 1 ohm) which is a poor match to a practical transmission line, whose characteristic impedance is typically 1000's of times larger. The radiation resistance of an antenna is the component of its complex impedance that is associated with the power captured. Poor impedance matching is equivalent to low energy efficiency, in this case very low.

One solution is to use a small circular loop antenna whose low radiation resistance can be increased by adding turns. Balanis (Antenna Theory Analysis & Design (1997), p.209) gives a formula for the radiation resistance of a loop smaller than 1/25 wavelength:

R = 20 * pi^2 * (C/L)^4 * N^2 ohms

where C is the circumference of the loop, L is the wavelength and N is the number of turns.

Better still is to use a ferrite loop antenna. You may be able to get one out of an old AM radio and adapt it to your receiver. The resulting formula is identical to the above, multiplied by the relative permeability of the core, u (SQUARED !), so you can use a very small-diameter loop and/or fewer turns, getting improved selectivity and sensitivity (i.e. high Q) in a tuned circuit:

R = 20 * pi^2 * (C/L)^4 * N^2 * u^2 ohms

A field strength measured in Volts/meter is just that, but the problem
getting the energy out of the air and into a receiver.

A short linear antenna has a very low radiation resistance (<< 1 ohm)
which is a poor match to a practical transmission line, whose
characteristic impedance is typically 1000's of times larger. The
radiation resistance of an antenna is the component of its complex
impedance that is associated with the power captured. Poor impedance
matching is equivalent to low energy efficiency, in this case very
low.

One solution is to use a small circular loop antenna whose low
radiation resistance can be increased by adding turns. Balanis
(Antenna Theory Analysis & Design (1997), p.209) gives a formula for
the radiation resistance of a loop smaller than 1/25 wavelength:

R = 20 * pi^2 * (C/L)^4 * N^2 ohms

where C is the circumference of the loop, L is the wavelength and N is
the number of turns.

Better still is to use a ferrite loop antenna. You may be able to get
one out of an old AM radio and adapt it to your receiver. The
resulting formula is identical to the above, multiplied by the
relative permeability of the core, u (SQUARED !), so you can use a
very small-diameter loop and/or fewer turns, getting improved
selectivity and sensitivity (i.e. high Q) in a tuned circuit:

```
R = 20 * pi^2 * (C/L)^4 * N^2 * u^2 ohms
```

Antennas can be modeled by various NEC based programs. For example:
<http://home.ict.nl/~arivoors/>
<http://www.eznec.com>
<http://www.nittany-scientific.com>

Note that the common "atomic clock" gets its time from WWVB at 60KHz
(about 5000 meters) using a tiny loop antenna. Huge antennas are not
required for many application.
<http://www.mas-oy.com/data/MAS_docu_AR.htm>
<http://www.leapsecond.com/pages/sony-wwvb/>

Also, search Google for LOWFER.

Why do you want a good impedance match?

Why don't you want to use a loop antenna?

At 5000m, atmospheric noise is very strong -- it would certainly overwhelm any thermal noise that you'd receive if you did make a 1/2 wave dipole (don't forget that your towers need to be at least 2500m tall to get close to the ideal). Getting an appropriate impedance match is mostly about maximizing your signal compared with your receiver's internal noise; the strong atmospheric noise makes this less necessary.

This atmospheric noise also makes really efficient receiving antennas rather unimportant. You want a good fraction of a wavelength for _transmitting_, but it really doesn't make much difference for _receiving_.

The two common receiving antennas that I know of at that sort of frequency are tuned loops and capacitive whips.

A loop can be fairly small -- my understanding (which I've never tested, YMMV) is that one square meter is plenty. Loops are nice because you can tune them, so they give you some additional selectivity on your receiver front end. You can impedance match the loop to your receiver, but most of the impedance your receiver sees will come from the wire in the loop, not the radiation resistance of the loop. Loops are also somewhat directive, which helps to reduce the total static received, and if done correctly (google "shielded loop") they can be arranged to reject sky waves (I _think_ by polarization, but I'm not sure).

A capacitive whip is just a 1m long wire whip (like a coat hanger or welding rod) feeding some high impedance amplifier like a JFET (or a toob, if you want to be picturesque). Put the active element right at the base of the wire for best signal. It's inherently wide band, and hard to keep it from being so, so if you have some local interference it'll kill your signal (my first try at these didn't work in my shop because of a nearby electric fence transformer, but it worked fine at the end-user's more-urban location).

A field strength measured in Volts/meter is just that, but the problem getting the energy out of the air and into a receiver.

A short linear antenna has a very low radiation resistance (<< 1 ohm) which is a poor match to a practical transmission line, whose characteristic impedance is typically 1000's of times larger. The radiation resistance of an antenna is the component of its complex impedance that is associated with the power captured. Poor impedance matching is equivalent to low energy efficiency, in this case very low.

One solution is to use a small circular loop antenna whose low radiation resistance can be increased by adding turns. Balanis (Antenna Theory Analysis & Design (1997), p.209) gives a formula for the radiation resistance of a loop smaller than 1/25 wavelength:

R = 20 * pi^2 * (C/L)^4 * N^2 ohms

where C is the circumference of the loop, L is the wavelength and N is the number of turns.

Better still is to use a ferrite loop antenna. You may be able to get one out of an old AM radio and adapt it to your receiver. The resulting formula is identical to the above, multiplied by the relative permeability of the core, u (SQUARED !), so you can use a very small-diameter loop and/or fewer turns, getting improved selectivity and sensitivity (i.e. high Q) in a tuned circuit:

R = 20 * pi^2 * (C/L)^4 * N^2 * u^2 ohms

Cops want cellphones out of 800. Some will go to 700 (ch 52 and up) after
the digital transition is completed. Cops cite interference as the reason,
so if they have it all to themselves they can complain about themselves.
Not a good time to be a radio tech.

didn't you die of deep bowel cancer yet? damn.

1174. Soldered copper connections exposed to elements

Newsgroup: rec.radio.amateur.antenna
Date: 2009-02-17 19:56:50 UTC
From: Tim Shoppa <shoppa@trailing-edge.com>
Message-ID: <38c06d58-4580-4acb-b3e8-b07fbcf1134b@v15g2000yqn.googlegroups.com>
Source record: 17498

My homebrew open wire line has spacers held on by soldered tie wires every foot. So, in the 90 foot rise, a lot of tie wires. I used copper wire and 60/40 solder.

While the copper wire has certainly acquired a greenish patina over the years, if I inspect the soldered connections they have flaky white-gray stuff on the outside. It seems to be pretty soft and if I scratch at it I can see shiny solder underneath.

The green on the copper is copper carbonate, I suppose. The whitish stuff on the solder joints is maybe lead carbonate, lead acetate, lead sulfide, maybe tin something?

Is the chemical reaction progressive, or does the coating on the outside stop further reactions from going on in the joint?

Any lessons I should learn about protecting outdoors soldered joints? The environment is pretty benign, just hot summers, cold winters, occasional ice storms, no saltwater air.

Tim N3QE

Maintenance would would certainly add to the longevity of the solder
joints.
As is they may only last a hundred years or so.

All my antennas for DTV and analogue are Quads and Quagi antennas. A two element Quad for channel 2 and 5 VHF(its wideband enough for this), a three element for channel 11 VHF and a 9 element Quargi for channel 63 UHF. Thats all the TV
stations we have here on the island. Easy and cheap to make and they perform like hormones IMHO. My non technical wife says they and the array looks like a Christmas tree, therefore not ugly but cute -)
Need more info... Tons on the Inet or let me know.
Chris

> acetate, lead sulfide, maybe tin something?

Mostly carbonates and oxides, I would think. The solubility in
water is low but is greatly increased by dissolved carbon dioxide.
Wash your hands well before consuming food if you get the corrosion
products on you.

> Is the chemical reaction progressive, or does the coating on the
> outside stop further reactions from going on in the joint?

Yes the reaction is progressive. The surface coatings will slow the
reaction but not stop it. According to one of my sources, lead/tin
solder is slightly anodic with respect to copper meaning that the
solder will be corroded away protecting the copper. Another
source says the reverse is true. However lead, tin, their alloys,
and copper are all close to each other in the galvanic series.

The only hard data I have is for 50/50 solder and copper in flowing
seawater, and your application is a far milder environment. The
potential difference is between 0.01 and 0.03 volts which is quite
low. Because of this, I expect your transmission line will last
quite a long while.

> Any lessons I should learn about protecting outdoors soldered
> joints? The environment is pretty benign, just hot summers, cold
> winters, occasional ice storms, no saltwater air.

I would avoid soldering to galvanized or cadmium plated steel. But
to connect to an aluminum alloy antenna you may have to use zinc
plated terminals between the copper and the aluminum. In this case,
I would clean the solder flux off the connection and then liberally
paint the connection with a good outdoor paint. Acrylic paints will
weather the best here.

The worst thing in your vicinity for corrosion is acid rain.
Waterproofing the connections will help protect against this.

I found an old 5 element yagi cut for channel 52 which was used years
ago for a pay TV station called "ON TV". It has 3 (10.5 inch)

directors spaced apart 5 inches, one (12 inch) reflector and the driven element is about 11 inches. The diameter of all elements is a little larger than a coat hanger.

Wondering what the bandwidth would be for other UHF stations below and above 52?

And is there an easy way to modify it for wider band?

I also need to get the high VHF band for channel 7-13, so maybe one more reflector is needed?

-Bill

This may be a duplicate answer: I _know_ I wrote one, but it seems to
have fallen into the bit-bucket.

In short:

For receiving you don't need to couple well enough to the ether to
overwhelm the receiver's noise with the Faintest Possible Signal. You
only need to overwhelm the receiver's noise with atmospheric noise.
Given the amount of atmospheric noise at 60kHz, that ain't hard.

When you get to the point where you hook up the antenna to the rig and
you heard static over the noise of the receiver, you know your antenna is
good enough.

(Transmitting is a different story, but try transmitting at 60kHz and
after the FCC gets done with you antenna size will be the least of your
worries.)

Whazza matta widda loop? They work fine, they provide some welcome
selectivity (well, at 60kHz one may provide _too much_ selectivity),
they're easy to construct, they're reputed to reject sky waves -- what
more could you want?

If you don't want to use a loop, the last time I did anything at MF a
short (1m) whip going to a JFET source follower was considered the bee's
knees to solve this sort of problem. The whip will pick up atmospheric
noise just as well as it'll pick up the intended signal, the JFET will
impedance match from that low-capacity whip to your receiver input (I
assume, I don't know what the nominal input impedance of your rig is),
and all will be well.

> Frank McKenney

A field strength measured in 100 uV/meter is just that, but the problem getting the energy out of the air and into a receiver.

A short linear antenna has a very low radiation resistance (<< 1 ohm) which is a poor match to a practical transmission line, whose characteristic impedance is typically 1000's of times larger. The radiation resistance of an antenna is the component of its complex impedance that is associated with the power captured. Balanis (Antenna Theory Analysis & Design (1997), p.137) gives a formula for the radiation resistance of a short dipole:

R = 80 * pi^2 * (W/L)^2 ohms

where W is the length of the antenna and L is the wavelength. The value for a monopole is roughly half as much again.

Why do you request a non-loop antenna? A small circular loop antenna also has a low radiation resistance but it can be increased by adding turns. Balanis (p.209) gives a formula for the radiation resistance of a small loop:

R = 20 * pi^2 * (C/L)^4 * N^2 ohms

where C is the circumference of the loop, L is the wavelength and N is the number of turns.

Better still is to use a ferrite loop antenna. You may be able to get one out of an old AM radio and adapt it to your receiver. The resulting formula is identical to the above, multiplied by the relative permeability of the core, u (SQUARED !), so you can use a very small-diameter loop and/or fewer turns, getting improved selectivity and sensitivity (i.e. high Q) in a tuned circuit:

R = 20 * pi^2 * (C/L)^4 * N^2 * u^2 ohms

Hi ML

I had sent Brent an E-mail as soon as I read Brent's link. That Smith Chart program is wonderful. and open source maves it valuable to many people. I really like what Brent has done.

> One doesn't try.

So Yoda was right: "Do, or do not. There is no 'try'." <grin!>

What has puzzled me is that I have run across designs that use
(e.g.) a JFET isolation amplifier hooked to a whip or hunk-o-wire
with the statement (or implication) that this is done to ",atch the
antenna's impedance". So I;ve been trying to figure out how to
calculate/estimate what it would be, without much success.

> The simple solution is the conventional one - you use a tuner.
>
> The tuner provides the matching (providing it has sufficient
> inductance and capacitance - you will have to investigate designs) and

> received signals).

I imagine that the inductance of a 6' extension cord (not plugged
in, just dangling from a planter hook <grin!>) is down in the
uH-or-less range, which would mean that most of the "tuning"
inductance would have to be supplied to achieve 60kHz. I have this
image of a big (tens of mH) inductor in series with a moderate
capacitor and my (electrically) short wire; all of the surrounding
EM sets the electroncs in the wire to dancing, but the series RC
blocks those which are wiggling "off-key" (e.g. not dancing at the
"proper" rate of 60kHz).

> Your antenna doesn't need to be very big, but it might help to have it

> heaters, bottle style TVs, ...); and the line sufficiently choked. A

> good ground too, tying into the service ground through a separate wire
> to reduce coupling of noise from shared grounds.

Well, there's no question that I have EM in the area. I hooked my
DVM -- set to ACV -- between the radiator and my 6' extension cord;
would you believe 8-10V??!! Not much current, though: feed it
through a 1k resistor and measure the voltage across it, suddenly
it's down in the mV range. <grin!>

> ... This last may
> introduce a ground loop if your Mohican is so vintage as to have had
> relaxed design standards. A little research online reveals it is
> battery operable. You may want to fully exercise that option.

The Mohican came with two 12V power "modules" which plug into the
back of the unit. The AC power module has a transformer with a
12V-12V center-tapped secondary, which is good, but then they run
the line voltage out of the module and down into the receiver's
volume control's on/off switch. The module's 12V power and 120V
switching connections are done through a 9-pin tube socket with
mating connector/cable; remember those? <grin!>

> 73's

Thanks for the hepl.

That's what I keep reading; any caution you hear coming from me is
based on years spent in close association with Murphy. <grin!>

I'm a long-time devotee of the Divide'n'Conquer(tm) school of
analysis and troubleshooting. This only works well when one is
familiar with the appropriate problem-partitioning tools and has
experience using them; as it is, I'm trying to acquire the knowledge
that will let me know why things didn't work when they don't work as
expected. <grin!>

> Also, search Google for LOWFER.

Thanks. I did see the phrase, but forgot to write it down; after
some hours searching the 'Web and reading it all seems to run
together. <grin!>

>> does one go about calculating the impedance of a coat hanger or an
>> extension cord ("short piece of wire")?
--snip--

> Why do you want a good impedance match?

Because I'm trying to snatch a signal that I have no experience with
"out of the aether", a signal that has to somehow excite an antenna,
feed into an upconverter, arrive at my receiver, and produce some
specific identifying evidence that I'm detecting the signal I hope
it will rather than (say) reporting that my neighbor is using his
electric razor. <grin!>

Each of these pieces (except perhaps the Mohican) are untested (by
me), and I don't have any tools that will help me easily distinguish
between (say) a bad upconverter, a poor antenna, or excessive noise.
Like many such situations, I'll know if I _succeed_, but if I don't
there won't be any clear indicators to help me figure out _which_
piece of the puzzle isn't fitting properly.

In short, anything that sounds like it might affect my results is of
interest to me.

> Why don't you want to use a loop antenna?

It's a question of time and effort: it looks like it will take me
less of each to test the "wire" first. If it succeeds, I'm done; if
not, I can start experimenting with loops.

Which is, of course, a variant on one of my favorite puzzles: How
do you allocate your resources when you don't yet know what you're
doin... er, "under conditions of less-than-perfect information"?

<grin!>

> At 5000m, atmospheric noise is very strong -- it would certainly

Yeah. All that, plus the funding. But mostly the funding. <grin!>

> This atmospheric noise also makes really efficient receiving antennas
> rather unimportant. You want a good fraction of a wavelength for
> _transmitting_, but it really doesn't make much difference for
> _receiving_.

Which may well be true, but it seems puzzling. Why would it not be
important to deliver as much of the induced electron movement to a
receiver as possible?

> The two common receiving antennas that I know of at that sort of

Talking about "radiation resistance" in a receiver antenna also
feels a bit odd.

> waves (I _think_ by polarization, but I'm not sure).

Yes. I'm reading up on loops so I have an alternative available in
caseXXXXXXX_when_ something goes wrong.

This is the direction I'm starting in.

> ... (my first try at these didn't work in my shop
> because of a nearby electric fence transformer, but it worked fine at the
> end-user's more-urban location).

Gack! I don't suppose it used an old Model-T spark coil, or a
buzzer-and transformer equivalent? I remember in my youth (Dirt(tm)
had been invented, but it was still considered cutting-edge
technology <grin!>) just how badly one could mess up AM BCB
reception with a string of those Christmas tree bulbs with built-in
bimetallic-switch flashers.

Well, I'm getting static with the built-in whip. On the other hand,
I haven't hooked up the downconverter yet.

Yeah, but the picture of all the local "Atomic Clocks" changing at
once _is_ rather appealing. <grin!>

Well, from my point of view you just justified the effort you put into this second post; you got me digging into the Mohinca's manual which lists sensitivity (10uV) and Selectivity ("3 kc wide at 6 db down"[sic]), but no specific antenna impedance. According to the _schematic_, the two screw-lug connections on the rear of the chassis are "HI-Z" and "GND" (apparently the Heathkit designers thought of a "short wire" antenna as high impedance as well). The HI-Z line runs through a "12uuF"[sic] to the whip, and then both are connected through a 22pF capacitor to the Main Tuning and Antenna Trim capacitors.

Fortunately the LF upconverter comes (IIRC) with 1MHz and 4MHz crystals, so I won't be trying to force a 60kHz signal past those itty-bitty little capacitors. <grin!>

Yes. It's not like I can just hang a bucket out the window and
bring it back full of electrons wiggling at just the right speed.
<grin!>

Um... 1.5 * 80 * (%pi^2) * (1/5000)^2 is... 471 micro-Ohms? That 's
pretty low; why would anyone match that to a JFET input?

> Why do you request a non-loop antenna?

I started there, ran into some questions, and wanted to clear up the confusion in my own head before moving any further. It's not as though I'm prejudiced against them; heck, some of my best friends have radios with loop antennae. <grin!>

Oddly enough, I now have ten old transistor radios that I picked up at FrostFest a few weekends back for $1 each. I was looking for ferrite and wide-ratio tuning capacitors, as they seem to be in scarce supply these days. I don't know where today's kids are getting their crystal radio parts from these days; it certainly isn't Radio Shack.

Hi Frank,

Matching provokes heated debates that in times past ran to 600+
postings - few knew what they were arguing (but enjoyed arguing
nonetheless) and little was offered.

A JFET at these frequencies does satisfy the naive requirements of
"matching," but that giving you a reception solution doesn't always
follow.

> So I;ve been trying to figure out how to
>calculate/estimate what it would be, without much success.

The Mohican schematic says quite planely Hi-Z input. This is borne
out by the antenna connection feeding a tank circuit in the front end
where the input stage is fed from a low tap into a 470 Ohm resistor.
This would be your JFET feed Z, but you could choose any suitable
close value. As for the input Z, the JFET input resistance is
perfectly capable of mismatching horribly high - although this is not
about optimal power transfer at these impedance levels. What is at
risk, is the JFET input capacitance which could present a low Z at
some frequency. Naturally, you select your JFET against this to
optimize. It will be in some ratio to the antenna capacitance (if it
is bare, short wire) and that will establish the proportion of signal
that gets in by divider action.

>I imagine that the inductance of a 6' extension cord (not plugged

That is one way, other ways work too and are electrically equivalent.
Loops help tune and match by a slightly more elaborate means, but
still fairly holds to simple requirements.

You don't need wire to build an inductor. At these frequencies you
can use a capacitor in a Gyrator design.

>all of the surrounding
>EM sets the electroncs in the wire to dancing, but the series RC
>blocks those which are wiggling "off-key" (e.g. not dancing at the

And this responds to the filtering capacity (selection AND rejection).
This is called "Q" which also serves the yeoman's task of matching as
well (observe the input tank design for the conventional bands).

>Well, there's no question that I have EM in the area. I hooked my

Still a lot of power. However, those are probably 60Hz fields because
DVMs rarely have the AC BW to go much above 1Khz.

Remembering isn't difficult. I broke into electronics through
TV/Radio repair during high school. If I could fix it, I got paid.

Anyway, power connections from that era brought "ground" notoriously
close to lethal if you plugged the radio into the wall wrong. Some
used AC noise reduction circuit design that could almost guarantee
your chassis was floating at 70V if things went wrong.

I had an ET striker (Navy parlance for a student electronics tech) who
connected a TV antenna input to ground, and the insulation melted off
of the wire in a heartbeat. This was in the day when we called TV
power line interlock replacements "suicide adapters."

Its not uncommon to have a high impedance input into a preamp. This is
the one-size- fits-all
approach. While its not good engineering for the purist it works quite

well to make a casual user happy and may be the practical solution for
even the professional installation..
Ive had some experience limited working with VLF and it always seemed
the thing that made the difference between a good and bad VLF
antenna was the quality of the ground network

I don't see how you will be able to elevate the base of that
fairly heavy mast to 8 feet, and still be able to raise and
lower it.
And.. it will need guy wires to keep from falling over.
Myself, I would use the 30 ft mast as the support and
build a lightweight aluminum radiator.
I made one from a junk 5/8 wave CB antenna.
The base was already fairly heavy duty, and I added
internal tubing to make the lower part stronger, and
adding progressively thinner tubing to get it to 32-33 ft.
The very top of the whip was a thin automotive whip.
The antenna itself is totally self supporting, and is
much easier to deal with than a heavy mast.
One person can hold it upright very easily.
But it would also let you have the base of the antenna
at 30 ft instead of 8, which would greatly reduce ground
loss vs the lower antenna.
Eight feet off the ground is not high enough on 40m to
greatly reduce the amount of radials needed vs a
ground mount. That's only 1/16 of a wave off the

ground.
With only two radials at 8 ft off the ground, your
ground losses are still going to be nearly as high
as if the antenna was on the ground.
But at 30 ft, which is almost a quarter wave up,
two radials would give you fairly decent performance.
I ran mine at 36 ft off the ground with four radials.
Was about equal to a ground mount with 60 radials
or so. Overall, the antenna kicked butt for DX
vs dipoles at 36 ft. :)
If you use two radials at eight feet up, I'm guessing
that would be appx equal to a ground mount with
4 radials or so.. Won't be a barn burner by any means..
It will "work".. But it won't be near as good as the
one I ran, unless you greatly increase the number
of radials for that low height above ground, or
get it higher up. With the telescoping mast, I was
able to try it at lower heights with the same four
radials. It was not near as good at say 16 ft up as it
was at 36 ft. Not even close really..

I've been using elevated quarter wavelength verticals in 4 square vertical array operations for years like this. But there is a way to do this which is FAR safer for you relative to lightning strike issues as well.

In my case, the vertical element is always a solid metal pole/tower which goes all the way down to and into the ground at the base. This works even without the elevated model with elevated radials as well.

Feed the vertical element at the feed point height, ground level, 8 feet up for you - whatever, with a gamma match section attached directly to your coax feed line. I make my gamma match sections with the little six inch TV feed line holders through which I thread copper wire in the little brown insulators that are out away from the pole by their length. You tie the feed point up at the top of a run of several of these. Then at the bottom at the feed point for the coax, you bond your coax braid to the actual tower element.

You run the hot tip wire for it to, at first, a variable capacitor which you adjust for the desired flat SWR match for the feed. Of course if you are going to use that variable permanently for the required capacitor in the gamma match section, it will need to be decent enough spacing for whatever power level you intend to use with the array.

But there is another trick! You can use a small receiving spaced variable capacitor to do the experimentation for the match with one of these little antenna analyzer units, Or .. even just and SWR meter in a crude sense. Then when you get the nice perfect flat match with the variable, you can figure out the capacitance needed for how many feet of your feed coax that would be! Usually it is only a few feet or so on 40 meters for RG-8 for example. You cut a piece of it that will have MORE than the required capacitance. You tie the braid to your hot tip point feed wire from the feeder coax. You then tie the tip point of the little piece of feed coax that is being used as a capacitor in this case to your gamma match input wire tip.

At that point, you take a cutter, and start snipping off little bits of the short coax piece you use for the capacitor! When the SWR comes down to the intended bottom nicest value, you simply strip a little more of the braid off

the free end of the capacitor coax chunk, leaving the insulation and center wire free in the air for an inch or so. And tape over it with tape to protect the end from the weather if you like.

Presto! Absolutely flat SWR match to your vertical element that will stay out there in the weather for years with no trouble. Since the mast is always hard flat grounded to the earth, in concrete for my towers, or with a few little six foot radials around the ground point for poles, to distribute the lightning strike into the surface, POOF no lightning damage to the place!

Sure .. you bring the feed coax down to ground level. You go under the surface to the shack, with a gas discharge protector plan on it as normal.

My 80 meter 4 square built like this .. four gamma match sections, one on each element, gets hit directly at my QTH at least once a year here. Absolutely no damage to the shack stuff from this ever for almost two decades of this now. And it is connected and up 24X7 just like the broadcast tower stuff.

Is that set of articles available on the web? That'd be an
interesting read.

That's why all my antenna masts are metal and run all the
way down to the ground.
I don't know how many strikes I've had, but I know I've had
two of them with me sitting in this chair, which is about
15-20 feet away from the mast.
I've never had any damage. It's kind of weird..I don't
think I ever took a direct strike when I had the 40m GP
going. And it was nearly 70 ft up to the tip. Both strikes
that I saw were just hitting the 36 ft mast, which was
supporting wire dipoles at the time.

Some of them. I remember on of them coming up in a discussion
in one of the radio newsgroups, and someone posted a URL.

They are practical hobby stuff mostly. A VLF converter, how to match
longwire antenna, an active whip antenna, a balanced loopstick. The most
useful non-hobby one was how to derive time/frequency references from
Loran-C.

I'm reluctant to go to the effort because this was back in the era when
R-E was paranoid about photocopying, with colored backgrounds for the
figures and charts, and it would take a day or two to photoshop the
scans so that they are of decent quality. Also, they were, near the end,
one of the more Internet savvy publishers and there may still be somebody
around to enforce their IP.

It has an effect, it upsets fags like you...now, go contract bubonic
plague or anthrax or something.

The 5 parts were later combined into a separate reprint, sold by R-E.
Sections for theory and circuits, construction, testing. Then building a
passive tuner VLF-LF, and a final section on loop antennas. One of the five
sections is a Loran-C receiver!!
I have an original copy in perfect condition, 30 pages, glossy paper,
copyright 1984 by Gernsback Publications, Inc.

Bushite Alex Jones "Obama is so much worst than Bush was"

So, don't arrest him for treason that murdered Americans?
Remember, Alex in eight years did everything he could to
not allow any to discuss BUSH'S crimes spree. Doctoring
the NIE?, prior plan from Condi? Or stealing 50 billion?
I could easily go on for paragraphs on DOCUMENTED CRIMINAL
ACTS - acts that Alex would not allow YOU to know need
defense to save the lives of innocent Americans.

60 Minutes: CIA Official Reveals Bush, Cheney, Rice Were Told Iraq Had
No WMD
http://greywolf.newsvine.com/_news/2006/12/20/489409-60-minutes-cia-official-reveals-bush-cheney-rice-were-told-iraq-had-no-wmd

Dumfuk Grunt "Duh, why are we here to kill
good people needlessly so the bushmob back home can
further rob our undefended families bro? Bro?"

What's The Point Alex?

Hey! Alex Jones said today Bush isn't guilty of nothing,
but boy, Obama is bad he'll tell you never mentioning
the FACT Bush LIED US into the Iraq war as a war crime. 1441.
Won't allow it. Why? He is a bushwhore, a believer in Bush,
the Antichrist enemy of Humanity who told US if we tried to
form our own conclusion, we would all be terrorists. NO JOKE.
Bush, the most evil man of all History, Alex claims is
guilty of nothing. Example: Bush, is his first days,
STOLE 50 billion dollars. How can Bush (the banker family
tied to Hitler) be above all the laws of the Universe
someone ask Alex. You know, Alex will hang up on any man
or woman who states in question, as he did with Peggy,
a once loyal listener, why he refuses to acknowledge the
evidence of Ron Paul being cheated through a fixed
election. Attempting as a demon, to demonize whomever
phones with such truths - like Ahamd, or Condi's 911 plan
for Enron. Alex Jones is openly a bigot, and a man who
has OPENLY confessed the willingness to murder INNOCENT
Americans - before allowing Justice to rule for the
defense of every American. I want open debate, he wants
censorship, so he can continue to masturbate to the
continuing deaths of innocent Americans. Laughing with

DEMON George Noory who claims Laden did 911, Hamas broke the truce, and Iran is a holocaust denier. Enron. Has Alex even ever mentioned it as motive for invasion of Afghanistan? Never. Has Alex ever stated the Taliban were simply asking for evidence to form anyone's conclusion on who was PERSONALLY responsible for 911? NEVER. THINK here. Even after me sending him email after email for years. Alex states all who criticize him, are delusional, because he warns people of poisons fed the masses. So therefore, every last word I state about Alex Jones undermining our wanting for real Justice is correct without argument - As according to ALEX, he is delusional. Wow eh? Alex is a stupid bigot as a matter of fact. He'll tell you we gotta get past the left right thing, (trying to steal my thunder - where i give to all freely) yet, near next breath, or the one before, he'll tell you what all Liberals think. Or all socialists, or... blahblah Someone should ask him what Christians think about letting the mass murdering LIAR Bush escape Public trial for high treason by conning teen grunts who are now dead. Bush PERSONALLY closed 911 investigations immediately after all. Again, NEVER mentioned by Alex as important to our struggle to arrest, try, and execute those responsible for mass murder in Johnny's America. An America were every Human life is worthy our protections. Where Alex Jones is NO GREATER than anyone of US. He is in a popularity contest, while I couldn't give a rats ass what rupuglicon, or demoncrates think about my wise words on God and Justice. Great entertainers I am not blindly enamored with, nor do I believe FALSELY, demon Bush, the Antichrist, is above and beyond all laws of our Humanity. If 99.9 percent of godless Americans disagree with me on God's will to have all neocons with the Bush Administration arrested immediately for public trial for high treasons, to hell with them all as they lose their rights rightly. For, they are not our friends who willingly murder OUR Humanity for stolen private Banker gains. Alex, a bushwhore, a censor, wrongly believes Bush is guilty of nothing. A bushwhore of the antiChrist he is. I mean come on, he claims all those folks who followed truth mentioned in the Bible were murdered. How stupid is that????? From what I recall there was a suicide, and well, that's about it. How many American "Christians" actually believe a man of God actually walks this world? How many? Being Gay is okay with me. I'm not Gay, but still to each his or her own, as long as your not infringing on the rights of another to do what ever they choose. I love all children too much. Real Freedom. GCN advertised HATE for Gay folks, then at the website, murder - and the station sees still, no problem with dividing our innocent masses on desperate

attempts to escape the neocons from Justice. That's the REAL reason Alex states a derision for Liberals. Note: "Liberals" in Canada are a right wing party that disbanded the RCMP corporate crime division as perfect example, and! sent a Soldier to prison for refusing criminal orders. Never allowed by Alex, for his gold dealing boss has a son killing innocent Peoples for Neoconned cash in Iraq today. ALEX WANTS TO CENSOR US ALONG WITH THE ENTIRE BIBLE NOW WHILE MASTURBATING HOW HE IS NEVER WRONG? In his dreams maybe, but not our shared suffering reality. By the way, has Alex ever written for Justice? and why not?, considering he is so greater than all others who haven't been invited on his show he stupidly said two or three days ago, me, and everybody else here globally? Truly delusional he is for not being truthful. Be a man Alex and face me in open debate to defend YOUR idiocy, he won't becasue HE KNOWS, Americans would win, and he would look the fool as loser. Too cowardly to defend America he is, because he doesn't have the virtue for it, and refuses to hold respect for men like me hugely wiser than himself he works to keep all down for death. Alex claimed the will to gun down kids who steal copper. Not only a man unqualified to "lead the Truth", but not qualified to even carry a gun. He told US when hearing the bullets going into the backs of two innocent men in an act of pre-meditated murder, it was 'the sound of Liberty'. That is evil to all my friends, evil to US all. He has called himself "the white devil" while mimicking another he refused to allow speak for himself after all.. And no, a debate between US and Alex will not be done where he gets the cut off switch to deny all others under the sun who speak for real Justice. Real freedom.

Bush and Cheney are traitors to the cause of American Liberty. To leave them free, is to leave America un-guarded from further transgression.

Patriotic American Navy Vet is tortured by bushite nazi grunts
http://killfile.newsvine.com/_news/2006/12/21/491153-white-american-navy-vet-is-illegally-detained-tortured-and-tried-by-us-government?last=1166730840#last_4

Again, Reagan warrants death to all who torture, and a deep hatred for all ungodly in America who support it. Why? Because the vast American public (especially FoxNews treasonous LYING enemies of The People) DO NOT have the intellectual skill to understand what freedom is. Justice. Look at me! they can't seem to talk for Christ's interests, that smart ass know it all, where he thinks he's so ingenious where no one on Earth can find fault with his indisputable simple logic we share EQUALLY. (Bankers don't cover our loans for example) Kill my kids,

my spouse, myself, before allowing John to speak openly
in the public on Coast to Coast for open debate, all of
Americans say in silence censored. Why does America continue
to die this way? Because bushites are truly as they claim,
stupidly ignorant as treasonous cowards, or as
prosecutable criminals, evil people who only want in this
world to rob or murder People indiscriminately as enemies
to Justice, enemies to GOD, a Criminal. NOT A JEW you fuks!
George Noory will tell you freely all about his hatred for
our Humanity, he does it near everyday, though People don't
have the ears to hear, or the care. Too scummy. That
remember! get American GIs murdered by the score with NO
REASON AS FOR. Example: why bomb more than a million
innocent souls indiscriminately in Iraq, if you have
complete unrestricted access to go where ever you will?
And, that Bush, Cheney, Condi and such, knew from day one,
Saddam had all the WMD destroyed as documented fully, as
did I. Documents that BUSH personally stole if you recall
not listening to Alex Jones, Foxnews, CNN, or the CBC.
err. maybe it was Bolton - s-t-o-l-e-n -.
Likely, as a likewise deeply ignorant person, you know
little of Life as principled for individual freedom, and
couldn't care less what this boundless Universe offers
all in reflection, instead, it all about what's in it
for you as a lying cheating thief to this mystery right?
Wanna be a lawless mercenary to murder innocent people
dreaming of becoming a private investment banker, who
never earns a dollar in their entire careers, taking
trillions undefended from Humanity just to see US
suffer to deaths for our continued silence. All you have
to do is raise your phone to demand justice in our times.
All Neocons must be arrested for public trial, along
with near every last member of the Bush Administration.
PUBLIC TRIAL. And Soldiers must learn quick a commander
who doesn't support getting those responsible by following
the crimes scene leads, is a commander deserving of an
immediate firing. Otherwise, what use is the grunt
good for eh?

Again, Ron Paul like near all Libertarians, does not
acknowledge the wanting of Justice for the high crimes
of Banker fraud, Iraq, or 911! He took the "Truther"
money, but refused to support the arrest of Bush for
treasons times 50. Social Security he wants to gut
like Health Care as a sadist who knows near nothing
on how such systems currently operate. Again, he
does not speak of recouping the STOLEN 1000s of
billions from America, or the lives. STOLEN. What
is it that you can't figure here? Fuk ego, FACTS.
We are all effected by suggestion, this is why,

since the dawn of time, evidence has been the
prerequisite to convince ourselves of anything.
Alex's cartoon storyboard, is truly, as measured,
Alex masturbating with our precious times. Think:
Alex doesn't ask Americans why they don't support
the arrest of Bush for high treason because a world
where all are treated equitably is beyond his
understanding as a bigot. He could change, but he
is 'light years ahead of the Public'.. but of what?
All you need do, is every time Alex says "they",
ask yourself, WHO? - then know: the bartender at
"Bilderberg", isn't as FOR SURE guilty of crimes as
Condi from "Builderberg" is. The 911 plan came from
her very desk according to MSNBC, never mentioned by
Alex Jones. Why? You have to be near genius like
me to explain it COMPLETELY without even seeing it.
NOT MAGIC, more like meditation through understanding
our universe is ruled by good ideas. Alex is a man,
a Good man mostly, with some fears countered with
an irrational aggression (not thought through) that
found him blindly supporting the murder of two
innocent men. Not freedom. while I, am of God. An
actual god. The Son of Man as a matter of fact.
I want to tell you how great Life could be, but i
see so very little of words present to survive the
lawless corporate state. I AGAIN, will ask YOU to
forward this post to two People, but will YOU??
Torture is outlawed by warranting Death under Reagan,
and.. it's like the best way to resolve a FoxNews
'excuse' given to illiterate nazi grunts to abuse
ourselves as innocent others. Tell me I'm wrong. .
KBR rapes American women, or murders them, and needs
to be hunted down by All American military forces
for it, as trialled to death. Including all commanders
of the Air Forces responsible for bombing our families
without causes. And lastly, any that discourage our
grunts from not supporting the arrests of those that
actually did US wrong. Get to it.

http://groups.google.com/group/alt.fan.jesus-christ/browse_frm/thread/5b24b172a24a923e?sco
ring=d&

/ / Again, as bushite fascist nazi vermin, they let those
responsible for destroying America through the bushmob
war crimes, still sit in the, for sale freedom captain's
chair, high-jacked from US true Loyalists, attempting to
get away the bushmob is doing from 9/11, by going real
fast .. nowhere. \ \

True you Fool

http://www.crooksandliars.com/Media/Download/16792/3/60Minutes-Tenet-2.wmv

/ / OH THE HORROR.... To those who say I lied about what
Tenent FREELY confesses (60Minutes-Tenet-2.wmv) LISTEN
in horror at what America is truly led blindly into
hell with STILL.. \ \ crooksandliars pulled the recording!
It it Tenant tells of the bushmob knowing in July 2001 bin
Laden was going to get blamed for a strike big in America
from a cave in Afghanistan! Then later, (not mentioned) in
AUGUST! Powell went over there himself personally, and gave
the Taliban 43 million dollars as an award. Swear to God true.
NOT HIDDEN. Look it up. I mean it made almost all the major
dailies. See? This is what Alex fears, that wise men, actual
wise men, like myself, can put this stuff together in seconds
by freely communicating for open challenge on error, of what
would take others committed to dying through censorship for
blind fear, never in a lifetime spared. Who cares right?

Johnny Law for Coast to Coast radio host!

DEBATE OVER

/ / Late last week, a federal court ruled that
there was no link between childhood vaccines
and Autism. But the legal conclusion is not
enough to erase many parents' concerns and
the debate continues. \ \ Mercury causes brain
damage as a neural-toxic heavy metal. Love God
why don't you? Alex near always calls his
critics jealous, so, are you jealous? Would
you rather see every American child murdered,
or suffer toxic poisoning, before acknowledging
we are without challenge, the greatest minds of
our time? Hurt you does it? Can't find a single
argument against my demand for Justice, but dying
instead, claim my call for freedom practiced
is to good is to be true in your dying dummy world
censored? It IS George Noory that denies you the
respect a person who craves Justice for all 911
victims. Cartoonish Alex Jones, the bigot, sucks.

The New World Order Alex Fears
http://groups.google.com/group/alt.military.police/browse_frm/thread/c61e5ca386f9f07b?hl=e
n

This Specifically:
http://groups.google.com/group/soc.culture.iraq/msg/c681b8ed9de5ede3

Alex Jones, "Liberals don't like Bush."for
mass murdering Humanity as never elected
demon enemy of God he means?

He tries to divide the freedom movement
away from Justice for ourselves.

Question for Alex Jones NWOers, wouldn't
God, if we existed, wouldn't God, push for
a one world government where all are treated
fairly through Justice practiced? Yes or no?

America! I am King Johnny.. I am from the Planet
Earth, I've come to share the knowledge of Justice
in our times on behalf of this, Our Future Great
Triumph over Evil.

/ / At 8:51, the flight [175] deviated from its
assigned altitude [31,000 feet - therefore cell
phones impossible], and a minute later New York

air traffic controllers began repeatedly and unsuccessfully trying to contact it."

And one minute later at 8.52, Lee Hanson receives a call from his son Peter. \ \

Couldn't have happened, as is why, these phony "FBI" bushmobsters stole the recordings and don't want the still dying victims to know the truth of the Neocon traitors to God and Justice. Cell phones are not capable of paralaxing above likely a couple thousand. Someone on Earth would likely know the near exact scientifically measured distance as nothing greater than a couple thousand, for why the need to put towers all over our fair cities then? 31,000 feet is a distance of miles! Hint: 5,280 feet in a mile. 5.871212 miles in fact. Drive out 5 miles from your nearest cell phone tower, oh yeah, and don't forget to bring a elevator like aluminum box to stand in, moving 500 miles an hour, then ask yourself, how dumb does a Repuglicon or Obamanaut take US for as silenced to the tyranny of mass murder in my America?

TED SAID SHE DIDN'T HAVE HER PURSE
http://911review.org/Sept11Wiki/Olsen,Ted.shtml

/ / Ted supposedly told CNN that she called him collect. However; once a credit card is swiped, you can begin using the phone to make calls. So, no collect call would have been made. \ \ The allegation also has been debunked by reported to be, Airline officials who stated no public phones were even available on 177. That seems near too far fetched, BUT!, GTE Airphone reports DO SAY - zero call assists were made on flight 177. ZERO. So, how then does she make a collect call then, and why if as claimed, Ted and Barbara were madly in love, would she not know her hubby's personal number?

Remember, Ted was the coke pusher's lawyer in the Contra case, of which Ted, was also assistant secretary to the Solicitor under Reagan. The Contra group if you recall were/are pushing crack cocaine into major cities for plans to undermine the American government for illegal wars against peaceful civilized life as stolen profit. YOURS.

FBI SAYS TED OLSON LIED OR WAS DUPED. NO 9/11 PHONE CALLS
http://www.youtube.com/watch?v=v78ibOa4PDE

The Olson story would make for good horror
if it just wasn't so horrific. EVEN I'M
SPOOKED. Olson tells of a elaborate drama
where he learns, she without her pursed
cell-phone, has to call through the phone
records of the Justice Department. How did
he forget that fact when first pronouncing
of how she had phoned him from a cell-phone,
or, then from an airliner that didn't have
phones in the cheap seats, nor tear-gassed
upper-classes? The trouble here is that
a small cadre of bushmobsters keep hiding
the evidence on CNN, FoxNews and George Noory
implicating themselves at the crime scene,
as illegitimate "intelligent officers" -
we WANT to know our media voices the voices
of those who support defending ourselves from
the 911 war mongering terrorist enemies.
Evidence is the prerequisite.

Beverly Eckert - victim to mysterious plane crash
http://www.commondreams.org/views03/1220-04.htm

/ / By suing, I've forfeited the "$1.8 million average
award" for a death claim I could have collected under the fund.
Nor do I have any illusions about winning money in my
suit. What I do know is I owe it to my husband, whose
death I believe could have been avoided, to see that
all of those responsible are held accountable \ \

Americans Want Torture Inquiry, Obama Doesnï¿½t
http://www.uruknet.de/?p=m51793&hd=&size=1&l=e

(who spoke to Obama just several days ago about bringing
Justice for America - Beverly, a anti-torture campaigner
also, likely spoke to Obama on the interest for EVERY
American Christian to hunt for prosecutions of bushite
enemies who lawlessly torture innocent children to death
with General Miller - what's Obama's response outside
of more false arrests of Americans, torture, and bombings
while giving banksters more billions to disappear out the door
never to be accounted for either? not much to care, for

Alex Jones is running his cover, along with the bushmobster neoCONners)

It's too bad Alex Jones, and his demon 'buddy', George Norry forbids Americans to know of General Ahmad, Bush closing FBI investigations, and iron flowing from the towers as more important than a passing fact he might have mentioned three or four years ago - Alex I mean - George's direct policy as so told to Alex, is NO INFORMATION on who was personally responsible for mass murder will be ever allowed spoken, while he demonizes millions on hopes for more indiscriminate mass murders killing mindless teen grunts to profit Zionism's war against Truth and or God.

Stephen Harper copies John Howard WORD FOR WORD
http://www.youtube.com/watch?v=L8YwJC_nBgw

BANKER SOLUTION

Solution: refinance near zero interest, (as low as we can go), and concentrate on returning all defrauded assets - working to put money in the hands of our criminally stolen from Low Income Grand Parents, who are robbed routinely in Casinos, and fraudulent mortgages schemes, where the intent is never succeeding but for the scammers playing US for suckers. Then, lower the taxes on all essentials including, expenses of harmful Pharma, clean up the food and the water with tight regulations - 'tight' because it's well thought out scientifically,. (sodium Fluoride is a poison) .All the while, gearing up for the Trial of Trials - US vs George Walker Bush and Co..

This is FDR's idea that worked "refinance near zero interest" So, a working plan could be to create a near no private profit plan, but a public plan that profit's The People Instead of Banksters stealing our public authority unchallenged by American corporate culture for personal private interest left undefended. The Depositors are the Shareholders! Broadcasting Everywhere.

/ / Provisions to impose a penalty on banks that paid hefty bonuses and to cap pay at $400,000 for all employees at firms applying for additional government funds did not survive the compromise, sources said. \ \ Another sacrifice to America's "God" substitute. aka magic private banker zillioniares, who rule the free thought of TV AmerikCo giving your life without free thought to question.

Why pay bankers more when they DO NOT cover our loans?
Hate US still for speaking truth dying amerikcan dumfuk?

Widespread Suffering and Death
http://www.youtube.com/watch?v=gVdee2iXSVk&feature=related
[CNN pulled this A. Cooper report off youtube - accessory]

Notice no one shoots at the blimp fire bombing the
entire neighborhoods. And if it's phosphorous, that
smoke is already deadly toxic. That is why it warrants
the Death Sentence under International Law when used
against OUR Humanity, as the most evil of Nazi War
Crimes ever.

http://www.youtube.com/watch?v=An_nXpr5K0A

Fake 9/11 Call From Flight 93 Exposed!
http://www.youtube.com/watch?v=L8JV3dJEJmA

These two "fbi" officers have to be brought in
with Mueller for questioning on Coast to Coast,
CNN, and the CBC. Likely the same two
responsible for following something near
3,000 leads, as so told to the actor, ah..
whatshisname about turban wearing zeros.

-
responsible for releasing millions of American made land mine
cluster duds that will murder as TERRORISTS do,
indiscriminately for decades. Perez, the DEVIL, along with
corporate news zionists, hold those crimes deserve immediate
executions with targeted strikes against the purveyors of true
EVILNESS. Please I beg, give G-D mercy.

http://www.waynemadsenreport.com/

/ / According to U.S. intelligence sources, at the end of
June 2001, the FBI intercepted two phone calls from Grossman
in which he told the called parties to "stay away from

Brewster Jennings . [Plame's TP SCRT Cover to nab REAL terrorist WMD proliferators by using GOOD policing freedom skills - with logical arguments, warrants, and everything!] . . they're the government . . . they're nothing but a cover." One of the calls was to a Pakistani Inter Services Intelligence (ISI) top agent in Washington. \ \

So, the ISI was warned by the White House clandestinely, in June 2001, 'some do gooder cops are on the prowl defending our interests, looking for REAL terrorists who jeopardize Freedom's cause, so, you'd better watch out for America's will power, US might get US, and boy, then we'd be in for one big hell of a surprise!,. eh?. Are you still with me? Hello? Is someone else on this line? ... Yyyou'll never catch me.'

Marc "Johnny America" Grossman "Any country that doesn't go along with US will be paying a very heavy price."

CNN Admits 9-11 Inside Job
http://www.youtube.com/watch?v=uyMIqVfH8zY

Patriot of Great Britain arrested for sending "7/7 Ripple Effect" to judge and jury members
http://truthaction.org/forum/viewtopic.php?t=4999

/ / Anthony John Hill, originally from Sheffield, was arrested on Carrig Street in Kells this morning on foot of a warrant issued by the authorities in Britain.

It is alleged he sent DVDs entitled "7/7 Ripple Effect" to the jury, the judge and members of the victims' families. \ \

All of Great Britain joins US in demanding the "Judge" to face trial for death sentence. Peter Powers "did" the 7/7 bombings. Ask Netanyahoo, he knows.

-

Report Of ï¿½People Planting Bombsï¿½ on 9/11
http://www.prisonplanet.com/report-of-people-planting-bombs-on-911.html

Why isn't Happy George Norry, Our Enemy, covering this everyday as an important subject to defend American life he holds truly in contempt? Again, Alex Jones leaves every American to die victim to his NWO, before he will acknowledge TRUE evil in our world. George Noory, the evilest ACTUAL Enemy of History, Alex claims is a good guy for never allowing open discussion on 911, Afghanistan, Iraq, and so on, without selling

his Zionist hate for our Humanity.
allowing the notion that he, and
his likewise cult, might just have something to
learn about evidence being a REQUIREMENT to prove
someone's guilt or innocence. His godless commitment
is to escape Bush, and his zionist media controllers
with excuses that don't hold water in any Court of
Thee. Alex refuses to allow Americans to know why
the Constitutional protections are there to defend
yourself, because if you did, you'd demand the
arrest of Bush for treason, and call Ron Paul a
sell out loser who pocketed the millions conned for
being Alex's loyal fans. Alex doesn't like this Truth
because he's gotta be leading Earth's "Truthers"
at the pinnacle of his spear as a liar, where all
of History, is one badly drawn Alex Jones cartoon.

I must be on crazy pills
http://www.uruknet.de/?p=m51615&hd=&size=1&l=e

/ / Well, why haven't the banks just returned
the money?... \ \

People who know they defeat all "Conservatives"
in seconds with indisputable simple logic, will
eventually rule the Universe, if CNN, CBC, and
Alex Jones allow open communications on what is
understood by all as high acts of treason openly
committed without a defense of smart people
explaining why/how we are being rooked as idiots
on purpose. Crazy man, crazy.

Oh, logic like, "Buying in bulk is cheaper."

-

Godsmack - I Fucking Hate You
http://www.youtube.com/watch?v=FiPtHkfDXus

Hey! Johnny's new theme song playing when
I be bagging the bushite zionist whores of
the demon antichrist, Our Mr. Bush Jr. Bush
closed 911 investigations, Bush lied about
Saddam not letting inspectors in, Bush never won an
word fairly in his entire war crime life of
game rigging with naked deceit and betrayal to
the cause of Man, die bushite die. Rock on
my friends, rock on.

"Army deserter deported from Canada, now in U.S. jail"

This is a for real war crime. Why? there was/is
no cause for the Iraq war. Truly. Example: why

bomb if you can go anywhere without delay? To
only murder innocent People INCLUDING SOLDIERS
to thieve from ourselves as war criminals is what
any rational person comes to understand. When you
destroy bushite grunts who war God for rape, torture,
and enslavement of our species, you save the
innocent lives of their next victims. To hunt
the godless bushite enemy, is to love Justice
as our glorious Humanity winning over the lawless
nazi grunts of the Third Infantry - who'll shoot
anybody, blindly as cowards, led by a Saudi, Buford
Blount. Their "leader" who left Iraqi's largest
weapons depot undefended for looting. Qaqaa. Killed
many a bushite nazi grunting lawless coward by his own
treasonous brand. And mumbling bushite nazi grunts have
what to say about American teens made valueless
victims for Neocon bounties? "whore yay" That's
about it..

LETTERS NOW RELEASED PROVE-Bush Intervened-To Suppress Torture
Evidence
http://www.democraticunderground.com/discuss/duboard.php?az=view_all&address=389x4994330

This is called ungodly nazi war crimes against
innocent Human beings.

Obama Gets Tough to Shield Bush Torturers
http://chris-floyd.com/component/content/article/3/1694-protection-racket-obama-gets-tough
-to-shield-bush-torturers.html

Who does Obama think we are as 'United' together
on pro lawless torture against innocent 'others'?

Wake up people, we are under attack by those who refuse US Justice to win Freedom for anyone. "Conservative" retards are completely lost here, because they do not have the intellectual skills necessary to understand: a person accused of a criminal offense without any evidence is innocent. Or, how about, No one deserves to be tortured for confessions on crimes left then unresolved for actual retribution. [Aegis OPENLY murders innocent families for more American paying for zionist monies - P2OG - YOUR Spouse, YOUR Child, YOUR family].

Following the crime scene leads of 911 to nab the actual evil doers is beyond the will of the deaf, dumb and blind? with lawlessness gaining for monetary loses due America as corporate cheaters. We are Brilliant, of that much I am certain. Conservatives are minimally, idiots.

Worst Person in American Broadcast Journalism
http://www.youtube.com/watch?v=ll2YW32bqi4&feature=channel

This is like, so profound. Gibson's condemnation is directly aimed at his own ideas of the subject he has no grasp of. Wow. profound. See though.. this "popular" FoxsNews celeb has zero interest in helping America succeed to defend freedom through lawful actions, because he has no sight of a better world blindly destroying itself. Hey Gibson! why don't you try and be a good guy for a change! No joke. Wow. Profound.

-

Israelis forced mother to choose which of her children would die
http://www.daily.pk/world/middle-east/9374-israelis-forced-mother-to-choose-which-of-her-children-would-die.html

/ / the soldiers told her she had to choose five of her children to ï¿½give as a gift to Israel.ï¿½ As she screamed in horror they repeated the demand and told her she could choose or they would choose for her. Then these soldiers murdered five of her children in front of her. \ \

Funded by the American tax payers as a gift to God as our stolen Humanity. Equal rights for all, especially the Taliban's position in defense of America, demanding evidence to form our guilty verdicts.

-

Obama Accused of Blackmail over Terror Trial Evidence
http://atheonews.blogspot.com/2009/02/us-accused-of-blackmail-over-terror.html

Again, Obama is taking a position to torture innocent
people here as a traitor to Just cause. Just cause to
live in a free society. Torture warrants the death
penalty under American STANDING Law.

Video: Cop Punches Woman In Face Four Times During Arrest For Riding A
Bike
http://www.liveleak.com/view?i=99c_1233639102

Top Cop Johnny Judge rules: Five years in prison.
Maybe fifteen if the dumfuk grunt, back from the
war against Iraqi children as a traitor to American
values, shows no remorse for his crimes against an
American women either. Absolutely any cop or soldier
who disagrees as true contempt for our freedoms with
punishment against this nazi trash pirating our
police uniform, WILL WARRANT death sentences all
around to ACTUALLY defend liberty in my America.
Any American father who prides in killing innocent
Iraqis for the escape of the neocons for 911 is no
father. And a wife should get the hell away from
a male who enjoys murdering helpless innocent others.
Children in such families should be challenged
by relatives through the Courts to save the lives
of our endangered offspring. Again, without water
or food, Iraqi children are murdered by Neoconner
grunts irrationally everyday with nothing to say,
aka, without reason but as Satanic Bush whores, to
make our God as Humanity suffer further for their
escapes as actually selling freely, lawless zionist
savagery.

KILLING MORE OF THEM - reporting war crimes to the Police
http://www.youtube.com/watch?v=gB-KaIBDNJw

Again, a bushite has no commitment to defend
America, for it speaks nothing for the arrest of
the neocon traitors. traitors like themselves whom
will murder innocent folks like your Self to steal
our common values. Wouldn't you glory in seeing
these savage grunts who on video, indiscriminately
shoot innocent families, or bomb a city entirely,
executed by Christian Patriot firing squads? or
televised to fry in the electric chair for these
documented war crimes? I sure would. It would make
our world a much safer place to raise a family
secure in knowing, bushite grunts as enemies of
everyone, were hunted to extinction for their

crimes against our Humanity. Hunted by Johnny Law,
the True Spirit of America.

Johnny Law for Coast to Coast radio Host!

yaahhh im a real person! Wow eh? Now,
let US bag some bushite scum for the Gipper.

UK judges accuse Obama Administration of suppressing torture claim
http://www.timesonline.co.uk/tol/news/uk/article5661291.ece

Yeah really. What kinda world does Obama take US
for here? Does he actually believe we hold no
interest in being attacked as ourselves, the
innocent forsaken? A reminder: an American was
executed under Iraqi law without any evidence
brought against the accused, while the grunts
were offered an excuse to seek not the culprits
at the terror scene. The case was lightly reviewed
at democracynow, a year or two ago, and can be
found by searching for a grunt pretending to be
an ambassador to Romania. A case where the Judge's
life was threatened by a "General", where if he
didn't order the death of the innocent American
citizen, the grunt with the General would murder
US all right then and there. The Innocent American
was murdered as forsaken for value shared by
free men.

-

PetBed-CatTree
http://www.petbed-cattree.com/cat.html

Hey! this stuff for cats and dogs looks pretty
coool. Check it out if your a pet lover!

Near Impossible to believe!

/ / "similar themes go through all our streams. And it all
comes back as Confucius says, "Do unto others, as you would
have them do unto you." And Christ said that, Hillel said
that, Buddha said that, everybody says that, cause that's all
it is. But bushite, he wants to accuse People of criminal
offenses without any evidence, and indiscriminately slaughter
everybody in countries, for no good reason but to be OUR
ENEMY, an ENEMY OF ALL PEOPLE." \ \

-

AG Holder-- First, Jail All Bush's Lawyers
http://www.consortiumnews.com/2009/020309.html

For actual documented criminal actions against
American interests in defending ourselves from
indiscriminate robberies, tortures, or mass murder.

"Judges Bribed by Private Contractor to Sentence More Kids to Juvie
Detention"
http://www.philly.com/philly/opinion/inquirer/20090128_Editorial__Judges_Sentenced.html

Christ speaks!! Echem.. This is called a criminal
action to falsely imprison American children for
more stolen money. Will the contractor be arrested,
tried, then executed in America to defend American
children? Unlikely, because it isn't as important
as how fat Oprah is today, or as Alex Jones the
bigot would say, on how daily, the hidden NWO elites
are responsible for every criminal action against
Liberty in America, not war crime dictating LIAR
Bush who told US Saddam wouldn't let the inspectors
in without corporate news correction, Bush, who
closed Police investigations on 911 for Enron, KBR,
and the Kissinger associates. And certainly not
Bremer for personally stealing tens of billions,
no no no, "just puppets" "just puppets" as instead,
the Illuminati in other words not allowed spoken
understood with Alex Jones NWOers. I want a free to
speak arena where 50 percent of what Alex spews is
truly dumber than stupid. Why? because he is controlled
through his personal weakness of bigotry, to actually
believe foolish things as factual. Examples are
truly endless when we discuss Alex Jones'
dumminess, but here is one example. Alex states
911 truthers were attacked in a TV show as NWO mind
control- but, the "truther" he referred to
talked in the drama on there being NO PLANES!
A dis-info bushite stooge if ever was one depicted
with special effects. We suffer with his bullshit
every day, knowing if we tried to phone, would
not be granted a minute because I, in support
of Freedom for America, make all bigots look truly
dumb as fascists lashing out at nothingness to
divide our masses. And apparently, he can't have
America becoming greater for defending ourselves
fairly through Judicial actions. Yet.

-

which side are YOU on? by REBEL DIAZ
http://www.youtube.com/watch?v=8Dr05tXktSo&e

The side where a person accused of a criminal
offense without evidence is innocent, and in the
case of capital accusation, the false accuser
deserves severe punishment as an enemy to my

Humanity.

U.S. partner, not Hamas, firing rockets into Israel
http://www.palestinianmothers.com/profiles/blogs/us-partner-not-hamas-firing

/ / The probe found the Islamic Jihad rockets were
actually fired by Fatah. \ \ Whom Israel in response
to the confessed by all to be true facts, murdered
innocent Christian children in Gaza as war criminals.
Actually claimed it was regardless who shot the tin
can rocket that struck no one harmlessly. Again,
Nazi Israeli responded by murdering innocent Christian
children as war criminals with "disproportionate"
force. War criminals who murder Humanity to steal
our shared values.

-

Dennis Kucinich "Israel is Killing Children With Your American Tax
Dollars"
http://www.youtube.com/watch?v=HrtPpk6nhF8&feature=related

Israeli openly admitted that they targeted those
innocent Christian children for MURDER - as -
continuing "disproportionate" force in our names
as enemies of God and Humanity. They are not Jews,
but of the evilest group of lawless nazi savages
pirating the government of Israel away from US Jews.
I demand open debate in America, and Americans refuse
me by not likewise demanding international coverage
on the Coast to Coast radio networks. Let's change
this by communicating.

Ceasefires, Israeli-Style
http://sjlendman.blogspot.com/2009/02/ceasefires-israeli-style.html

They admit TODAY, as yesterday, and last week, month,
year, decades, that they target completely innocent
people for murder to punish Humanity for believing
in God as Just, or real freedom understood as practiced.
Libertarian couldn't give a shit on a issue such as this,
that they keep everyone ignorant of through hypnosis. Israeli
openly admit to thieving innocent peoples homes, to them
be sent at gun point, to live in a concentration prison
death camp.

http://www.davidduke.com/

/ / ..the Israel Prime Ministeri¿½s speech in which he
actually boasted of his power to order the U.S. President
as one would a dog. \ \ and all American men can't for
some god forsaken reasons, can't for their lives, phone
George Norry to be hung down on. George Noory is a "good
guy" for aiming to go ballistic against every American
who refuses criminal orders to destroy themselves.

Americans Are Welcome In Israel

Obama set to allow Bush-era ï¿½torture flightsï¿½
http://timesofindia.indiatimes.com/Obama_set_to_allow_Bush-era_torture_flights/articleshow
/4067338.cm

What the fuk eh? Doesn't Obama know this
crime warrants death in America according
to the war crime act? Does he believe America
just will never have a chance to speak for the
interests of US as innocent Human beings he is
planning to torture as an enemy to Life?

Refusing to Defend American Values

Yoo: Bush okayed torture to outwit defense lawyers

This is why it warrants the Death sentence. Remember
corporatist Amerikan citizen, these torture victims
that include children as younger than a hundred, had
not been alleged to have ever committed a crime in
their entire lives. Victims tortured to death for the
pleasures of those Satanic, such as General Geoffry
Miller, who tell US today as confidenced, they do it
because, patsy wasted American soldiers will just refuse
to hunt them down for formal executions. Let's change
this for our Humanity in this future, to look back,
and know, American males were men of the World, who

stood for the principles enshrined within every living
Constitution. A free man shall not be jailed, or
tortured by anyone in our names as Governed, without
the perpetrator tried publicly for execution as our
Love of real Justice. As first degree mass murderers
warranted death sentences under the War Crime Act
ushered by Reagan!, all done in for our protections
of their next innocent victim - ourselves. Or
die a death in corporate tyranny worthy the title,
cowardly traitors to God and Liberty. Blackwater,
CACI, AEGIS, KBR and the like will all be hunted to
extinction for refusing to quit their lawless Rape
and mass murder, murders done for more stolen money
as America's name high-jacked. The Lawless enemies
shall be prosecuted by the honorable Soldiers of
the Good old, Red White, and Blue. Count me at
our words on this, I am,

King Johnny

Ungodly Israeli Nazi LIARS Continue to Murder Children after "Truce"
http://www.youtube.com/watch?v=-HQO0774lx4&feature=PlayList&p=4199C9262539936D&index=0&pla
ynext=1

A truce means nothing to Hamas?, who states
much of no complaints as in support of Israeli
Nazi lies, why? Have you seen where a blimp is
traveling about five miles an hour, fire bombing
thousands, and none have even a pullet gun, never
mind an Iranian rocket launcher to shoot the Satanic
demons down for God as Love? Why doesn't Hamas
at least admit, like an Israeli General has,
to be funded by Zionists for cash gains paid for
by Zionist Amerika? Why? Why is it that Hamas
suffered near no loses, but all the Cops who
voted who knows, died murder victims trying to
defend our family from Texan child rapists?
Along with thousands of others targeted as
innocent Peoples? Targeted. Why? Nazi Israeli
broke the truce!! THINKTHINKTHINK Demand coverage!
Hamas certainly isn't. ..maybe because they're
illiterates on the Cause of God's Will being
Just?

Bushwhoring Enemies of the American Police

What a demon enemy of life these bushwhore enemies
of American Liberty are eh? No concern whatsoever,
for all the teen soldiers conned to die for those
who committed 911 in NYC. The millions of bombing
victims, the tortures, the rapes of American women,
STILL, TO THIS DAY, left undefended by "the law".
Evil enemy of everyone these demon fuks are. How
difficult is it, to understand the facts they feign
complete blindness on? They WANT to con you as the
coward to life they are, willing to kill America to
make their antiChrist lawless enemy Mr. Bush happy.

From years after the fact still demanding Justice now:
http://groups.google.co.uk/group/alt.military.uk/browse_frm/thread/ca0e34fb32caeb0a?hl=en&
scoring=d&

Huh? "at last been disarmed..." ? How does he figure?
The equation hasn't changed. Example: The same
unaccounted anthrax, (that was disintegrated into ash),
still is not able to be measured as completely accounted
for, (never could be), but this bushwhoring war crime
apologist, tells US, it was only though the lawless
murder of our good friends and family for countless
generations, that he now attests without reason, or
evidence, to find Iraq in "fact" disarmed of it's still
nowhere to be found, weapons of mass destruction. (An
irrational reason he pronounced previous in corporately
broacasted public support of instigating heinous war
crimes against our humanity under the leadership skills
of the evil lying demon antiChrist, our Mr. bush Jr..)

Ron Paul defeats 5 TV 'experts' in 10 minutes
http://www.youtube.com/watch?v=0k92fTDReHg&e

Ron Paul is a traitor. They stole the cash Ron.
And, the Iraq war is a war crime. But Ron, the
Fascist, doesn't want THESE FACTS uttered. Why?
Because wiser men would prevail, wiser men like
me who understand buying in bulk is cheaper. Those
like Christ who understand, who KNOW, the banker

doesn't cover our loans - so why give them as much as a taxed red penny?, let alone trillions as officially unaccounted for? They are stealing the cash Ron. Ask yourself: Why has Alex Jones forbidden his bushwhore cult from understanding Bush doctored the NIE?, or of iron flowing like water from the towers? Because wiser men would prevail and he can't have that. He called shooting innocent men in the back, an act of liberty. I, an actual god, unlike Alex, lie near never, but maybe to myself when I'm lonely. Alex yes will tell you rapists are free to do what they will in Texas to American children, un-arrested, but he won't mention it when the police chief is with him on air, talking about how he'd like to be exempt from traffic tickets for being so popular. NO MENTION of the rapists walking away without arrests made, no mention of Bush's documented treasons on 911. Where are Alex's priorities? In selling YOU out so he can be wealthy like a bankster?, and have special rights over everyone else that drives drunk, or speeds? a big hero standing over our dead soldiers yelling, I told you so, I told you so, I was right, I was right. Again, understand: It is not by my will to deny open debate with America, it is Alex, and his demon buddy George Noory that denies out Humanity this right. And when people try, like Peggy, or Black men on Jewry, Alex lies cheats and steals our wills for further thefts. Ron Paul's family has millions taken from loyal Alex Jones fans. MILLIONS! Does Ron do commercials with that money highlighting the bushmob's plan to invade Afghanistan, dated two days prior to 911 for Enron? Of course not, wiser men would prevail to expose him as the charlatan charity raider he is regarding Health Care, Social Security, Public Schooling, earmarks.. It is unfair to measure Ron against corporate nazi zionist whores of MSNBC who willing, openly, kill American teen soldiers for criminal neocon gains, as an honorable gentleman's talk. Half honest People like Ron are extremely ignorant on the workings of our world. EXTREMELY. I joke here not. Evil is the deceived disguised - translated - evil people are always dumb.

Corporate America says no, Charlie Manson was a genius, but not, that most Americans are prone too easily to suggestive states where they can be made to believe anything blindly. Think: what does, "bin Laden did 911" mean anyway? You should know of what I'm trying

to teach you here. That is how
Alex knowingly or otherwise, steals our rights, by
beating off he knows everything already. And some,
if not most, actually believe him without knowing
squat either. It's sooo easy that way - no study
required!! LIBERTARIAN HELL! Everything is not on
the Internet, where it near should be, but regardless,
a Libertarian can't be bothered to read anyway.

It's YOUR life. It's God's
Gift. Now support our rise for popular international
debates to get these Neoconners behind bars
awaiting Public Trials! "Public"thatsoyu!! Get to
the Phone to call someone to care man.. Johnny
Jesus has arrived! Justice Will Be Done in this,
Our Kingdom to Come.

Justice to the war criminals of
indiscriminate warfare would better serve ourselves
to halt for our safety. The bushmob did 911.

1. The ISI's General, Mahmoud Ahmad funded 911's Atta

2. We have video of iron flowing like water from the towers

Humanity Under Attack by the Zionist Enemy of Life

GAZA APPEAL THE BBC & SKY REFUSED TO SHOW
http://www.youtube.com/watch?v=c9kwpxlZorI

Not only that but the BBC argued that to show
innocent Human Beings suffering, in CRITICAL
life threatening need of desperate food and
water that Israeli nazi stole, (because they are
unlawful murderous thieves), would have them look
like they were partial to serving Humanity's
interest in compassion for US humans. Over the
Israeli terror Nazi tactics of indiscriminate
slaughter for more Amerikan welfare. Wicked evil
nazi bastards who too, DO NOT THINK IT BEST to
report Peter Powers committed the London bombing.,
Oh yeah, and mercury is neural toxic, anti-psychotics
make us crazy, and sodium fluoride makes us
stoopider while weakening your body for big cash
surgeries - ultimately leading to a profitable
death for dah' winnahs.. So, they, the BBC-NWOers
just needed to avoid the bath or shower,
humidity, Pepsi's purified bottled water product
lines, koolaids, swimming pools, Jacuzzi, Hot Tub,
Sauna, private Whirl Pools, and.. blh blh blh

/ / the FBI says no.. There is not a thread of
fact a zionist offers to form YOUR own mind in

respect for your rights being equal to ours. \ \

Who is the guy who keeps writing such things,, and
shouldn't he be recognized as Promotional to raise
all spirits towards a better future? I'm with him.

The U.S. Is Required To Bring George W Bush & Donald Rumsfeld Before A
Court! U.N. War Crimes
http://www.youtube.com/watch?v=BRAlqkPbjP0

Olbermann | Bush Years: 8 in 8 Minutes
http://www.truthout.org/011809Z

Bush and Cheney are traitors to the cause of
American Liberty. To leave them free, is to leave
America un-guarded from further transgression.

The bushmob doctored
the NIE. Conned Congress, and Soldiers. Did 911,
by closing criminal FBI investigations immediately.
Alex and George don't seem to want US to know
these FACTS that demand arrests of the culprits
responsible for high treason against Johnny's
America. Alex wants your money, and EVIL George,
our enemy, wants your soul stolen for Satan.

Turley: Obama 'accessory' to war crimes if no prosecution
http://rawstory.com/news/2008/Turley_Obama_accessory_to_war_crimes_0127.html

Understand, Alex Jones doesn't want Justice
for Americans because he loses out to better
men that usher a greater life. He doesn't want
the evidence of George W. Bush made public to
defend American teen soldier's lives. The true
fascist Alex Jones, who in silence supports the
escape of Bush for treason, will fail our true
voice for Justice in our times. WE DO NOT rule
the truth we share equally committed to defend
ourselves from lawlessness. And you'll never
rule my right to speak freely over your intent
to sell us all out for monetary swindles, just
like Ron Paul did. Understand: Ron Paul doesn't
even acknowledge 911 was an inside job, or, that
Bush gave zero evidence to form Your opinion.

Alex Jones, the Slave, told US today that
he challenged Bush for eight years - Bushite
lying nazi traitor. Not only that, but he
also ridiculed those who wish to blame Bush
now for anything! Again, he doesn't want
Justice where bad guys can't steal from
ourselves unrepresented. Ron Paul is a
multi-millioniare, made rich by charitable

aid conned from Alex Jones' NWOers! Alex
Jones doesn't have a problem with that, we
do.

Israel to be Judged - Universal Petition
http://www.tlaxcala.es/reponse_signataires.asp?lg=en&ref_campagne=10&Page=1

The demon LIAR zionist Israeli is a godless enemy
of Humanity, much like everyone at Foxnews, CNN,
BBC, and the CBC. Our revolution against the godless
bushite shills, will not allow our revolution
through speaking honestly, (to become of ourselves
something greater), a chance to be televised for
our benefits. Bush closed criminal investigations
immediately after 911. According to the FBI and
Senator Daschle. CNN says you have no power, Foxnews
says you have no power, the BBC says you have no
power, the CBC, the same, like Alex Jones NWOers...
but well, don't believe it. YOU Do have the Power.

http://www.iran-daily.com/1387/3324/html/east.htm#s359247

/ / International attorneys have filed war crime
charges against 15 Israeli political and military
officials including Ehud Olmert, Tzipi Livni and
Ehud Barak. \ \

-

We must demand open communications to bring back
values WE ALL would agree to through polite debate.
"Conservatives" don't want this Freedom idea
expressed in general terms because, a "conservative"
is universally, minimally. a bigot. Why? Life isn't
like, their way, - then- all other opinion under
the sun on how things actually get done. (Aka
"socialist" traffic light repair men, or "liberals"
who want to treat The People fairly). Or who we are
as equals to our laws fairly practiced. Pay attention
to what I am saying here. Liberals can be Dicks with
a capital D too of course. But a Hannity couldn't
survive 2 minutes with me speaking on his very real
treasonous behavior in OUR public arenas. Behavior
done to escape the 911 culprits from the long arm of
the Law, with his conscious will of criminal deceit
exposed, we all learn to better defend ourselves.
And Shawn Hannity can't have that for ourselves, he

takes too much money from ourselves as talentless by keeping US in the dark dying needlessly for traitors never elected publicly.

Who am I you ask? Johnny Law. at your service. Look me up with usenet to discover, we live in a world of idiots everywhere pretending to be somebody by lying. While I want US all to truly improve our condition by actually understanding how bad off we are by failing to respect ourselves for correction. Too many, know it alls, with not enough to know you need evidence to form a guilty verdict against an accused man or woman. Not according to CNN, CBC, MSNBC, Foxnews and the like however. Let's change this by supporting my challenge for top billing at the Coast to Coast radio show hosting. Look for me coming soon!!

-

Unseen Gaza High Quality: Part 1 of 6
http://www.youtube.com/watch?v=UeezoWRu1FU&eurl=http://whatreallyhappened.com/

Why is it that numerous visits don't change the view count? What is this business of a=a+1, the top secret, I'll go rhythm, that is way beyond our comprehension in it's scientific complexity? For Americans, okay, but the Human species just isn't this dumb.

While Zionists OFFICIALLY target Christian school girls for mass murder, CNN instead reports that bushite grunts attacked girls in Afghanistan, posing as Taliban. I WILL every celeb at CNN to be arrested, tried and executed for the reporting they have done today without facts. Remember: the Taliban played no part on escaping those responsible for 911, and opened schools for girls, and were brought together on the single purpose to defend women. Death to CNN reporters to LIE for killing OUR school girls. I HATE zionist enemies of Humanity and God I am.

The Torture Ban that Doesn't Ban Torture
http://atheonews.blogspot.com/2009/01/torture-ban-that-doesnt-ban-torture.html

/ / Obama's Executive Order bans some -- not all -- US officials from torturing but it does not ban any of them, himself included, from sponsoring torture overseas. \ \

Is America a nation of Law to Live freedom?
Because this SPECIFIC deviant action of Obama warrants the death sentence under Reagan's "War Crimes Act". SPECIFICALLY. Or, is it you falsely believe Obama

can do no wrong against innocent people here, where
an illiterate nazi grunt, maybe from South Africa,
will kidnap YOUR children, and torture them to
death for sadistic pleasure, with as they did using
power tools caught in Iraq, according to Iraqi
government official(s), and several soldiers from
Oregon, all because Obama has given an ILLEGAL!
"excuse" to NOT support following the crime scene
leads at our REAL murder scenes? Again, death to the
bushite dumfuk enemy of God, death to the enemies
of a freeing Humanity striving for a just society.
Obama needs to be arrested for this under the Law
as it stands I'm sorry to say my friends. Why?
Torture is illegal in all 50 states, (as Reagan
directly planned), no matter where you ship the
innocent victim to, or from! Read the War Crimes
Act, then demand Justice today, otherwise, it's
YOUR funeral. Obama wants to secretly torture
Peoples here, while lying to US ALL that he doesn't!
A TRAITOR! Who also wants to give bankers 100s of
billions of dollars more to disappear, that WE pay
for, out our door, never to be seen as our own
again.

-

Don't miss this..

-

Jack Blood interviews Richard Andrew Grove, an AIG insider and
whistleblower
http://video.google.com/videoplay?docid=6546044203900048624

Alive We Say

And Alex Jones gives us the same guy twice
a week that blames the Illuminati, while
encouraging that YOU TOO! can get money
for nothing like the banksters. Just give
the Alex Jones', NWOers, the "truthers" money
money money money. No time for affording the
explanation that the TREASONOUS bushmob
doctored the NIE. That Saddam wasn't in
violation of 1441. That a NEOCON is
identifiable for it's demonic LIES
against God and Man. Never to tell, the
private bankers don't cover OUR loans,
that Bush PERSONALLY worked to close
Police investigations immediately after

911 (obstruction), or that WE have video
of iron flowing like water that PROVES,
without doubt, bin Laden couldn't have
single handedly placed the explosives
in the buildings, or stole the black boxes.
Because someone surely would have spotted
him dragging his dialysis machine what with
all the professionalism of corporate news
media coverage regarding our horribly
suffering worlds. Alex Jones ignores the
treasons of Bush, as a Bushwhore, and
instead, tells US of how Obama is Bush on
steroids. He only wishes. What about
Justice for Americans Alex? Why for do you
forsake ourselves? For money? What about
the lives lost to mass murder, that you
allege to champion OUR TRUTH without saying
much of anything on real Freedom?, on real
Justice like your deviant election rigger,
Ron Paul? Well, no wonder, Alex told US he's
into shooting innocent American People in
the back as a tyrant of evil, a white Devil
if you will. Kids too if you dare look in
his back yard for a copper. See? Now if Alex
doesn't allow US to speak, more and more will
understand to know why. I am a defender of
all that is right and just in this world,
because I don't need to lie like Alex does on
a huge host of issues. I'm more like Jessie
Ventura, in where I don't need/want to lie.
If I end looking foolish, (of which I like
never truly am), it's a benefit, because that
way, I've learned something. Alex knows
everything already, and 'is always right'.
Like I say Retarded. You weren't right by not
understanding that the banker doesn't cover
the loan. One example of easily hundreds. He's
a typical, he knows it all, know nothing dumduk
American. Hear him on health care speak as
Ron Paul does, and know, I defeat them in under
ten seconds. TEN SECONDS. This is why he hasn't
in years, allowed me to speak more than five
or six words. He's rather all America die, than
admit he does NOT rule our 'Ocean of Truth'.
I want the challenge of opposition through debate
to PROVE my skills beyond reproach. Alex,
every time, just hangs up on anyone who tries
to improve our communications by factually
speaking. Why? Because he IS TRULY deeply
ignorant on what freedom or Justice means. Why

we have law. What a consensus is. Allan Watt is severely disabled in this regard, another Alex Jones favorite. And this is why, Allan can't take calls openly either. He has jerked off with himself too long to quit now learning super basic precepts, for like Alex, he "knows" the inner workings of the 'genius' NWO elites. Not Law 101, not Bush, not Rumsfeld, Not Condi, not Torturers, not bank robbers, rapists, or even petty thieves. Allan Watt isn't a bad guy, he's just a chauvinist pretending he actually knows something, when his real disability is directly related to his absence in understanding understandings. Doubt is a near foreign concept. A challenge for Allan: can you get your 'genius mind' around the fact that Peter Powers did the London bombings, and not the Illuminati of 1463? and if not, why are we so dumb to our present plight that way? Don't get me wrong, Allen has much to offer, it just isn't the issue right now on saving our dying futures. Maybe I was too hard on Allen, he is really actually kinda cool. Alex Jones too has many incredible moments of ecstatic clarity increasing in all they joy of seeking enlightenment. .. Ok - but this is serious business that requires little dilly dally with what we'll have as a side dish in Paradise Lost. We are talking Human Lives have been destroyed by our inaction to remedy these failures to communicate effectively. and.. Jeeze, the weight of my responsibilities, as just plain John, being a/the Legos Man - for like the Family and everythings, get's me never forgetting, all we got are these words left dormant from the power they truly possess in the minds of the jack-asses. And.. here I am. I'm a Talker of Words looking to make a break in the NewZbiZ. Zzzz... Alive We Say! Alive!

King Johnny, from Earth, has come for talks.

-

The Zionist enemy, the most evil nazi sons-of-bitches who openly advocate tyranny and oppression through mass murder of ourselves as the innocent left targeted defenseless. Enemies of Jews everywhere, the Zionist cares not for facts on who's Life it destroys for stolen gain by lying. That's why they target Jews, for fear the Light of Truth would expose them as the Nazis they are.

Hamas doesn't have a military though, so,
why not demand the arrests of those who
broke the truce, and murdered innocent people
indiscriminately, on plans more Jews would
die for cash profit? Profit paid for by
zionist amerika? - the false imprisoning
torture and rape center for Neocon
Freedom.

The self-defence defence
http://www.guardian.co.uk/commentisfree/2009/jan/23/israelandthepalestinians-gaza

/ / This has been a central theme of the war in
Gaza: not that hundreds of innocent people were
killed, not that over 5,000 were horribly injured
and not the sky-high human and monetary cost of
wrecking homes or razing infrastructure. \ \

Court petitioned to arrest Livni upon arrival in Brussels
http://nawaat.org/portail/2009/01/23/belgian-court-petitioned-to-arrest-livni-upon-arrival
-in-brussels/

"We believe there were dozens of IRGC
personnel in the Gaza Strip during the
war," an Israeli source said. "Some were
killed; others went into hiding, and
others escaped."

See? the demon enemy of God speaks no
evidence as a TRAITOR to every Jew. A terrorist
nation that still steals humanitarian aid in
our public realm of left defenselessness. The
false allegation deserves a death sentence
by Jews against the war monger Zionist enemy.
A cause that Iran should champion, if in fact!,
this allegation by OFFICIAL WAR CRIMINALS WHO
TARGET FOR MURDER OUR SCHOOL GIRLS, is on it's
face, unsubstantiated as patently, demonically
false. As typical from any godless Zionist.

Where are the Americans asking for the
formal arrest of Bush for high treason?
Whoring for Alex Jones's contempt for REAL
Justice? The ignorance of all American
talk radio hosts speaks for itself. NO
knowledge on why acts of high treason, are
crimes against every American. The bushmob
doctored the NIE, and Alex doesn't want
Americans to know, because if they did,
they ask, why does Alex do everything he
can to escape those personally responsible
for 911, while then asking for money to
continue his fight against freedom in

America. Again how much money do we have to
pay Ron Paul or Alex Jones before they
will allow the knowledge of the Iraq war
against Human will is criminal? How much?

Obama! feel free to call
on me to help out with a plan for judicial
actions. That offer goes out to everyone in
Palestine, Canada or Britain too. Russia,
let's help out these fools by freely
communicating, what say you? Justice
for all is freedom to be. The Israeli cop
killers must be brought to justice for war
crimes. Those cops, were cops. And I,
am a man.

Alex Jones Rocks!

Now Alex has problems in "my" mind because I am
an ACTUAL genius, and he is generally, an idiot.
Today, he did one of his usual commentaries, however
this time, he was pretty honest with himself, and
his love for Ron Paul. Ron Paul sells incompetence,
and Alex corrected correctly!. that a.. sorry Ron
but these banksters know they're robbing us as
undefended blind men essentially. That's what I'm
talking about!! Look, Ron Paul can be a dumb Ass,
although, he's still not all that bad a guy. A Dumb
guy on things like economics sure, Justice, warfare,
Health Care, Social Security, ect. ect. but still.,
like a child learning of why the sky is funny
blue, isn't all that bad a guy really. He's
certainly not a war criminal, like Bush or
Rumsfeld are. Doing 911 then sanctioning torture.
While Neocons Champion sending illiterate American
teens for death as war criminal. Think about it.
Maybe he is..

-

ï¿½We have all these documents that are now
publicly available that prove that these
methods of interrogation were intentionally
ordered by Rumsfeld,ï¿½

Let us understand. These actions "give" a guy
like Willie Brand "the right" to RANDOMLY kidnap
men, women, or children, and torture them to
death for sadistic pleasure with his faggot
Capt, Christopher Beiring. (I think that's
how it's spelt). But anyway, this is the truth.
A bushite is a godless Zionist whore of Nazi

evil, an enemy of America, who wars YOUR Freedom with criminal "excuses", for refusing to support the arrest of those responsible for 911. A TRAITOR, and could be wannabe rapist, robber, or 911 mastermind ringleader. Torture is illegal, and warrants the death sentence, according to, Reagan's "War Crimes Act". Some only suggest, that this was why someone tried to kill him as honorable. Death to the torturers of our innocent families, torture they do without apology as Zionist Military "Judges". Instead today, where they get salaries paid in the billions by the zionist giving nation of, a-mirror-kay, echem, America. Johnny's America. A nation where Justice will rule for the favors of all treated equitably with or without you. Honor me in company my friend. We have no rivals.

"they do not understand, the private banker never covers the loan. Never does a private banker reach into it's pocket to borrow US to begin with - so as a consequence, the bankers have just pocketed all the 'free' loot for nothing, TRILLIONS, and are not saying why should they help anyone else up with charity?" Then went on to say, it wasn't any of our business with what they did with the money. (But for to cover criminal fraud in the derivatives market, where the true value of said commodities were backed by ZERO capital. ZERO DOLLARS. WORTH NOTHING. So, think about who's truly giving it always here until Johnny, the man who came out of nowhere, arrived to explain everything in five or six minutes.

Support Johnny America for Coast to Coast Radio Host!

-

Gaza: 'I watched an Israeli soldier shoot dead my two little girls'
http://www.independent.co.uk/news/world/middle-east/gaza-i-watched-an-israeli-soldier-shoot-dead-my-two-little-girls-1452294.html

Getting away with murder as 'God's Chosen' chosen for death by war crimes trial more like. Death to the criminal zionist enemies of Humanity. Zionists who falsely accuse without evidence to respect our rights, like TV corporated Americans who treasonously LIE, 'bin Laden did 911'. Enemies of Freedom for our Humanity.

[JEWISH!] Arrest warrant: Ehud Barak
http://www.wanted.org.il/ehud_barak_en.htm

/ / For violations of the Rome Statute
& 4th Geneva Convention \ \

They are murdering Cops

2-Bombings target house of Abu Ubaida El Jarah,
Police Director in Sheikh Ridwan area.

3-Airstrike targeting Al Zaytoun police station.

Nazi Israeli are murdering Police Officers,
and the families that live in the areas near
them as once defended from criminals.

It's like saying, every Cop in America deserves
a death sentence by thousand pound radio-active
waste based uranium/plutonium war shells because
Bush stole the election, then committed 911 with
the Neoconned Partners of Public Crimes, Cheney,
Rumsfeld, Condi with General Ahmad and Myers. Now,
I ask all Cops, does that make sense to you as
still remaining silent? You can be a man too, why
don't we all just give it a try. To the Telephone
Robin! Israeli are attacking prisoners held
criminally in their own Death Camps!! GET ALEX
JONES ON THIS! and.... the ADL! er.. JDL.. er..
let US join forces for the common good of all,
as so we will benefit everyone. That means
Justice for all, especially the Taliban for
defending American Freedom by demanding evidence
to form a conclusion of capital accusation,
regarding an unsolved case of mass murder.
Taliban blamed it on concern for life draining,
!AMERICAN ENTERTAINMENT TV! sports, weather,
Music, and news about some, who knows war we are
committed to now die you for, for better or worse,
of mass death and suffering against innocent
Peoples all for glorious Neocon tyranny of inter
national private banker IMF enslavement plans!
in some far off distant places. America! I am
King Johnny.. I am from the Planet Earth, I've
come to share the knowledge of Justice in our
times on behalf of this, Our Future Great
Triumph over Evil. We come in Peace with
a sword for War Mongers, and a choice for
'lawless' grunts of ungodly action against
Life as we live it. Targeting school kids
deserves death sentences, don't you think this
value is what every soldier should hold proud
with Johnny in America? In Israel? In

Everywhere?

Chief Israeli Nazi Rabbi "All civilians living in
Gaza are collectively guilty for Kassam attacks"

ï¿½In spite of rising the blue flag of UNRWA on
our schools, the Israeli army has been targeting
those schools by missiles and tanks shells.ï¿½

U.N. special rapporteur on torture calls on U.S. to prosecute Bush and
Rumsfeld.

[SATANIC ENEMY] Israeli warplanes attack Gaza during Truse
http://www.presstv.ir/detail.aspx?id=83073&sectionid=351020202

Satanic Enemies of Humanity Kill 8 Yr Old Girl During Fake 'Ceasefire'
http://uruknet.info/?p=m50983&hd=&size=1&l=e

A MEMORANDUM OF UNDERSTANDING TO KILL MORE
http://desertpeace.wordpress.com/2009/01/20/a-memorandum-of-understanding-to-kill-more-pal
estinians/

/ / Dr. Condi was very smart when she declared
at the outset of the most brutal Israeli war on
Gaza that it was the Palestinian side which
is held responsible for violating the six
-month truce. \ \

She lies, Innocent Christians die.

Nazi argues it's good to get killed Jews by
breaking truces with prison camp.

They shoot Peoples indiscriminately telling US
that's how evil they are to argue it's Your
fault though.

This post was passed to near everyone in our Secret
Service defending Obama. Let US demand Justice for
the Victims of 911, by warranting for the arrest of
every Neocon Nazi Zionist pirate of OUR Jewish faith
for Public trial on LYING for War Crimes against
our dying Humanity. War Crimes against God.

A ZIONIST LIAR'S TRUCE

/ / live images of an Israeli helicopter hovering
above the city and dropping its white phosphorous
bombs on the city \ \

Again, the Zionist deserves to die by public trial
today to defend the Jewish faith. Look at usenet.
These demonic enemies go, 'yeah, Hamas broke the
truce', they do it to kill you. To steal the lives

of innocent Peoples to profit off our deaths as
victim.

Zionists are Satanic Demon Liars of Satan

FIGHTBACK

/ / Israeli forces demolished the house of the
Sammouni family in Gaza City after ordering
them to remain in it for safety. \ \

Palestinian Children found with bullets lodged in their head
http://jnoubiyeh.blogspot.com/2009/01/palestinian-children-found-with-bullets.html

/ / Israeli officials continued to deny on Saturday
that their soldiers had deliberately targeted
civilians, \ \

The Zionist is an
enemy to the God of Love and Justice, of Beauty, and
Children. A zionist LIES with a hatred unmatched in
Satanic hatred for the survival of our species. I
beg you, hunt to bill the zionist war criminal who
charges we will not succeed to see every last war
criminal on this planet hunted down to complete
extinction, by public trial, then Jewish firing
squads. The Zionist has bombed US, The People
indiscriminately with out cause. It was Nazi
Israeli that broke the truce to get killed
Jews for money. They starve Jews in Israel
to attract more charitable aid they can use
elsewhere. They, as Nazis, will continue to
murder Jews for money unless WE DEMAND, their
formal trials and public executions. They have
murdered our families, and they will pay will
their lives for it as the directly responsible,
and in no way, will escape our rages against
them as the enemies of every Human Being
Living for Freedom. Every Human that loves
children. They HAVE ADMITTED to targeting the school
girls for murder with lies they were caught
doing. THEY DON'T GIVE YOU EVIDENCE. And when we
get the facts, it's near always exactly the same
thing: they steal our Homes, they STEAL our
lives. God calls the Zionist Jew Enemy of
the Synagogue to Satan!!

"We also need a massive overhaul in Our news channel
prioritizing, including to add censorship free, open line
public communications. Done to gain value in learning from
the art of conversations. We need still to appreciate the
values of a free society where Justice is above all, the

measure of our success to communicate openly."

The Ungodly Murder of Innocent Men by Israeli Nazis
http://atheonews.blogspot.com/2009/01/summary-execution-in-southern-west-bank.html

/ / At noon an Israeli military jeep with four
soldiers entered Tameiziï¿½s land. After 15
minutes the man was thrown, blindfolded and
still handcuffed, into the back of the jeep. \ \

Let us not lose the focus of fact, that these
people of ourselves live in a concentration,
prison death camp, robbed of everything.
in Curfew near anywhere in "peace time". And
still, to this day, do Nazi Israeli CONTINUE
TO THIEVE the Homes of god loving folks in the
region, guilty of no crime but to have been
born into such brutal ungodly oppression
against Civilization. And to see, face no TV
opposition as American tax payers continuing
to fund such war crimes in our absent names,
is a crime on to ourselves if allowed to go
unchallenged. Johnny for Coast to Coast radio
host. Free the Slaves! Free the Slaves!

Binding U.S. law requires prosecutions for those who authorize torture

The ugly secret of Barak and Livni, the truth about the Gaza rockets
http://www.youtube.com/watch?v=8rqDzXeA-PQ&feature=channel_page

[HEY WHAT THE.. THE LINK IS GONE ABOUT GODLESS
ZIONISTS MURDERING JEWS IN ISRAEL FOR MONEY!]

See my Jewish friends, these zionist liars
will never escape our love for Truth in this
our new age. Killing Jews for money is as
evil as found, negligently criminal, agreed?
Agreed.

Gaza: lives in ruins
http://www.youtube.com/watch?v=OFWxEtWcT8w

'Ungodly Enemies of Life is the only way
to describe it from here Tom. They again,
are attacking People indiscriminately for
murder as sadistic Satanic enemies of God'

Someone should ask what King Johnny, The
King of the Jews has to say on this subject
of a Zionist's complete absence of morality,
as inhumanly bereft any common decency among

our brothers and sisters. I mean for Christ's sake Tom, THEY ADMIT to sadistically targeting our children for MURDER - as some kinda Satanic demon whore to Pure Evil - aka. Wanted War Criminals for Public Trial. Just as the Nazis were for similar outrages. Let's hope men of America are least half they were then, but we are suspecting, they will as of usual, balk as cowardly slaves to the private banker man ruling their minds, it's a, no wonder. Where is there that purpose striving for a greater future living in a just society? Where is the Christ in their Christianity? to financially support the arming of such unlawful Zionist killings in silence against Innocent Christians?

Free Radio International Broadcasts Alive!

For the Popular Will?

Alex Thomson shuts-up Israeli spokesman!
http://uk.youtube.com/watch?v=zIQZ1-RFq6A

Wow. The demon LIAR will also say Hammas broke the truce, and Israeli started this by stealing innocent peoples homes, then imprisoning ourselves, the victims, in a death camp for indiscriminate slaughter. While they continue to STEAL OUR CHARITY by breaking truces. What is it that YOU can't picture?

"The view from the other side, that the Qassams are a retaliation for the siege that starves the one and a half million inhabitants of the Gaza

Strip, [a prison death camp,] was not mentioned
at all."

Masada legend galvanises Israel
http://news.bbc.co.uk/2/hi/middle_east/7830416.stm

/ / they committed collective suicide - men killing
their own families, afterwards each other, until
one [evil zionist liar] remained to kill himself. \ \

ISRAELI IS A THIEF WHO CAN'T SPEAK OPENLY IN
DEFENSE OF OURSELVES IN OTHER WORDS? That is
right. They, as documented criminal, lose
every debate personally since before the dawn of
Civilization because their position is clearly
unsound. They are criminals who murder People
in hate for a freed Humanity. They OFFICIALLY
steal Peoples homes in that country didn't you
know they proudly proclaim it so? And steal
humanitarian aid from starving children.
Targeted to murder children specifically as
publicly confessed, 'it is Hamas WE blame',
not them as demonic child murderers. Hideously
evil as ungodly sadistic savages. Enemies of
YOU, enemies of them, and enemies of me, the
King of Jews Christ fellow from beyond the
grave. They are so evil to God and Man,
they tarnish everyone of US to not win justice
sooner by blaming the actual bad guys. Justice
is Freedom.

/ / Those white phosphorus shells used on the
Gazans are made in the USA according to Jane's
Defense. \ \

Again, these peoples are not Jews. Being
Jewish is a religion. These thieves of God
are Satanic in their LIES to betray the
common trust in our words, that bind all
worlds to victory, called freedom universal.
Even tales of the Devil have him keep his word,
with verses specifically condemning the self
to damnation for targeting the innocent for
death. God's the Word. Every word inside a
fool's paradise. Including the periods. Not as
like, I'm playing a word game, but that it in
wonder, is all strangely here. Example: The
Universe as it has existed always, is not
separate from our 'pauses', or faulty drawn
conclusions. The universe, in one sense, was
as good as anytime, created 6000 years ago.
AS TOO 50 billion. You say, impossible, I

say no, study quantum physics, and know, I
live this.. our existence is not scientifically
separate from the timeless nature of
consciousness, proven as not only theoretical,
but actual. That is a first step at developing
a REAL relationship with the living Universe
if you want to as like an artist does - that
TOO! can be just as thought static in it's
orderly constructions for Atheists. (An
Atheist is still mostly a fool here however.)
Overall, for any, it's sorta simple: Life has
left YOU in charge of YOUR fate. Now, do well
to make something of this being as eternal Life
reaching for balance, as your body does, and
good cops do when bringing the bushmobsters to
Justice. By Israeli calling for more murder
against the innocent of your mind as racists
and bigots they are openly, is still shadows
of YOUR mind, YOUR WORLD.. get it, got it? God
is in genius to set Life as this, as like,
nowhere existing, but for as yourself within.
Will you speak out for the Justice denied
Humanity?, or not you? Atheists can be Just
too!, but generally lose it on not
understanding the intelligence of order is
way beyond what they dream up with
assumptions. All anyone has to do is ask
themselves, who do you mean "God"? Atheists
are ridiculous!, but, to each his or her
own, we are on a path here, believe what
you want to believe. This is not a faith
initiative I'm bringing by keeping this real,
I DEMAND JUSTICE BY OUR WILL BE DONE.

A zionist cabal of criminal pirates who murder
Jews around the world for stolen money is
seriously evil as criminal. What do you think?
Let US have a open line discussion on this
indivisible matter of rights to all as equals
before who ever we proclaim, I AM.

I mean you right? Say it with me... "I" "AM"
we are good to go.

-

George Galloway "The West has DOUBLE STANDARDS when it comes to
Israel"
http://www.youtube.com/watch?v=IIpvrOJQ0J0&eurl=http://whatreallyhappened.com/

ï¿½Main actions: Israel targets hospitals, United
Nations premises, Press offices, theaters and densely

populated buildings in west of Gaza. Additionally,
people are being used as human shieldsï¿½

A Zionist Nazi Being

See? A zionist Nazi argues it's good to get killed
Jews by breaking truces with a prison death camp,
cause look at all the free American Welfare money
we can steal through kicking-back AIPAC members in
Congress.

-

Harper complicit in Israeli war crimes
http://onlinejournal.com/artman/publish/article_4246.shtml

Canadians! Please war with words for open line
calls on the war crime enemy propagandist,
The Chorus Radio Network. CJOB STEALS millions
from Manitoba each year, and refuses all calls
for honesty in governing. They are actual
CRIMINALS.

Canadians Stand Alone
http://www.thestar.com/article/569872

Harper the proven war criminal
who will be going to prison, is the only person
on Earth that has publicly okayed Israeli Nazi
to target murder Christian school girls. Canada,
join me in demanding Harper's Public trial as a
war criminal. Prison for Harper who took a
honorable soldier who stated he refused to commit
war crimes against innocent civilians, and placed
him without trial in prison. Without warrant for
arrest. Harper, the Nazi Appeaser, is a War
Criminal standing against the Queen.

"Or is this another, popular amerikan past time,
of, who cares for the facts, we are at war with
God and Christ now?" Die bushite die Christ always
says against lawless torturers as mass murdering
thieves of Humanity.

shreveport man gets 15 years for stealing $100.00
http://wesawthat.blogspot.com/2009/01/shreveport-man-gets-15-years-for.html

Again, Americans need to demand the arrest
of the Judge and prosecutor for being openly
evil demons, as TRUE enemies to freedom in
America. But guess what? Americans will refuse
to even phone Alex Jones, or George Noory
to be hung up on. Just refuse as brain dead

zombies - as known in this circle, McCainiacs.
Did you hear Alex's NWOer yesterday state he
doesn't want anyone to speak as Justice for
Americans because to learn even the most basic
of precepts for Justice, he can't pretend he is
a Freedom Fighter begging US for more money?
Like multi-millionaire Ron Paul, who gave the
fixed election up to take our money and walk
away. How much money in the millions do we have
to pay them at GCN, before they will acknowledge
the Iraq war is a war crime? THEY NEVER WILL,
because the faggot owner has a son who's into
raping American women as lawless enemy of Life.
Americans are indeed, selfish, like all the plane
crash survivors telling US how they couldn't care
less that Israeli nazis are openly targeting our
Christian children for murder with their tax
money, as unimportant, to how long they stood on
a plane wing, now approaching it's third day, of
wall to wall coverage. Telling us again of how
Christ saved your life as a lifeless degenerate.
I, as Christ, am really starting to hate all
Americans in total now. How difficult is it to
pick up their phones? They don't, and I'm beginning
to believe it's because, like GCN, they really
don't care for the future of our Humanity being
left for dead as continuing victims to EVIL liars.

Nazi Israel Broke Ceasefire as Satanic:
The Bush Administration and The New York Times v. Amnesty
International
http://uruknet.info/?p=m50870&hd=&size=1&l=e

UN sites shelled with WPh after GPS coordinates given

Livini was reported to say today that, 'every
innocent person targeted by Israeli, as such
driving in ANY car, or on ANY bike, or walking
down the street as then directly murdered, Hamas
will be blamed for. Heil Hitler' Well, I made
that last part up, but do you have the ears to hear
the screams for mercy given by Humanity?, while
this, the evilest of JEW KILLERS in the known
universe, (targeted, and murdered countless Jews
in Lebanon as one example), believes no man or
woman living can speak directly against her wanting
to MURDER even more as ungodly... 'Until the tin
can rockets stop falling on Jews' standing in their
detention centers, or living at the garbage dump
BUT.... THEY BROKE THE TRUCE! THEY BROKE THE TRUCE.
They will rob and kill US all my INNOCENT friends

as LIAR Satanic if you, YES YOU continue to refuse
to support my/our demands for OPEN COMMUNICATIONS
for Justice ourselves. Johnny Dazzler for Coast
to Coast Radio Host!

'Secretary General outraged at shelling of UN building in Gaza'

"I conveyed my strong protest"

Not good enough. Public War crime charges warranting
Death by Jewish firing squad, is what is demanded of
our Humanity. Death to the zionists liar war criminal
enemies of Humanity, instead of US, who they target
for mass murder.

Google have attacked US again as Evil doers..
They have again destroyed my writing with war
criminal intent to deny these truths as men they
could never face me, because they are not. They
STEAL our voices.

They are jewish criminals, not criminals because they are Jewish.

HERE IS WHAT GOOGLE IS:

"End the illegal Human occupation of Jewish land in Gaza!"
http://stoptheism.com/

HUMAN

These war criminals need to be arrested for Murdering
LIES against the lives of every innocent Christian
and Jew. Godless zionist nazi bastards are as evil
as they are dumb. Get every man who defends freedom
truly to hunt down these satanic demon ENEMIES for
thee True Jewish Cause, to ask it why it lies as an
enemy to HUMANITY, to murder innocent others as
evil doing thief to Freedom. A thief of Jews
everywhere to know truly God as Love and Justice.
Not only will Americans celebrate these neocon criminal's
freedom to call for the murder of innocent Christians,
as he does without arrest, "Americans" too, will as
Satanic refuse to hunt the ungodly enemy of the Jewish
faith down as Nazi hunters. No, Americans, cowardly, are
committed to dying with the Nazi Elite, as such
to escape of the Neocon terrorists who participated
in the mass murder of America for more stolen money
as war criminals.

THESE ARE SERIOUS WAR CRIMES

Israeli soldiers say they have OK to KILL Innocent People
http://www.mcclatchydc.com/251/story/59704.html

Israelis 'shot at fleeing Gazans'
http://news.bbc.co.uk/2/hi/middle_east/7828536.stm

They'll murder anyone human to steal our homes.

-

We battle injustice by demanding the public
arrest, and trial for execution of proven
war criminals. Now, who disagrees?

Israeli using Palestinian Kids as Human Shields
http://uk.youtube.com/watch?v=rXq57XK2L0A

Israeli Soldiers using Palestinians as Human Shields
http://uk.youtube.com/watch?v=FjEd4hJNVCE

Why do you as an American, refuse to contribute
to Just cause?

These monster enemies of Hillel are inhuman
to their prisoners, prisoners who had their
homes stolen and are denied freedom for being
born to Nazi tyranny. Demand Justice for
yourself as a Human.

Some Serious Evil Jarg in Dishonest Reporting
http://www.aish.com/jewlariousMultiMedia/jewlariousMultiMediaDefault/Israel_Unfair_and_Unb
alanced.asp

Forgetting about the truce given to those in
a concentration prison camp? Where they are denied
food and water? In curfew prior to near half the
days of the year, for years? How could they not
to claim such self righteousness? They don't bother
because they'd rather YOU were made innocent victim,
then them, Zionists who would screw you out of a house
called home. Did you know: they openly steal Peoples
homes in that criminal nazi state labeled godly?
Of whom openly thieve? Officially? Yes, and they try
to thieve the title of Jew from the Messiah too,
but I'm not going to a slave prison death camp
for innocent humans, I'm fighting back to demand
open communications to rule true Justice concerned.
Freedom is paramount. 911 perpetrators will be
brought to Justice by King of Jews Johnny Dazzler.

-

Israeli Murders Officer to make it look better

israel-fakes-rocket-fire-fatalities-in
http://stevenwarran.blogspot.com/2009/01/israel-fakes-rocket-fire-fatalities-in.html

/ / And we may assume that he was a non-Jewish
member of the IDF, given [...] \ \

Lawless evil doing for neocon lying criminals
really sucks man. Our friends are dying murder
victims. They are robbing our humanity of common
decency.

Neocon Enemies of the Jew do not Care for Truth

ElBaradei says Iranï¿½s nuclear program is legal: report
http://www.tehrantimes.com/index_View.asp?code=184534

But Neocon enemies of the Jew do not care for Truth.
They lie as enemies to God, on hopes to murder Jews
like they did in Lebanon with millions of land mines.
What kind of "Human" would commit such crimes against
Life? Cheating Liars for Satan Johnny tells YOU.

When Bush asked about his errors in judgement:

/ / you know, could I have done something
differently, like land Air Force One
either in New Orleans or Baton Rouge. \ \

Would have been better PR he means? Likely.
He walks away looking good, your family is
dead, or dying due to criminal neglect for
cash profit. Did I tell you that the private
bankers don't even cover our loans yet?
Trillions given by Americans, now Obama is
asking for more to disappear. THEY DON'T
even tell US what they've done with the
eight trillion already taken. Desperately,
Life Begs, THINK ABOUT THAT. King Johnny
for Coast to Coast radio host.

/ / So what is Ron Paul saying about Ron Paul?
I'd wager, he doesn't know himself, and fears
like FOXNEWS from open debate \ \

Excellent! if I do say so myself.

-

The Queen Shall side with The Great Nation

You can not hand over a prisoner for the crime
of refusing to commit a war crime. Otherwise,
YOU'D be a war criminal like now Harper is.
A Zionist appeaser. The government of Canada
already decided on this issue, and the vote was
137 Patriot to 110 neoconned bushite dumfuk.
The Iraq War is a war crime. These be demons
that steal our democratic voices, by denying

freedom from a man who's capital offense, is
that he tried to be fair for all parties. See?
War criminals.

The Queen Shall side with The Great Nation of
Canada Vs. S. Harper on this. Ask her.

God Bless the Queen.

-

/ / destroying Hamas terror infrastructure \ \

As Satanic, they TARGET TO MURDER Christian
School girls, and claim, none on Earth will demand
their public trials for executions as War Crimes
against God, because to the Satanist LIAR, (and
many "American" "Christians") God doesn't exist
within YOU to demand Justice for our Times.
YOU change that.

Evil on Parade

43,000 FoxNews Zionists in America, sign petition
in YOUR INNOCENT BLOOD calling for censorship of
Gaza conflict across all America

http://www.iraq-war.ru/article/186735

Stressing that Israel was "the first to stand
up against pure evil." [See? A zionist Nazi argues
it's good to get killed Jews by breaking truces
with a prison death camp, cause look at all the
free American Welfare money we can steal through
kicking-back AIPAC members in Congress.]

"I demand that the use of images and headlines
that misrepresent current events to the detriment
of the State of Israel be stopped immediately,"
the petition went on. [and the 'judge' judges
anything detrimental misrepresents the constant
LYING nature of the Nazi Zionist thieving pirates
of the Jewish Faith?]

This is detrimental to Zionist war criminals
because it exposes their TRUE EVIL NATURE..

Israeli Forced to Admit in League with Satan
http://uk.youtube.com/watch?v=zfFMZ7Y-s_c

Israeli forced to admitting, it lied as a demon
enemy of Life about tin can rockets falling
into the head of a good Jew, prior to the
Neocon LIAR's ungodly criminal attack for

senseless war against Humanity in the region.
When Jews die, these Zionists really take
everything like bandits., Peace where smarter
People speak freely for Justice? not so good.

The Other Side of the Story!

I Want My Bailout Money by Michael Adams the Health Ranger
http://www.youtube.com/watch?v=dnT21hmlT4o

Breakdown Dead Ahead
http://www.youtube.com/watch?v=yFCnVC2C8As&feature=related

-

Simple Common Sense for Mankind

/ / Israel has admitted HAMAS kept the cease
fire; and that Israel broke it, then unleashed a
total starvation blockade on Gaza followed by
flaming death from the sky aimed at schools,
hospitals, ambulances, and children, and you
dare call the people opposed to such barbarity
a "mob?" \ \

Zionists are evil people who pretend they
are honest, when lying directly to everyone.
Blitzer reports Hammas broke the truce, he
is lying to continue the murder of innocent
peoples. Understand: Israeli Nazi state they
will continue to murder our innocent Humanity
until the rockets stop falling on Jews. Yet,
they broke the truce, and murder Jews routinely
with reckless abandon. Jews from the Bible as
of "nigger" Ethiopian, are what the Zionist
hate when warring GOD for apartheid, apartheid
that is Humanity in Gaza. A zionist is a war
criminal who speaks not against the neocon,
but against Innocent Humanity as YOUR enemy.

Livni: Gaza truce would give Hamas legitimacy

As they always do because they are dishonorable
murderous nazi thieves of God as Just cause is.
I am, and YOU are, you just maybe don't know it
yet, or if ever. A zionist serves Satan to escape
the neocon terrorists from their ungodly crimes
on 911.

http://desertpeace.wordpress.com/2009/01/12/gazatoon-of-the-day-blaming-the-victim/

Ron Paul:
US Will Be Rightly Blamed for Israeli Killings
http://www.youtube.com/watch?v=6C756NOPyDA

Not the Nazi Israeli?

The guilty party are those who advocate these
mass murderers of innocent peoples with
deliberate lies, like from Blitzer. Blitzer
will be tried, and executed a war criminal
for stating Hamas broke the truce., Where,
only two minutes earlier, he learned, that
it was his Nazi partners. DEATH SENTENCE.
It was on TV. BUT SEE? Ron Paul, the Libertarian,
ain't going to be honest here. He'll lie cheat
and steal Humanity's voice for Justice - like
he did with OUR money. A typical Libertarian
like Alex Jones who wants to blame "socialists",
"Liberals", aka, all of innocent America.
Blitzer is war criminal, who makes his own
discussions. As is Ron. What an enemy to not
mention the truce. THINK: IT IS THE ISSUE. But
Ron plays the dummy to kill more with contempt
for Freedom. Ron Paul, the bigot, asked,
'should we be doing this'? SEE? it's not first
degree mass murders, no, according to Ron Paul,
it's argumentative that indiscriminate mass
killing is a good thing really. Remember,
Ron Paul does not support arresting those
who committed mass murder on 911 either.
Or those who STOLE TRILLIONS. Or lawless Bush,
the ACTUAL AntiChrist enemy of God. Ron Paul
will watch America die for a stolen dollar.
And Alex Jones will refuse all calls to label
him good guy like himself warring order
to our universe for it.

Israel is [NOT?] responsible for these childrens death
http://uk.youtube.com/watch?v=Y9PIZQqIep4&feature=email

Ron Paul "When we pick sides, we make it worse"

He also took our millions donated for freedom
fighting away for his family, but not our own
as dying innocent victims giving. Pick a side.

Remember: Sadistic authoritarian George Noory
is a very real DEMON of Satan, who again,
openly tells US, he wants to murder our
species as the innocent forsaken, and Alex
Jones doesn't hear a problem with that
either. Love the bushite blindly, and
they'll kill US for a dollar sukka.

Alex Jones is like the retarded brother we
can't help but love because we're human. He
is still retarded. And George Noory is still
seriously evil as a traitor to the cause of
Freedom in America. And Ron Paul is still
slamming Ron Paul.

Ron Paul "Israel can not act without
Washington's approval"

So, it is Ron's fault then by not mentioning
the truce?, or as that, innocent People are being
indiscriminately murdered in a death camp that
he figures is argumentative? that innocent
People are dying as targeted for mass genocide?
Or is it the Ron who states YOU are to blame
instead of himself for being there, not saying
anything? HEY RON! Can you hear me now!

-

Contribute to our rise for the popular will

Alex Thomson shuts-up Israeli spokesman!
http://uk.youtube.com/watch?v=zIQZ1-RFq6A

Wow. The demon LIAR will also say Hammas broke
the truce, and Israeli started this by stealing
innocent peoples homes, then imprisoning
ourselves, the victims, in a death camp for
indiscriminate slaughter. While they STEAL OUR
CHARITY. What is it that YOU can't picture?

Hi. My name is King Johnny.

TALK IN AMERICA
http://www.mediafire.com/?mxw3nzi4nzf

-

/ / The targeting of civilians, whether
by Hamas or Israel, is a war crime. \ \

They are targeted by Obama who suggests
there is an argument to be made here. There
isn't. Nazi Israeli DEMON LIARS broke the
truce to kill Jews for money. They are godless
enemies of Humanity. So it isn't that we are
pro-Palestinian, it is that we are pro-Human.
Zionists DESERVE to die, before US, the innocent,
they target for murder for stolen cash gain.
Like Obama has promised to do for AIPAC. But
what about the rest of US 6 billion plus Obama?
Who is it of US innocent folks do you wish to
MURDER, or torture next as a Zionist war criminal

for Satan Obama? Torturing kids is popular in
Israel, tell US Obama, which American father will
have his children tortured, or murdered
sadistically by yourself as a whore for Nazi
Israeli? tell us, we're not waiting.

The Chosen Bad Example

Zionists Destroy Our Homes as Satanic
http://www.youtube.com/watch?v=mo2HW4T7wK4&feature=related

When I see the women and her child, left outside
while they sadistically destroy her meager gains,
I grow weary with ourselves for not speaking right.
Nazi Israeli are committed to deny US our God given
rights as Innocent persons to speak freely for Justice
realized. All because they STEAL our Lives for monetary
gain. It is our reality, give it or take it, YOU LOSE.

Then.. Hammurabi founded Civilization.

I go concerned for any hesitations of condemnation by
Obama. It's like, he's talking some jive about
how now he'll NOT let the words of Hamas reach
his ears. Being against war criminals, doesn't make
you pro-Hamas, necessarily, it means your against
war crimes to defend the lives of ourselves respected.
Remember: He told US earlier during the campaign that
he wouldn't fear speaking to anyone, Hamas especially,
because he was confident he could win the discussion on
Liberty, by principles that unite all free men. Now,
he has promised the FBI's Most Wanted AIPAC, he will
pretend to not hear any calls for fairness as all
parties united by common cause. Johnny Who? Where did
you go Obama? You were here, then.. pooof! you
vanished into the loving shackles of convicted/ing
criminals is a mass, "WE ARE TRAITORS TO JUST CAUSE"
organized war crime outfit, dedicated to deceiving the
Public by lying. I am not Lying. I'm not saying I hold
his associations as a measure of himself, I am concerned
with him stating, he will not hear our cries for Justice,
as then AIPAC cheered. I was as freaked out about it as
you maybe yourself now, believing it as possible. Check it
out for yourself, and wonder, just "who" is this person
they tell us they're are going to take for as dying fools?
I mean look at what happened to what's his name, when he
sided similarly the same in error as hugely criminal? Come
on be honest with us son, "Are you on drugs?". Maybe he's
just been stressed with all of everything he is heaped
to follow on, NOT to know by Blitzer, that Israeli broke
the truce to kill more Jews for money, and, also STEAL
innocent Peoples Homes while saying, "they are God's

Chosen". Yeah, chosen for, "The Bad Example", of how
Jews are left undefended by these grave robbing war
criminal nazi forces. As the King of Jews, I call for
Public War Crimes trials of the entire bushmob as
terrorists, and their supporters for lawless tyranny.

People are Coming to Town. Justice for All Coast
to Coast radio broadcasts all, until we have secured
the neocons in a prison cell awaiting the treason trials.

We are Good to Go. Rise Up for innocent Life,
or don't and see where it'll get you in the end.

TALK IN AMERICA
http://www.mediafire.com/?mxw3nzi4nzf

Nazi Israeli STEAL Peoples Homes without
apology, as a function of their SATANIC
government, while collectively bombing the
INNOCENT victims who die because of it.

Gaza 2009 - Operation Cast Lead
http://www.youtube.com/watch?v=hFEiOfLUfzY

Again, they are Satanic here because
they THREAT to tell you, yeah, Zionists
are casting the leads for the real mass
murder scenes - Justice denied Humanity.
God doesn't exist to defend yourselves
from war criminals for Satan.

War crimes trials with public executions
will commence against ever GUILTY zionist
living to lie that Hamas broke the truce,
that Georgia was attacked without provocation,
(again, CNN are not 'accidentally' conning
US here). And trials for every last living
bushite bomber, rapist, and torturer -
death to the bushite, the true traitors who
war against freedom for America, traitors who
war Innocent Humanity for the escape of the
neocon zionists.

-

Both parties cheerlead loudly for Israel's war Against Humanity
http://www.salon.com/opinion/greenwald/2009/01/08/israel/index.html

Death sentences MUST be willed by Christians for war crimes.
Death to the bushite, death to the enemies of God and Man.

-

For the Great Truths. We Stand United

/ / This option is also regarded
as a non-runner as the US would certainly veto that
suggestion. \ \

No no no no. What you do is investigate who this
the "US" person is as the GUILTY party my friends.
The facts have spoken for ourselves without contention.
And while we're at it, try to figure who that "Army
says.." person is too, we need to know who these
traitors are who hide their names backing war crimes
to continue. The Enemies of Civility, they are
enemies of US all my innocent friends, enemies of US
all.

white phosphorus shells on Gaza
http://www.youtube.com/watch?v=HPY2M6IxDRA&feature=related
listen to the inflection of voice near the end of this..
the mind of a delinquent 7 or 8 year old.. This phenomenon
is pervasive, and illustrates some cognizant short coming in
Calcium or Zinc somethings. However, IT IS THERE. Normally, as
an Expert on Psychiatry, I dismiss the whole notion of
Psychiatry as I intimately know it as pure bunk wacky,
however the study of something here is needed if we're
ever going to convince ourselves dying indiscriminately
this way sucks. As the innocent for profit we pay for,
with lies sold without Public defense of mass murdering
demon traitors to the cause of US falling victims. God
says their Satanic, I just say they are criminals. War
criminals easily convicted for murdering our loved families.
They have no remorse for all that have been murdered
already.. Livini should be on her knees begging our
forgiveness, but she's not because she couldn't care
less for any Jews, especially those she don't have
imprisoned under threat in Israeli 'society'.

It's a 'bad' thing. nnNo.

Israel bomb attack Gaza Civils Palestinians 27/12/2008 launches
missile attacks on 27 Dec 08
http://www.youtube.com/watch?v=tQLDBujnwEE&feature=related

This was what Israeli did as a legitimate murder
scene, committed after the Nazi Israeli Jew HATERS
broke the truce. More dead Jews, more money to be
rich with. and we'll blame it on that God nonsense.
We must demand war crimes trials from Obama, and
everyone else down there who is appalled at this
indiscriminate mass murder continuing in your name.
We need arrests of Zionist infiltrators within
the American military who have been shipping
weapons to nazi Israeli to murder more defenseless
innocent People as targeted. Obama must demand
death sentences against these ungodly Zionist

vermins for treason, warranting execution for the
war crimes of accessory to mass murder, or genocide.
For the Great Truths. We Stand United.

-

Here on a Mission

/ / after dropping leaflets warning residents it was
about to "escalate" its offensive against Hamas. \ \

SEE! This is AFTER fire bombing the whole community.
Satanic evil enemies of Life. Who admit to targeting
any one who has ever so much as swept our streets,
warranting bombs dropped on their Block(s). SEE! they
are ENEMIES OF EVERYONE. EVERY LAST ONE OF US.
INCLUDING GOD.

Riddle me Dumb

Hamas Workers and/or Troops? Out hiding in the mountains
of Afghanistan you mean right? Satanic enemies of all
Humanity I tell you. The most evil nazi sons-of-bitches
who openly advocate tyranny and oppression through mass
murder of ourselves as the innocent left targeted
defenseless. Enemies of Jews everywhere, the Zionist
cares not for facts on who's Life it destroys for stolen
gain by lying. That's why they target Jews, for fear the
Light of Truth would expose them as the Nazis they are.
It's a prison death camp, brought about by Israeli STEALING
OUR Homes as ungodly thieves. Thieves who leave a Jew
to starve to death in a garbage dump because, it'll
attract more charitable aid The Zionist can use
elsewhere. It's not a Jewish thing, it's a criminal
matter. They STEAL innocent Peoples Homes in that
country. God's Country? God would will such criminal
offense? Which God? Not the God of Abraham, nor by
the teachings of Hillel, Christ, Mohammad, or
Confusion? So which absent God do you speak where WE
can't speak as ourselves openly for Just Cause?
Cat got your tongue? How come your not saying anything?
The Israeli Zionist ENEMY wants US ALL in slave
labor prison death camps silenced away that's why!

Israeli War Crimes
http://bothwell.typepad.com/whos_your_nanny/2009/01/israeli-war-crimes.html

Well, maybe I'm wronger on Ron Paul than I needed to.
Hey, don't you EVER forget, I am a man also. We need
to meet on common grounds, to demand the start of
formal arrests for the bushmob crimes of 911, Iraq,
Afghanistan, South Osettia, and Palestine, as a group
together united by agreement for this one cause, and

then... we can later argue about how your ideas are
better than mine because I actually know of which
your speaking.. Hey! you could call me Daddio if you
wanted! To the telephones we go.

-

Israeli are attacking prisoners held criminally
in their own Death Camps!! GET ALEX JONES ON THIS!

Hmm... why wouldn't Alex? to support his fictions
over Our Rights to Live Free perhaps? A Hero adapting
to the deaths scene?, or, a Bush whore committed to
enslaving Humanity, all so he can say, he told US so.
Big hero or big hero. Your NOT powerless to his vision
of complete control over information. He refuses 911
info, Iraq war info, Israeli info. All so he doesn't
have to look the fool, while Humanity dies with his
insults against our wills to make something better
of ourselves. Justice is what I will. Masturbate on
your own time Mr. Alex Jones.

If he states again about how he knows everything,
and is always right, and those that criticize
him on ANYTHING are delusional, it's going about to
make everyone further sick with this obscene take on
what life means as Alex takes it. If I truly state
two nickels make a dime, does that mean therefor
they make a quarter also? If I say so like Alex
would? He is an idiot. Truly. George Noory figures
Hamas broke the truce, and that the Mideast solution
is that Jews should be separated with special rights,
as oppressors over the freedom of every Palestinian
Prisoner, and what's Alex Jones gonna say about
his 'truth telling freedom fighter' George to actual
'lame ass evil nazi traitor' George?, to YOU about
how George is just trying to murder millions of
helpless people as an offer for the final solution?
We can expect Alex now to claim, Zionists should
have special rights over Jews, all to maintain
his FICTIONS on Noory being anything but the
monster to Humanity he is. Just because Noory
doesn't growl when talking about murdering all
children in around the age of 15, or against
soldiers who refuse criminal orders, does still
make him a true fascist nazi enemy laughing at
your murderers escaping to live freedom in
our dying forsaken worlds. The bushmob doctored
the NIE. Conned Congress, and Soldiers. Did 911,
by closing criminal FBI investigations immediately.
Alex and George don't seem to want US to know

these FACTS that demands arrests of the culprits responsible for high treason against Johnny's America. Now, who's with yourself. I am! I am! I am!

Alex Jones doesn't know squat of Social Security, but pretends he does, like Ron Paul does when speaking of the Federal Reserve, Health Care, IMF, World Bank blahblahblah.. I mean even the expert of experts Alex has on near twice a week, EVERY WEEK, to talk all about how the Illuminati are doing everything,(give me your money now for whatever), DOESN'T SAY TO KNOW, it was Chris Cox who changed Investment Banker rules, to cover instead one tenth of WORLD INCOME loans, to one twentieth. MORE THAN DOUBLING THE ENTIRE GLOBAL MARKET FOR LOOTING WITH HIS SIGNATURE! (And. that isn't even a fifth of the TRUE trillions dollar fraud story.!) Now, granted, I wouldn't expect one tenth of one percent of America to have even a distant clue of which I am speaking, but importantly, Alex's expert of experts has never mentioned it. EVER. Why? He don't give a fuck, but how much money he can get you to give him for investing in things that are un-important to our struggles, but for the fact, he states, you'll get free money for nothing!! OUR ACTUAL PROBLEM. It reminds me of those Ron Paul dollars... where Ron'll fix everything, cause we, as a private company, are going to make YOUR money instead... holy fuk mon.. Talk about the kettle calling American racists. Thank God the FBI stepped in. (The answer unfortunately is not nowhere as easy as Alex would blindly lead you) - again, so I guess it will be, Americans were just too far gone as illiterate chauvinists, who cared too little for your freedom as themselves degenerating. Why? To battle tyranny they knew not Justice wins the day, and blamed innocent groups gathered wherever, instead of following the crime scene leads at the real murder scenes - like was once done on TV and at the Movies. But even that was too far above their doped down heads, to raise their finger to dial a phone number.

How about stating "A lawless bushite enemy wars America as a traitor, to escape the neocons from the crimes of 911."

Then Alex states the head of GCN is giving out gold at less than it's value as a special treat, every second or third week. Below wholesale. Now, really think this thru. Do you think Alex is trying to con you here? you bet. That is the Gold Racket. Diamonds are another thing - where I've personally seen, about a decade ago, a huge press that makes Diamonds

out of coal. Swear to God it's true. Costs to make diamonds are pennies to the thousands paid to Zionists who live in Israel calling for the murder of all innocent Peoples. Where is the rich Zionist, grave robbing Jew hater to demand Justice for our times? Where? Pressing coal into diamonds, while advocating the murder of our entire Human species. THEY WANT TO KILL GOD AS SATANIC ENEMIES OF LIFE. While I am last known to Life's enemies as Jesus Christ, the Zionist's end every time. I'll have brought more Zionists to their rightful dooms, than any other, of any time, anywhere. I HATE Zionist bushite LIARS to death, all because I Love Humanity too much, to watch US die undefended as the innocent forsaken. They can change their evil ways, but till now, often not, benefiting off our suffering as war criminals who simply lie as demons to steal our Human values. Let's change this for our betterments. I mean the Halo is a dead give away..

The head of GCN has a son warring God to rape American women as lawless enemy in Iraq for the Neocon - again NEVER mentioned as something worth fighting against for Freedom in America - soldiers are suppose to REFUSE criminal orders - but not when Alex is at the mike. He will never mention the Bushmob doctoring the NIE to con America for death as exampled, because it doesn't fit his fictions, where all the bad guys escape because they are geniuses headed by secrets so powerful, nobody can ever know'em, except Alex. He tells us near every day, he knows everything already, and is never wrong, therefore you can't criticize him. Bullshit. It's like he wants to be wise like Johnny Gawd is, without doing anything like studying for a test where the teacher actually does know the issues. He told US today, the British came up with concentration camps, from the Indians - who spent all their lives murdering themselves. The British 'invented' false imprisonment? The British came up with the, Jews Killed Jesus? The British invented Pope Gregory VII? I suppose Alex has never heard of Ghettos. SEE? he just pulls shit out of his ass, and calls it like it's truly pure gold you'd wanna buy. Those, like your typical American have no clues, so they figure, Life must be sorta so that History is all one big Alex Jones NWO cartoon. What? that the NWO did 911, and everything else that use to instead, require criminal investigations to nab the actual evil doers? Alex Jones IS the NWO he tells US all we should be concerned about never stopping,

like it was in the DARK AGES. Justice Alex, why is
that hard for you as a "Conservative" to figure? Is
it because you are cowardly in the face of true
Liberty? Afraid that some People, on some Issues,
ACTUALLY know a great deal better than you could
even imagine presently? Don't like that do you?, where
you don't rule this Universe as a lawless tyrant
desperate to live in an illusion at the expense of
everyone else dying victims to censorship? Does he try
to find wise men or women? rarely. "Ron Paul [MUST]
leads our truth movement" - like, fuck off already
with the Ron Paul, The Truther, Bullshit Alex Jones.
1% is what YOU get on Social Security deposits - 1%.
And.. Bush stole 700 billion. 700. Billion. That's 700
BILLION. It's a "Trust" account. A "Trust" Account. It's
being held in "Trust" Alex. Ron Paul is asleep at the
wheel. As, so are the rest of all you other fools..
I want Justice, and I want it now for all the victims
of 911. Americans be damned, we want Justice, and We
want it Now.

In Texas, child rapists are given the right to
freely move about without fear that Texans will stand
as armed Men in defense of their very own offspring.
And Alex wants this for the rest of America. That some
how to own a gun, means an American would kill a cop
who beat a women near to death for pleasures that
he could never be Publicly arrested for, as a
sadistically evil nazi bushite fuck. Look, if YOU DID
kill that particular DEMON COP after the Chief
refused to arrest him, you couldn't possibly go to
jail in Johnny's America, because the truth would win
out in a fair verdict. And REAL cops would honor you
with great big, thank you. Nothing worse than a
cop (or bushite grunter) who believes the Law doesn't
apply to him while he drives drunk, tazers someone for
nothing, abuses Women, or kids, to sell drugs, or
kills good cops, who are good men. (Like mercs do in
Iraq officially for Rumsfeld's P2OG. Coming to an
American city near you!)

Again, the two Laws of Johnny:

1. No evidence, person innocent.

2. Torture? fuk you and die then

"Rice says it is 'hard' for Israel to spare civilians in Gaza"

We KNOW they are ONLY targeting innocent People,
the ungodly zionist Satanic enemies say so..

"Israel Rejected Hamas Cease-Fire Offer in December"

Livni has declared her country "is not going to show restraint"

"Her" country?

It's like she's admitting here, that they DO NOT
target the IDF's Hamas, but only our innocent lives
as a threat to LIFE and GOD. Remember: the Zionist
LIARS broke the truce.

THIS NAZI ZIONIST FUCK BREATHES THE AIR OF US
http://www.youtube.com/watch?v=lMxfEsooM5M&NR=1

/ / So, Hamas decides it's time to end the
cease fire and has begun shelling Israel again. \ \

This guy even sounds like the Satanic false
accusing enemy of God he is. Let US, as Humanity,
hunt these real devils down, try them, and have
them executed publicly for the benefit of God and
Man. Understand: this REAL DEMON knows he's lying,
no living man on Earth could spew the vile lies he
does to excuse indiscriminate mass murder, or starvation,
as this Zionist enemy of life sells to STEAL Your
HOME, your Family, YOUR LIFE. An open enemy of God
trying to STEAL the Title of Jew from Christ. EVIL
ENEMY OF LIFE. See, when a bushite dies, you served
Life well in defending their next INNOCENT target.
BILL HIM FOR STATING ISRAEL WAS STRUCK THOUSANDS OF
TIMES. BILL HIM FOR STATING HAMAS BROKE THE TRUCE.
BILL HIM FOR STATING bin Laden DID 911. BILL ANY
Zionist FOR THIS TREASONOUS LIE. Why God asks? Because
there isn't any evidence to support that Satanic lie.
According to the FBI. And according to God, Zionists
are not Jews, but of Satan as enemies of every life
form in this Galaxy, Hunt him down, and bill him
today for the love of God. You can 'hear' it in his
voice.. how he lies TO YOU as a DEMON of a Hatred
for Truth and Humanity. Facts, that are easily
available, are not what he works to mislead others,
others he hates, and wishes to murder for as ungodly
sadistic pleasures as YOUR enemy. Bill him under
American law for being pro-torture too while we're
at it. Death to bushite, death to the murdering
enemies of God's Love for Mankind, and enemies of
TRUE Justice for Americans. The fuking demon enemy
lies to you, as a con to STEAL your life, or just
as soon, the life of another innocent other. Now,
what are you going to do about it? Except his lies
as exceptable, as he tries his hardest blatantly
LYING to kill God and Justice in our Worlds? Not
in mine, but perhaps Yours.

' In Civil-Contempt Cases, Jail Time Can
Stretch On for Years for Americans, without Ever
seeing a day in Court. '

Where are the arrests?, then firing squads for
the Judges who 'judged' such criminality against
freedom for US, the Peoples in America?

' Where Did Taxpayer Money Go? Panel Slams Treasury
[FOR STILL REFUSING TO SAY] '

Where are the arrests?, they stole eight trillion
and counting.. And Congress 'slams' them for
disappearing OUR MONEY. Slams with what?, a,
don't do that again please butt sqeeze? It should
be massive slammer time, with a return of all
STOLEN monies.

' THEREFORE, those pro-Israel politicians in Congress
won their seats in part using stolen money. '

Where are the arrests? Amerikan bushite nazi grunts
are assisting in the mass murder of innocent Christians
in Palestine. War crimes demanding death sentences. It
isn't an argument that can be turned around. Nazi Israeli
STEAL Peoples Homes without apology, as a function of
their SATANIC government, while colectively bombing the
INNOCENT victims who die because of it. It's a prison
camp! they are denied water, food, shelter.. since four
or five truces over that they've broken, every one. These
are Satanic enemies, willing War Crimes against God,
a God NOT loved by zionist American Nazis. And a Son
as powerful as the four winds, ridiculed by Zionists,
and American know nothings, for the continued debasement
of YOUR soul worth here dying.

Israel Attacks Iran News Station

Why does not Iran DEMAND arrests, and death sentences
for these blatant war crimes against Humanity committed
by Amerikan Nazi Israeli Zionists? Along with the
perpetrators of 911? WHYWHYWHYWHY. Russians! Can you
help US out?

-

THE NAZIS SHELLED THE HOUSE WHERE THEY HELD
INNOCENT CHRISTIAN PRISONERS
http://uruknet.info/?p=m50596&hd=&size=1&l=e

Rise up for Justice American Christian, or
die innocent victim the Son of God does say.

-

Pictures of Alex Jones masturbating
"we were right about it all."

It's the NWO! The Illuminati! Not Bush, Cheney, Neocons Gone Wild, or any of many other REAL criminals, for the war criminals are just puppets to his EVIL fictions. Forget about Bush escaping.. Socialists who design traffic lights, and Liberals who will to share fairly are Alex's enemy, because he's fearful the FACTS would escape his denouncements against truth tellers. George Noory, one of the most despicable individuals on the face of our great Earth - is exactly the kinda guy he wants returned to send his wannabe Patriots nowhere but to die. What about Justice America? The bushmob doctored the NIE. TREASON. There is video of iron flowing like water from the towers, seconds prior to the collapse. Alex ain't there to help US, for that is where TRUE Patriots fight for real Justice. When WE phone with indisputable facts, on Ron Paul the bush whore sell-out for example, he lies to all (GOD), then hangs up on US. Is that the kinda freedom you think the Founding Fathers had in mind to give Your rights to speak for Alex who blames anyone but the criminals directly responsible for your funeral? The private banker never covers our loans, so why give them trillions without questions offered without answered as, never mentioned by the guy who is 'right all along on everything under the sun', and.. he 'rules the Ocean of truth' too don't you know YOU have a steak going all rotten to hell here also? You'd think Alex would take our call just for the challenge on where we stand? I'm free!

He is not. And George Noory tells us openly, he's into killing innocent kids for profit. George's profit is that apparently, by murdering all children in around the age of 15, will stop them from getting a clue at anytime in the future, to take him out as an ENEMY of EVERYONE for censoring our cries for Justice. Why is it that Alex would invite obstructionist, Steve Quail, or Alan Watt, on to lead you nowhere while they jerk off, but where we gotta go to actually defend ourselves? Steve has been on with Noory more than a hundred times, and, we'd figure, Alex will soon be delving into the Alien questions also. Answerable by me in seconds, but ahhh.. like Noory, doesn't want the truth of such a subject uttered,

just endless streams of illiterate bushite dumfuk
losers sucking on each other. While they wrest
from US the wonder; just why we can't stop
criminals from robbing ourselves, while murdering
our families? Alex wants to blame the unstoppable
NWO, while I, want to blame those actually
responsible, like Bush and the proven treasonous,
Neocon terorist liars who are pro-torture.
With arrest warrants. All of them. I'll do it for
Reagan's, War Crimes Act, as an act of respect
for my Great America, that's isn't always been
dying dead wrong under the leaderships of
criminals.

Israel hits Gaza after UN truce resolution

/ / AP Israel and Hamas responded to a UN peace
demand by hammering away at each other with bombs \ \

The IDF's Hamas is hammering away with what at who?
Is the AP referring to the tin can rockets that
travel usually several miles, but in one case,
22 miles? To kill a Jew standing outside in his
yard, thinking on how he would defeat true evil in
his time? Tin can rockets that contain no explosive
charge? Have no mistake, if it hits you in the head,
your dead, but really, what do you think the odds
are on that? E=mcï¿½. Or is this another, amerikan
past time, of, who cares for the facts, we are at
war with God and Christ now? Joe is an American Zionist
"Plumber", who has amassed a multi-million dollar
fortune in the competitive industry by shit eating.
Every bushite death is a mercy given to God in defense
of all that is right and Just in this Universe. A
lawless bushite enemy wars America as a traitor to
escape the neocons from the crimes of 911.

1. The ISI's General, Mahmoud Ahmad funded 911's Atta

2. We have video of iron flowing like water from the towers

Traitors to the Cause

Bush and Cheney are traitors to the cause of
American Liberty. To leave them free, is to leave
America un-guarded from further transgression.

UN: Israel Admits Claims About Attacked School Baseless

US military re-supplying Israel with ammunition through Greece

House and Senate Compete To See Who Can be Most Pro-Israel

This warrants the Death Sentence to Republicans
who have committed America to these war crimes
- DEATH SENTENCES. Christ DEMANDS these trials
to start tonight on America's Coast to Coast
radio program. It's called first degree mass
murder.

Israel broke the truce on Nov. 4th, yet state they
will continue to murder Humanity indiscriminately
until a truce can be found that they will break,
as always, Being the Satanic enemies of God and Man
according to the Bible:

The Bible "I know the blasphemy of them which say
they are Jews, and are not, but are the synagogue of
Satan."

/ / UN Call for investigation into shelling of
Civilian shelter \ \

Investigate that evil does exist in the thieving
LIAR name of godless Zionism? The enemies of God
and Jews everywhere?

-

Freedom Granted by Americans for Neocon Liberators

"Americans are having their heads velcroed to chairs
and forced to take in nutritional supplements by a
tube forcibly inserted through their noses by US guards."

These are People not charged with any criminal
offense don't forget. Die bushite die you know is
what I recommend, as does Reagan. A dead bushite
means you've saved the life of their next victim,
an Innocent Human Being guilty of no crimes. The
war criminal enemy is the bushite, the Zionist,
the LIAR neocon traitor to Life as this Universe,
along with every dumfuk grunt who serves tyranny
for the bushmob at Guantanamo, Iraq, or Afghanistan.
It is a soldier's oath to obey lawful orders only,
but Cheney they don't take out with American Law -
how come? cowardly fascist nazi whores for Zionism's
evil as the ungodly that's why. Cowards dying for
the escape of the Neocons from the 911 scene as
reported publicly. - Vs. US. That's we whoever
you are.

Widespread Suffering and Death
http://www.youtube.com/watch?v=gVdee2iXSVk&feature=related

Notice no one shoots at the blimp fire bombing the
entire neighborhoods. And if it's phosphorous, that
smoke is already deadly toxic. That is why it warrants
the Death Sentence under International Law when used
against OUR Humanity, as the most evil of Nazi War
Crimes ever. The neoCON LIARS are the LIARS conning
you here on our TVs and Radio dramas, in where, they
don't want to openly take our public calls for real
Justice. Bush and Cheney are traitors to the cause of
American Liberty. To leave them free, is to leave
America un-guarded from further transgression. So,
them being "puppets" is even all the reason more to
insist in their capture for trial by Jury. A Public
Jury of our Peers. Now, who's in with You? You can
count me in. and I bet willed to action, we will find
others to be something of ourselves too.. Justice
and Liberty for All. Equal rights given is what true
freedom is as measured. Translated from the 'Alien'
dialectic to Amereeze jank vibe; where is the fucking
evidence here Neocon traitors who false accuse to lead
us off the straight and narrow? It leads to Bush,
Cheney, Rumsfeld, and Condi that's why I figure, you
figure, they figure, we figure, so... what are WE
going to do about this sacrificing for godless tyranny
further then as unrepresented?

Gaza Mosque Struck as Targeted by Israel Air Force 1 Jan. 2009
(Why so you may wonder they've had this string going
now where a secondary something, then there! that proves
something absolutely apparently, without the intellect
to fairly judge anything, particularly themselves honestly
as dishonorable thieves and murderers, targeting prisoners
held hostage to their own camps. Death camps. Nazis are
they.

Humans for Coast to Coast Radio Hosts as Frequent
contributers to the mention of Justice by name. Your
Rights, Your Word, Your Future, Your Life, This World.
Join me in proclaiming victory over the enslavement
of Humanity, through Justice realized as practiced.

Israel Attacks Jews,
Silence from Mainstream about Violation of Law
http://www.youtube.com/watch?v=K1kt8qi0M-M

They kill Jews for money. They bombed Jews in Lebanon
for money. They want to bomb the HUGE sacred Jewish
communities in Iran.. wonder why? Zionists are not
Jews, for Jews don't steal in God's good name. Nor
target innocent beings for stolen gains. A zionist is
a thief to life, and as such, needs to be formally
charged for their criminal offenses, given lawyers,
and upon a successful prosecution, rot in a prison
cell and/or pay restitutions. YES. why? so not another
innocent person must fall in their place as next
victim to a zionist's public commitment to lawless
tyranny for evil intentions.

Johnny for Coast to Coast Radio Host

-

Israel Phones 'Terrorists' Before they Bomb Homes
http://www.youtube.com/watch?v=K5wrwZlwAq8&feature=channel

Didn't the Nazis say something like, they weren't
there to take out Hamas directly? Well, after all,

it was founded by the Zionist IDF, so I guess that
must be why they target our children instead..

UN: "Israel knew they were bombing a school"
http://uk.youtube.com/watch?v=uWP0GU0wVSk

/ / The hospital, and other smaller hospitals and
clinics were previously shelled by the Israeli
warplanes and tanks, stressed Hassanein. He
also denied Israeli claims that medicine and
medical supplies had arrived to Gaza hospitals. \ \

The Zionist is a thief of Life as our enemy.

IDF VLOG UPDATE: IDF Hits Dozens of Hamas Terrorists
- Capt. Benjamin Rutland - 4 Jan. 2009
http://www.youtube.com/watch?v=q9Jt-pV5wuM&feature=related

This Zionist enemy of God speaks like a six year old.
"Hamas Terrorists", "4. Jan.", come on now, how evil
do you have to be to believe this ungodly demon sells
you righteousness. They STEAL our food. They are OUR
criminal enemies who torture innocent Peoples. A
godless criminal enemy who also steals Peoples Homes.
And drops millions of land mines to murder Jews
indiscriminately for decades. Commits war crime after
war crime against Humanity. Vile bile.

They killed our innocents, and unless we kill
theirs, they will go on killing ours.ï¿½

It is the crime of which they demand WE are outraged
against. Welcome to Humanity's suffering world due to
lacking communications skill. The term "they" are
referring to is YOU. Your innocent life Israeli
intend TO STEAL, TO MURDER, TO ROB YOU Your rights
here granted by God. These are ungodly acts of mass
murder, perpetrated by enemies of Life. They targeted
a UN Girl School for Christ's sakes. please fight back
by supporting my calls for open international dialog.
Justice must win our Freedoms back, for there is no
other lazy TV'ed ass, pop a pill to make it all go
away, plan 'b'. Look at me! I'm not crazhey! We can
handle this no prob.. I'm a perfect King for these
times of wonder and horror. equal rights are found
through open communications for a measured Justice
we do contain. Evil is the deceived disguised. And
i am a god... on a mission.. Ladies?

-

The Appropriate Response To Islamic Terror
http://revisionistreview.blogspot.com/2008/12/judaic-columnist-urges-kill-muslims.html

/ / an Orthodox Jewish Russian immigrant \ \

Let US never forget, the Zionists also would bomb
some locations, then later, drop the warnings
for the Jews to run for their lives. Didn't warn
them though if they get into a car or truck they would
be destroyed instantly by the Zionist flying the
America paid for Apache. I did a big show of shows
through that continued as, more 'un-resolved' crime
scenes perpetrated by the treasonous, neocon Zionist
terror merchants. It's like they think some dying
fools are going to keep going to save'em in the end
from ourselves as still suffering in Justice denied
as enslaving into ungodly tyranny eh? These Zionists
are not only the bad guys, but they're bad guys to
even the bad guys as there is no found honor among
murderous thieves. A Zionist will kill a Zionist for
a stolen nickel, as do bushites today. Hey! it's only
Your Life in the balance. Or are you one of those
who goes in America, it's okay, we're only murdering
innocent folks who don't live in Israel.

Doing what's right and just, or evil as dumb is
Your riddle. Get back to US on that.

We need People are Equals Power!

President and CEO of Shareware Earth Co.
King Johnny Wizard at your service me Lord.

-

/ / It is just unacceptable to apply two standards of
morality, one for Jews and another for non-Jews.
For if what Israel is doing in Gaza is right, as
Israel and her supporters maintain, then what the
Nazis did in Europe several decades ago must have
been right as well. And vice versa. \ \

The ungodly zionist enemies, are enemies of
God and Man. Don't think the NAZI Zionist like
Bolton doesn't know this, with his friends at
FoxNews.They WANT to rape, murder, and pillage
America all her freedoms for the bounties of
private banker frauds. The banker does not
ever cover our loans, we do. So, why give them
trillions of American worker waged dollars for
nothing?. THEY DON'T COVER LOANS. See? that is
what this war against God is all about. People
of Humanity just seem to truly hate a guy like
US as wise and Just. See, people hate US, because
they can't for their lives disagree with Facts.
Why won't YOU support these same rights and

champion our demands for open communications.
Johnny for Coast to Coast radio host.

US Again Stops UN Call for Gaza Truce

Who is this the "US" person?, and let's
put him to death with Bolton and Kalilazad
for the most serious of war crimes against
OUR Humanity. Remember, Bolton was NEVER
confirmed because, the Zionist could find
no man or woman to say a single kind thing
about him. FACT.

CNN: The Nazis Broke The Ceasefire!
http://www.youtube.com/watch?v=KntmpoRXFX4

Protest pictures from around the world (not on CNN)
http://www.rys2sense.com/anti-neocons/viewtopic.php?f=11&t=16496&start=0

Remember Israeli nazis to this day, insist as
DEMONIC LIARS, Hamas broke the truce - as Hamas
is responsible when they target school girls for
slaughter. They said the UN were secretly attacking
Jews, clearly a LIE as impossible to prove because
it didn't happen. But facts are the furthest thing
away from the godless false accuser Zionist con man
or demon witch LIAR like Livini. FoxNews calls the
demon witch a Jew! ANTISEMITES.

We can witness, Americans do not have the intellect
to understand what this means. See, LIAR Nazi Israeli
broke the truce to get killed Jews for money. A
regular fair for Nazi Israeli. Now, they state they
will continue to indiscriminately murder humanity
until the tin can rockets that travel miles stop
killing Jews who hate Zionists. But importantly,
it is Israel that wants Jews to die, so they can
make off as Satanic with our stolen values. Just
like the Bush family did with Hitler, that the
Nazi Nation has no probs working gun in hand to
wipe out Jews everywhere still to this day. Again,
Nazi Israeli MURDERED JEWS in Lebanon as targeted.
And leave Jews to starve to Death in Israel for
more charitable aid they can use elsewhere. Public
knowledge not disputed by any living soul on this
planet because, the Zionist government admits freely
to this. Israeli think being Satanic is worth it,
for all the money and lives they can steal as enemies
to Christ, Hillel, Mohammad, YOU, blahblahblah.

And, as demonic thieves, they steal homes from
innocent god loving folks. US. But see the McCainiac

HATES you as being a virtuous man or women, so they call for more indiscriminate carnage against Humanity, on failed hopes, that we as God are not going to come down to hunt them to the ends of this earth, try them, and have them executed for the war crimes of Torture, Rape, and mass murders committed for the neocons escape of 911.

Joe the Plumber to cover Gaza op

/ / Wurzelbacher says he'll spend 10 days covering the fighting and explaining why Israeli forces are mounting attacks against Hamas. \ \

Don't want an intellectual who might have a clue of what is transpiring with the forces of Satan, fuk, CNN'll likely hire him also. Don't you just hate this treasonous lying nazi demon? He has no journey man's license, never did, isn't a plumber, and doesn't have the millions of dollars he claimed he did to purchase a company that would have rolled over 250,000.00 a year for himself alone plumbing. Plumbers, as good as the job is, never generate that kind of money. Who cares though, right? A Nazi liar is what Zionist's want, and that is what America gets. TV'ed Americans couldn't care much less. Evil nazi McCainiac who's sworn existence, is to con teen soldiers for death to raise the fortunes on the un-elected Neocon bushmobsters now fancies himself a teacher on the struggles against evil. It's like that faggot at anotheruntoldstory.com, who's into murdering innocent Gays, while fucking his own brothers up the ass, who runs ads everyday at GCN, tells US now, all about how evil we all are for demanding Justice. How long do you think that'll run with the Alex Jones towners still raising no concerns? It's for the money as Ron Paul would say.. Again, it is to divide ourselves from true liberty, by demonizing the innocent on our radio and tv channels. Instead of Bush, Cheney, Rumsfeld, and Condi.

http://www.liveleak.com/view?i=ab0_1231290043

http://www.kuwaittimes.net/upload/img_pict/headline9637e7.jpg

Read of the bushite in my America who call this work of Satanic enemies, a good thing they support to war terrorism for the sadistically evil liars of the neocon. Then KNOW my friends, a bushite is the enemy of every living soul on this planet. Have no love for those in the Air Force, the enemies of Man who bomb our families without excuse, but to know, they hate

US as Christ to speak free for Humanity. That DEMON George Noory was so happy last night about all the good the bankers AND CHENEY are doing for their hatred they spoke of for all Russians. SEE? not to protect America, but to kill you with their true commitment to the demonization of innocent people, all to escape the neocon terrorists. I HATE George Noory more than anyone alive in America. He is so openly evil to ourselves, that only those who wished to lie to you, (like Alex Jones does about Ron Paul), would say otherwise as bushite dumfuk enemies. Cowards committed to escaping Bush and Cheney for treason against Freedom. They doctored the NIE on Iraq, highest of war criminality. Alex Jones has never mentioned it, but for MAYBE in passing. Hey because all the bad guys are just puppets to ignore over the elites, globalists, socialists, liberals, gays maybe, Blacks, Mexicans, and anybody else smarter than NWOer Alex. Ron Paul is a coward as rarely if never has a clue of which he is speaking on.

Israeli PM says to end offensive if Gaza ends rocket attacks

Sarkozy urges Syria to press Hamas for Gaza truce

How does the ungodly get away with this obscenity? Nobody can deny Nazi Israeli broke the truce, as they always have done as Satanic for the last 60 years. Killing Jews for money is popular with the Zionist Nazis don't you know us by now? FoxNews CONNED Americans for DEATH with the unmentioned, TREASONOUS doctoring of the NIE. To kill Americans for more neocon gains, which Alex Jones never mentions either. Do Americans even care enough to raise Humanity's call? Do they demand public executions of sadistic godless Zionist torturers? as the Standing Law of America - The War Crimes Act - brought to be by Reagan - DEMANDS by the Law of America? It is the Law after all, yet, CNN, CBC, and FoxNews calls the perpetrators of the most heinous evil against Mankind, heroes. America is
a nation of godless cowards willing to die murdering innocent Christians in Israel, all for the profits of the 'magical' zionistic private bankers. Bushite grunts are now supporting the indiscriminate carnage, serving as police services forbidding any of the prisoners in Gaza from fleeing the indiscriminate slaughter. Again, as Satanic, they don't arrest the "Suspects", for what could they truly charge them with?, no instead demand we die helpless murder victims by forbidding escape, as they did in Fallujah murdering more than three hundred thousand innocent

souls. Die bushite die screams to all men on Earth from the Son of God. Will you stand for YOUR life as truly worth something here? Like lawless enemies Policing your reality will bring you more happiness and prosperity with the great truth teller HAPPY George Noory? The demon who openly confesses the will to want to murder all children in around the age of 15? Too crazy for you to face such an enemy of huge demonic origin, so, go the cowardly way like Alex Jones as sell out slave instead, to cover the demon with endless praise on his treachery to not have our fight on everyday with open calls for understanding Justice is freedom. Instead of a constant stream of bushite dumfuk enemies of Living. This isn't complicated. Or it doesn't have to be.

Israeli nazis state they will murder humanity indiscriminately until rockets stop falling on their country. Yet, they broke the truce.

Alex Jones told US as a deceiver, he's been on Coast to Coast a hundred times. Not in these last eight years he hasn't. I demand Alex prove this, or be known by all far and wide a treasonous liar, trying to take US off the tracking of criminal action of his buddy, the demonic enemy LIAR George Noory. bin Laden didn't do 911, despite the facts that WE KNOW George Noory knows better of but LIES to con the American teen further for death at the profits of the un-elected bushmob. See Alex wants you to blame anyone but those directly involved in the crimes of 911, or Iraq, or those responsible for it's cover-up by Zionist propaganda. George Noory will have as invited guests whos only function there is to spread dis info as supporting more indiscriminate warfare for the escape of the neocon terrorists responsible for starting the illegal wars to begin US at. Or those whom often support torture, a war crime that only exists as irrationally held by those who's minds have only a blind hate for the indivisible rights of another innocent other. And often truly hate men and women for being Just as wise. The McCainiac Zombie video is a perfect example. When the Zombie is asked about the rights of Women, the McCainiac Zombie cried out for raping more Women. The position of authoritarian power, was only found with the bushite as oppressor, rapist, torturer, or Air Force Bomber, not liberation by freedom. The bushite McCainiac KNOWS it can't compete

openly to defend it's criminal treasonous
actions! Remember, Alex "the Conservative"
thought McCain was the choice if you had to make
one, earlier on, then changed his position,
sort of, later by calling them all puppets not
worth the effort, but .. Obama's idea's matter
not, it's that his Birth Certificate is, no war
too be fawned. Palin? who's she? McCain
firebombed Vietnam as "war hero" for France?
The Banker doesn't cover our loans? Matters
little.

Norwegian doctor: Israel intentionally targeting civilians
http://rawstory.com/news/2008/Norwegian_doctor_in_Gaza_Israel_targeting_0105.html

"All that is happening in Gaza here now is against
international law, it is against humanity and I
think it is against what it means to be a decent
person. You don't treat other people like this.
Even if you disagree with himï¿½ maybe even if you
fight with them, you don't treat civilians, children
and women like this."

Israel deliberately targeting civilians in Gaza
http://www.youtube.com/watch?v=Ev6ojm62qwA

It was almost acknowledged on CBC radio that
nazi Israelis, use the argument that a tin can
rocket traveled miles, to kill some innocent
Jew as a direct hit (likely a person who hated
godless NEOCON), all because that nazi state
has OPENLY, as PUBLIC policy, stolen water and
food including baby formula, along with a huge
list of other atrocities, to punish God and
Humanity since way back before three of four
truces. AGAIN, Nazi Israeli always, as ungodly,
break their truces. Why? Because YOU, or Christ
as any Jew's life means nothing, to all the
'free' billions they'll get from given American
worker wages. Look, Americans refuse to call
for the arrest of Bush on their national,
"truth telling" Coast to Coast radio program.
Why? Because, for one, George Noory, (Alex
Jones' best buds), has told US he's into
killing innocent kids as powerful, and that
'bin Laden did it', Is good enough for US.
You don't get a say here however how you will
live or die. George Noory calls all grunts
heroes, and those who refuse criminal orders,
those he wishes to go ballistic on. Yes, it's
true, George Noory is still alive and happy

as ever.

Rise Up for innocent Life, or don't and see
where it'll get you in the end.

Again, every soldier in the Air Force serving
for the neocon liar is a traitor warranting death,
to save the lives of their next innocent victims.
They have murdered more than two million people
in Iraq. They are pushing heroin into America
from Afghanistan. They are raping AMERICAN
women as officially "LAWLESS" (can't be arrested
but through Rumsfeld - who has not seeked any
prosecutions for the raping of American Peoples.
He, as Neocon, is TRYING to DESTROY FREEDOM
For all Americans in America - while paying
with American wages, South African death squads
to murder Black men) and TV'ed Americans refuse
to speak for Justice denied themselves. Zionist
amerikans only see US as innocent others, not
themselves to pay, but they do pay, they will pay.
God, nor John will not live in a world where
bushite grunts walk freely down our streets as
first degree mass murdering rapists, torturers,
and thieves. Celebrated by CNN, CBC, and FoxNews.
Especially when they DEMAND they have greater
rights than Human Beings. Mass Murderers deserve
immediate death sentence to defend ourselves
from their demon lies and betrayals to God and
Man. Every CBC and CNN reporter who reported
Russia attacked Georgia unprovoked will warrant
trial, then death sentences for their total
commitment to the Satanic NeoCON enemy war
criminals. Remember: they targeted for murder,
helpless innocent families. YOUR family. CNN
wants you to blindly believe, CNN personalities
like ENEMY George Noory are so happy, why would
we think they willed death against our great
Humanity by conning you for more stolen money
through the sacrifice of YOUR life for zionist
criminals who laugh at your powerlessness to
raise your voice for Justice.

Stealing the Title of Jew from Christ:

Fallujah by the Sea: Aping America, Israel Unleashes Chemical Weapons
in Gaza
http://uruknet.info/?p=m50412&hd=&size=1&l=e

Look at this picture of nazis indiscriminately slaughtering
our Humanity, while on MSNBC they reported that the Nazis
will continue to murder Humanity until a truce can be found,
A truce that the Satanic enemies of God will naturally break,
as they ALWAYS do. They are godless enemies of Life who wish
to steal the Title of Jew from Christ. They targeted Jews in
Lebanon with seven million land mines, and let Jews starve to
death in Israel for more charitable aid they can steal from
G-d's Good Will. When asked by Israeli newspapers why, it was
said to kill a Jew is rewarding for the godless Zionist.
Public record. Die bushite die.

http://lataan.blogspot.com/2009/01/israeli-zionists-guilty-of-deliberately.html

/ / In doing so, this makes Israel guilty of using
its own people as ï¿½victimsï¿½ for political purposes. \ \

ISRAEL BROKE THE TRUCE - ISRAEL BROKE THE TRUCE

-

a-mother-from-gaza.blogspot.com

This web site is the winner of greatest interest internet site of the years 2000s.

Israeli plan to topple Hamas, re-instate Abbas
http://a-mother-from-gaza.blogspot.com/

/ / Breaking the truce Nov. 4, then, was Israel's way of getting the gears rolling for this whole sick game: the toppling of Hamas, and the re-instating of the impotent Abbas into Gaza so the "peace process" can remain forever in formaldehyde, to quote wiseass, er., Weisglass. \ \

Nov 4th! - perfect!. We are dealing with Nazi war criminals who refuse US, as a Species, Justice for everyone. Especially The Jew's Jew, Johnny America. Hint: they call us Love just to hide our complete agreement with this Living Universe to will Justice for God as every last bushite zionist freely moving. Once all the neocon zionists are rotting in a prison cell, or formally executed as godless war criminals, we all will have one joyous welcome in a heavenly future.. Until then, demand Justice for US. That's YOU too. Angels included. Who? I don't see no Johnny Wizard here anywhere, We are Good to Go. Rise Up for innocent Life, or don't and see where it'll get you in the end. The bushmob are traitors for closing official FBI investigations into 911, immediately after the mass murder of Americans occurred. Treason, of a, trust WE don't have it in US to stand for our common values as the Revolution will not be televised, Johnny Who. Man, are we or no? Be Somebody, then get on your phone to call in for Justice willed. Alive I Say! - this must be where you'd raise the dead and dying.. if you only could raise your finger to dial the phone numbers - well guess what? - I Command You Can! - snapoutofit - Speak for pursuing Justice on 911, and show serious concern for publicly paying private banker men trillions in worker wages for nothing. This is seriously disturbing, yes, but seriously important to address openly in our spaces to remedy with a Johnny Wizard World Wide Work of Wonder, Super CNN Special of Specials, with Your Host, the One and Only, President and CEO of Shareware Earth Co. John Himself. Hey everybody! Wow eh? So a.. when is the good guys showing up? Now. Justice. I want US to Host Coast to Coast for open Public communications, where things get solved because we know whats we're learning about. We of god, this way comes, then men and women with calculators to know: giving money to private bankers

on hopes they'll lend a small fraction some back
to ourselves at high interest is dumber than rocks.

Arab American rally in Dearborn for Gaza
http://www.youtube.com/watch?v=AVP4_-u6MV0&NR=1

Israel Drops White Phosphorus Bombs, Littlest Victims Suffer
http://www.apfn.org/apfn/DU_Israel.htm

My friends, demonic evil forces do exist to STEAL
the living rights from anyone of us, especially
including the Jews. Remember, it is the zionist who
steals God's good name through lies left unchallenged
by private corporate interests tied to the CON of
private banking in total. Christ is a Jew too.
Israeli broke the truce knowing such action woud get
killed Jews in Israel, a cash bonus! Like starving
Jews do attest on a infomercial that ran for near
18 months across Canada. Then covered by the Israeli
press, that the Zionist officials there actually
enjoy the prospect of suffering Jews because it,
OUR SUFFERING, will attract more charitable aid the
ungodly criminal enemy can use elesewheres! Hitler
revisited. I am the Son to God and I wouldn't lie
to you about an issue as hughly Satanic as this.

White Phosphorous: Israel fires artillery shells into Gaza
http://www.sott.net/articles/show/172089-White-Phosphorous-Israel-fires-artillery-shells-into-Gaza

We can overcome this, and create a better world in
the process. It's back to the simple things: open
communications, and evidence, evidence, evidence
to convince ourselves truly of anything. We are
in a horrible dream right now, that we must arrive
ourselves into for comforts. Arrest the Neocons for
treason. That of course includes anti-gay faggot
Bolton for his and Kalilizad's treasonous lies
brodcasted on FoxNews these last few days. And
Peter Powers for the London bombings while we are
at it, then, we'll really being going places.

/ / My relative's neighbors- 3 young children- were
all killed today \ \

-

Satanic Enemies of Christ

CNN with Blitzer allowed reported on Larry King
that Hamas broke the truce, without any uttering
of fact. While when the nazi israelis were accused,
just minutes earlier, Mark Regev could say only

silence. The zionist Satanic enemies of Jews speak only silence, because they know they are satanic enemies liars of Human will.

Again, these SATANIC enemies break their truces everytime, then state, it is Humanity's fault because CNN will never ALLOW the humans to know. They are murdering innocent People in hospitals for example, or those in a Church, just as amerikan bushite nazi grunts do for the escape of the neocon zionists responsible for 911. To hunt a lawless bushite nazi grunt, and kll it instantly is to defend it's next innocent bombing victims. Bush and Cheney closed 911 investigations on 911, therefore killing a lawless bushite traitor for our Humanity is just to get ourselves together to arrest those responsible for mass murder on 911. The deaths of bushite zionist liars is a mercy given for the love of God. Die bushite die.

Israel Nazi State

Israeli nazis state they will murder humanity indiscriminately until rockets stop falling on their country. Yet, they broke the truce. They always break their truces. Understand these Satanic enemies of God, dropped seven million land mines on Lebanon when learning the conflict was over. They will kill Jews for money, THEY are the Nazis. Nazi Mark Regev is clearly insane. 'It wasn't israel that started this' He could not stand with any man without instantly being exposed to All of Humanity as a war criminal in need of immediate public trial for death sentence. These are only innocent people being bombed. In a concentration refugee camp. Look, it's a prison camp. And if YOU
were a prisoner there, and Texan child rapists are something you'd wish to defend your community from, you'd maybe join the Gazan police force, run by Hamas, a political group democratically elected. All police officers in Gaza, Nazi israeli claims warrant 1000 lb bombs, not warrants for arrest for a criminal offense. Remember, it was Israel that broke the truce, as so is spoken by Palestinian government officials speaking internationally - using the example from November. But understand, as Satanic fraudsters, they always fuck over Our Innocent Humanity this way.

What kind of "Human" would commit such crimes against Life? Cheating Liars for Satan God tells YOU.

The Bible "I know the blasphemy of them which say they are Jews, and are not, but are the synagogue of Satan."

Look, these enemies of Life steal INNOCENT PEOPLES HOMES as thieves of The King of Jew's simple philosophy.

The Reality of Zionist War Crimes in Gaza
http://www.youtube.com/watch?v=GDjthFt6EZg

The zionists aligned with Bolton are using radio-active weaponry against all Christians. What do "Christians" in America on Coast to Coast have to say? Nothing because that demon enemy of Life George Noory, the pro child killer, insists as Truth's closest most bestest friend, bin Laden did it.

most moral army in the world:

Our reign of terror, by the Israeli army
http://www.ifamericansknew.org/cur_sit/rot.html

Glorified by CNN, CBC, and FoxNews:

ï¿½do the Gazans know that only Hamas is to blame for their sufferings?ï¿½

Remember those same news groups will KILL Americans too with poisons in our foods while smiling as George Norry does Daily

-

Gray Ghost

/ / Funny thing noone ever shows pictures of the scumbag Hamas rockets falling on Israeli civilians, but the nooz is full of Palies suffering. Fuck you all I hope Israel exterminates the vermin. \ \ He can advocate the MURDER of innocent people for the neocon liars, and Google doesn't destroy his account?

Remember Zionist Nazi Israeli started all their murder rampages against Innocent Peoples for 'free' welfare money, as broke the truce with, IDF funded Hamas on Nov. 4th. They have been indiscriminately bombing People with excuses that never do add up. Example: Nazi Israeli stated they were in the right to murder ANYONE

in a car or truck in the entire nation of
Lebanon, (especially in the Jewish communities)
because like enemy "Gray Ghost" would say, all
those innocent Peoples deserve TO DIE AS MURDER
VICTIMS for his sadistic ungodly pleasures.
Remember, Nazi Israeli didn't mention this until
thousands has already been murdered, then even
still, without radio, TV, or newspapers, telephones,
or sky writing how were ONLY THE INNOCENT JEWS
as officially targeted to know? Then the seven
million land mines to kill innocent kids for
generations. To the enemy of Life, Gray Ghost
it matters not that Israeli started the conflict
by sacrificing nazi vermined trashed as Satanic
dumfuk enemy soldiers sent across the border,
to Grey Ghost, all it knows, is Justice must not
be allowed to win this game for our human race,
for he would be truly seen as a sadistic enemy
of Freedom, powerless, or rightly dead for
his proud treasons against life in this universe.

ZIONIST DEMON LIARS TO SHOW HIT ON TRUCK FULL OF ROCKETS ACTUALLY HIT
TRUCK FULL OF WELDING TANKS
http://english.aljazeera.net/news/middleeast/2009/01/20091117737115874.html

Please John begs all People's of Humanity,
Americans do not have the courage to even speak
concerns for their dying as evil state of godless
private banker ruled blind tyranny. 'Duh, yeah
give billionaires trillions, trillions, TRILLIONS
to help the poor homeless mothers poisoned by
FoxNews CRIMINALLY.' Gawly je, I dunt no y dat
detnt work-ed' - o wel, cary ohn my wayward Son.

Livni: Gaza truce would give Hamas legitimacy

See? this is why NAZI I$raeli thinks they have
an excuse for bombing people indiscriminately
to break a truce they signed on to. This isn't
a one time, maybe two time occurrence, but every
time in the last 60 plus years the zionists
aligned with Hitler have. Satanic enemies
of Humanity.

ANTI-SEMITE is FoxNews every time they assault God
with "Israel, the Jewish State" to torture, steal,
and murder.?. ANTI-SEMITE!

The Ungodly Zionist - a report from the front

/ / The most recent victim of Israeli airstrikes
was 10-year-old Ismail Hamdan \ \

To the Satanic enemies of Man, the Ungodly Zionist,
an innocent murder victim's life can not be allowed
a defense such as the charge of first degree murder
against Netanyaho because, he states no Justice to
any who believe in the Jewish cause, as Hillel, of
freedom as Liberty for all. If Jews ran Israel,
Netanyaho would be chastised publicly by the Humans,
for sanctioning the criminal acts of first degree
murder. The nation of Nazi Israel STEALS Peoples
HOMES. What other nation on this Earth commits
such willful crimes against innocent Human beings
OFFICIALLY? Steals homes from god loving innocent
folks and labels it our 'Justice system'? Who? Neocon
Amerika, the nation that gave trillions to bankers
recently on only prayers that their gods will maybe
lend some of their own money back to them at high
interest. But alas, evil is the deceived disguised,
as in their deep ignorance of money and virtue, they
do not understand, the private banker never covers
the loan. Never does a private banker reach into
it's pocket to borrow US to begin with - so as a
consequence, the bankers have just pocketed all the
'free' loot for nothing, TRILLIONS, and are not
saying why should they help anyone else with charity?
it's the amerikan way. Instead, hate the wise socialist
who designed a working good traffic signal system,
where lives are saved and congestion is eased, or
hate the white man, the black man, different People.
But never Mr. Bush, Mr. Cheney, or Rumsfeld, the
neocon traitors who closed criminal investigations
immediately after the crimes of 911 occurred, who
doctored the NIE to con America into death, and
never slight the trillioniare private banker gods,
who have stolen/taken our public authority through
war criminals in Congress. Taken from all others
to bring us a much poorer world suffering due to
our speakings of contempt for Justice as christians
in America - who claim in silence only indignation
for real Christian families robbed or murdered
Officially by the zionist state of ungodly Israeli,
paid for by dying America. Americans refuse to raise
their phones for the arrest of the bushmob for capital
mass murder, so, what's private trillioniare bankers
walking away with the entire economy in free fall
going to do for them, when they are already to
death for the glorious Zionist Neocon thieves of
Civilization? Proudly in hatred for Innocent
Humanity. Again, Hamas was founded by Zionists
in the IDF, to kill Jews for money - public record.
Jews starve near death in Garbage dumps of Israel,
all because the Nazi Zionist UNGODLY government

states it is beneficial to starve Jews, for, they will receive more humanitarian aid THEY can use elsewhere. Public knowledge. Zionist liars murder innocent Jews for money, like they did in Lebanon, and like the zionists did on 911 by forbidding the pursuit of the terrorists by following the crimes scene leads at the real murder scene. Unjust enemies of Man.

To arrest those responsible for 911, we are going to need to form a public warrant for a person or persons. Bush and Cheney are guilty of closing investigations on 911, treason, called obstruction.

UnHoly Nazi Israeli Racists are Greater than the censored words of Messiah!

IDF's YouTube Gaza channel to Correct Ourselves

/ / it will disseminate footage of precision bombing operations \ \

Precision? They dropped seven million land mines in Lebanon, after having seeked out where the Jews lived, (Northern Lebanon), and murdered them firstly! JEWS. They, as enemies of God, like those of FoxNews, will refuse these type of FACTS on their hatred for Love and Justice. Their hatred for Jews, real Jews, like me. Understand: American baby formula has been contaminated with poisons, and FoxNews doesn't think it's important to their corporate responsibilities to kill ourselves further for profit. The Zionist will murder anyone just to steal your belief in God as Love. They HATE me for being wise and Just. Hate. For, why wouldn't America support my demands for open radio communications on the Coast to Coast radio network? Americans would rather murder Humanity before Justice succeeds beyond their illusions of grandeur through the mass murdering of ourselves for stolen gains. The banker does not cover our loans! Giving them trillions for free unquestioningly is dumber than rocks. Enough.

Fake Rocket Attack
http://xymphora.blogspot.com/2005/02/fake-rocket-attack.html

Remember however, the Zionist has no qualms about killing Innocent Jews too if it means Americans will get it more free welfare to murder ourselves. They openly STEAL Peoples

homes in that nation run as thieves don't
You know? Or as it is just open public
knowledge that the Zionist excepts that
911 was actually a good thing for them as
war criminals reaping the cash rewards for
continuing capital murders?

/ / Ehud Barak promised that the war would
continue ï¿½to the bitter end.ï¿½ \ \

That is you there Barak promises to end
bitterly as the innocent the demon targets
for ungodly murder. How could ANY REAL MAN
steal food from a Christian baby? How do they
do it?, as the inhuman. (Like bushite do in
Iraq, while on CNN in interview tell US, they
are there war criming for neocon traitors to
steal everything as "helping the Iraqi
children". They offer no clean water, no food,
just indiscriminate bombing campaigns of evil
incarnate. True fascist nazi enemies of true
freedom in America who advance censorship to
anyone like myself. Why? They lose. They are
not men but Satanic enemies of the King to
Jews, the Messiah. I Am. Thieves to the
scriptures of Hillel, and of Moses. Thieves
to the intent of every true religious person,
for God is everywhere. God is the Word, and
the Word is Holy. So, fuck you and die bushite
nazi traitors to American Justice, those of
them who refuse US open free words to resolve
their war criminal behaviors as is done in
godless Israel today against INNOCENT
Christians. Done before another innocent other
has our homes stolen, or is murdered by the
lawless grunting bushite dumfuk enemies of
Jesus Christ. I am King already, always have
been, always will be. Live with it. The Koran
is filled with great understandings on this
relationship. Christ is mentioned more than
Mohammad - and Mary can be understood as the
mother of all being before we are. a virgin.)

Look humans, you've
had your fun murdering yourselves, now the wise
people will compete for bettering ourselves by
understanding. Who the fuck are these illiterate
monsters at CTV national television? and how can
they willingly keep our soldiers in the dark dying
that way by simply smiling? Are they experts in
anything? are they respected researchers? writers?,

politicians?, civil rights lawyers? - do they even
respect ourselves enough to be warned of vaccines?
NO, instead they LIE with such contempt for Humanity
I am surprised Canadians, don't speak out more..
perhaps they do, it's just CBC, CJOB, and the
Winnipeg Free Presses of our World make no attempt
to inform ourselves about it. They don't take my
thousands of calls, how about Yours?

Life is real to know, if you seek, and not go
so freaked out as Living is as it always has
been. Knowing God is cool, 'amazing', yeah,
whatever, but we are of too this real world
suffering for our lack of respect for a wise
person speaking. I WANT FREE PUBLIC DEBATE
FOR JUSTICE AS ALL INCLUDED. Now really, is
that too much for US to ask freely? What say
you Googler? Afraid I will truly make your
banker gods look like fools?, the gods we all
give more than half our lives to for nothing?
Don't want to look truly dumb as deathly
ignorant, so censor US all themmers you are
too in command of your Fate. So be it. See?
Stand in. I didn't even really do anything
there, yet it's written, it's done. A Miracle!
Imagine: your Christ! YOU. now what are you
going to do.. time is ending for you remember,
now what are you going to do? Will you pick
up your magic phone and call likewise for
Justice denied, or will you crawl up on your
cross and die in silence for the glorious
Zionist aligned with trillioniare private
bankers and Satan? Christ is of all peoples.
Your on a mountain.. You've raised yourself
from death already, and your here to do
something greater for the love of God..
what's your plan for the common man? Welcome
to the real world my friend.

Morpheus 'Nobody can tell you what the Matrix
is, you have to see it for yourselves. .. all
I am offering is the truth Neo, nothing more'

Lawless Police to Defend Who Again?

They Call it Terrorism

"Israeli nazi enemies call bombing people,
like they do without apology, terrorism.
What can't you figure?"

CNN TODAY

/ / Stand down 'Christian' nation. It's not your babies. Ethnic cleansing is not a 'sin' as long as the 'chosen ones' of Israel do it. \ \

Israel, the nazi enemies of God nation broke the ceasefire on November 4th. Now, as demon liars claim they want to honor a ceasefire again to further steal ourselves from the Love of Justice. Why do the godless Zionist do this always as first degree murderers? Because they can't win an open debate on their treasons against God and Man. The private bankers DO NOT cover our loans. Again, these SATANIC ENEMIES OF GOD dropped seven million land mines on Lebanon while target killing JEWS. INNOCENT JEWS. Targeted. Northern Lebanon, look it up. Israeli MURDERED Jews. Innocent Jews as targeted for more stolen charity. I again, beg you to support my call for war crime trials against the bushmob, including CNN demons who report a total contempt for YOUR life dying. Your call loser.

ISRAEL: No civilian casualties in Gaza! http://uk.youtube.com/watch?v=RlZd3vR6Kzk

Satanic enemies of God as anyone included. Think: who buys these demon lies to steal further from our innocent Humanity? Zionists do at CBC and CNN, who will murder America by openly lying to destroy freedom. Example: CNN reports Georgian nazis who targeted children schools, churches and threw grenades into our homes to murder as minions for Satan are called freedom fighters. Just like the Third Infantry, the new lawless police officers of California, who can't be charged with rape for example, because ONLY Rumsfeld can okay such prosecutions. Hey who cares for Iraqi Rights right?, for TV America's CNN with FoxNews and George Norry doesn't, for it's only American women and children now right nazi enemies? And WE ALL KNOW, cowardly America refuses to even raise their phones for these dying concerns. How can George Norry continue to live happily dying America for the neocons? How? they let them. Alex Jones thinks George Norry is just fantastic, so no, don't encourage the NWOers to demand free communications, because if we did, Alex Jones and the like, would factually look like the idiots he is. (better to die

America than face this foolishness?) The banker doesn't cover our loans, we do Alex. So giving them trillions in American worker wages is a bank robbery in progress. Simple. NOT a diabolical ingenious plan, we, the simple folk can't figure without the Alex Jonesers geniuses of thought control developed by the CFR, builderberg, the Boners and NASA.

Obama stated all lawless soldiers who war for godless Zionism are heroes, which includes South African death squad goons who murder my nigger friends. AEGIS. I call them lawless enemies of God, deserving death sentences to save the lives of their next innocent victims, Obama calls them heroes warring for the escape of the neocon traitors responsible for 911. Who are you going to believe?

1224. Where does high gain antenna get the gain from?

Newsgroup: rec.radio.amateur.antenna
Date: 2009-02-20 17:52:55 UTC
From: john <nospam@nospam.com>
Message-ID: <008acc5d$0$11648$c3e8da3@news.astraweb.com>
Source record: 17448

Wireless routers come with small antennas. There are high gain,
non-directional antennas you can buy , like this:
http://www.amazon.com/Linksys-High-Antenna-Connectors-HGA7S/dp/B0002F3E9M

If the antenna is directional, I can understand how it could achieve high
gain (by concentrating the radio wave in one direction). But it is
non-directional, so where does the extra gain come from?

The gain comes from taking the Spherical shape of a Point Source RF
Emitter, and squashing it Flatter. Think of a round balloon. What
happens if you put it on a table and push down on the top. it gets
fatter. Ok?

In this case, "non-directional" is misleading... they're more commonly referred to as "omnidirectional".

These antennas are non-directional in one plane (perpendicular to the axis of the antenna). Normally, the antenna is oriented vertically.

They are *quite* directional in their elevation, though. That is to say, they're most sensitive (highest gain) in the directions which are perpendicular to the antenna. As soon as you start getting "above" or "below" this perpendicular angle (at higher or lower elevation angles) the gain drops away... and directly above or below the antenna there is a deep "null" in the gain pattern and the antenna is *extremely* insensitive.

The three-dimensional gain pattern of a simple half-wave dipole antenna looks somewhat like a donut (or, in cross-section, like a figure-8).

For these higher-gain "omnidirectional" antennas, the donut is "squashed flatter" - there's more gain out in a horizontal direction (compared to a half-wave dipole) but the gain falls off more rapidly as soon as you start getting much above or below the horizontal plane. It's concentrating the power (and receive sensitivity) just as you say, but in the vertical (elevation) direction rather than by picking a sector of the horizontal plane.

As a result, these higher-gain omni antennas can be a good solution for increasing your signal coverage throughout a single-floor building space. However, if you're trying to provide coverage for multiple floors, you may very well find that such an antenna makes signal coverage *worse* for users on any floor other than the one with the wireless router.

In short, you pay Peter by robbing Paul... not unlike every system of taxation ever tried by humanity :-)

A truly non-directional antenna (technically referred to as an "isotropic" antenna) would put out precisely equal amounts of power in every direction in the sphere. It can be proven that no such antenna

can actually exist - it's impossible to create such a unform EM field
without the presence of singularities (i.e. holes) or one sort or
another. However, the isotropic antenna is a useful point of
reference (even if it doesn't really exist) and you'll often see
antenna gain figures given as a "dBi" number (that is, antenna gain in
decibels, compared to what you'd get from an isotropic antenna if one
actually existed).

You seem to be confusing "non-directional" and "omni-
directional". A non-directional antenna has no gain.
An omni-directional antenna takes away from higher
elevation radiation and focuses that radiation
at lower elevation radiation angles.

I can retrieve the email. Thanks for the notice.

I have done a bit of gedanken after the slant range issue was raised.

A

B

o H
ooo

ooooo

Let the group of "o" represent a polar view of earth,
"A" represent satellite at azimuth (highest point in the sky),
"B" represent satellite between azimuth and horizon,
"Z" represent satellite very near the horizon,
nominal orbital height 1000 miles above mean surface,
and mean radius of earth of 4000 miles.
Then range to the satellite at A is about 1000 miles, at B may be
about 3000 miles and at H would be about 5000 miles. The arithmetic
for relative sensitivity versus elevation angle can even be solved
analytically, though 4 evenly spaced angles on either side of azimuth
would be quite sufficient to plot the most even EIRP curves.
Your DCA is notably more hemispherical than that. Can you tinker it
up to get about 16 dB more at the horizon than at the azimuth?

Maybe, maybe not. Roadway surfaces are rarely conductive. More like
static dissipative materials. While the area is significant the
opposite conductive pole plate is missing, computing the effective
capacitance may be challenging.

Much more than the roadway surface is involved. The skin depth in average soil varies from about 12.6 feet at 30 MHz to 15.9 feet at 3.5 MHz. So significant current flows to depths of several tens of feet, well below the road surface. Within this distance of the surface you'll usually find strata with various conductivities and permittivities, as well as possibly buried pipes, rebar, and who knows what else. Computing an "effective capacitance" is virtually impossible, and useless if the vehicle is to be moved even a short distance. So only generalizations are possible. But any reasonable assumption about the characteristics of the ground under the vehicle points to it having a significant impact on the current distribution.

Hi Joseph

I am not familiar with all the satellite orbits. It seems that most of
the Polar Orbiting Satellites are about 500 miles above the Earth. If the
Earth radius can be considered to be 4,000 miles, the distance to the
satellite at the horizon is about 2,000 miles. That means that, the path
los from the satellite to the ground station varies by about 12 dB as it
passes overhead.
One of the objectives of the DCA design project was to produce a pattern
with about 12 dB less sensitivity toward zenith. I attempted to achieve
that pattern shape by tilting the dipoles to minimize overhead sensitivity.
Serindipity offered me a side benefit when it made me aware that tilting the
dipoles in this array effects the dipole input impedance. The input
impedance of the dipoles in a DCA with 45 degree tilt (90 degree cross) is
about 72 ohms. The dipole input impedance in a DCA with 30 degree tilt is
very near 50 ohms. Kinda lucky!!

Does anybody have experience with any of the 2009 Prius or Honda civic hybrid cars with HF installed ?? I hear that at least 2006 Prius' have quite a bit of RF interference that evidently can be cleaned up quite a bit.... BUT, how about the 2009 Prius OR 2009 Honda Civic Hybrids.

And, any experience on HF antenna mounting on the Honda hybrid ??

Source record: 17357

I have been toying with the idea of putting up a 40M vertical antenna. I have an inverted vee up at 40 feet high but it doesn't seem much good for hearing European stations. I put up a temporary 40m vertical today and heard alot more stations than on my inverted vee. I have a steel shed with a zincalum roof with an area of about 320 square feet. If I was to mount a 40m quarter wave vertical on that roof area would I have an adequate ground plane? Or, am I better off ground mounting it and running out radials? Or for something completely different, how would I go if I erected an 80m loop at about 30 feet high? I have tried to reorientate the inverted vee to better capture European stations but it doesn't seem to help, hence I am looking at other ideas. Any information gratefully accepted.
Cheers
Max

1235. Helically-wound Monopoles

Newsgroup: rec.radio.amateur.antenna
Date: 2009-02-21 15:11:55 UTC
From: Richard Fry <rfry@adams.net>
Message-ID: <060605f0-480d-4ff7-9f4b-f8b9a7e5571d@e22g2000vbe.googlegroups.com>
Source record: 17359

Someone on another board I read posted a description of how to
construct a self-resonant, helically-wound vertical as an emergency
replacement for a 1/4-wave monopole for a MW broadcast station. His
conclusion was that its radiation resistance would be somewhere around
40 ohms, and could be driven at least at reduced power by a tx
expecting a 50 ohm load.

I responded as below, and thought it might be a topic for discussion
on rraa.

Such a configuration may be self-resonant, but that does not mean that
it
has the same radiation resistance as that of a linear monopole at its
1st
self-resonance (1/4-lambda).

According to John Kraus in "Antennas," 3rd edition, Chapter 8-22 --
the
radiation resistance of such a helical antenna is approximately the
same as
that of a linear monopole of the same overall height, and not to the
length
of the wire used to wind the helix.

The radiation resistance of a short monopole is approximately (h^2)/
312,
where h = height in electrical degrees. A 20-ft monopole is about
12-1/2
degrees at 1700 kHz, so the highest radiation resistance possible for
your
configuration for MW broadcast use is about half an ohm.

Kraus says in this chapter "The advantage of the helix over a straight
wire
or stub is that its inductance can resonate the antenna."

This means that a separate "loading coil" is not needed, which can
reduce
the fixed resistive losses in the antenna system. But it doesn't mean
that
a self-resonant, normal-mode helix has the radiation resistance and
radiation system efficiency of a linear, 1/4-wave monopole (other
things
equal).

Richard Fry wrote:
> But it doesn't mean that
> a self-resonant, normal-mode helix has the radiation resistance and
> radiation system efficiency of a linear, 1/4-wave monopole (other
> things equal).

Here's a data point. Awhile back, using EZNEC to simulate
the delay through a 75m bugcatcher loading coil, I used
the coil pretty close to its self-resonant frequency of
~7 MHz. It had a 4 inch bottom section and a 4 inch
stinger so the antenna is about 14 inches long. The
resonant feedpoint impedance is 2 ohms (not including
ground losses) and the maximum gain is -14.8 dB.

Assuming a typical 1/4WL monopole has a maximum gain of
0 dB, the 1/4WL monopole is 30x the efficiency of this
short "helical" antenna on 6.85 MHz. So it seems that
the radiation resistance is ~1/30 that of a 1/4WL
monopole using mininec ground simulation.

Incidentally, a resonant helical monopole obviously
has a 90 degree delay from feedpoint to tip. The reason
that virtually zero phase shift occurs through the coil
is that one is sampling standing-wave current phase which
doesn't change (much) whether it is through a coil or
through a 1/4WL wire. Quoting my web page at:

http://www.w5dxp.com/current2.htm

"Standing wave current cannot be used to directly measure
either a valid amplitude change or a valid phase shift through
a loading coil. All of the reported conclusions based on
loading coil measurements using standing-wave current on
standing-wave antennas are conceptually flawed."

Hello Max.

You proved yourself that the concept is better then the current solution. Vertical polarization gives lower elevation angle of the main lobe. From an antenna standpoint I would place the antenna on the shed. It raises the feed point, giving lower elevation angle of maximum radiation.

I suppose the walls are metal also and are electrically connected to the roof, so you don't get HF inside the shed. The large metal surface (roof and walls) that serves as counterpoise may be sufficient. Depending on foundation of the shed and type of soil, some radials may help you. You can try it yourself. Look to the VSWR or impedance of the quarter wave as it is now. Add 2 floating radials from opposite edge of the roof. Vary the length and see what happens with the VSWR or impedance. When it doesn’t change much, radials will not give a large improvement.

When the walls of the shed are non-metal, you will create an RF field between the roof and the soil under it (this will also lead to a common mode current on the coaxial feed line. In my opinion this is undesirable (both RF and safety). In that case I would ground the roof at several places. More thin copper grounding points are better then some thick grounding points.

Safety is different. When the roof isn't connected to the walls at sufficient places, I direct hit can be fatal. Though you are pretty safe in a full metal shed when hit by lighting, when safety grounding is not OK, you might have a problem in the electrical system. When your shed lacks its own safety grounding, you will get excessive

lightning current in the mains cable that runs from your home to the shed.

About radials, buried, laying on the soil or elevated.
Adding radials may reduce ground losses in the vicinity of the antenna, but will not change elevation of main lobe as this is mostly determined by soil properties up to many wavelengths from the antenna itself.

When you make the vertical radiator longer then a quarter wave, it raises the input impedance and lowers the elevation angle of maximum radiation (you will like this). You only need a capacitor to tune out the inductive component. I use this concept for the 40m antenna for JOTA (16m vertical). The increased input impedance, reduces the current that must be drawn from the ground system (in your case the roof with or without radials). You may increase the electrical length by adding a capacative head.

Some design info from the JOTA logfile. 13m radiator with 8 elevated quarter wave radials (2m above ground), gives about 60 Ohms in series with about 200 Ohms inductive part. All over pastoral ground. Last year we extended the radiator to about 16 m and used a 50 ohms to 200 Ohms transformer and just 3 floating radials. The reason for the many "abouts" is because of measurements are done with primitive antenna materials at the grass production ground adjacent to the scouting camp.

Best regards and good DX.

Im in the market for a vertical that will work 80-10 including WARC. Im limited in space and would like one that doesnt need radials. I work both cw and ssb, but prefer cw. I can go about as high as 30 feet with it. Can anyone recomend something that theyve had good experience with or is there an FAQ somewhere that would have some comparisons I could look at? Any help is appreciated.
73,
Brian

Hi Brian,

Trim your sails for a vertical that goes from 20-10 and you might find
the performance you expect. You could sneak in 40, but 80 will arrive
only to spite your dreams.

Brian, as others have suggested, you can't have all. You want vertical, broadband, no radials, and 30'. Suggest you pick 1 or 2 favorite bands and go from there.

Sounds right to me. The 'loading coil' is distributed throughout the radiating element and, consequently, throughout the current distribution so it might be possible to reduce the I^2R loss using the normal-mode helix. It follows that terminal impedance involves an inductor with a non-uniform current distribution throughout its length, so the magnitude of the reactive part involves an integral.

> coaxial horns. Not the same as a quartet of dipoles at all.

Actually, it's not much different.. Both are radiators that radiate a linearly polarized signal. The Lindenblad (and variants) make the CP with two dipoles canted relative to each other and fed with a phase shift (same idea as crossed yagis for Satellite CP antennas). The "two dipole" thing radiates in both directions, of course. Add another pair pointing at 90 degrees from the first, and you get roughly omnidirectional coverage. You can do the same thing with 4 (or 3 or 27) CP horns arranged in a circle.

Most of the fooling around with dimensions and spacing and phasing has to do with the overall pattern and just how circular it is at which look angles.

What I think I'm looking for would be a point of reference that
would let me, if not exactly evaluate the facets of such an
argument, at least be a foundation for forming a testable opinion of
my own.

> A JFET at these frequencies does satisfy the naive requirements of

Ah! You have a Mohican? Or just access to the manual? Mine is missing,
burioed somewhere in my basement; I was fortunate enough to locate a
copy of a GC-1A PDF some kind soul posted online.

"Gyrator"? I thought that was the rooftop dance that follows an
antenna adjustment in mid-thunderstorm. <grin!>

Google led me to the AAVSO site (www.aavso.org) which led me to the
Yahoo VLF_Group. Aaaaaaaaaaaaaauuuuuuuggggh! A circuit that can
replace capacitors or inductors? My first reaction is "technology
at a level indistunguisable from black magic".

I don't think I'm in Kansas any more.

(On the other hand, I have lots more toys to play with. <grin!>)

> task of matching as well

Um. I don't think I ever got past the simplistic "High Q = Good,
Low Q = Evil" stage. Looking back, I can now see cases where an
excessively high Q might be... counterproductive, but as always, it
depends on what one means by "high" or "low" in a given context.

Noted as something else I need to review and not depend on instinct
for.

> ... (observe the input tank design for the
> conventional bands).

Of the five bands (A-E, SW3 positions 5-1), the only one which seems
different is "E", with an additional 130pF cap between the antenna
and the tank circuit.

Is that what you're referring to?

You got _paid_!?? <grin!> Woody Maiden, WA4GMV, ran a radio/TV shop near my home and didn't object to someone hanging around and watching over his shoulder in the afternoons, but he was a bit concerned about his liability insurance. (Don't know why. I didn't get zapped by a "discharged" CRT until my college years. <grin!>)

I learned about them from my father, a power company EE who wasn't above swapping the odd tube or building a color TV from a kit with my little sister's help.

> 73's
> Richard Clark, KB7QHC

* * *

If you're getting bored, please feel free to skip the following; on the other hand, someone with access to a GC-1 manual might enjoy my story...

A few months back I pulled my old Mohican out from under a pile of magazines and blew the dust off it. It had been buried so long that I had forgotten why I never built an outdoor antenna for it or showed it to my nephews an nieces; I remembered the moment I powered it on: there was a loud buzz coming from the speaker.

This wasn't _hum_ mind you, which even when loud has a sort of even-ness to it; this was an intense, jagged, and metallic "I'm shredding your speaker cone and I don't care!" kind of low-frequency buzz. Worse, it went _away_ when I turned the volume _up_, and reappeared when I turned it (the volume control) down.

I was able to isolate it to the audio section by unsoldering the capacitor connecting the volume control wiper to the base of the first audio stage. It went away (blessed relief!), and when I hooked up a RadioShack "utility" amplifier to the volume control wiper the sound was clear and crisp. I considered this A Clue. <grin!>

NTE listed their NTE102A as a replacement for the Mohican's 2N407s... at nearly $7 each (apparently Germanium is on the Endangered Elements List). I replaced all three AF transistors, and the audio level was much better than it has been. Unfortunately, the BUZZZZZ was still present, and also louder. I did notice that turning the ANL ON (diode and resistor connected between the base of X7 and ground) eliminated it.

I tried all sorts of things. I jumpered the volume control wiper to ground to make sure the resistance arc hadn't cracked, leaving the wiper floating near its low end. I tried swapping the transistors around. I tried paralleling the electrolytics I could reach, but no luck.

As you've seen (or know personally) the Mohican's IF and AF stages are all on one printed circuit board which is bolted down to the chaissis with ?2-40 machine screws around its border. I couldn't see much of the underside of the AF section of this board because my vision -- and fingers -- were blocked by a large AF transformer, so I unbolted it and let it hang free (but not shorting anything; thank &deity for stiff transformer leads).

With that pushed out of the way I could see all three AF transistor sockets and even reach them with my test leads. I jumpered a 100uF electrolytic from the chassis to the emitter pin of X7, the AF stage 1 transistor, parallelling it with the existing 150uF emitter bypass capacitor (C55(?)), and a miracle occurred: the buzz disappeared! I can't tell you how good it felt to hear normal-sounding hiss, static, and the odd "sqrgrl" coming out of the Mohican's speaker.

No 150uF in the parts bin, so I wired two caps in parallel for a 147uF, shrink-wrapped them, unsoldered the decades-old 150uF and wired the glob-cap in its place. Didn't even burn my fingers in the confined space<grin!>. And then I turned it on.

BZZZZZZZZZZZZZZ!!

I'm sure you recall the feeling: "What did I do wrong?" Bad solder joint? No... Overheated the component? Not as far as I could tell. Dropped a solder glob across two traces frying by $7 transistors? No... in fact, although the buzz existed over a larger percentage of the volume control's span, the louder end of the audio worked just as it had before. My "proven cure" had made the problem slightly worse.

It was late, I was tired, so I decided that, since my previous jumpering had created 250uF total, I needed to hit the problem with a bigger hammer: I jumpered in a _470uF_ this time. And the buzz

went away. Again.

Okay. Now I was _sure_ I had fixed the problem, so I unsoldered my obviously-too-clever glob-cap and soldered in the 470uF, this time triple-checking the polarity markings. I inspected the traces for possible solder bridges. I inspected the new solder joints under a large magnifier and wiggled the new leads; the joints looked good, so I hooked up the power supply again and turned it on.

BZZZZZZZZZZZZZZ!!

By now I was tired _and_ cranky, so I jumpered in the original decades-old 150uF cap. No buzz.

At that point I had two options: go down in the basement and bring up a sledge hammer, or quit to go eat supper. It was a close call, but supper won out. There's something very weird about watching the news, eating supper, and looking over a schematic and trying to work what I was doing differently when it worked.

If the emitter of X7 is wired to R37 and C55, and if the other ends of R37/C55 are wired to ground, how on Earth could a new capacitor jumpered from X7's emitter to the chassis cause different behavior from the _same_ capacitor soldered to a trace going to the same emitter and the PC board's ground trace?

All I could think was "this makes no sense, but it does appear to be happening". R37/C55 were clearly grounded. The trace was unbroken. If they weren't grounded, I'd be getting _no_ audio. So how could _soldering_ to ground be any different from _jumpering_ to ground? Even stranger, how could a jumpered connection be _better_ than a soldered connection?

* * *

You've probably figured it out by now. The answer is that when I was jumpering, it was to the metal chassis; when I was soldering, it was to the PC board ground trace. The "ground" trace on this PC board includes a wide band around its outer edge; the strip makes contact with the chassis when the board is bolted down, creating a really solid round-the-board ground. Somehow, over the past half-century, the contact between the chassis and trace had become slightly less than perfectly conductive, and was "floating" in the Never-Never Land between zero and infinite resistance.

Loosen all ten machine screws slightly, spray some contact cleaner in the extremely narrow gap, tighten the screws, and guess what? NO BUZZ!

Re-mount the transformer(*). Reconnect C54 to the volume control wiper. Check for accidental shorts, dropped bits of solder and component leads, and make sure the transistors haven't fallen out of their sockets while I had the chassis upside down, Turn it on.

STILL NO BUZZ!

By then it was 2230, so I went to bed. Next step will be to improve the PC board/chassis contact by running a thin bit of fine steel wool around a bit to get rid of any residual crud; with luck, it'll be another couple of decades before this problem reappears.

As for the 470uF capacitor, I think I'll leave it in place. The original is likely good, but 470uF should work as well, and all I need now is to have that portion of the trace lift off from the PC board due to overheating.

* * *

What's interesting here is the contrast between the schematic and reality. On paper, or on my CRT, those components were clearly connected to ground, and, had I hand-drawn my jumper wires, their wiring lines would have looked identical. It took me a long time to find the cause of the buzz because I was stuck thinking about the lines on the schematic, even though my hands were working on physical components, wires, and traces; how do you know when to stop trusting your compass and check it against the sun and stars?

Definitely a "Learning Experience". <grin!>

Anyway, thanks again for your comments. My head is about to explode from all the new ideas, but please don't take that amiss. If I don't expand it occasionally, it starts collapsing into a dull, super-dense mass (think neutron star <grin!>).

(*) GlueStic(tm) is great for assembling hardware in confined quarters. It's much better than spit for making lockwashers and nuts stick to your fingertips so they don't drop off into the chassis interior.

Hi Chris

I can send you an EZNEC file that includes DCA axial ratio for all angles within the hemisphere. Or, tell me the angle and I'll tell you the AR. I developed the DCA for reception from NOAA Polar orbiting satellites on the 137 MHz band. The axial ratio is not a requirement. The sensitivity of the antenna to signals from satellites at low elevation angles is a primary problem. Zero dB axial ratio RHCP antenna is certainly a benefit for increased sensitivity to weak signals from the satellites.

Gyrators have been around for a very long time, and can be found in a billion telephones, one probably within reach of you at the moment. They use telephones in Kansas don't they, Toto? You can build one with four components (none of them an inductor) to make an inductor more precisely than you could winding one.

If you truly want to be overwhelmed with the dark arts, try googling for "magnetic amplifiers." (Art would go ballistic knowing such a topic was in practice looooong before he left second form.) No tubes, no transistors, and the orginal "solid state" design. As this may sound as if it wanders from the subject of RF, add the name Ernst F. W. Alexanderson to any search.

I am merely pointing out the obvious application of a tapped inductor of the tuned front end serving as impedance match to an high-Z antenna (the topic of your choice). The schematic abounds in examples. One need only substitute values to serve the right frequency band - a simple exercise in reverse engineering employed since Hertz drew a spark across a gap at the base of a loop.

>If you're getting bored, please feel free to skip the following; on
>the other hand, someone with access to a GC-1 manual might enjoy my
>story...

Yes, your story was/is classic with a beginning, middle, and end. Very few chroniclers here manage to write with as much clarity. (We get mostly cheesy attempts with "cliff hangers" serving as examples of neo-scholarly writing.) Your learning lesson of maintaining the chassis ground with the trace is classic too. The discovery of corrosion brings up the common practice of taking ALL the tubes out and putting them back in to solve problems. Tightening ALL screws is another hard learned lesson that bench techs either get or don't get.

You probably could have got away with cheaper transistors by also substituting the bias diodes (56-7s) - but as events bore out, the transistors were good. If you note the difference between the base and emitter voltages, there is only about a tenth volt there. If I am to presume the diode call-out is for an 1N56, it is germanium too.

What is more amazing is this wasn't about the decrepitude of the electrolytic capacitors which usually suffer with time if they are not used for a long while.

Well, I think of myself as a "casual user", and _I'd_ like to be
happy. <grin!>

I don't mind throwing in a high-impedance (JFET) front end to my
antenna simply on the basis that (a) people who seem to know what
they're talking about recommend it and (b) I associate "high
impedance" with "sensitive" (which seems like a desirable quality
when you're working with microvolts). Someday, though, I'd like to
have build up a framework in which _I_ can see why it's appropriate,
or at least "does no harm". <grin!>

My brother Bruce is working on the same problem from a slightly
different angle; his experience is in software and digital stuff,
and I find myself unintentionally assuming the role of "RF expert"
without an EE degree or years of circuit design to back it up. Left
to myself, I'm perfectly capable of pushing stuff around on the

breadboard until it seems to work, but when I'm offering advice to
someone else I'd prefer a better response to his questions than
"someone else said so". <grin!>

> Ive had some experience limited working with VLF and it always

Thanks for the suggestion. Do you think that my current "ground", a
30x60' 4-way pipe-loop network (mixed copper and cast iron) with
thermal radiation elements might be... um, "less than
satisfactory"? <grin!>

I ran across one article he wrote, in PDF format, but couldn't
locate the articles. Have you seen them posted anywhere?

Also, Dr. Barry Ornitz was kind enough to send me a PDF file
describing two books available from the ARRL online store at
http://www.arrl.org/:

Mike Dennison and Jim Moritz: LF Today
Peter Dodd: The Low Frequency Expermenter's Handbook

He also took the time to offer a description of why a JFET input
matches a high impedance. The words seem to fit together, but I'm
still working on downconverting it to a frequency low enough for my
brain to accept. <grin!>

The first time I tried to dabble with VLF the rx front end I found
from an university paper was nothing more than a triode(probably 1/2 a
12AX7) amp using a couple of TV horizontal osc coils as the tank

circuit. After breadboarding the rx up on an old TV chassis I kept it around for a few years soon loosing interest in the CW and man made data transmisssions. There seem to be quite a few naturally occuring sources of RF in that band that sound interesting, some almost musical.

For a fixed length of loaded monopole, a high-Q
center-loading coil (or top-loading coil) will
result in greater efficiency. Helical elements
have been measured in numerous 75m shootouts to
be relatively low-Q and therefore lossier than,
e.g. Texas Bugcatcher Coils.

I've got this antenna:

<http://www.hdtvprimer.com/ANTENNAS/cm4228.html>

From my location the 2 largest DTV transmitter clusters are approximately 60 degrees apart.

How effective would it be to modify this antenna such that each of the 2 bays pointed to each transmitter cluster?

Yes, I know it's probably best to buy 2 antennae and couple them, but funds are really scarce and I've got time on my hands.

1. Would it work?
2. What are the practical down-sides (engineering blasphemies aside)?

I know this is not an elegant solution, so if your only comment is to say this, please resist.

Thanks.

I'd think you'd really sacrifice the VHF hi-band coverage if you do so. Do you, or will you, have and digital stations that will remain in the VHF band?

That's interesting. I imagine it would be difficult to support a helix with a length of many metres whilst keeping the losses low, and of course there may be a greater total length of conductor in the continuously-loaded case. Otherwise, I can't think of a fundamental reason why a long normal-mode helix should have lower Q than a monopole of the same length with a series inductor somewhere in it.

The Tesla coil brigade appear to have sorted out suitable tube materials in lengths up to a couple of metres or so with low loss at frequencies up to the medium wave band or thereabouts.

Can't find an old Tenna-Rotor for cheap? Me neither.

Hate to suggest hacking up your antenna but sure, I think you could
'bend' it down the middle 60 degrees and accomplish that.

In the analog days that might have resulted in terrible ghosting but the
latest 8VSB technology can operate even with a multipath signal at 1-2db
down.

(That also means that if you have a 2004 vintage DTV or DTV converter it
might not work if multipath comes into play)

Second idea. If you are in a fairly strong reception area why not
simply build a pair of homebrew antennas before hacking up your good
one? There's some plans on the web, one notorious one is on YouTube
with DIY instructions.

I think hacking an antenna so that half is pointing in one direction
and half 60 degrees awy would be worse than just pointing the antenna
half way between the two TV clusters.

Well, if funds are tight, and you have time, build two of
these antennas designed by Kent Britain. They'll work
better than the antenna you cited (for UHF), and also
have the benefit of being 75-ohm impedance.

hacksaw the top and bottom angle bars to just break the lip that
extends out from the mast (rather than lays against the mast).

Bend the angle bars and screen 60 degrees along the length of the mast
so that each side points towards the separate transmitter clusters.
(Giving the appearance of a ship prow pointing halfway between the two
clusters.)

Effectivity? You lose up to 3dB gain; your nulls fill in somewhat;
you don't spend any money.

That's what the man said... I saw the schematics for Gyrators I-III,
and I need to go back and re-read the decriptive text.

> more precisely than you could winding one.

That doesn't take much. I've had days recently where I felt like I
could wind a mile of wire around a ferrite rod and _still_ not make
an inductor. <grin!>

Oh. Okay. "Parallel LC (tank) circuit = high impedance. Coil tapped
to match lower impedance". Gotcha. I got lost trying to figure out
your reference to "conventional bands".

> ... The schematic abounds in examples.

Yup. You don't see many AM/FM radios these days with three tank
circuits per band. <grin!>

> ... One
> need only substitute values to serve the right frequency band - a

Which was, in its own time, pretty close to "magic".

I've been trying to stir some excitement in the one niece and nephew
who are talking of studying engineering next year, but it's tough.
They seem to be so constantly surrounded by wonders that they take
them for granted.

--snip--
> ... Your learning lesson of maintaining the

It's still surprising to me just how often taking something apart
and putting it together again will get it working again. Doesn't
even require mystical passes with my hands (but I occasionally add
them anyway <grin!>).

> ... Tightening ALL screws is
> another hard learned lesson that bench techs either get or don't get.

Finished with the Mohican this afternoon. I wound up taking out the
eleven machine screws around the IF/audio PC board out (they were
all still tight, FYI). I then ran some fine steel wool around in
the gap and reassembled it; turned out that I had to unbolt the
audio transformer and 1/4" earphone jack to get the lockwashers and
nuts back on four of them. When I finished there was no leftover
hardware, a small miracle in itself.

It still doesn't buzz. (Yayyyyy!)

> You probably could have got away with cheaper transistors by also

> to presume the diode call-out is for an 1N56, it is germanium too.

Oh. A 56-7 is a 1N56? I wasn't sure about substituting them, and
finding any Germanium parts on this side of the Pond is tough.

I was about ready to bypass the entire audio section and wire in a
small LM386-or-similar amplifier in its place. Might still do it
next time.

> What is more amazing is this wasn't about the decrepitude of the
> electrolytic capacitors which usually suffer with time if they are not
> used for a long while.

When I first heard the buzz, my first instinct was to check the
electrolytics. I even tried parallelling the X7 emitter bypass, but
because _that_ time I did it by hooking my jumpers to the component
leads on top of the PC board, the effort had no effect. Ack! Phlbbbbt!
So _close_...

I have to say that those Gyrator circuits are really appealing. I
may throw one togehter just to see what happens. Thanks for
pointing me at them. (Now if someone would just design a "network
component" that replaced _intelligence_ with four components, none
of them involving intelligence... <grin!>)

Thanks again for your feedback.

"Death of Digital Radio Mondiale in 2008 as well?"

"From both formal and informal discussions among participants at the
HFCC, it is now clear that the proposed DRM (Digital Radio Mondiale)
system, that would have converted analogue Shortwave to digital, FM
like quality reception would hardly be implemented if ever on a large
scale, beyond the current experimental stage."

http://tinyurl.com/b6z5lr

"Why don't you use DRM on Shortwave?"

"DRM is the acronym of Digital Radio Mondiale, a new technology
intended to offer digital, almost FM, quality to Shortwave, Long Wave
and Medium Wave (AM) broadcasts. Unfortunately DRM is incompatible
with ordinary Shortwave radios and requires buying new receivers, that
are not currently available in mass production, or at a cost that is
anywhere close to a conventional, analogue Shortwave receiver... Some
large companies are pushing DRM by convincing program producers and
broadcasters to start airing in DRM ahead of time, but unless there is
mass availability and penetration of receivers on the listeners side,
this will remain - unfortunately - a technological experiment, and
broadcasters using it to reach their listeners now, are clearly
throwing their money out of the window."

Yep... The only way to get a helical wound stick to really
work well is to have a decent length stinger on it.
You don't want to have to rely on coil turns alone
to tune the antenna. Capacitive loading adds less
loss too.
It's also better to wind the turns from the top down,
and have the lower part of the stick basically a wire
mast.
This will improve current distribution vs a constant
winding. But again, without some capacitance from
a decent stinger, it will be a dud.
It's much better to use a 20m stick with extra whip
for 40m, than it is to use a 40m stick with many
more turns and less stinger.
I used a 20m stick with about 5 feet of stinger on
40m, and it worked very well compared to a
single lumped coil.
But it wound the turns in the manner I prefer, with
them concentrated at the top.
So in effect, it was a single lumped coil of sorts,
just a long thin version.. :/

If I DIY, I'll need only one; I'll keep the 4228 and couple it with the DIY.

How do I couple two antennae onto one cable?

Thanks.

If you can stand a loss of 3dB, I reckon that should work OK.

As you increase the angle between the two parts of the antenna, the
presently 'pointed' polar diagram will broaden and flatten, then it will
start going heart-shaped (with an increasingly deep null in the centre).
The only downside is that, when you are looking at one transmitter, you
will be picking any reflections coming from the direction of the other.
But, being digital, you will probably get away with it.

Just one point: I'm wondering if, for the highest gain towards each
transmitter, the bend should be 60 degrees - or maybe something a bit
more would be better?

TV splitter. Any place such as Best Buy, Wal Mart, Radio Shack should
have them. Normally used to split one antenna to two TVs. Just reverse
it and put it up by the antennas. This will "combine" the two antennas
and send the signals down one coax to the TV.

One thing stands out loud and clear from the 75m
mobile shootout results. The longer the straight
high current bottom section under the loading coil,
the greater the radiated signal. The best 75m
mobile antennas that I have ever seen were not
center-loaded. They were top loaded.

One was my entry which was a CB whip with a
horizontal top loading coil and capacity hat at
the top which equaled the top-rated bugcatchers
and screwdrivers and bested all the others.

The other was a 10 foot long, 2 inch diameter
copper pipe with a loading coil and top hat
on top out in El Paso. I forget who entered it.

If it had been for analogue, I would have said no, no, no, no, no, no -
never EVER use a wideband splitter to combiner two antenna feeds. When
you are looking at one transmitter, you will be picking any reflections
coming from the direction of the other. However, as this is digital, you
may get away with it (just like bending the antenna to obtain two
lobes).

However, you are far, far better off with a separate feeder and a 2-way
A/B switch. They are only a few dollars each.

How well do they travel, Cecil? It's an experience with a capacitance hat at the top, I have to imagine a loading coil up there would be trying to turn the whole thing into a horizontal antenna.

That kind of answers my question for one way to support the coil on top. A big honkin' support. Did these folks travel with their antennas up? At least here in the PA mountains, the trees and a lot of the bridges don't put up with much antenna on top of the car.

My VHF/UHF antenna scores a few trees, and I ended up putting a string and loop on my Bugcatcher to pull the stinger down, and it still hits the occasional object.

Like they said you cant have both, but if you can do 25 feet around
the antenna, then try a HF9V. At 29ft it is under your 30ft height.

Lay out about 16-32 radials of 25 feet under it in a circle and you
have a nice multi band performer. You still have to pick 75 or 80 on
it but with
a good tuner you can do most of 75/80 curve. I love mine and its in
a limited area behind my house.

Better in the sense of being there to throw the switch, maybe. But I've got a programmable-event DTV converter box which allows me to record shows automatically. The antenna set-up needs to be automated.

Thanks.

Some DTV converter boxes support the CEA-909 or CEA-909A "smart antenna" interface, which allow a command to be sent to the antenna to change the antenna's behavior (directionality, frequency setting, etc.). A good DTV converter will identify the best antenna setting for each channel (I imagine this takes place during the initial scan-for-channels process) and will switch the antenna system each time it tunes to a new channel. In CEA-909A, the signalling can be done over the same coax cable which carries the antenna signal; the older CEA-909 requires a separate control cable.

Not all converter boxes support this feature, and of course you need to have an antenna which has Smart Antenna support.

Unfortunately, the Smart Antenna specs are not freely available... a hardcopy or download version costs somewhere in the neighborhood of $70. I don't know if anyone has reverse-engineered the data format.

!!!

Well, if you put a smallish bend in the antenna of (say) 10 degrees, you will still have one lobe, although it wider and the gain will be lower. Only when you increase the bend to (maybe) 20 degrees will you start to get two separate lobes.

I'm somewhat guessing, but I reckon that the angle between the two lobes will continue to be less than the angle of bend until the bend is considerable - and possibly more than the 60 degrees between the transmitters. Eventually, the angle between the lobes will 'catch up' with the angle of the bend - but maybe only when the bend is a full 180 degrees.

So, for the two lobes really to be 60 degrees apart, maybe the bend will have to be (say) 65 degrees? What do you reckon?

Hi Ian,

That sounds more reasonable, but I would suspect that when the hammer
is swung, that 5 degree slop will par for the course. It will take
more sophistication to peak both clusters independantly to prove your
point, but it could well be.

I thought I wasn't talking total rubbish (like I usually do).

Unfortunately, I've just spotted a problem with bending the antenna. If
you cut partially through the two angle bars to weaken them, and then
bend them and the reflector backwards by 60 degrees, the 'feeder' which
joins the two halves of the antenna will have to be stretched - and you
won't be able to do that. You would have to replace it.

Nah... It would be silly to ruin a handsome antenna. Far better to put
up a separate antenna and feeder, and use some sort of A/B switch at the
TV end.

Hey OM
I guess nobody here is a youtuber? I seen on youtube a guy has a 4 bay
bow tie, shows how to make one for chump change. Like 5 steel wire
coat hangers and a 2 ft 1X2 and some screws, and a balun transformer.
I saw it on youtube he makes a 4 bay bow tie antenna in under 5
minutes. It doesn't have a screen reflector, it's more like
bidirectional, well almost.

You can't; one is 75 ohms and it looks like the one you have
is 300 ohms. You'd need a balun on the 300-ohm bowtie antenna to
make it 75 ohms, and then use a TV combiner/splitter to
combine the two antenna feedlines down to one single
feedline.

I don't see that one, but this one has several possible configurations, one
of which includes multiple bays aimed in different directions:

Umm .....
I've skipped through the video, so maybe I've missed one or two key
facts. However:
1. Are there three identical antenna, each pointing 120 degrees apart,
each with its own feeder, or
Are all three combined to make an approximately omnidirectional antenna?
2. The reflector seems to be far too close to the active elements. I
would have expected it to be a quarter wavelength away.

Sorry, that was a little American-centric comment (must remember: Imperial Measurement System is not universal...)

The most basic standard lumber used in construction in N. America is the 2x4 stud (2 inches x 4 inches cross-section, available in 8, 10, 12, 16, and (I think) 20 foot lengths).

This is what the guy building the antenna is using as the structural wood members.

I have completed the remainder of the Smith Chart tutorial. I have
added a program that shows how to use a transmission line stub as part
of the matching circuitry in place of a capacitor or inductor.

Link is here:

http://www.fourier-series.com/rf-concepts/smithchart.html

Actually, dimensional lumber has shrunk over the years just like candy bars and dollars. Only in very old houses will you find 2 X 4s that are 2" X 4". I'm getting pretty geezerly, and it was before my day -- they were down to 1-5/8" X 3-5/8" at the earliest I can remember. Now a "two-by-four" has shrunk to 1-1/2" X 3-1/2". When they get down to 2 X 4 cm, we can finally go metric without having to do any conversions. Maybe when they get down to 1/4 X 1/2 inch they'll get revalued like a peso?

One of the most common places gyrators are used today is in graphic
equalizers. I wonder if a graphic equalizer could be built to cover
the VLF band complete with LED bargraph(grim). The first graphic eq I
ever saw had tons of coils in it and vaccums tubes and must have cost
a few $K. The second one I saw was made with ICs no coils and cost
about $500. It was replacing the first one I saw.

That's why I carry an extra lower mast section.
Really helps the efficiency.
And the good part is adding more lower mast
below the coil does not change the resonant
frequency near as much as adding more stinger
above the coil. So in my case, I have my 10 ft
plastic bugcatcher, which is center loaded when
driving. But when I'm parked, I can add the extra
3 ft mast and get a pretty good boost.
And the resonant frequency hasn't changed too
much, and I can basically use the same coil taps,
and stinger lengths.
Or at least for the lower bands.
If you added three feet above the coil, the
resonant frequency would be way off from where
you started. Maybe not in the same band any more..

I wish I had one even taller.. I'd like to find a 5-6
foot lower mast. I think the Hustler bunch sells
one that tall.
Course.. Knowing me, I'd end up using both of them
coupled together if the antenna mount would stand

up to it. :/
Just the setup I have now with 8 ft under the coil
works pretty well. Some peoples whole antenna
is about that long.. :/
I use a 5 ft stinger whip on 80/40..
Various shorter ones for the higher bands when
the coil is bypassed.

I was looking through some of my old antenna books and came across an article from K6TS about building a 20 Meter Collinear antenna. Has anyone ever built one, or have any input on if it would be worthwhile to pursue. Weather is getting warm here, so I was looking for another antenna project. 20 meters, vertical and ground mounted. So I was thinking about 1/2 Wave, 5/8 wave or the collinear.

Ken

>
> Roy Lewallen, W7EL
Finshed lumber 2x4's have never been 2 inches by 4 inches. That's the
"rough lumber" size. However, as you point out, it changed from 5/8 to
1/2, which lets you get just a few more 2x4s out of that tree.
And hardwood is done even more differently.

Google is my friend, and the first hit was this: (which tells me that I
was wrong about the drive to get more boards out of a tree..)

http://www.fpl.fs.fed.us/documnts/misc/miscpub_6409.pdf says that back
in 1964:
"Declining markets for lumber have been a source of grave concern for
the lumber industry and the Forest Service. The industry has studied
its marketing problems and concluded that thinner sizes of boards and
dimension are desirable."

This fascinating document also talks about how it came to be.. (things
like saw kerf changes make a difference, too). Basically, they went out
in the 'teens and measured what people were actually producing and
selling as 2x4s.. which were typically 2" boards that had been surfaced
while green, and then shrank a bit after drying. Truly fascinating..
rail transport and the Panama canal also had their effects. One Mr.
Hoover (Sec'y of Commerce), a noted engineer(!) had an interest in
standardizing stuff (e.g. NBS, part of Commerce Dept) and started this
activity in 1921.

Upshot is that the change occurred in around 1960 (the doc refers to the
"battle of the 32nd inch" in the trade literature of the late 50s), with
everyone signing up to the "new" dimensions by 1963.

The drive to make it a bit smaller was for transportation costs,
apparently, not to get more boards out of a tree.

Hello Ken,

I would not use the 5/8 wave antenna, unless you can make a dipole of
1.25lambda. The 5/8 wave vertical only gives the published gain over a
large good conducting ground plane. 3 or 4 quarter wave radials may
provide a reasonable floating ground for feeding the antenna, but it
is not a large ground plane.

Using a half wave has the disadvantage of the more complicated feeding
network. You may expect impedances up to kOhm range (depending in
thickness of the radiating element), so you need some high voltage
evaluation of your structure in case of >100W input power.

The advantage is the low requirement for the (floating) ground at the
feed point. Just 1 or 2 quarter wave radials are sufficient. These
radial wires may also slope down, as they carry low current, hence do
not have large influence on radiation pattern. When you have some
metal structure around you, you can use that as ground, eliminating
the need for radials. When you look to half wave CB antennas, most
ones do not have radials at all.

When you want to use horizontal polarization, a full wave center fed
dipole or 1.25lambda center fed antenna can be nice. Of course you
have to make something to rotate it….

When you want to design a vertical HW antenna from the ground up, I
have a document on my website dedicated to HW end-fed antenna design.
It also addresses high voltage issues. http://www.tetech.nl/divers/HWmonopoleNL1.pdf.
It is in Dutch language, but all comment in illustrations and formulas
is in English, so it can be helpful.

Very nice historical document. However, it's 45 years old and much
has happened since then.

In the mid 1970's there was a movement to convert everything to metric
sizes which included using the actual lumber dimensions instead of the
approximations.
<http://www.awc.org/HelpOutreach/faq/FAQfiles/Metric_Lumber_Conv.html>
Instead of a 2x4, it's really a 38x89mm. Next time you're at the
lumber yard, ask for a 38x89 and enjoy the blank stares.

Things get messy with larger sizes, such as 4x8ft panels. Apparently,
the lumber industry is unable to handle more then 2 significant
figures. So, a 1220x2440mm panel becomes a 1200x2400mm panel. What's
a few mm between friends?

Also, lumber is shipped and wholesaled by the board foot, which is
independent of how it's cut.

Wim;
Thanks for your input, I just noticed that I had my finger on the
shift key when I posted the subject, so it came out as @0 meter.. :-)
I don't ever plan on running high power, 100 watts is about my
limit. I do want to stick to putting a vertical up. I have an old 1/4
wave 40 meter vertical that I was going to scrounge parts from.

Ken

When I was a kid you could buy 2x4s that were just planed on two
sides. These were made by a local sawmill sold by the local building
supply and were cheaper than lumber with all four sides finished. You
could also buy full size unfinished lumber. These 2x4s werent 2x4
either and could be larger or smaller.

What are the critical dimensions? If one wanted to use better materials (plastic rather than wood for the base; aluminum tube rather than wire), how does one calculate the dimensions?

I mean, "about 2 inches down" and "about 5-3/4 inches between elements", and "tips about 3 inches apart" are the results of some calculations. What are the calculations that determine these dimensions for this style of antenna?

Thanks,

All dimensions will be approximately +/- 0.001".

Seriously, when the antenna simply gets dumped behind the TV set, do you
really think that any of the dimensions will be very critical?

I'm sure that went the way of all industrial metric conversions..
(perhaps someone on the newsgroup who buys lumber in Europe can provide
standard sizes used there..

There's a whole discussion of that aspect in the document, towards the
end. Lots of commentary on moisture content, shrinkage, etc.

This and other points are deceptive. First, the performance you site
is indeed due to the plane of ground (not to be confused with our
usage of the term ground plane) to the extent of the conductivity of
ground out about 5 to 10 wavelengths away from the antenna. No
practical ground system is going to impact that.

The ground system placed below the antenna WILL impact gain, only
insofar as it shields the ground's loss contribution. Hence the large
number of radials.

>Using a half wave has the disadvantage of the more complicated feeding
>network. You may expect impedances up to kOhm range (depending in

The advantage of the half wave is exactly for its high impedance in
relation to the loss of ground. The far ground still dominates low
angle launch characteristics, but if (like the large number of radials
offers) you lose less to ground, you have more in the air in all
directions.

>The advantage is the low requirement for the (floating) ground at the
>feed point. Just 1 or 2 quarter wave radials are sufficient. These

If there is just 1, or if the 2 are not symmetrical, then the DO
contribute to the radiation pattern lobe shape. As to the degree or
notice, that is variable to the user/listener.

>When you have some
>metal structure around you, you can use that as ground, eliminating

They probably rely on the coax shield as a return path, which makes it
notoriously unreliable in its state of tune.

If one were to build something to better specs, with better materials, in a
much better location (not dumped behind anything)?

I presume there's antenna design formulae that result in the proper
dimensions for this type of antenna. Where can I find this information
(preferably on-line)?

With my Google criteria, I don't find much that's useful.

Thanks.

The following may be useful:

http://www.digitalhome.ca/ota/superantenna/index.htm

Single- and double-bay Gray-Hoverman UHF antennas, which can be built
using either of several styles of reflector - a full screen, a split
screen, or a set of collinear rods.

When I lived in the Air Force barracks a guy bought a very similar
antenna at Radio Shack. This was after cable had been removed because
so many people were stealing it.
Anyway it didnt take long before everyone started building their own
antenna copied from the RS one. The stock of brazing rods at the
motorpool was depleated very quickly.

Funny thing, I was accused of stealing cable though I wasnt hooked up
to it. I was able to demonstrate to the First Sargent that I could
receive Cable TV just off of the leakage from the system and argued
that the Cable company had the responsibility to prevent radiation
from their equipment. He agreed. What I learned was really happening
was that the guy in the room next to me had his rabbit ears connected
to the cable input of his TV and was broadcastinig it. About 10 rooms
could clearly pickup the signal from this. Unfortunately several
people had simply made illegal connections to the cable system. I
understand that the same thing is happening now with internaet service
in the barracks. My nephew tells me that it has been forbidden to have
a wireless router in the barracks for ths isame reason.

I see the 300 ohm feedpoint for the single bay but the double bay is a
little different. I can see something's attached to the two bars that run
vertically and join the antennas (in the photo that shows the double bay
with PVC frame), but I can't tell if there's a balun there. Do we know what
the impedance is at that point?

I may need to try reaching the people who did the web page. Thanks.

Given that the presumed bandwidth of the antenna ranges from 470 to 700
Mhz (not counting any VHF bonus) I figure there's no specific impedance
other than 'ballpark'.

If you already have a 32 ft radiator, I would go with the half wave.
Feeding one is simple. I prefer the "gamma loop" type of feed.
I've built many of those, and they are simple to get going, and work
well.
The antenna as it is does not require radials to function as a
"complete" antenna. Most will work fine as is, with no radials.
But if one wants to further improve one, they can be further decoupled
from the feedline using decoupling sections.
The way I usually decouple a base fed half wave is to use a 1/4 wave
length of coax dropping down the supporting mast to a union which
I clamp a set of quarter wave radials. The shield of the coax is
bonded
to the radial set.
That will do a pretty good job of decoupling the feed line, if common
mode current ends up a problem.
But like I say, I've never had any problems using one with no radials.
I consider the decoupling as optional.
A 5/8 wave GP would be nice, but that will take a pretty tall radiator
on 20m, and may be unpractical.
Also, I don't use 1/4 wave radials under 5/8 verticals.
This page explains my position on that issue..
http://home.comcast.net/~nm5k/acompari.htm
If you want to avoid the funky high angle lobe you often
see on poorly designed 5/8 wl antennas, use 5/8, or 3/4
wave radials.
I've done very extensive testing of all the usual types of verticals
on 10m, and the 5/8 GP is the best performer of the bunch,
even with it's supposed warts.
Even the 1/2 waves I used with decoupling sections were never
as good as the 5/8 GP when working far off space wave stations.
But like I say, a 5/8 GP on 20m could end up being a real pain
to deal with. You are talking a 41 ft radiator, and that needs a
supporting mast under it. Radials under it too.
BTW, a 1/4 wl GP is not a bad antenna if you want to take the
easy way out. Needs radials though.
I haven't looked at the collinear design, but sounds like more

trouble than it's worth. Would be tall too.
Most higher gain collinear antennas used on 20m would
probably be horizontal wire affairs.

I don't think there's anything wrong with the materials. It's basically
a sound design. It's just that (unless I'm very much mistaken) the
elements need be around a quarterwave in front of the reflector (more
like 6 inches instead of the less than 2 inches shown), and you need to
mount the antenna 'in the clear', and point it towards the transmitter.
Obviously, with these materials, the antenna is best suited to mounting
in a loft, provided that the roof tiles and lining are adequately
transparent to UHF RF.

1323. balun for portable VHF dipole 2M to 6M

Newsgroup: rec.radio.amateur.antenna

From: Richard Ferryman <richardferryman@btinternet.com>
Message-ID: <DYydncl8a7wnhjjUnZ2dnUVZ8j-WnZ2d@bt.com>
Source record: 17347

I have constructed a simple telescopic dipole for 2M to 6M to use with my FT-817ND. This works fairly well but it is prone to RF on the feeder and some noise pickup. This is almost certainly the result of feeding a balanced antenna with unbalanced coax. As I need a wideband balun I can't use traditional VHF tuned baluns. Question is which type of balun can I scale up (down?) to VHF from HF and maintain efficiency? Toroidal balun? Ferrite choke? Coiled coax? If ferrites or iron dust cores are involved then what mix?
Any ideas?

Here in Britain it is illegal to 'tap' an individual's or
organisation's/company's Wifi for Internet Access without permission,
however with consent of the Wifi router owner it is permitted.
I know that for example in the Netherlands (usually large)houses are
often occupied by up to 20 students . With 1 Hi-speed /unlimited
download (A)DSL connection , they all share that 1 connection.
They don't need an e-mail address from the ISP but have one or more from
Google or Yahoo .

If I had a neighbour close by I would be happy to share my connection.

That advantage of high impedance is also the disadvantage, 1500 Ohm
end-fed impedance, or higher, is not uncommon. With 400W input power,
this leads to 1100Vp voltage (at 1500 Ohms). Without careful
construction, E-field at sharp edges will exceed 3000V/mm easily. This
will not result in full air breakdown (due to strong nun-uniformity of
E-field, but will result in undesired corona discharge.

> notice, that is variable to the user/listener.

End fed impedance for 3cm thick radiator is about 1500 Ohms, hence radiator current (middle) is about 5 times higher then feed current to the quarter wave radial. Therefore current*length product for radiator is 10 times as high as for the radial. When the radial is vertically oriented (worst case situation) influence on field from radiator is +/- 10%. So very worst case you are talking of < 1dB. When the radial runs horizontally, the effect on the vertical component under low elevation angle is negligible. As the original question relates to amateur service, mentioning: "hence do not have large influence on radiation pattern" is justified, in my opinion.

Mostly CB antennas are mounted on a metal mast, so part of the return current goes through the mast. You are right, in some cases this may lead to significant common mode current, but looking to my experience, this seldom resulted in untunable systems when lambda/dradiator is high. I did experience problems in antennas for VHF where thickness of radiator is no longer thin to wavelength. Fortunately, at such frequencies a simple ground is easy to make.

I don't think that this is necessarily true. There are many valid antenna designs in which the reflector spacing varies quite a lot from 1/4 wavelength.

In Yagi designs, for instance, the spacing between driven element and reflector has a big effect on the antenna's feedpoint impedance, and is sometimes set to yield a convenient feedpoint impedance match with the cable. It doesn't have all that much effect on forward gain.

With a "sheet reflector" antenna design, I suspect that the reflector spacing won't have much effect on either forward gain or on front-to-back ratio. It's entirely possible that (in this design) it was set as it was in order to result in a not-intolerable impedance match over the relatively broad range of frequencies that this antenna needs to be able to cover.

I would have thought they were the same. (Corona discharge is NOT air
breakdown? Is there some distinction to "full?")

However, this is not an exclusive disadvantage of a half-wave radiator
when a quarter-wave radiator can exhibit similar problems through
similar poor building practices. The same high potential "problem"
exists at the quarter-wave's distant end where the half-wave's is at
the near end, feed point. As the original poster posed this as a
single band antenna, a half wave has practical solutions if the
additional gain is deemed sufficient for the effort.

On the other hand, going from quarter-wave to 5/8ths does yield
benefit that exceeds +/- 10% or < 1dB.

Google bow tie tv antenna, similar in principal to the short backfire array.

I get them from Mouser. They are 1-2 bucks apiece.

One often makes a distinction between a corona discharge which exists as
a steady state sort of thing and the streamers which precede a "spark".
Both are air breakdown phenomena, but qualitatively different, and
both are different from a low pressure discharge like that found in a
fluorescent lamp or neon bulb, or from phenomena like St Elmo's Fire.

Field uniformity is only part of it, of course.

Bazelyan & Raizer, "Spark Discharge" from CRC Press, 1998, is probably
one of the better books on this.

Most interesting. I've always thought that St. Elmo's fire was a corona discharge, and a quick web search indicates that it's apparently a very widely held misconception. What's the difference?

No doubt, so I don't think a wooden antenna is the final solution. Best
check out how the scheme might work with scrap wood and coathangers and
if that works then you could upgrade to finer materials for a more
permanent solution that works in the rain.

On the other hand it may work well for you in spite of the loss in gain.

Nice idea in theory, bad idea in practice, since you can't monitor his PC.
If something illegal goes on from his computer, your IP address will be
logged as the source.

I note a valid objection to this thread going OT and will not post on it
again.

Hello Richard,

A "full air" breakdown is the situation where there is a full
conducting path between the two conductors through air. So the
current that goes into the conductors is mainly supported by real
electron flow through air and not dielectric displacement current.
The effect is strongly non-linear and shows hysteresis.

Imagine you have an antenna and you increase the input power
gradually. At a certain point somewhere in the construction air will
break down. When you have a full breakdown in a uniform field, you
will notice a stepwise change in SWR. To stop the breakdown, you have
to reduce the input power significantly (hysteresis effect). As most
amateurs have an in line SWR indicator, you will notice full air
breakdown and will check the installation.

In an RF "corona discharge", air only breaks down in the high field
strength area. As you will probably know, field strength is highest at
air/conductor boundary with small curvature (edges, needle tips).
Outside that area air will not break down and current in that region
is supported by displacement current. This effect may show only minor
hysteresis and you may not notice this during normal operation.

The voltage required to establish a corona discharge may be far below
the level to get a full air breakdown.

At the tips of a HW radiator, you will have highest field strength.
However when you bring a conductor close to that tip (and retune if

required), field strength will increase. This is also the case with HW end-fed radiators. At least the ground of your feeder, or the ground of the matching network will be relative close to the end of the HW resonator. For some formulas see the document referenced before.

I hope this clarifies the "full air breakdown" and "corona discharge" issue as used in my postings.

Best regards,

That's what spar varnish is for. Metal booms with the uninsulated
elements going through are probably more "shorted" than from wet wood!
When aluminum is out in the rain, it's just as wet as wood would be.
The water may detune it slightly. Wood can be a great choice for boom
material (with proper varnishing)...it would probably outlast an
aluminum one in a salt air environment....

In this case the wood is being used as the feedpoint insulator.

I have a 6-meter wire dipole fed with RG8X that was getting about 79
watts forward, 20 watts reverse. A coil of coax, four turns about 5
inches across just below the feedpoint, gave me 100 watts forward. How
this would work on 2 meters, I don't know, but it would be easy to
try.

Wood is fine, it has been used for UHF colinears for decades....
The trick is to have the elements supported (in contact with
wood) at the low voltage,
high current points. CC made a colinear back in the 60s
that used good insulators, but had them on the high voltage
points, which affected the antenna's performance.

Yep, Palomar, and the Wireman are good sources. They get the snap on cores and re-package them, and this costs a little extra. If you get them from a parts house such as Mouser or Newark, you will save a little. Shipping costs will be a little less as well. Looking at my latest Mouser catalog they have 3 pages of EMI cores.

Criminal penalties apply to computer crimes that could be committed via such a shared connection. Notable are the downloading of child pornography (a five-year federal felony in the US) and the misuse of a "zombie" computer for conducting a distributed denial-of-service attack or for sending spam.

In these and other computer crimes, the shared connection is via the subscriber's IP, no matter where the misused computer is located -- in the house, in the barn, in the street, next door, etc. The authorities want to talk to YOU!

Even if the person with whom you share your connection is a model citizen, you still face a risk of misuse out of his sight.

I hope I've made my viewpoint clear.

No it hasn't. The original thread, 'Hack a DTV antenna for dual
directions?' has been hijacked, and changed to 'Sharing Internet
Connection'.

You have been replying "take it to another thread" on a post that already
has changed the subject.
When you don't consider that another thread, pity for you.

So now it is a new thread "Sharing Internet Connection". That is
what was requested. No need to put more comments about changing thread
into there.

I thought that mine did!

When the tree is collapsed, the subject is 'Hack a DTV antenna for dual
directions?' It's only when you expand it, and look 66 postings down the
tree, that you find that some idiot has changed the subject to
'Newsreaders that thread by subject'

Are there any news readers which allow you to rearrange news posts,
which have already been received, into a separate, new thread, and then
have further incoming posts automatically routed there?

My newsreader, slrn, does just that. It is starting a new thread at
toplevel everytime you change the subject.

Your newsreader is broken -- it doesn't understand threads. Here are all
the contributors to the "Hack a DTV antenna for dual directions?"
thread:

True enough if the design work has been do to ensure that the high
impedance points arent in contact with the wood.
In the concerned case this may not be and probably isnt true for all
frequencies concerned..

I use Forte Agent. It starts a new thread whenever a post isn't a
reply to an existing thread, but has a new header.

Also, if I right-click on any received header, Agent gives options
for moving, copying, deleting, marking "read" or whatever.

Glory be to God! I failed absolutely!

No, no NO! What I said was: Do NOT trust your neighbor with your Internet connection. He is not as concerned with keeping you out of prison as you would want him to be if you are a freedom-loving soul. His misdeeds (or the misdeeds of people who have access to his computer, connected wirelessly to your 802.11 Internet connection) will be blamed on you. He does the deed -- you get the beating.

If there is no life without risk, go down to the packing plant and stick your dick in the pickle slicer. Maybe nothing will happen.

;-)

So do I, but Scotty indicated he wanted REASONABLE (his words). I
have just bought a number of them for a non ham application, and
depending on how many you need, the savings can be significant.

The absolute cheapest place to get ferrites has been the swap meets. In
Southern California, we have two that I know: Santee in San Diego and TRW
in Los Angeles. Tons of stuff -- old and new.

The problem is that the vendors often have donuts that are advertised as EMI
suppression ferrites, but they can't identify the mix. The mix determines
the frequency range, so if you try a Mix 43 donut at VHF, you may not see
the desired improvement.

I have a kit of ferrites that I bought for dirt cheap. Why so cheap?
Unlabeled, that's why. I take a shot with one donut and it does nothing, I
try another. For four bucks, I can tolerate some of this annoyance.

I just did a fix with one donut for RF getting into my computer keyboard on
PSK31. A few turns of the keyboard cord through a donut and the problem
went away. Luck and science married.

Could I set up a test jig to figure out the mixes and frequencies? Yes,
maybe. Give me some ideas for the test circuit. I have a 1GHz spec-an &
tracking generator.

Seriously, do the headers retain a record of a past thread when the subject
line is changed? I ask because I do not recall whether I did that or
whether I went to the <File> menu and initiated a <New News Message>.

When I saw the complaint about being off-topic, I really, truly, sincerely
wanted to comply with general NG etiquette (and I thought I was doing so).

I already Googled for NG etiquette and got a lot of stuff, nothing
conclusive on this subject. URLs, please. If I do wrong, I need to undo
it.

Answering my own question, for some newsreaders, a change of the subject
line DOES NOT create a new thread.

Therefore, to avoid taking the "Hacking a DTV Antenna ..." thread off-topic,
I should have posted a new message. We're all still learning.

To determine if a core is useful, you need some way to measure the impedance. And unless you're using the cores for high power or high Q applications, all you really need to know is the magnitude of the impedance. An "antenna analyzer" is a really simple and portable way to check flea market beads if you have one -- just put a short loop of wire between the terminals and run it through the bead's hole. If you're measuring at low frequency where the impedance might be low, you can use more than one turn and calculate the one-turn (one pass through the hole) impedance as the measured value divided by the square of the number of turns.

If you really need to know the mix, you'll probably need to be able to measure the R and X components of the impedance as well as the core dimensions, then refer to catalogs of various vendors to find a match.

Update....
After careful consideration of all the points raised here and also a lot of thought on the mechanical and structural aspects of things, I have decided to just go with ground mount setup with radials. I had thought of building some type of lightweight vertical radiator and mounting it atop the mast but I am trying to work with stuff I have on hand. I can't afford to invest any money into buying any sort of aluminum or other material to make such a radiator. As it is I will be stripping insulation off of wire to make ground radials as I have no bare copper. I once read somewhere not to use insulated wire for ground radials.
One problem I'm going to have though is with the mast being mounted against the house. This is a manufactiured home and I have a crawl space under the house. In order to try and get the best results I was thinking of actually running some of the radials underneath the house in the crawl space. I f I don't do this I will have radials running out in three directions and will have a whole area of the ground covered up by the footprint of the house that has no radials. Hope that makes sense.
Anyone see any problem with running radials on top of the ground under the house in the crawl space area? Other than having to watch out for them when I go under there of course.

1384. Guy wires to trees?

Tower project

I'm in beginning stages of installing a 50' guyed Glen Martin tower, 13" per side.
http://www.glenmartin.com/catalog/page6.html
Finished digging the 45" cube hole for the concrete base yesterday. Quite a chore with a small hand shovel, but kept thinking about the "Little Engine that could, "I think I can, I think I can... Started out with a larger shovel, but the small 'stricker' type was just right at depth and what I could lift up to the wheel barrow. Soil is a dirt-clay mix. I figure it took about 18 hours, a couple hours at a time over a week, since I'm an old geezer.

Next step is to secure the tower base, which consists of 3 28" 3/4" rods, secured at their top and bottom with metal braces, that will match the tower base. I'm working on how to secure it in place while concrete is poured. Thinking of rebar into the dirt sides and bottom corners, tied securely to the base with wire.

Any better ideas or suggestions?

Re: trees

Any reason I shouldn't use two old healthy 40'+ oak trees as guy supports from about the bottom 4-5' of the trees? I have three supplied ground 'screw in' guy anchors, but these trees are in the right place and I couldn't screw in the ground anchors with so many big tree roots in the vicinity. Maybe use very large and long screw eye-bolts, or possibly drill a hole for a bolt through the 15" dia trunk?

The tower and beam will be well grounded. Does it matter if guy wires are also grounded, or not?

Re: House and 3rd guy

The tower will be about 3-6' from the house and I have a heavy duty house bracket that could go into a window header 2 x 6 about 8' above ground. I know it's not necessary, and I have no idea how secure the header is, but I figure it'd help keep it stable, esp when several guys would be lose while raising the hazar platform which contains the rotor and mast while moving it and my beam up the tower and above the top guy wire brackets. I'll be able to assemble the beam onto the mast while standing on my 1-story house.

The tower itself, being HD aluminum and about 220 lbs, is to be walked up by a few good men via the base's hinge plate.

Would like to hear "words of wisdom" from anyone who's worked on a similar tower project.

Stupid idea. Trees grow and thus move over time. They're not stable long enough for construction purposes.

wrote:

>The tower and beam will be well grounded.

Hi Marv,

Take advantage of an excellent opportunity to create an "Ufer Ground."

In a nutshell, when you put in the rebar, weld each piece to the
others for continuity, and then make provision for a wire (either
securely clamped, or likewise welded) connection to the assembly that
is accessible for further connection outside of the block of concrete.
This wire will be a low Ohmic ground lead.

>possibly drill a hole for a bolt through the 15" dia trunk?

This should be robust, but think carefully about how those guys span
out towards the trees. If they are not dead-on in angle away from the
tower (as a function of their tower connection) you may twist the
tower and weaken it.

>I have no idea how secure the header is

Will that statement go into an insurance claim? Houses are not built
for lateral strength. Not only does the wall lack the stiffness of
your Oak trees, it is far closer to the moment arm (think crowbar).

If you read that here in this group, put that writer in your
kill-file.

Save your time and energy and simply plant the insulated wire.

You do what you can. The difference between doing it and not doing it
will be trivial on the other guy's S-Meter. Putting them under the
home, in the crawl space, is nice if you want to. It really depends
on HOW MANY total you are laying down, and HOW LONG they are before
your "total" coverage footprint matters.

Does your Manufactured Home have aluminum siding & roof?...I had a HF6V
vertical mounted just off the side of my manufactured home at the roof level
& used the home for the ground & no radials. It worked great. My home was
24X60. If you go with the ground mounted go ahead & put them under the home
& don't waste time stripping the wire as the radial won't care either way.
You can also use the I-Beams that are under your home, just connect your
wire from your vertical to each of them also.

Yes, and I screwed it up by changing the <Subject>, thinking I was creating
a new thread. However it doesn't always happen that way.

It went off topic, I followed and was called on it. The attempted "fix"
turned out to be my screw-up.

>
> How much power do you use for psk31?

I generally set it for about 50 watts to get a decent fade margin. With good propagation, I've used as little as 15 watts and had a solid QSO. (I retweak it for each QSO, since the equalization of the audio input isn't flat. 1500 Hz audio might give me 50 watts, but if I click at 800 Hz, I might get 15 W. The rig has an equalizer in it. Ya think maybe I should learn to use it?)

I put a newer computer in service for PSK and I found that at 50 watts I was getting doubles and triples of many of my keystrokes during QSOs. When I dialed the power down to 25 watts, the problem went away. Ferrite time.

Funny, with the old computer (a 486 running Win95) the RF got into the mouse only. With the new XP computer, the RF got into the keyboard only. Go figure.

Mark a spot 4-5 feet up on a tree, 20 years later it will still be 4-5
feet from the ground.

But won't the diameter, where you marked, be a lot greater? Anything
tied to the tree will get buried in the wood. Even if you leave 'room
for expansion', this may still happen. A tight loop, buried in the wood,
will also choke off the sap, and possibly kill the part of the tree
above.

1398. Cubical Quad Wind Loading ??

Newsgroup: rec.radio.amateur.antenna
Date: 2009-03-01 22:20:39 UTC
From: n8ppq <n8ppq.3f0cbf7@radiobanter.com>
Message-ID: <n8ppq.3f0cbf7@radiobanter.com>
Source record: 17222

Dear Possibly Informed Person:

I have looked at several online pages that describe calculations involving Yagi antennas. However, when I apply these methods to the cubical quad (my antenna of interest) I get numbers greatly higher than those listed by commercial manufacturers. For example, a Cubex 3-el, 5-band gives me 10 sq ft, just counting the boom and spreader arms with no wire, spiders, or Dacron support line, and I'm using the 2/3 multiplier for round members. They report only 7.4 sq ft. I've read that manufacturers exaggerate, but this seems more than that. What am I missing?

Thanks,

Dan N8PPQ

Hi Ken

Thanks for the reference. I read it (again). Actually, I scanned it.
The information in that manual is difficult for me to understand. Still, I
gain a little more understanding about this"BPSK" system each time I reread
the documents.
My original goal was to assemble an antenna with the needed amplifiers and
demodulators so I can see NOAA's Earth images on the computer monitor.
When I began this project I thought the demodulator would be easy to 'hook
up'. That was a big mistake. The BPSK demodulation is like a seperate
science.

It appears that I need to find a proper card for this CM 701. I find no
reference to the "5MB Modem card in the CM701 I now have.

Bad idea, trees move in the wind even big ones close to the ground. That puts a lot of extra strain on the tower. If the tree blows over so does your tower and trees blow over more often than towers. Also it's bad for the tree and can kill it then it's an even worse guy anchor. I've seen it done and by people who should have known better and it came to a bad end. My ham club salvaged some nice hard line off the wreckage though.

I think maybe you could drill a hole through the tree with a wood borer.
The Irwin Speedbor toolset comes to mind. They can be fitted with
extensions for added length. I have two, 6" & 12". They use setscrews to
avoid the bulk of a chuck. Love 'em.

http://www.irwin.com/irwin/consumer/jhtml/brandProducts.jhtml?brand=Speedbor

After the hole is through, slide in a piece of All-Thread, flange it with
some sheet aluminum (and maybe a couple of rubber bumpers to be a little
kinder to the bark) and add nuts. Attach your guy wire to the protruding
end of the All-Thread.

Trees will tolerate being drilled. I mounted a garden hose rack on a tree
about 20 years ago; tree and hose rack still doing fine as of this
afternoon.

==========

I didn't see this mentioned: Have you investigated the possible use of a
concrete "deadman anchor"?

Hi John;
I wasn't advocating the use of trees as Guy supports for a tower.
They work great as supports for wire antennas. My Boxelders and Oaks
that are 2-3 feet across hardly move in a strong wind. And, no, putting
Eye bolts in a mature tree will not kill it.

Ian;
We have used trees as supports for barbed wire by wrapping it around
the tree. The tree just grew over it, healing itself as it grew around
it.

From: Rollie <rollie@iowatelecom.net>
Message-ID: <goh1d5rb1@news.netins.net>
Source record: 17229

My understanding is the wind load of a normal quad is about 4 square feet in the 10 meter region. If the antenna gets larger for the lower frequency bands 10 square may not be to far off. A good vertical as high as permissable could very effective although a horizontal antenna cuts out a lot of QRM. Maybe a few more guy wires will keep the extra square feet up there as the antennas are usually built to survive 80-100 MPH winds. We have to remember a good antenna is a must and if the conditions are good the antenna makes a mediocre radio sound like a champ....KD0FGX

This indeed can happen. I did say 'possibly'. I have a grape vine
growing up one wall of the house (and, given half a chance, would take
over the other three), and I see it where I have tied it up a bit too
tightly to the support wires. However, I doubt if any plant is as happy,
healthy or strong as it would have been without the strangulation. It's
the sort of thing that needs to be checked every so often, and suitable
adjustments made.

All trees are not created equal. I am sure there are some that are massive and well anchored enough to do the job. I have a sycamore tree that would do the job if needed.

FYI,

There is a sociological phenomenon called "Godwin's Law"

Here is a copy.....

Subject: How to post about Nazis and get away with it - the Godwin's Law FAQ

Archive-name: usenet/legends/godwin
Posting-Frequency: monthly
Last-Modified: October 7, 2003
Version: 1.15
URL: http://www.killfile.org/faqs/godwin.faq
Maintainer: tskirvin@killfile.org (Tim Skirvin)

Godwin's Law FAQ
-or-
"How to post about Nazis and get away with it"

One of the most famous pieces of Usenet trivia out there is "if you mention Hitler or Nazis in a post, you've automatically ended whatever discussion you were taking part in". Known as Godwin's Law, this rule of Usenet has a long and sordid history on the network - and is absolutely wrong. This FAQ is an attempt to set straight as much of the history and meaning of Godwin's Law as possible, and hopefully encourage users to invoke it a bit more sparingly. Of course, knowing Usenet, it won't do an ounce of good...

[Standard Disclaimers: this document assumes you have some basic knowledge of Usenet; if you don't, go check out news.announce.newusers for a while to gain said knowledge. Misuse of the information contained within this FAQ is not the responsibility of the author (though he's pretty confused exactly how you could misuse this information). Copyright 1999-2002, Tim Skirvin, all rights reserved, <FISH><, fnord, furrfu.]

I. The Basics
1. What is Godwin's Law?

Godwin's Law is a natural law of Usenet named after Mike Godwin (godwin@eff.org) concerning Usenet "discussions". It reads, according to the Jargon File:

As a Usenet discussion grows longer, the probability of a comparison involving Nazis or Hitler approaches one.

2. What does it mean?

It pretty much means exactly what it says - as a Usenet thread goes on, the chances of somebody or something being compared to a Nazi approach one.

3. Yes, but what does it *mean*?

Aah, now *there's* the real question.

In case your head has been buried in the sand for the last sixty years or so, the Nazis were a German political party led by Adolf Hitler that slaughtered upwards of ten million people that didn't meet their standards of "ethnic purity" and set off to conquer Europe and the world in World War II. They are generally considered the most evil group of people to live in modern times, and to compare something or someone to them is usually considered the gravest insult imaginable.

As a Usenet discussion gets longer it tends to get more heated; as more heat enters the discussion, tensions get higher and people start to insult each other over anything they can think of. Godwin's Law merely notes that, eventually, those tensions eventually cause someone to find the worst insults that come to mind - which will almost always include a Nazi comparison.

4. That still doesn't answer my question. What does it *MEAN*?

The Law is generally used on Usenet as an indicator of whether a thread has gone on too long, who's playing fair and who's just slinging mud, and who finally gets to "win" the discussion. It has, over time, become the closest thing to an impartial moderator that Usenet can get.

So, what this means in practical terms:

o If someone brings up Nazis in general conversation when it wasn't necessary or germane without it necessarily being an insult, it's probably about time for the thread to end.
o If someone brings up Nazis in general conversation when it was vaguely related but is basically being used as an insult, the speaker can be considered to be flaming and not debating.
o If someone brings up Nazis in any conversation that has been going on too long for one of the parties, it can be used as a fair excuse to end the thread and declare victory for the other side.

5. So - *WHAT DOES IT MEAN*?

Fine, fine - it means that somebody's eventually going to say something about the Nazis in any thread that lasts very long. When it happens, the thread is going to start either degenerating into a long flamewar over Nazi Germany or about Godwin's Law. Either way, the thread is effectively over, and you can safely killfile the thread and move on.

II. What does it mean?
1. Didn't we already spend the last section talking about this?

Well, yeah, but people don't seem to get the point...

2. What happens if we're actually talking about Nazis?

Then you've already invoked Godwin's Law, and the chances are that your thread isn't going to last all that much longer as a sane discussion. Them's the breaks.

That isn't to say, of course, that you can't talk about Nazis and such on Usenet - this *is* Usenet, after all, where virtually every conversation that goes on is fairly ludicrous in the first place. It's just going to take you a lot more effort to find real information out of there and to avoid getting yourself off on side-threads - which you'll eventually do regardless, but you can try to put it off.

This also applies if a thread mutates into an actual discussion of Nazis, of course.

3. What about arguing with Neo-Nazis?

Arguing with Neo-Nazis is probably the quickest path to getting Nazi invocations, because, well, they're actually accurate. Still, trying to invoke Godwin's Law near a Neo-Nazi isn't really a good idea because it's not terribly original and they'll probably get off on it anyway. Just ignore them and occasionally publish a FAQ detailing what actually happened during the Holocaust and such; arguing probably isn't going to help you.

4. How can I use Godwin's Law to my advantage?

In the proper kind of flamewar, Godwin's Law can be used as a gambit - how can you force your opponent to invoke the Law? Actually teaching these skills is tough, of course, and is best done through experience. Experience with chess and alt.flame are recommended.

5. What should I do if somebody else invokes Godwin's Law?

The obvious response is to call them on it, say "thread's over", and declare victory. This is also one of the stupidest possible responses, because it involves believing far too much in the power of a few rules that don't say exactly what you wish they said anyway. The proper response to an invocation is probably to simply followup with a message saying "Oh. I'm a Nazi? Sure. Bye" and leave, and in most cases even that much of a post is unnecessary.

6. "Hitler!" Ha! The thread is over!

Nope, doesn't work that way. Not only is it wrong to say that a thread is over when Godwin's Law is invoked anyway (Usenet threads virtually always outlive their usefulness), but long ago a corollary to the Law was proposed and accepted by Taki "Quirk" Kogama (quirk@swcp.com):

Quirk's Exception: Intentional invocation of this so-called "Nazi Clause" is ineffectual.

Sorry, folks. Nice try, though.

7. Does Godwin's Law apply in the real world?

Actually, yeah, but usually discussions in Real Life end by somebody wandering off in disgust before it can be invoked.

8. Are there any topics that lead directly to Godwin Invocations?

Well, yeah. Of course. Case's Corollary to the Law states "if the subject is Heinlein or homosexuality, the probability of a Hitler/Nazi comparison being made becomes equal to one" - but that's just an old list. Abortion and gun control debates always lead to Nazi comparisons; talk with a Libertarian for more than a few hours and he'll almost certainly bring up Nazis; book-burning is pretty much considered a sub-topic of Nazism at this point. Hell, talk about anything politically related and you'll eventually get there.

If you're really bored, a fun game to play is Six Degrees of Godwin.
Take a topic - any topic - and see how quickly you can relate it to Nazis
using legitimate topic drift methods. For example: a discussion about
computers will eventually lead to discussions of keyboards and which are
best, followed by a lot of complaining about the Windows key on 104-key
keyboards, leading to complaints about Microsoft, forcing the standard
MS-vs-government flamewar that I'm sure you're all aware of, leading to
attacks on Microsoft's "fascist" tactics by one side or another, which
will force the other side to start talking about the differences between
fascism, capitalism, and, of course, Nazism! The fun never stops!

Appendix A: The Many Forms of Godwin's Law

"You can tell when a USENET discussion is getting old when one of the
participants drags out Hitler and the Nazis."
- Richard Sexton (http://www.vrx.net/richard/) stating what would later
be known as Godwin's Law, Message-ID <21000@gryphon.COM>, 16 Oct 1989

http://groups.google.com/groups?selm=21000%40gryphon.COM&output=gplain

"Godwin's Rule of Nazi Analogies: As a Usenet discussion grows longer, the
probability of a comparison involving Nazis or Hitler approaches one."
- Mike Godwin, first article about the topic in the Google archives,
Message-ID <1991Aug18.215029.19421@eff.org>, 18 Aug 1991

http://groups.google.com/groups?selm=1991Aug18.215029.19421%40eff.org

:Godwin's Law: /prov./ [Usenet] "As a Usenet discussion grows
longer, the probability of a comparison involving Nazis or Hitler
approaches one." There is a tradition in many groups that, once
this occurs, that thread is over, and whoever mentioned the Nazis
has automatically lost whatever argument was in progress. Godwin's
Law thus practically guarantees the existence of an upper bound on
thread length in those groups.
- The Jargon File (http://www.ccil.org/jargon/)

Hitler, Nazis, nazis, and net.cops:
Warning: now that this FAQ has mentioned Hitler and Nazis, UseNet Rule #4
(also known as Godwin's Rule, after Mike Godwin of the EFF, sci.crypt, and
comp.org.eff.talk, a sometime foe of David Sternlight (q.v.) [even though it
was apparently in use, by Richard Sexton {q.v.} among others, before Mike's
1988 (?) net.advent; the "Godwin's" part seems to stem from "Rich Rosen's
Rules of Net.Debate, which I don't have a copy of]) says it will be coming to
an irrelevant and off-topic end soon. Just as there will always be newbies
("It's *always* September, *somewhere* on the net" - response to a 1993 wave
of delphi.com postings on a.f.u), there will always be people who see the net
and are repulsed because there's stuff there they don't want to see - so they
set out to make sure noone else can, either. They invariably fail, because
there are no net.cops to enforce any such rules on UseNet; in the course of
the heated flamewar that usually follows, things escalate until either Hitler
or Nazis (or both) put in an appearance, at which point the thread has
officially lost all relevance. People scream at each other a bit more, then
give up and go home. Bleah. "Keep your brains up top; don't be a net.cop."

This has mutated, in true UseNet fashion, to encompass *any* continuing thread; if you mention Hitler or Nazis out of the blue, the thread is sure to die irrelevantly soon (and, incidentally, you've lost the argument, whatever it was)... and every continuing thread on UseNet *must* contain such a reference sooner or later. Invoking Rule #4 deliberately in hopes of ending a thread, however, is doomed to failure (Quirk's Exception)...

UseNet Rules #n:
No firm info at the present time is available on just what the other UseNet Rules #n are. However, at a guess, they include:
--
Rule #nonumber: There are no hard-and-fast Rules on UseNet, only Guidelines, which are more or less strictly enforced (and differ) from group to group; this is why it's generally wise to read any group for a bit before ever posting to it.
Rule #0: *There* *is* *no* *C*b*l*. There *is*, however, a net-wide conspiracy designed solely to lead Dave Hayes (q.v.) to believe that there is a C*b*l.
Corollary: *There* *are* *no* *pods*.
Rule #9: It's *always* September, *somewhere* on the Net.
Dave Fischer's Extension: 1993 was The Year September Never Ended [so far, there doesn't seem to be much evidence he's wrong...]
Rule #17: Go not to UseNet for counsel, for they will say both `No' and `Yes' and `Try another newsgroup'.
Rule #2 (John Gilmore): "The Net interprets censorship as damage and routes around it."
Rule #108 (from the soc.motss FAQ): "What will happen to me if I read soc.motss?" "In general, nothing. (You may be informed or infuriated, of course; but that's a standard Usenet hazard.)"
Rule #666: Old alt groups never die. They don't fade away nicely, either.
Rule #7-B: There is no topic so thoroughly covered that noone will ever bring it up again.
Rule #90120: Applying your standards to someone else's post *will* result in a flamewar.
Rule #1: Spellling and grammer counts. So do grace, wit, and a sense of humor (the latter two are different), as well as a willingness to meet odd people, but these are lesser considerations.
Rule #x^2: FAQs are asked frequently. Get used to them.
Rule #29: no rational discourse can happen in a thread cross-posted to more than two newsgroups.
rule #6 (Eddie Saxe): don't post to misc.test unless you understand the consequences.
Rule #547 (Arne Adolfsen): When people know they're wrong they resort to ad hominems.
Rule #37 (Faisal Nameer Jawdat): Read the thread from the beginning, or else.
Rule #5 (Reimer's Reason): Nobody ever ignores what they should ignore on Usenet.
Rule $19.99 (Brad `Squid' Shapcott): The Internet *isn't* *free*. It just has an economy that makes no sense to capitalism.
Rule #3 ("Why 3?" "Because we felt like it"): For every opinion there is at

least one equally loud and opposing opinion; sometimes stated as:
Rule #27 (Gary Lewandowski): "In cyberspace, *everyone* can hear you scream."
And for completeness' sake:

Rule #4: (Godwin's Rule) Any off-topic mention of Hitler or Nazis will cause the thread it is mentioned in to an irrelevant and off-topic end very soon; every thread on UseNet has a constantly-increasing probability to contain such a mention.
Quirk's Exception: Intentional invocation of this so-called "Nazi Clause" is ineffectual.
Case's Corollary: If the subject is Heinlein or homosexuality, the probability of a Hitler/Nazi comparison being made becomes equal to one.
- net.legends FAQ (http://www.killfile.org/faqs/legends.html)

Appendix B: Addendums, Commentary, and Miscellaneous

1. Bentsen's Defense

For some, there is another way around Godwin's Law:

"Not this time. I know Mike Godwin. Mike Godwin is a friend of mine. Senator, you're no Mike Godwin."

This, of course, only applies to friends of Mike Godwin. The originator of this rule, Earl Cooley III (shiva@io.com), is one of those people. If you have to ask, you don't apply. I don't apply, so don't feel bad.

Note that this was named after Senator Lloyd Bentsen's "You're no Jack Kennedy" line from the 1988 vice-presidential debates. And the original usage can be found in <3b09d2e6.79411309@news.supernews.com>:

http://groups.google.com/groups?as_umsgid=3b09d2e6.79411309@news.supernews.com

2. Godwin's Commentary

Godwin actually wrote a short article for Wired Magazine on the Law back in 1994:

http://www.wired.com/wired/archive/2.10/godwin.if_pr.html

The article is actually more about the power and danger of memes (thought-viruses) than about Godwin's Law itself, but it's worthwhile reading for anybody who actually got this far into the FAQ.

3. Author's Note on the Holocaust

Over the years, I have received several emails regarding this FAQ regarding the Holocaust itself, either disputing the holocaust or the numbers listed in this FAQ. I'd just like to make it clear that I don't have any particular desire to debate these points; this FAQ is meant to point out and explain a quirk of human nature, not to codify the history of World War II.

4. Additional Corollaries

There have been many additional corollaries and otherwise related
rules created since the net.legends FAQ codified them, and/or missed in
that FAQ. Those that have been brought to the author's attention:

Stead's Law (named for Lew Stead of alt.pagan fame):
Any discussion between more than 2 Pagans will eventually come around
to Christianity.
- Reported by Donal Brewich <donal@brewich.com>
- More information regarding its history would be appreciated

I have head that various types of precipitation can cause static and have seen it to some extent but last night I think I witnessed it nearly wiped out air ground communications at a major airport when a snow storm passed through the area. The static could be heard on over 50 receivers most of which had their own antenna. Is this possible.

Yes.

Aviation uses AM, so yes you can hear percipitation static and lightning
noise and when airborne you can hear it from a long way away.

Though generally if the static is really bad you have bigger issues
to be concerned about than radio noise.

You can't believe how many trees I have cut for firewood and had barbed
wire, nails, even steel posts in them.

We dont generallty have a problem with P static during rain but the
snow, if that wwas the cause was, breaking the squelch on the
receivers. Normally the squelch is set to break at 2uVs. I adjusted
the squelch on a rx until it just blanked while listening to the noise
then measured the amount of signal from a generator that it would take
to breal squelch. The level was about 40uV and the level was
continuous for the duration of the storm. Does snow normallly cause
more of a static problem than rain? Living in the SOuth snow isnot
something I have a lot of experience with.

To me, the fact that His Law (in one form or another) is true proves
that He exists.

In the UK, in uk.radio.amateur, after about three 'overs', all threads
get hijacked and turn into a slanging match which is invariably about
the UK amateur 'Foundation Licence' (effectively a low-grade novice
licence). This is much more important than Nazis and the like.

What's that? A block of concrete...?

I've measured the growth rings in an almost identical Live Oak we had to
take down after H. Ike. A 1 inch radius growth was about 12-15 years.
Going into the ground just makes another obstacle to mow around. Another
solution may be a steel rail into the ground like a fence post. Will
think about it all some more.

Thanks for the comments!

I am trying to source a readable copy of Orr & Johnsons "VHF Handbook".

I have found a copy, but the "heavy wear" description is just that, some pages are unreadable.

If anyone can help me, either with a reasonable hard copy or a PDF file or a copy on a CD, I would be very grateful.

Yes. It's the favored material because it won't rust or corrode, like its metal counterpart. Metal used sometimes, but only for temporary guys, like a Field Day antenna tower.

Cut a hole in the ground and prop a metal rod in the hole. Fill around with concrete, like a fence post. I did a 10' satellite dish mount in 1985. Sucker never moved a millimeter, even with that big dish hanging off to one side

Mounting a garden hose rack isn't the same as anchoring a guy wire for a
50' tower.

No, but the OP of the thread did - a 50' tower.

1426. [ADMIN,META] Allow crossposting to rec.radio.amateur.moderated?

Newsgroup: rec.radio.amateur.antenna
Date: 2009-03-03 14:22:16 UTC
From: rram@panix.com
Message-ID: <gojeci$m74$1@reader1.panix.com>
Source record: 17250
Cross-posted to: rec.radio.amateur.antenna,rec.radio.amateur.dx,rec.radio.amateur.equipment,rec.radio.amateur.homebrew,rec.radio.amateur.misc,rec.radio.amateur.policy,rec.radio.amateur.space,rec.radio.amateur.moderated

(Followups directed to poster by default. If followup to newsgroups is desired, edit your headers on followup to drop rec.radio.amateur.moderated from the Newsgroups line, else your article will be rejected.)

The rec.radio.amateur.moderated newsgroup enters its 3rd year of operation this month. Since its creation in February of 2007, we have approved nearly 3,000 articles about amateur radio and closely related subjects. We would like to thank our readers and posters for their quality contributions to our newsgroup.

When we first started out, consistent with our newsgroup's Charter and Posting Guidelines:

http://www.panix.com/~rram/usenet/rram/

we allowed discussion threads to be posted to our newsgroup only. Our moderation software is programmed to automatically reject any crossposts. The one exception has been periodic information postings that are crossposted to rec.radio.info, rec.answers, and/or news.answers.

Some moderated newsgroups, such as those in the comp.lang.perl.* and misc.kids.* hierarchies, started accepting crosspostings to appropriate unmoderated newsgroups after a suitable waiting period from their initial creation. Now that our newsgroup is well-established and carried at most major sites, we would like to implement this customary followup and allow some crossposting. We would propose to allow simultaneous crossposting (i.e., one article, with all newsgroups specified at once on the Newsgroups line in the headers) to rec.radio.amateur.moderated and one other unmoderated newsgroup in the rec.radio.amateur.*, alt.radio.amateur.*, and alt.ham-radio.* hierarchies only.

Pros:

- Allows the moderated and unmoderated newsgroups to share discussion threads of common interest, without propagating more than one set of articles to news, or showing them more than once in a newsreader. Presently, threads of common interest have to run in parallel, with different sets of followups, and requiring readers to have to follow two threads, possibly with duplicate articles, in different newsgroups. We have seen multiple examples of this happening in the amateur-radio-related newsgroups over the past 2 years.

- Provides the default action of submitting articles and followups to moderator review, as news servers will forward to us for approval any article that contains rec.radio.amateur.moderated on the Newsgroups line. This allows the moderated newsgroup crossposting to serve as a "guardian" or "sentinel" to discourage threads from getting hijacked into running off-topic or into personal abuse. This may also encourage posters to use the underutilized rec.radio.amateur.misc or .policy newsgroups as crossposting targets for articles that might otherwise be posted only to .moderated.

- Readers of the unmoderated newsgroups will enjoy high-quality, on-topic, discussion threads that would otherwise require subscribing to and reading a moderated newsgroup. Readers of the moderated newsgroup will enjoy high-quality, on-topic, discussion threads that would otherwise require subscribing to and reading other unmoderated newsgroups. Those unmoderated newsgroups may contain articles of widely varying degrees of quality and topic relevance.

- Participation in this crossposting scheme is completely voluntary. Posters of initial articles in threads will make the voluntary choice to add rec.radio.amateur.moderated and one other unmoderated newsgroup to the Newsgroups line when posting. Those following up to these crossposted threads will make a voluntary choice whether to keep rec.radio.amateur.moderated or any other newsgroup on the Newsgroups line, or remove them. Followups may be directed by default to any subset of the newsgroups on the Newsgroups line (or via E-mail to "poster") by specifying them on an appropriate Followup-To line. In short, you control what you post, where you post it, and what default destinations you want for any followups. This proposed crossposting scheme does not change any of these long-standing features of Usenet and newsreader software.

Cons:

- This will subject all such simultaneously crossposted articles to moderator review by us. If they do not meet the Charter and Posting Guidelines of rec.radio.amateur.moderated, they will be rejected. We will attempt to work with submitters to let them know what is happening, and how their articles can be fixed for eventual approval. However, rejected articles that were submitted anonymously without a traceable/derivable E-mail address or identity will have to be dropped silently without feedback to the unreachable submitter.

- Moderator review will introduce some posting delay. However, it has been our experience over the last 2 years that with our large moderation team distributed across many time zones, and the automation provided by our moderation software, we can turn submissions around relatively quickly, often within an hour.

- Many newsreaders do not give clear feedback to the user what newsgroups in which a given article appears, nor to what newsgroups a followup to that article will be sent by default. We expect to initially have to handle a few confused, possibly angry, submitters

who will insist that they did not intend to post to a moderated newsgroup. We are willing to provide the necessary polite feedback and user education to them to allow this crossposting scheme to work effectively. This will help ensure that the scheme is only used by those who are reasonably aware of the various pros and cons. We hope that this problem will diminish with time and greater user awareness.

- Not all newsgroups, especially those in the alt.* hierarchy, are carried at all sites. Users may find themselves following up by default to newsgroups that do not exist on their local news server, possibly resulting in article rejection from their server. Those users would have to edit their Newsgroups line for successful resubmission. We will work with users to get appropriate newsgroups added to their local servers, as well as with Panix to get those newsgroups added to Panix's server. However, as with default followups described in the previous paragraph, we expect to have to go through an initial period of user and news service provider education and polite feedback. We hope that this problem also will diminish with time and greater user awareness.

We propose to enforce this scheme in our moderation software as follows:

- Submissions simultaneously crossposted to more than 2 newsgroups will be automatically rejected with a rejection form letter (same as what happens now to submissions that are posted to more than 1 newsgroup).

- Submissions that contain newsgroups on the Newsgroups line other than approved newsgroups in the rec.radio.amateur.*, alt.radio.amateur.*, or alt.ham-radio.* hierarchies will be automatically rejected with a rejection form letter.

Approved rec.radio.amateur.* newsgroups are those that are currently listed in the latest version of the "List of Big Eight Newsgroups" which is crossposted monthly to news.announce.newgroups, news.groups, and news.lists.misc.

Approved alt.radio.amateur.* and alt.ham-radio.* newsgroups are those that have been created consistent with the suggestions in "So You Want to Create an Alt Newsgroup" at:

http://www.faqs.org/faqs/alt-creation-guide/

We will make every reasonable effort to keep our list of approved newsgroups up-to-date. In case we have overlooked any, and a submission is rejected in error as a result, the rejected submitter can E-mail us at our administrative contact address (in the signature at the bottom of this article, and the default Reply-To for the rejection message) requesting that it be added, and that the article be approved. We may still choose to reject articles crossposted to any alt.* newsgroup with an inappropriate name, including obscene language, embedded name-calling, or encouragement of unlawful conduct.

To help publicize this new editorial policy, we will update our Posting Guidelines, which are posted to the moderated newsgroup on the 15th of each month. Changes to our Posting Guidelines are indicated by an updated date in the Revision: auxiliary header at the top of the body, as well as "change bars" ('|') after each modified line of text. We will also add a short announcement, posted on the 1st of each month and cross-posted to the unmoderated newsgroups, restating this new editorial policy, and encouraging crossposted submissions.

Since this is a change to our newsgroup's editorial policies, and with some impact to the readers and posters of the unmoderated newsgroups, we would like to solicit 30 days of direct feedback and/or public discussion regarding this proposed change. For example, we would be interested to know if allowing crossposting to one other unmoderated newsgroup is enough, or if two would be preferable. We feel that more than two additional crossposted newsgroups greatly increases the probability of misconduct or accidental misposting that may result in article rejection by us. Also, should this scheme be opened up to uk.radio.amateur and aus.radio.amateur.* as well? You may send us E-mail directly to our administrative contact address below, which is the default Followup-To/Reply-To for this article. You may also discuss this publicly on the unmoderated newsgroups. In fact, we cannot stop you from doing so. We will make every reasonable effort to incorporate any feedback and suggestions. If we decide to implement this proposal, we will make a public announcement shortly after the end of the 30-day discussion period.

(Followups directed to poster by default. If followup to newsgroups is desired, edit your headers on followup to drop rec.radio.amateur.moderated from the Newsgroups line, else your article will be rejected.)

I am not aware of this, but the chances are surely infinitesimal.

A related (psychological) phenomenon is: "the elephant in the livingroom"
which is a tag label for people who are unaware of their own problems even
though everyone around them can see it.

My own pet notions about newsgroup threads are as follows:

1. It is a fact that dogs, when out being walked by their owners (or dogs
wandering on their own), go around and sniff fire hydrants and tree trunks
for dog piss residue. Because of their olfactory sensitivity, dogs can
identify other dogs on piss smell alone. So, its a form of communication.
After the sniff, the dog pisses on top of the prior layer of piss to tell
the next dog (maybe the same one as before) something like "Hi Joe, this
is Pete", etc., and thus makes dog socializing possible (as for millions
of years), and now, humans can do the same on newsgroup threads (read the
post, reply to the post, etc., thus giving rize to terms like "pissing
contest" etc).

2. There is a certain resemblance, to a certain degree, to the bar scene
in the movie "Star Wars"

3. I've also had the observations that: i) no matter what you say, and no
matter what your intentions, there will always be at least one person out
there who will be unhappy with what you say, ii) they will also completely
misunderstand what you say, and iii) no matter what you do to try to
explain it, it will still be misunderstood. In my retirement years I've
been reading a lot of history; kinda makes it obvious why we've had
thousands of years of wars, destruction, death, pain. Hmmmmmm? Is there a
lesson there? On newsgroups, thus, we get flamewars as a substitute.

>>Jimmie

It is usually very dry when it snows but it can do that with rain too. The
charge builds up as it falls and snaps when striking the antenna elements.
Smog and dust can do the same thing and we hear that when it is very dry and
the wind blows even on weak and long path FM signals.

During an Arizona dust storm, the charged-dust-particles
transferred their charges to my G5RV and the disconnected
coax connector laying on the floor arced with such intensity
that it caused my shag rug to smoke. :-(It was previously
arcing across the coax terminal on my IC-745 but apparently
didn't cause any damage with the power off. I can imagine
what it would have sounded like if I had turned on the power.

Did you also call the tower police to see if he was abusing the tower?

My father in law was an excelent wood craftsman often making things
from wood he had havested.
The first thing he would do before cutting the wood to size is run a
metal detector over it. He had even found large pieces of metal buried
in OSB.

True. I only made that observation for someone who wondered about the
effect of puncturing the tree. (I did it without any problem and maybe
someone else can, too.)

I should have made that clearer.

Navy ships use whip antennas for HF receive and these are prone to build up
static charges unless something is done. The usual solution is a 50K-ohm
resistor to ground near the base of the whip, enclosed in what's called a
termination box, where coaxial cable is interfaced to the whip. The
resistor is usually termed electrostatic discharge protection, or simply the
"static drain resistor."

Cecil
One more time.
Unbound static particles rest on diamagnetic materials of which water
is one
Updraft in a storm collects not only water but also the static
particles at rest.
When the moisture changes physically(ice , snow etc) and the
particles have no room
to stand where during to its travels it has gained charge. This
conglomeration of charge can transfer to another cloud that is still
in the moisture status or down to earth (diamagnetic material also
such as aluminum) when reaching the ground or moisture clouds, It
reverts to its static particle status where the charge is then
released upwardsto the clouds.
The original charge came from the movement of clouds relative to earth
and if one consideres the application of G.U.T. (Grand universal
theorem per Einstein and Newton) one can see this as part of applied
current which also must include a rotataional force as per
displacement current. Review of weather patterns on the TV clearly
shows the rotational aspect when weather changes are prevalent.
Thus the noise heard on the radio is the dissipation of energy from
the charged particle as it reverts to its original static particle
orientation when it settles on one antenna.

We have a small portable sony radio, and it has the usual type of extendable aerial (antenna) that you get on small japanese radios.

It now refuses to maintain its position at an *angle*. Slowly but surely it drops down until it reaches the horizontal position.

The small screw has been tightened up, but even as tight as we think we can do it without stripping the slots in the screw head, it is not enough to *clamp* the aerial to stop it dropping down.

Basically the aerial at its base is a square shape with one small bronze coloured washer each side of it and that all sits in a ' U ' shaped base with it all being clamped with a small screw.

Are there any tricks you know of, to get it to behave? Thanks.

Does this radio live in a kitchen? If so, you may want to unscrew it
from its base and degrease the two parts - I suspect cooking-based
lubrication.

If that doesn't work (and you manage not to lose the washers), there is
probably wear that needs 'taking up' - an old-fashioned hardware shop, or
an electrical/electronic repair shop, should be able to supply replacement
washers. A temporary make-shift shim using paper or aluminium foil
/might/ work.

I've seen replacement aerials on sale too, in case all else fails.

Take the two washers out and restore the 'curl' in them by pressing them
over the shaft of a screwdriver.

If you are able to work carefully :

Remove the screw, then ...with a high-quality drill bit...
drill a hole all the way through...just slightly larger than the
original hole..

Then get a high-grade screw and nut...Use a Nylon Lock nut and you
should then be able to tighten the antenna enough so that it will no
longer tilt.

The washers are spring washers which provide a degree of tension so that
the screw doesn't need to be over tight and thus allows the movement.
Over tightening the screw will flatten the washers and ruin them. I'd
suggest seeking replacement washers or a new aerial which might be easier.

You are kidding right? You know exactly how hard that would be to do. There
would be bearly enough meat on that as it is, let alone the chance of the
drill bit biting into what is there and breaking the union - he'd have to
resort to some metal to metal bonding glue and some duct tape by the end of
it all.

What were you thinking?

Get some garden wire, the gauge you need to apply a bit of force to to get
it into the shape and position you want.

Then, place the wire through the mounting holes and the aerial (hook the
end) and simply wind the wire around the aerial until you've covered the
fitting and above - you could even wind the wire back down to double up on
strength and flexibility.

At least that way you are still able to adjust the aerial should you need
to - And if done well, it won't look too much like a ham-fisted job.

I've done it myself. Seems a perfectly reasonably suggestion, provided you have the right tools and some small nuts and bolts.

Have no ideas about the noise. I'm running a Corolla.
But from an antenna mounting issue, any of these small
cars are a real pain when it comes to mounting a "good"
HF antenna. Any antenna of weight will need a strong mount,
and the sheet metal on these cars is pretty thin.
So you either have to rig up some kind of below body mount,
like a hitch mount or whatever, or use a lighter antenna on a
body or trunk mount. IE: ham sticks, or other fairly light antennas.
Some use the roof magnet mounts, but I'm paranoid of messing
the paint up, or creasing the metal when I try to yank one off.
I could use a trunk lip mount with a light antenna. Might be my
best option..
The last Honda Accord I had, I cut a hole in the trunk for a
mount. But I had to reinforce the whole bottom of the trunk lid
for it to be strong enough to handle my antenna. I used thin
steel plates, and a large steel circle plate at the base of the
antenna.
But.. I just can't bring myself to do that to my present car,
which has not a single dent in it.. :/ It's still like new basically,
and I just haven't been able to get myself to drill holes.
I know on the Accord, even with the reinforcement, it eventually
slightly warped the trunk metal. Not real bad, but noticeable.
And I don't want to take that chance with this car.
So far I've been going radio less.. :(I just take my radio
with me and use it portable when I get where I'm going.
If I try a mount, it will probably be a trunk lip mount if I can
be fairly sure it won't damage the trunk. And I'll probably
stick to pretty light antennas.
BTW, I hate bumper and hitch mounts cuz the antenna
base is too low to the ground, and the ground losses are
excessive vs a body mount.
I still have two trucks, both with good antenna mounts,
but I don't drive them as much as I used to. They guzzle

gas vs the car.

You might as well replace the aerial with a new one. They are so cheap
and the time taken to fit a new one would be exactly the same as it
would be to make a lash up repair.

That the OP is posting for help on such a matter should indicate he is unlikely to have the smarts to do that, and if he did, he'd probably drill himself to death.

Personally, I don't know why he doesn't just get the welding kit out of the shed and go at it with that.

:-)

Well, now you're just being silly!

he wants it to still be adjustable.

:)

I've done exactly this repair myself (to more than one radio).
This is a proven and practical repair technique. Dunno what
"DNA" is thinking?

That would be a practical response *IF* one could find an exact
replacement. Alas, there are thousands of different varieties of these
things, and they tend to be custom-designed for each model. Even
if there were exact replacements in a warehouse somewhere in
central Asia, finding one and getting it shipped to you would be
far less pratical than just tossing the radio and buying a new one.

Impractical. Almost every model has a custom-designed antenna
assembly. Even popular brands who may stock repair parts likely
charge more for them than the radio is likely worth.

1) Remove the screw and drill out the threads. Replace with an
appropriate size screw, washer, and nut. Or use a smaller screw
and you don't have to drill out the existing threads.

2) If the radio is used in a fixed position, get a cliplead (piece of wire
with an alligator clip on the end) and clip it onto the (collapsed) radio
antenna. You could attach the wire to the furniture/cabinet to reduce
its visible impact.

IME, it is not practical to try to find an exact mechanical replacement
because those assemblies tend to be custom designs for each model
of radio equipment.

The OP said it was a Sony. Parts should be readily available for such a
major brand. That said, most of these aerials are pretty much the same
shape and size on even the cheapest brand.

Several varieties of portable radio telescopic aerials are available
from Maplins in the UK for less than 5 pounds. There are many other
suppliers.

Another trick, depending on how the swivel is constructed, would be to
take a hammer and smash the radio to bits..... hold on, too much coffee
this morning.

Take that hammer, and maybe a nail, brace the swivel against a solid
object, and tap the other side until the swivel stiffens up a bit. It's
a temporary improvement, as the swivel will loosen again over time, but
if it's loosened anyhow, it doesn't make much difference.

This is because of the loss of equilibrium in the gussian particels.
They have become diamagnetized with the corresponding failure to
support internal current flow which formerly held that antenna at is
optimum non-vertical angle for efficient operation. Now that your
antenna (aerial borealis) has assumed full horizontality you should
think, instead, of tilting the radio to the proper vector relationship
that fully matches with the integral weak-force buoyancy.

Geez. It`s just gone a bit floppy, the spring washers have lost their
tension, it shouldn`t be beyond the wit of man to either retension them,
find an old aerial from which the springs can be salvaged or if it comes
to it, purchase a replacement aerial from which the springs can either
be used or if he`s lucky enough to find a good match, the whole twig can
be used.

Here in the UK several companies spring immediately to mind who stock
quite a good range of generic replacement aerials, a bit of fiddling
will probably result in a workable solution.

Certainly. And there are lots of them available over on my side of the
pond as well. But they are all "NOS, annonymous surplus". Nobody
knows which radios they fit, and I've never been lucky enough to find
one that fits any radio needing a new antenna. Perhaps you don't have
as many different radios in your world, or you are more lucky than me.

Safer to use a BIG pair of pliers (with lots of leverage) and squeeze it
hard.
Hammers and electronics inside plastic are something I try to avoid. :-)

>
> Roy Lewallen, W7EL
Indeed.. but St. Elmos fire has many characteristics not shared with corona.. (the extent of the glow, for one.. corona tends to be a very small sheath or longer leaders/fingers)

Most likely, it's glow discharge off small water droplets shed from the surface from which is charged. Basically the process is like an electrostatic sprayer.. small bumps in the liquid surface form from whatever cause, and the surface charge tends to make the droplets come off. They're charged to the maximum charge for the diameter, and as the droplet evaporates, it gets smaller, causing the glow discharge to shed charge. Or, a big droplet splits into smaller droplets because of electrostatic forces.

You can set up a nice demo in a dark lab with something like a cork wet with saltwater, a HV power supply, and some cookie sheets for electrodes.

If you can locate a spring of the appropriate diameter and strength
just slip it on and it should assist in your problem

The problem doesn't seem to be the screw itself. As the OP said they can
tighten the screw as hard as they dare.

The pivot may be "lubricated" with powdered metal, derived from the
material itself (probably plated brass). Take the joint apart, clean it
thoroughly with solvent and/or detergent plus scrubbing, *lubricate it*,
and reassemble.

Isaac

It used to be OK, right? What may have changed is that the mating pieces have been polished by repeated movement and they are now quite slick and smooth.

If so, you take them apart and rough up the mating surfaces. This restores what one of my witty friends called "stiction," a combination of "sticky" and "friction."

I have some dental picks that I might use for scratching the smooth surfaces to restore the lost stiction. A large sewing needle or the tip of a steak knife could work, too. Sandpaper wrapped around the tip of a nail file? An Emory board?

One very foggy night on Hwy 1 between Carmel and Santa Cruz,
I came up behind a mobile radio in operation. The glow
off the end of the antenna was bright orange. An oncoming
CHP officer stopped the vehicle for having a "red light"
visible from the front of the vehicle. When I left the
scene, the two were arguing whether it was really a "red
light" and whether the operator deserved a ticket or not.
I don't know what radio service was involved.

Don't forget, with all this mention of glues and paper washers, that
you still want a decent electrical connection between the two bits :-)

I've read that W6AM used to drive the route between Long Beach and San Francisco. His mobile station is legendary around here. The operator was no doubt explaining to the officer that a glow discharge in air is more of a salmon than a red.

Did the officer look like Broderick Crawford by any chance? :-)

I couldn't help but fix the subject line.

And I've been repairing and constructing electronic equipment for at
least 10 years more than that. Repeating: "Perhaps you don't have as
many different radios in your world, or you are more lucky than me."
In either case, you seem to be in a better position to match replacemnt
antennas with consumer equipment. I'm happy for your success.

Harry,

There is a book entitled, "All about VHF Amateur Radio" by William I.
Orr available for around $4 from a used bookseller.

Is that the exact title ["VHF Handbook"] that you're looking for?

Alain

1505. Definition of antenna receive gain?

Newsgroup: rec.radio.amateur.antenna
Date: 2009-03-06 16:29:32 UTC
From: Daniel <janzon@gmail.com>
Message-ID: <0ba6e6da-f856-4e7b-a272-5efb3ea68301@p20g2000yqi.googlegroups.com>
Source record: 17129

Hello,

Let's say I have a transmitter with output power T dBm using an antenna with A dBi. Then we have a receiver, with gain B on the antenna. How does this affect the received signal strength? I guess the field strength at a point (in the transmitter antenna lobe) would be something like T+A-PL where PL is the path loss at the point.

But what does the receiver get when it uses an antenna? Is there a notion of reciever gain of an antenna? In my mind I can't see that anything else than antenna area would be relevant. I mean, a reciever antenna shouldn't be able to suck in radio waves from the sides... Can anyone sort this out?

Regards,
Daniel

I have heard there is a process where coax cable is baked in an oven to lessen the effects of temperature change of the cable on phase shift. I havent been able to find any information on this process. Direction to any information on the subject would be greatly appreciated.

Rumor has it that W6AM had a 1 KW Swan amp in his trunk. Plus some
really big Rhombics.

The home is made of wood with a shingled roof just like a stick house.
it's not a mobile home in the sense of one composed entirely of metal.
I never thought of connecting the metal I-beams underneath the floor
to the ground radial system, might be worth trying.
Just to clarify something. I misquoted what I had read about
insulated ground radials. Apparently what was written was that you
should not use insulated ground radials as part of lightning
protection system. That statement actually makes a little more sense.
I apologize for my mistake.
I guess I'm just going to start stringing out radials till I tire of
it and then quit. Maybe after a few days when I feel like it again,
I'll run a few more and so on and so on until I get to where I think
the antenna is performing well enough.
I do know enough about verticals and ground systems to know that at
some point I will reach the point of diminishing returns. Whether that
point is sixteen, thirty two or forty eight or some other number of
radials remains to be seen. I'll probably start with about sixteen and
see what kind of results I get with that.
I appreciate everyone's advice and input.
Tnx and 73,
Michael, W4HIJ

Daniel-

I think the easiest way to see this is by looking at the transmitted power having a value at the receive antenna, of so many Watts per square meter power density. The receive antenna presents an "effective" area of so many square meters. Its value depends on things like frequency, antenna size, gain and direction.

Multiply transmitter power density at the receive antenna, by the receive antenna's effective area to get received power.

But how do you determine your antenna's effective area? That isn't so easy! I understand a half wave dipole has an effective area of about one half wavelength times one quarter wavelength in the direction of the antenna's major lobes. On 40 Meters, that would be 200 square meters.

Once all the factors are known, you can reduce the calculations to Decibels.

Daniel,

Look up the Friis Transmission equation on Google.

Here is a little application for solving the Friis Transmission equation: http://www.vk1od.net/software/fsc/ .

Another concept that is important is reciprocity, but understand that limit of the scope of the concept (eg it doesn't capture differences in impedance mismatch from tx to rx).

Yes, that's correct. But remember that what counts is the signal-to-noise ratio at the receiver. At VHF and above, the majority of the noise comes from the receiver, but at HF and below, from the atmosphere. So at HF and below the receive antenna gain magnifies both the signal and noise in the same proportion and doesn't help the S/N ratio. The transmitter antenna gain, however, does, because it magnifies only the signal and not the noise.

> But what does the receiver get when it uses an antenna? Is there a
> notion of reciever gain of an antenna?

Yes. It's exactly the same as the gain the same antenna has when used for transmitting. This principle is called "reciprocity".

> In my mind I can't see that
> anything else than antenna area would be relevant. I mean, a reciever
> antenna shouldn't be able to suck in radio waves from the sides...
> Can anyone sort this out?

Sure, it's been sorted out for more than a hundred years. Antennas do indeed suck radio waves in from the sides, unless you're talking about antennas with dimensions of many wavelengths on each side. Waves aren't little tiny things like BBs, but big things that spread out over a large amount of space and interact with antennas in complex ways. Passing waves induce currents in an antenna which then creates waves of its own that interact with the original field. Ordinary intuition doesn't work well for thinking about this, unless you took physics in high school and got to play with a ripple tank. Lacking that, spend some time at a harbor and see how water waves interact with pilings and docks. Of course, there's always the option of reading some books on antenna theory.

Don't get hung up on an antenna's physical area, unless you're dealing with antennas that are many wavelengths across, like parabolic reflectors and horn antennas. An infinitesimally short, lossless dipole has nearly the same aperture ("effective area" or "capture area") as a half wavelength dipole. A fair size loop is about the same as a dipole. Making a dipole's wire diameter several times larger makes no

significant difference to its aperture. Aperture or "capture area" is simply an alternate way of stating gain -- if you know one you know the other.

By using the word "effective", do you suggest that the word area
should not be interpreted in it's literal sense of the size-property
of a surface in physical space? So it is not simply a matter of taking
the product of a height and a width (of a e.g. a patch antenna)? I
understand that the direction is a factor to deal with; that's
obvious. I also understand there might be losses if the frequency is
different than what the antenna designer had in mind. But I don't
understand how the gain makes any difference when receiving. Here I
use gain in the sense of transmission gain (radiation intensity in the
lobe compared to an ideal isotropic antenna).

> Multiply transmitter power density at the receive antenna, by the
> receive antenna's effective area to get received power.

I would totally agree unless I was confused about the notion of
"effective area". I guess my mental picture of a real physical surface
exposed to incident radiation is naïve and stops me from
understanding, but I simply don't know what image to replace it with.

> But how do you determine your antenna's effective area? That isn't so
> easy! I understand a half wave dipole has an effective area of about

I assume by definition the height of a half wave dipole antenna is one
half wavelength. But what about the width? Why one quarter wavelength?

>On 40 Meters, that would be 200 square meters.

This I don't understand. Again, it seems to me to be something that
would only be meaningful when transmitting, not when receiving.

Ok, at least that makes the definition of receiver gain clear!

I *have* done one experiment as a kid: I placed a dipole permanent
magnet under a piece of paper and poured iron filings on the paper to
see the pattern created when the filings arranged itself in the
magnetic field. So I kinda have some understanding how field phenomena
can behave. I just didn't connect it to antennas. Is it more correct
to say that a field is established between the two antennas rather
than saying that something is transmitted in a direction from one end
to the other? (Of course on another level, *information* is
transmitted in a direction, but I am referring to the level of the
electromagnetic field).

Ok, good to know!

> A fair size loop is about the same as a dipole.

As far as I can understand, the notion of "effective area" is quite artificial and only meaningful if one wants to fit a complex wave phenomena into a form where one can think of it in the naive way I have expressed in my earlier posts... Anyways, thanks for a great reply!

Regards,
Daniel

mostly it's done by empirical methods..

The idea is to relieve internal stresses by several temperature cycles, reducing at least one source of phase change.

In reality, what you want is "consistent and repeatable phase change vs temperature without hysteresis"... hysteresis or randomness is usually due to mechanical effects (stick/slip, etc.), so temperature cycling fixes it.

google for phase-stable coaxial cable and you'll probably find manufacturer sites that discuss it.

BTW, there's "low phase change cable" and "repeatable phase change cable", and sometimes one is better than the other in a particular application.

Your magnet experiment showed you one thing about a *static* field. Time-varying fields behave much differently, so it's a mistake to think that you now understand radio waves.

> Is it more correct
> to say that a field is established between the two antennas rather

> electromagnetic field).

No, it's not. One antenna creates a field whether or not the other antenna is there. The field propagates at the speed of light away from the transmit antenna.

> . . .

> As far as I can understand, the notion of "effective area" is quite

> reply!

Yes and no. "Effective area" or "effective aperture" describes the cross section of the impinging field which contains the amount of energy the antenna captures and delivers to its load. It's most useful in the analysis of antennas that are very large in terms of wavelength, such as parabolic reflectors and horn antennas. For those, the effective aperture is on the order of, and closely related to, the physical area. When dealing with simpler and smaller antennas, though, there isn't any direct relationship between effective aperture and physical size, which leads to a lot of misunderstanding.

Posting-Frequency: posted monthly
URL: http://www.faqs.org/faqs/radio/personal-intro/

Changes followed by "|".

The rec.radio.info newsgroup, first established in 1993, has been
recently revived by an active moderation team. We are currently seeking
suitable information, FAQ, and bulletin articles from the entire
rec.radio.* newsgroup hierarchy for simultaneous cross-posting to our
newsgroup.

We are seeking a replacement maintainer for the following information
bulletin formerly posted to rec.radio.amateur.* (and currently archived
at http://www.faqs.org/faqs/radio/personal-intro/ ):

radio/personal-intro
Subject: Guide to the rec.radio Newsgroups
Maintainer: jeffreyh@Hawaii.Edu (Jeffrey Herman)
Last Posted: 9 Nov 2001 06:18:17 GMT
Posting-Frequency: 15th of each month

We are willing to provide any technical support necessary to get this
article updated and automatically posted again at a regular interval.
This would include establishing contact with the original maintainer for
any necessary permissions. We would prefer to seek a new, dedicated
maintainer at this time, rather than start auto-posting the original
article ourselves.

For more information about our newsgroup, see:

http://www.panix.com/~rram/usenet/rri/index.html

Please direct any comments, questions, or criticisms to
rec-radio-info-request@panix.com.

Richard

It could also be that the micro SpinDizzy drive in the antenna tip has
run out of anti Higgs bosons. This would result in an unavoidable gain
in mass causing the antenna to droop.

Yes, I think this is the problem. There are multiple cables that must
remain phase matched fairly closely and they are exposed to the
weather. If there was a sudden change in phase of the signal on one
cable that would definatly be a problem. Any cable that does not have
hysterisis would probably work. I also realize now that the type of
cable being used is probably the worst possible choice. Just swiching
to a foam dielectic cable may solve the problem.

A little story of mine about phased coax....

No matter what the consultants tell you, make the two (or more) sample lines the same length and exposed to the elements in the same manner.

I ran into a sample loop problem on an 5 tower AM directional array where the coax from the sample loops were cut to the needed length and the phase difference was compensated for in the antenna monitor. There was a difference of several hundred feet between runs. Plus, one monitor loop was a hundred feet higher up a tower.

Once I made the sample runs the same using phase matched coax, coiling the same amount of coax on each tower then coiling the same access underground, the readings changed drastically and the array became more manageable. The insanity had ended!

Before installing the coax, measure each of them with connectors installed using a signal gen and splitter. Align the antenna monitor for 0phase on all inputs with a signal gen and splitter, then add the coax to the monitor with the signal gen and splitter on the other end before installing onto the tower to confirm system integrity. Excessive bends both in number and radius can change the phase of one line over the other so be conscious of how you make the individual runs!

If your under the FCC, make sure you have a CP. :-)

1528. Tower project - Phase 2 Complete

Newsgroup: rec.radio.amateur.antenna
Date: 2009-03-07 21:03:33 UTC
From: MTV <volztexas355@comcast.net>
Message-ID: <ujBsl.21032$Yx2.18103@en-nntp-06.dc1.easynews.com>
Source record: 17052

For what it's worth - may be interesting to those contemplating a similar project:

Phase 1 was finding 'such a deal' on a full sized 7-element Mosley Pro 57-B five band beam. Also researching towers that I wouldn't have to climb and still reach above my trees of 30-45'. e.g. 50' tower.

My first choice was a Heights crank-up, but cost moved me to Glen Martin Engineering's M-1350A package deal. (13" wide legs; 50' high w/guys) and their "Hazer" system to raise and lower the beam (with one or two guys temporarily disconnected at the ground).

Phase 2 was first digging the 36' x 36" x 45" hole for the base, then securing the tower rod base and pouring the concrete.

It took almost two weeks of occasional digging with a handy small "striker" shovel to dig the hole. That shovel holds just what I can lift up to the wheel barrow, and is easy to maneuver in the hole. I used a wood 2 x 4 frame which is also used for the top of the concrete platform. Easy then to keep sides vertical in line with the frame. The soil is a firm clayish-dirt mix. A problem not explained is what to use in the hole to support the metal tower rod base which only goes 28" into the hole. Why don't the manufacturers just make available longer rod supports? I ended up using concrete blocks under each of the 3 tower rods with a couple bricks on top to just equal the requirement for the rods with nuts to extend above the concrete the proper length. One handbook suggested a rebar wire cage in the hole, but I had no way to bend or weld rebar. I did try, driving around one morning to various shops with welding equipment, but none could or would do it. So, I cut various lengths of rebar and wired them at various angles and levels to the base and through the cinder blocks without going into the dirt sides. It made lots of surface area for concrete adherence.

The concrete: I'd checked some local concrete companies and had only two that responded with any interest. Actually, the closest to my home quoted me a price of $426 when I stopped by and asked, including a $125 delivery charge. Yikes! And it was close by and my "hole" was accessible so the truck could back right up and dump the load. As it turned out, when I was ready for the delivery I stopped by to prepay, and they lowered their price to $195 for 1.5 cu. yds., 3000+ spec, and no charge for delivery. I'd expected delivery in a few days, but they said they'd be over in about 15 minutes. They were, made the delivery, cleaned up their chutes, and in another 30 minutes I had it all smoothed out and finished!

I'll be letting it dry for at least a week. Now I'll be on to Phase 3, driving guy anchors into the ground, assembling the tower pieces, and preparing for the "several guys" walking up the tower into the air with the hinge mount in the base secure.

To be continued

$426 YIKES. I think it runs arounf 90 dollars a yard here with a 2 yard minimum order . There is no delivery fee unless you live way out in the boonies. I think they have a little truck that deliveres the concrete dry then they use your water to mix it for small orders, less wasteful but you still have to pay the 2 yard minimum.

Jimmie

Fed to Taxpayers: Up Yours! -- Insists on Hiding Bailout Data
http://wakeupfromyourslumber.blogspot.com/2009/03/fed-to-taxpayers-up-yours-insists-on.html

Who cares in America? All the bushwhores like
Alex Jones love George Noory for forbidding open
communications in America, while championing wars
against US as innocent folks all to further escape
the TRAITOR neocon LIAR war mongers for the crimes
of mass murder on 911. George Noory HATES America
to have Justice where a man like me could explain
the errors of a bushite's lawless ways in seconds,
and America can not be granted such wisdom to be
freely expressed where the good guys win. Sadist
Ron Paul wants to gut social programs blindly as
a corporate fascist, while claiming 911 was
committed by bin Laden - and, shockingly, (when
you consider the evidence available) that the
Iraq war crimes of rape, torture and mass murder,
are actually an American police action to defend
God's world - and Alex has ZERO problems with those
demon lies, and won't let ANYONE express the facts
on such History. To think that Alex insists he and
Ron Paul leads our "freedom" movement! Alex wants
to gun down innocent men in America as boasted,
and RON WANTS TO GO A GOLD STANDARD, BUT DOESN"T
WANT TO RECOVER THE STOLEN TRILLIONS. Who can
afford this continuing deliberate ignorance of
Alex Jones and the bushwhores, still asking for

our dwindling money to fight for anything but
Justice? Who? How much will it cost America to
donate to Alex Jones to afford US the public
knowledge that the Iraq war is a war crime? Or
that we have video of iron flowing like water
from the towers? How much?

Bushwhoring Enemies of the American Police

What a demon enemy of life these bushwhore enemies
of American Liberty are eh? No concern whatsoever,
for all the teen soldiers conned to die for those
who committed 911 in NYC. The millions of bombing
victims, the tortures, the rapes of American women,
STILL, TO THIS DAY, left undefended by "the law".
Evil enemy of everyone these demon fuks are. How
difficult is it, to understand the facts they feign
complete blindness on? They WANT to con you as the
coward to life they are, willing to kill America to
make their antiChrist lawless enemy Mr. Bush happy.

INTERPOL REJECTS CALL FOR ARRESTS OF WAR CRIMINALS

/ / INTERPOLï¿½s Constitution strictly prohibits the Organization from making ï¿½any intervention or activities of a political, military, religious or racial characterï¿½. \ \

Then, what the fcuk are they good for to not speak against clear war crime injustices against God and Humanity? Who pays for this without thought to question? YOU DO.

Alex Jones is a Bushwhore

Alex Jones stated today the reason why Ron Paul constantly LIES to America, is because he needs to play politics. Yes, he like Alex the censor of Truth, does not have the intellectual skills to ACTUALLY defend his silence of a grunts lawless position. 1441. American grunts in Iraq are dying for the escape of the Neocons, as NOT police officers trying to "police the world". Understand: Ron Paul actually sells bin Laden is the target for the crimes of 911. And Alex Jones, who we know knows better, refuses to defend Freedom's cause for Justice. No, today he told US he sides for a Con because he doesn't want America to openly communicate the facts to save our souls. Again, a bushwhore who believes Mr. Bush is above all the laws of the Universe as the Conservative bigot's false deity. Again, Mr. Bush closed 911 investigations as godless traitor. We, as Humanity, demand the demon enemy of Life, George Norry grant US the freedom to speak freely on the evidence available directly implicating the bushmobster Neoconners.

A Jew Speaks Out! - "All the answers are here."
http://www.webfilehost.com/?mode=viewupload&id=415673

'Israeli Military Attacks the Civilian Police Force'

Zionist Nazis CHOSEN for Public war crimes trials.
War crimes warranting death by Jewish firing squads.
Only Black Jews will be asked to pull the triggers
on the war criminals Convicted of mass murder. The
Zionist NAZIS confess to have broken the truce, to have
then targeted Christian School girls for deliberate
satanic mass murder against God ourselves, the Innocent.
Trying to have ourselves blame all Jews, instead of
the demonic zionist threat against Humanity. These be
not Jews who steal anothers home, but of that which
The LORD preaches. The Bible "I know the blasphemy of
them which say they are Jews, and are not, but are the
synagogue of Satan."

REVEALED: 'There was no Cabinet debate in run-up to war,'

Amazing News on Fox - 9/11 was an inside job told to troops
http://www.youtube.com/watch?v=Fbgd-mBdSjQ

9/11: Impossible Speed & Impact -- Busted! Updated
http://www.youtube.com/watch?v=L978nIT-AY4&feature=related

The no planes idea is mostly ignoring
the fact, that we all agree explosives
took those towers down as widely captured.
It's an inside job. The questions are always
cool, (though sometimes wasting time) and
by challenging our conceptions on what it is
that we can prove is vital if we're ever
going to understand that by Bush simply
closing criminal investigations on 911, he's
"officially" assisting in the escape of
those truly responsible for mass murder in
New York City. Why? Well it seems the Neocons
had this planned all along with those in NATO,

and the Chiefs of Staff, to con the dumb grunts
for criminal greeds. You know, a repuglicon.

-

Wizards of Money
http://www.takeoverworld.info/wizardsom.html

This stuff is excellent! They are playing
the odds exactly like the bookies do. It
is actually illegal to do that now when I
think of it.. ! We'll need to discuss this
internationally to gain a better focus.

Your Car Has Been Repo'ed

The derivatives recordings sound fascinating.
I know the banksters don't cover our loans, fraud
from the get go, but these available estimates
going as high as into the tens of quadrillions
are a mathematical impossibility. But for the
the 'value' of something speculated with
OUR assets as truly worthless to be an "investment
vehicle" for our futures. (Like Hedge Funders.) The
"toxic assets" are the crime scene evidence of
monster fraud, where for the sales of paper
arbitrarily determined to be worth zillions,
they took the real deposits as commissions in
the trillions, just like a bookie does but
usually far more fairer. At least that is how
I see it with my limited knowledge on this one
particular scam of the Capitalist Free Market
System of Lawless Corruption Due a Failure in
Real Leadership. - worthless pieces of paper
America has paid trillions already as dahh..
LuCkY WinNaaAhhs. Do you People even know what
a Hedge Fund is? They hedge US out of the Markets
by nickel and dooming everything to undermine the
Market in it's entirety. And, some of these
people have "earned" as much as a trillion
dollars personally in the span of a short few
years under repuglicon misrule. Geniuses? Hardly.
What every Bookie does as a felony warranting
unjustly Life probably. They trade bets,
and take their cuts, paying themselves with the
money the private Investment banks hold, leaving
derivatives as balanced collateral, BUT, a
derivative can have no actual value. It's just
the rules on how the cash will be divvied on this
next go-around with the suckered. As according

too to a 60 Minutes spot on this very specific issue. Now, the bushmob with Obama, CNN, FoxNews and some of MSNBC have been issuing the blind acceptance, that buying these "toxic assets" was a better investment, than publicly challenging ourselves on where all the actual money went? and for wHaT?? Manufacturing has been purposefully outsourced by the Bushmob as treasonous SABOTAGE, while now, to make up for a small percentage of the massive job losses, they, to FOOL YOU, include those who flip burgers as the new Manufacturing Jobs created to make the numBerts look not so bad - but for Christ's sake, who even cares enough to demand CNN to count our Lives as worthy of defenses? ..besides, the Private Investment Fraudsters told US already. Bonuses paid by Public Welfare in the trillions to actual billionaires, with one CEO bragging all he needed to do was fudge his books, and he then immediately qualified himself for 272 million! IS FOR REAL. It was in the Washington Post. No, nobody was arrested, yet, in fact, I wouldn't doubt he's going to try for a second Public Cash infusion to bolster his 'credit' that you can't/don't/won't know: the magical Banksters never even cover our loans YOU left for robbed dead victims - So, needless to say, these new Inter-National Trillioniares, that expect Ourselves to pay them back for minimum fifty long generations, have been going on one hell of a shindig binge of excessive excesses, but what about the continuing "CRISIS" of PUBLIC Banking left undefended by looting? Giving the banksters any public money is totally crazy when we think aloud, but more?? is a recognized crime in progress. Giving public money to banksters to do what they will with our investment is nuts okay? - even if they lent it back, of which they have formally refused, but even if they did, it would still be nuts because where is the public's interest being defended where they pocket privately by defrauding near all at 99 percent there also? It's like you EARNING a thousand dollars, to then be told by the banker, he's going to charge you a thousand dollars plus interest for cashing YOUR check at the only bank available for fifty miles. (Your car has been repo'ed.) Answers: The depositor should be recognized as the shareholder - and there should be no private interests existing to take in between our exchanges for goods and services. Banks need to be separate from the Casino frauds which comprise much of what the Market is

today., and a tax for every buy and sell needs to
be re-introduced. Obama, and the Repugs want US to
religiously accept the Banker Buildings rule our
Reality by giving of ourselves blindly in huge
error. We can work it out. Ego must be chucked
- facts are facts - and Justice is measured as
Freedom is cherished. In other words: No evidence?
Person innocent.

Trillionaires, whatyahfingureeh?

Johnny America for Coast to Coast Radio Host.

-

Children sodomized at Abu Ghraib, on tape
http://www.salon.com/politics/war_room/2004/07/15/hersh/index.html

Again, understand: these "American" soldiers
are still being recognized as heroes. American
"Heroes" in the Mansions of Florida going un-arrested
for raping, and/or torturing INNOCENT PEOPLE TO DEATH.
Erstwhile committed criminally, to assist in the
'escape' of the neocon traitors for the crimes of
massive banker fraud, 911 and Iraq. Bush personally
worked to close FBI 911 investigations, immediately
after the terror attack occurred. Criminal. Torture is
still illegal if you didn't know so as an American
victim silenced by Coast to Coast censorship on your
personal value system being sacrificed. Pick up a
phone to champion wide open communications - Justice
for All is Freedom won. Speak for US demanding
international 911 arrests of those directly
responsible for mass murder in New York City.
Starting with Bush and Cheney for obstruction,
and any other that would stand against the
True American Patriot. Justice for 911.

Yours Truly

Autism & Vaccines: U.S. Court of Claims
http://www.nvic.org//vaccines-and-diseases/Autism/courtclaims.aspx

The PROVEN fact here is that, without DOUBT,
Mercury causes brain damage one hundred percent
of the time. NO DEBATE. But Alex's NWO will blame
anyone but themselves for this communications
failure. NOT DEMANDING arrests against those in
government LIKE BUSH, who have consciously allowed
this massive criminal assault against all children,
continuing against our better judgments. Realize:
Alex Jones actually believes George Noory is anything
but a willing traitor who boosts in tale, propaganda
lies of death through terror to sacrifice American
GI Teens, all for the escape of the 911 perpetrators.
So again, I ask all to question, what is Alex's point
in not mentioning the crimes of the Bush Administration?
The Courts are being told to rule on whether a proven
connection can be found from vaccines to Autism, where
OUR Court should instead be ruling, mercury is a neural
toxic heavy metal causing irreparable brain damage.

Bobby Jindal Gives A Pathetic Speech
http://www.mefeedia.com/entry/bobby-jindal-gives-a-pathetic-speech/14744063

He looks at US all, like naive five years olds no?
Unless he actually talks like that all the time,
then we maybe should be asking, who actually here
voted for this guy 'publicly' by under estimating
on our present economic dilemma, including
absent Justice for You also? Repuglicons on
TV should learn about themselves firstly,, instead
of denying our wiser, stronger voices. Instead of as
lackey substitutions, who jack for the murder of innocent
others portrayed 'suckered', you lost to blindly whoring
for the war criminals in Israel. The 'lawless' Bush
administration DOCTORED the NIE on Iraq, while Bush
LIED repeatedly that, "Saddam wouldn't let the inspectors
in." Assisting in the escaping the TRAITORS responsible
for the crimes of 911. Bush closed FBI investigations.

/ / btw jindal was horrible...came across so
phony...but if that's how he really is...yikes! \ \

US repeating old Iran lies at UN
http://www.presstv.ir/detail.aspx?id=86904&sectionid=351020101

THIS IS FOR SURE TREASON NO?

-

Alex Jones is a Fraud

/ / A bank that received $1.6 billion in bailout
money just spent a fortune last week in L.A. hosting
a series of lavish parties and concerts with famous
singers ... \ \ While CNN with George Noory can be
only happy here watching America robbed and left for
more dying victims? Yup. Who cares? Alex doesn't for,
George Noory is a 'good guy', and what ever you do,
never encourage the truthers to organize for public
debate against the evil enemy forces of the Satanic
LIAR Coast to Coast radio programmingers. Why, because
Alex Jones THE LIAR, would lose, and Americans would win.
Again, never forget, it IS Alex and George who silence
those who truly speak for Justice in America. "Bush is a
puppet" is the call of a hypno mugger, who cowardly,
refuses to fight against those who PROVABLY commit lawless
acts of murder in America. Not a Jewish conspiracy, you
demon fuks who deny George Walker Bush. Alex Jones stated
today as a demon enemy of GOD, that the bible states
the AntiChrist will appear posing not as Bush. I again,
demand Alex PROVE his NWO FRAUD against the Son of Man.
I want free communications to face any or all who
disagree that the Bushite promotes lawlessness as
acceptable, while Alex wants to lie as a cheat to
only pretend his rights champion ours dying. No evidence
against the accused, is US being abused.

the banker does NOT cover our loans

/ / Alex Jones on Coast to Coast tonight to speak Bush the mass
murderer, is just a 'puppet' for lying that Saddam wouldn't let
the inspectors in WITHOUT CORRECTION \ \

He's a bushwhore. A soul who refuses others to actually
understand their own conclusions. It's all about Alex, and
not about Justice. Bush closed 911 investigations. He'll
go on and on about the new bank of banks their selling
against "all" as a diversion to understand, the
international private bankers have stolen trillions as
of late, and believe Alex and George ain't gonna let
Americans know: The banker does NOT cover our loans, and
even if they did, WHICH THEY DON"T, why give them our
own money to only hope that they will lend a small
back to ourselves at high interest? The derivatives are
crucial in understanding what is going on here, and Alex
is stuck in his bullshit, nwo crap, blinding him from
understanding how the scams went down. A derivative has
no real value, unlike ARGUABLY, everything else comprised
of 'free market' highjinx. It's like me selling you a
piece of paper with nothing special written on it, for
ten billion dollars. NOW; why would you do that? Because

the American suckers are on the hook for the loses because
Alex doesn't want smart people to speak. Steve Quail is
as real a demon enemy of God and man than anyone. "He talks
directly to God", and 'knows' consciousness can be
imprisoned into Military Intel. Comps., but doesn't know
Laden as falsely accused - delusional enemy of rational
thought denying, like Alex Jones, Justice and Truth.

Justice in The Gun State of Texas

Texas Prepares to Execute Man for Driving a Car Near Scene of Murder
http://maritimes.indymedia.org/news/2007/08/21460.php

/ / Forbidden cross examination of the State's
definition of a witness's statement as co-accused as
definitely un-constitutional. Who was the jury really and how
did they not know what was absent as American jurisprudence
there? Who was the Texan "Judge" to find no outrage in
absence of argument for 'final' verdict? What was he to
judge, if the defense council's request to be heard wasn't
recognized? \ \ See Humanity? bushite HATES US for speaking
wise for the benefit of all fairly.

-

Bushite Alex Jones "Obama is so much worst than Bush was"

So, don't arrest him for treason that murdered Americans?
Remember, Alex in eight years did everything he could to
not allow any to discuss BUSH'S crimes spree. Doctoring
the NIE?, prior plan from Condi? Or stealing 50 billion?
I could easily go on for paragraphs on DOCUMENTED CRIMINAL
ACTS - acts that Alex would not allow YOU to know need
defense to save the lives of innocent Americans.

What's The Point Alex?

Hey! Alex Jones said today Bush isn't guilty of nothing,
but boy, Obama is bad he'll tell you never mentioning
the FACT Bush LIED US into the Iraq war as a war crime. 1441.
Won't allow it. Why? He is a bushwhore, a believer in Bush,
the Antichrist enemy of Humanity who told US if we tried to
form our own conclusion, we would all be terrorists. NO JOKE.
Bush, the most evil man of all History, Alex claims is
guilty of nothing. Example: Bush, is his first days,
STOLE 50 billion dollars. How can Bush (the banker family
tied to Hitler) be above all the laws of the Universe
someone ask Alex. You know, Alex will hang up on any man
or woman who states in question, as he did with Peggy,
a once loyal listener, why he refuses to acknowledge the
evidence of Ron Paul being cheated through a fixed
election. Attempting as a demon, to demonize whomever
phones with such truths - like Ahmad, or Condi's 911 plan
for Enron. Alex Jones is openly a bigot, and a man who
has OPENLY confessed the willingness to murder INNOCENT
Americans - before allowing Justice to rule for the
defense of every American. I want open debate, he wants
censorship, so he can continue to masturbate to the
continuing deaths of innocent Americans. Laughing with
DEMON George Noory who claims Laden did 911, Hamas broke
the truce, and Iran is a holocaust denier. Enron. Has
Alex even ever mentioned it as motive for invasion of
Afghanistan? Never. Has Alex ever stated the Taliban

were simply asking for evidence to form anyone's
conclusion on who was PERSONALLY responsible for 911?
NEVER. THINK here. Even after me sending him email
after email for years. Alex states all who criticize him,
are delusional, because he warns people of poisons fed
the masses. So therefore, every last word I state about
Alex Jones undermining our wanting for real Justice is
correct without argument - As according to ALEX, he is
delusional. Wow eh? Alex is a stupid bigot as a matter
of fact. He'll tell you we gotta get past the left right
thing, (trying to steal my thunder - where i give to all
freely) yet, near next breath, or the one before, he'll
tell you what all Liberals think. Or all socialists,
or... blahblah Someone should ask him what Christians
think about letting the mass murdering LIAR Bush escape
Public trial for high treason by conning teen grunts who
are now dead. Bush PERSONALLY closed 911 investigations
immediately after all. Again, NEVER mentioned by Alex
as important to our struggle to arrest, try, and execute
those responsible for mass murder in Johnny's America.
An America were every Human life is worthy our protections.
Where Alex Jones is NO GREATER than anyone of US. He is in
a popularity contest, while I couldn't give a rats ass
what rupuglicon, or demoncrates think about my wise words
on God and Justice. Great entertainers I am not blindly
enamored with, nor do I believe FALSELY, demon Bush, the
Antichrist, is above and beyond all laws of our Humanity.
If 99.9 percent of godless Americans disagree with me on
God's will to have all neocons with the Bush Administration
arrested immediately for public trial for high treasons,
to hell with them all as they lose their rights rightly.
For, they are not our friends who willingly murder OUR
Humanity for stolen private Banker gains. Alex, a bushwhore,
a censor, wrongly believes Bush is guilty of nothing. A
bushwhore of the antiChrist he is. I mean come on, he
claims all those folks who followed truth mentioned in
the Bible were murdered. How stupid is that????? From
what I recall there was a misunderstanding, and well, that's
about it. How many American "Christians" actually believe a
man of God actually walks this world? How many? Being Gay
is okay with me. I'm not Gay, but still to each his or
her own, as long as your not infringing on the rights of
another to do what ever they choose. I love all children
too much. Real Freedom. GCN advertised HATE for Gay folks,
then at the website, murder - and the station sees still,
no problem with dividing our innocent masses on desperate
attempts to escape the neocons from Justice. That's the REAL
reason Alex states a derision for Liberals. Note: "Liberals"
in Canada are a right wing party that disbanded the RCMP
corporate crime division as perfect example, and! sent a

Soldier to prison for refusing criminal orders. Never allowed by Alex, for his gold dealing boss has a son killing innocent Peoples for Neoconned cash in Iraq today. ALEX WANTS TO CENSOR US ALONG WITH THE ENTIRE BIBLE NOW WHILE MASTURBATING HOW HE IS NEVER WRONG? In his dreams maybe, but not our shared suffering reality. By the way, has Alex ever written for Justice? and why not?, considering he is so greater than all others who haven't been invited on his show he stupidly said two or three days ago, me, and everybody else here globally? Truly delusional he is for not being truthful. Be a man Alex and face me in open debate to defend YOUR idiocy, he won't because HE KNOWS, Americans would win, and we would look the fool as loser. Too cowardly to defend America he is, because he doesn't have the virtue for it, and refuses to hold respect for men like me hugely wiser than himself he works to keep all down for death. Alex claimed the will to gun down kids who steal copper. Not only a man unqualified to "lead the Truth", but not qualified to even carry a gun. He told US when hearing the bullets going into the backs of two innocent men in an act of pre-meditated murder, it was 'the sound of Liberty'. That is evil to all my friends, evil to US all. He has called himself "the white devil" while mimicking another he refused to allow speak for himself after all.. And no, a debate between US and Alex will not be done where he gets the cut off switch to deny all others under the sun who speak for real Justice. Real freedom.

Bush and Cheney are traitors to the cause of American Liberty. To leave them free, is to leave America un-guarded from further transgression.

Patriotic American Navy Vet is tortured by bushite nazi grunts
http://killfile.newsvine.com/_news/2006/12/21/491153-white-american-navy-vet-is-illegally-detained-tortured-and-tried-by-us-government?last=1166730840#last_4

Again, Reagan warrants death to all who torture, and a deep hatred for all ungodly in America who support it. Why? Because the vast American public (especially FoxNews treasonous LYING enemies of The People) DO NOT have the intellectual skill to understand what freedom is. Justice. Look at me! they can't seem to talk for Christ's interests, that smart ass know it all, where he thinks he's so ingenious where no one on Earth can find fault with his indisputable simple logic we share EQUALLY. (Bankers don't cover our loans for example) Kill my kids, my spouse, myself, before allowing John to speak openly in the public on Coast to Coast for open debate, all of Americans say in silence censored. Why does America continue to die this way? Because bushites are truly as they claim,

stupidly ignorant as treasonous cowards, or as prosecutable criminals, evil people who only want in this world to rob or murder People indiscriminately as enemies to Justice, enemies to GOD, a Criminal. NOT A JEW you fuks! George Noory will tell you freely all about his hatred for our Humanity, he does it near everyday, though People don't have the ears to hear, or the care. Too scummy. That remember! get American GIs murdered by the score with NO REASON AS FOR. Example: why bomb more than a million innocent souls indiscriminately in Iraq, if you have complete unrestricted access to go where ever you will? And, that Bush, Cheney, Condi and such, knew from day one, Saddam had all the WMD destroyed as documented fully, as did I. Documents that BUSH personally stole if you recall not listening to Alex Jones, Foxnews, CNN, or the CBC. err. maybe it was Bolton - s-t-o-l-e-n -.
Likely, as a likewise deeply ignorant person, you know little of Life as principled for individual freedom, and couldn't care less what this boundless Universe offers all in reflection, instead, it all about what's in it for you as a lying cheating thief to this mystery right? Wanna be a lawless mercenary to murder innocent people dreaming of becoming a private investment banker, who never earns a dollar in their entire careers, taking trillions undefended from Humanity just to see US suffer to deaths for our continued silence. All you have to do is raise your phone to demand justice in our times. All Neocons must be arrested for public trial, along with near every last member of the Bush Administration. PUBLIC TRIAL. And Soldiers must learn quick a commander who doesn't support getting those responsible by following the crimes scene leads, is a commander deserving of an immediate firing. Otherwise, what use is the grunt good for eh?

Again, Ron Paul like near all Libertarians, does not acknowledge the wanting of Justice for the high crimes of Banker fraud, Iraq, or 911! He took the "Truther" money, but refused to support the arrest of Bush for treasons times 50. Social Security he wants to gut like Health Care as a sadist who knows near nothing on how such systems currently operate. Again, he does not speak of recouping the STOLEN 1000s of billions from America, or the lives. STOLEN. What is it that you can't figure here? Fuk ego, FACTS. We are all effected by suggestion, this is why, since the dawn of time, evidence has been the prerequisite to convince ourselves of anything. Alex's cartoon storyboard, is truly, as measured, Alex masturbating with our precious times. Think:

Alex doesn't ask Americans why they don't support
the arrest of Bush for high treason because a world
where all are treated equitably is beyond his
understanding as a bigot. He could change, but he
is 'light years ahead of the Public'.. but of what?
All you need do, is every time Alex says "they",
ask yourself, WHO? - then know: the bartender at
"Bilderberg", isn't as FOR SURE guilty of crimes as
Condi from "Builderberg" is. The 911 plan came from
her very desk according to MSNBC, never mentioned by
Alex Jones. Why? You have to be near genius like
me to explain it COMPLETELY without even seeing it.
NOT MAGIC, more like meditation through understanding
our universe is ruled by good ideas. Alex is a man,
a Good man mostly, with some fears countered with
an irrational aggression (not thought through) that
found him blindly supporting the murder of two
innocent men. Not freedom. while I, am of God. An
actual god. The Son of Man as a matter of fact.
I want to tell you how great Life could be, but i
see so very little of words present to survive the
lawless corporate state. I AGAIN, will ask YOU to
forward this post to two People, but will YOU??
Torture is outlawed by warranting Death under Reagan,
and.. it's like the best way to resolve a FoxNews
'excuse' given to illiterate nazi grunts to abuse
ourselves as innocent others. Tell me I'm wrong.
. . KBR rapes American women, or murders them,
and needs to be hunted down by All American military
forces for it, as trialled to death. Including all
commanders of the Air Forces responsible for bombing
our families without causes. And lastly, any that
discourage our grunts from not supporting the arrests
of those that actually did US wrong. Get to it.

True you Fool

http://www.crooksandliars.com/Media/Download/16792/3/60Minutes-Tenet-2.wmv

/ / OH THE HORROR.... To those who say I lied about what
Tenent FREELY confesses (60Minutes-Tenet-2.wmv) LISTEN
in horror at what America is truly led blindly into
hell with STILL.. \ \ crooksandliars pulled the recording!
It it Tenant tells of the bushmob knowing in July 2001 bin
Laden was going to get blamed for a strike big in America
from a cave in Afghanistan! Then later, (not mentioned) in
AUGUST! Powell went over there himself personally, and gave
the Taliban 43 or 47 million dollars as an award. Swear
to God true. NOT HIDDEN. Look it up. I mean it made almost all
the major dailies. See? This is what Alex fears, that wise men,
actual wise men, like myself, can put this stuff together in

seconds by freely communicating for open challenge on error,
of what would take others committed to dying through censorship
for blind fear, never in a lifetime spared. Who cares right?

Johnny Law for Coast to Coast radio host!

Israeli Bombs inflict more pain on Gaza hospital
http://uruknet.info/?p=m51882&hd=&size=1&l=e

DEBATE OVER

/ / Late last week, a federal court ruled that
there was no link between childhood vaccines
and Autism. But the legal conclusion is not
enough to erase many parents' concerns and
the debate continues. \ \ Mercury causes brain
damage as a neural-toxic heavy metal. Love God
why don't you? Alex near always calls his
critics jealous, so, are you jealous? Would
you rather see every American child murdered,
or suffer toxic poisoning, before acknowledging

we are without challenge, the greatest minds of
our time? Hurt you does it? Can't find a single
argument against my demand for Justice, but dying
instead, claim my call for freedom practiced
is to good is to be true in your dying dummy world
censored? It IS George Noory that denies you the
respect a person who craves Justice for all 911
victims. Cartoonish Alex Jones, the bigot, sucks.

The New World Order Alex Fears
http://groups.google.com/group/alt.military.police/browse_frm/thread/c61e5ca386f9f07b?hl=e
n

This Specifically:
http://groups.google.com/group/soc.culture.iraq/msg/c681b8ed9de5ede3

Alex Jones, "Liberals don't like Bush."for
mass murdering Humanity as never elected
demon enemy of God he means?

He tries to divide the freedom movement
away from Justice for ourselves.

Question for Alex Jones NWOers, wouldn't
God, if we existed, wouldn't God, push for
a one world government where all are treated
fairly through Justice practiced? Yes or no?

America! I am King Johnny.. I am from the Planet
Earth, I've come to share the knowledge of Justice
in our times on behalf of this, Our Future Great
Triumph over Evil.

/ / At 8:51, the flight [175] deviated from its
assigned altitude [31,000 feet - therefore cell
phones impossible], and a minute later New York
air traffic controllers began repeatedly and
unsuccessfully trying to contact it."

And one minute later at 8.52, Lee Hanson
receives a call from his son Peter. \ \

Couldn't have happened, as is why, these phony
"FBI" bushmobsters stole the recordings and
don't want the still dying victims to know
the truth of the Neocon traitors to God and
Justice. Cell phones are not capable of
paralaxing above likely a couple thousand.
Someone on Earth would likely know the near
exact scientifically measured distance as nothing
greater than a couple thousand, for why the
need to put towers all over our fair cities
then? 31,000 feet is a distance of miles!

Hint: 5,280 feet in a mile. 5.871212 miles
in fact. Drive out 5 miles from your nearest
cell phone tower, oh yeah, and don't forget
to bring a elevator like aluminum box to stand
in, moving 500 miles an hour, then ask yourself,
how dumb does a Repuglicon or Obamanaut take US
for as silenced to the tyranny of mass murder
in my America?

TED SAID SHE DIDN'T HAVE HER PURSE
http://911review.org/Sept11Wiki/Olsen,Ted.shtml

/ / Ted supposedly told CNN that she called him
collect. However; once a credit card is swiped,
you can begin using the phone to make calls.
So, no collect call would have been made. \ \
The allegation also has been debunked by
reported to be, Airline officials who stated
no public phones were even available on 177.
That seems near too far fetched, BUT!, GTE
Airphone reports DO SAY - zero call assists
were made on flight 177. ZERO. So, how then
does she make a collect call then, and why
if as claimed, Ted and Barbara were madly
in love, would she not know her hubby's
personal number?

Remember, Ted was the coke pusher's lawyer in
the Contra case, of which Ted, was also
assistant secretary to the Solicitor under
Reagan. The Contra group if you recall were/are
pushing crack cocaine into major cities for
plans to undermine the American government for
illegal wars against peaceful civilized life
as stolen profit. YOURS.

FBI SAYS TED OLSON LIED OR WAS DUPED. NO 9/11 PHONE CALLS
http://www.youtube.com/watch?v=v78ibOa4PDE

The Olson story would make for good horror
if it just wasn't so horrific. EVEN I'M
SPOOKED. Olson tells of a elaborate drama
where he learns, she without her pursed
cell-phone, has to call through the phone
records of the Justice Department. How did
he forget that fact when first pronouncing
of how she had phoned him from a cell-phone,
or, then from an airliner that didn't have
phones in the cheap seats, nor tear-gassed
upper-classes? The trouble here is that
a small cadre of bushmobsters keep hiding
the evidence on CNN, FoxNews and George Noory

implicating themselves at the crime scene,
as illegitimate "intelligent officers" -
we WANT to know our media voices the voices
of those who support defending ourselves from
the 911 war mongering terrorist enemies.
Evidence is the prerequisite.

King Johnny Speaks Coast to Coast! Answers Everything!
http://www.mediafire.com/?myz0etmzx1y

Beverly Eckert - victim to mysterious plane crash
http://www.commondreams.org/views03/1220-04.htm

/ / By suing, I've forfeited the "$1.8 million average
award" for a death claim I could have collected under the fund.
Nor do I have any illusions about winning money in my
suit. What I do know is I owe it to my husband, whose
death I believe could have been avoided, to see that
all of those responsible are held accountable \ \

Americans Want Torture Inquiry, Obama Doesnï¿½t
http://www.uruknet.de/?p=m51793&hd=&size=1&l=e

(who spoke to Obama just several days ago about bringing
Justice for America - Beverly, a anti-torture campaigner
also, likely spoke to Obama on the interest for EVERY
American Christian to hunt for prosecutions of bushite
enemies who lawlessly torture innocent children to death
with General Miller - what's Obama's response outside
of more false arrests of Americans, torture, and bombings
while giving banksters more billions to disappear out the door
never to be accounted for either? not much to care, for
Alex Jones is running his cover, along with the bushmobster
neoCONners)

It's too bad Alex Jones, and his demon 'buddy',
George Norry forbids Americans to know of General
Ahmad, Bush closing FBI investigations, and iron
flowing from the towers as more important than a
passing fact he might have mentioned three or
four years ago - Alex I mean - George's direct
policy as so told to Alex, is NO INFORMATION on
who was personally responsible for mass murder will
be ever allowed spoken, while he demonizes millions
on hopes for more indiscriminate mass murders killing
mindless teen grunts to profit Zionism's war against
Truth and or God.

Stephen Harper copies John Howard WORD FOR WORD
http://www.youtube.com/watch?v=L8YwJC_nBgw

BANKER SOLUTION

Solution: refinance near zero interest, (as low as we can go),
and concentrate on returning all defrauded assets - working to
put money in the hands of our criminally stolen from Low Income
Grand Parents, who are robbed routinely in Casinos, and fraudulent
mortgages schemes, where the intent is never succeeding
but for the scammers playing US for suckers. Then, lower the
taxes on all essentials including, expenses of harmful Pharma,
clean up the food and the water with tight regulations - 'tight'
because it's well thought out scientifically,. (sodium Fluoride
is a poison) .All the while, gearing up for the Trial of Trials
- US vs George Walker Bush and Co..

This is FDR's idea that worked "refinance near zero interest"
So, a working plan could be to create a near no private profit
plan, but a public plan that profit's The People Instead of
Banksters stealing our public authority unchallenged by American
corporate culture for personal private interest left undefended.
The Depositors are the Shareholders! Broadcasting Everywhere.

/ / Provisions to impose a penalty on banks that paid hefty bonuses
and to cap pay at $400,000 for all employees at firms applying for
additional government funds did not survive the compromise, sources
said. \ \ Another sacrifice to America's "God" substitute. aka magic
private banker zillioniares, who rule the free thought of TV AmerikCo
giving your life without free thought to question.

Why pay bankers more when they DO NOT cover our loans?
Hate US still for speaking truth dying amerikcan dumfuk?

Widespread Suffering and Death
http://www.youtube.com/watch?v=gVdee2iXSVk&feature=related
[CNN pulled this A. Cooper report off youtube - accessory]

Notice no one shoots at the blimp fire bombing the
entire neighborhoods. And if it's phosphorous, that
smoke is already deadly toxic. That is why it warrants
the Death Sentence under International Law when used
against OUR Humanity, as the most evil of Nazi War
Crimes ever.

King Johnny's "Nazi Israel"
http://www.megaupload.com/?d=QAEXT4G0
(note: History has changed since then)

FBI Believed that Bombs Used on 9/11
http://georgewashington2.blogspot.com/2009/02/fbi-believed-that-911-involved-bombs.html

/ / Indeed, the FBI told a reporter for
USA Today that FBI agents believed there
were bombs in the Twin Towers. \ \

Awesome. Where is CNN and CBC here? Is
this an issue of life and death or no?
Who are they to judge OUR lives unworthy
of defense? I am King Johnny. Support my
demands for open communications above the
NWO shills who bark Bush and the Neocons
must be allowed to escape our Public
authority.

Eyewitness to Shanksville Crash - It Was Not a 757
http://www.youtube.com/watch?v=An_nXpr5K0A

Fake 9/11 Call From Flight 93 Exposed!
http://www.youtube.com/watch?v=L8JV3dJEJmA

These two "fbi" officers have to be brought in
with Mueller for questioning on Coast to Coast,
CNN, and the CBC. Likely the same two
responsible for following something near
3,000 leads, as so told to the actor, ah..
whatshisname about turban wearing zeros.

-
responsible for releasing millions of American made land mine
cluster duds that will murder as TERRORISTS do,
indiscriminately for decades. Perez, the DEVIL, along with
corporate news zionists, hold those crimes deserve immediate
executions with targeted strikes against the purveyors of true
EVILNESS. Please I beg, give G-D mercy.

http://www.waynemadsenreport.com/

/ / According to U.S. intelligence sources, at the end of
June 2001, the FBI intercepted two phone calls from Grossman
in which he told the called parties to "stay away from
Brewster Jennings . [Plame's TP SCRT Cover to nab REAL
terrorist WMD proliferators by using GOOD policing freedom
skills - with logical arguments, warrants, and everything!] .
. they're the government . . . they're nothing but a
cover." One of the calls was to a Pakistani Inter Services
Intelligence (ISI) top agent in Washington. \ \

So, the ISI was warned by the White House clandestinely, in
June 2001, 'some do gooder cops are on the prowl defending our
interests, looking for REAL terrorists who jeopardize
Freedom's cause, so, you'd better watch out for America's will
power, US might get US, and boy, then we'd be in for one big
hell of a surprise!,. eh?. Are you still with me? Hello?
Is someone else on this line? ... Yyyou'll never catch me.'

Marc "Johnny America" Grossman "Any country that doesn't go
along with US will be paying a very heavy price."

CNN Admits 9-11 Inside Job

Patriot of Great Britain arrested for sending
"7/7 Ripple Effect" to judge and jury members
http://truthaction.org/forum/viewtopic.php?t=4999

/ / Anthony John Hill, originally from Sheffield,
was arrested on Carrig Street in Kells this morning
on foot of a warrant issued by the authorities in
Britain.

It is alleged he sent DVDs entitled "7/7 Ripple
Effect" to the jury, the judge and members of the
victims' families. \ \

All of Great Britain joins US in demanding
the "Judge" to face trial for death sentence.
Peter Powers "did" the 7/7 bombings. Ask
Netanyahoo, he knows.

-

Report Of ï¿½People Planting Bombsï¿½ on 9/11
http://www.prisonplanet.com/report-of-people-planting-bombs-on-911.html

Why isn't Happy George Norry, Our Enemy, covering
this everyday as an important subject to defend
American life he holds truly in contempt?
Again, Alex Jones leaves every American to die
victim to his NWO, before he will acknowledge
TRUE evil in our world. George Noory, the evilest
ACTUAL Enemy of History, Alex claims is a good
guy for never allowing open discussion on 911,
Afghanistan, Iraq, and so on, without selling
his Zionist hate for our Humanity.
allowing the notion that he, and
his likewise cult, might just have something to
learn about evidence being a REQUIREMENT to prove
someone's guilt or innocence. His godless commitment
is to escape Bush, and his zionist media controllers
with excuses that don't hold water in any Court of
Thee. Alex refuses to allow Americans to know why
the Constitutional protections are there to defend
yourself, because if you did, you'd demand the
arrest of Bush for treason, and call Ron Paul a
sell out loser who pocketed the millions conned for
being Alex's loyal fans. Alex doesn't like this Truth
because he's gotta be leading Earth's "Truthers"
at the pinnacle of his spear as a liar, where all
of History, is one badly drawn Alex Jones cartoon.

I must be on crazy pills
http://www.uruknet.de/?p=m51615&hd=&size=1&l=e

/ / Well, why haven't the banks just returned
the money?... \ \

People who know they defeat all "Conservatives"
in seconds with indisputable simple logic, will
eventually rule the Universe, if CNN, CBC, and
Alex Jones allow open communications on what is
understood by all as high acts of treason openly
committed without a defense of smart people
explaining why/how we are being rooked as idiots
on purpose. Crazy man, crazy.

Oh, logic like, "Buying in bulk is cheaper."

"Army deserter deported from Canada, now in U.S. jail"

This is a for real war crime. Why? there was/is
no cause for the Iraq war. Truly. Example: why
bomb if you can go anywhere without delay? To
only murder innocent People INCLUDING SOLDIERS
to thieve from ourselves as war criminals is what
any rational person comes to understand. When you
destroy bushite grunts who war God for rape, torture,
and enslavement of our species, you save the
innocent lives of their next victims. To hunt
the godless bushite enemy, is to love Justice
as our glorious Humanity winning over the lawless
nazi grunts of the Third Infantry - who'll shoot
anybody, blindly as cowards, led by a Saudi, Buford
Blount. Their "leader" who left Iraqi's largest
weapons depot undefended for looting. Qaqaa. Killed
many a bushite nazi grunting lawless coward by his own
treasonous brand. And mumbling bushite nazi grunts have
what to say about American teens made valueless
victims for Neocon bounties? "whore yay" That's
about it..

LETTERS NOW RELEASED PROVE-Bush Intervened-To Suppress Torture
Evidence
http://www.democraticunderground.com/discuss/duboard.php?az=view_all&address=389x4994330

This is called ungodly nazi war crimes against
innocent Human beings.

Obama Gets Tough to Shield Bush Torturers
http://chris-floyd.com/component/content/article/3/1694-protection-racket-obama-gets-tough
-to-shield-bush-torturers.html

Who does Obama think we are as 'United' together
on pro lawless torture against innocent 'others'?
Wake up people, we are under attack by those
who refuse US Justice to win Freedom for
anyone. "Conservative" retards are completely
lost here, because they do not have the
intellectual skills necessary to understand:
a person accused of a criminal offense without
any evidence is innocent. Or, how about, No one
deserves to be tortured for confessions on
crimes left then unresolved for actual
retribution. [Aegis OPENLY murders innocent
families for more American paying for zionist
monies - P2OG - YOUR Spouse, YOUR Child, YOUR
family].

Following the crime scene leads of 911 to nab
the actual evil doers is beyond the will of the
deaf, dumb and blind? with lawlessness gaining
for monetary loses due America as corporate
cheaters. We are Brilliant, of that much I am
certain. Conservatives are minimally, idiots.

Worst Person in American Broadcast Journalism
http://www.youtube.com/watch?v=ll2YW32bqi4&feature=channel

is directly aimed at his own ideas of the subject
he has no grasp of. Wow. profound. See though..
this "popular" FoxsNews celeb has zero interest in
helping America succeed to defend freedom through
lawful actions, because he has no sight of a better
world blindly destroying itself. Hey Gibson! why
don't you try and be a good guy for a change! No
joke. Wow. Profound.

-

Israelis forced mother to choose which of her children would die
http://www.daily.pk/world/middle-east/9374-israelis-forced-mother-to-choose-which-of-her-children-would-die.html

/ / the soldiers told her she had to choose five of
her children to ï¿½give as a gift to Israel.ï¿½ As
she screamed in horror they repeated the demand
and told her she could choose or they would choose
for her. Then these soldiers murdered five of her
children in front of her. \ \

Funded by the American tax payers as a gift to
God as our stolen Humanity. Equal rights for all,
especially the Taliban's position in defense of
America, demanding evidence to form our guilty
verdicts.

-

Obama Accused of Blackmail over Terror Trial Evidence
http://atheonews.blogspot.com/2009/02/us-accused-of-blackmail-over-terror.html

Again, Obama is taking a position to torture innocent
people here as a traitor to Just cause. Just cause to
live in a free society. Torture warrants the death
penalty under American STANDING Law.

Video: Cop Punches Woman In Face Four Times During Arrest For Riding A Bike
http://www.liveleak.com/view?i=99c_1233639102

Top Cop Johnny Judge rules: Five years in prison.
Maybe fifteen if the dumfuk grunt, back from the
war against Iraqi children as a traitor to American
values, shows no remorse for his crimes against an
American women either. Absolutely any cop or soldier
who disagrees as true contempt for our freedoms with
punishment against this nazi trash pirating our
police uniform, WILL WARRANT death sentences all
around to ACTUALLY defend liberty in my America.
Any American father who prides in killing innocent
Iraqis for the escape of the neocons for 911 is no
father. And a wife should get the hell away from
a male who enjoys murdering helpless innocent others.
Children in such families should be challenged
by relatives through the Courts to save the lives
of our endangered offspring. Again, without water
or food, Iraqi children are murdered by Neoconner
grunts irrationally everyday with nothing to say,
aka, without reason but as Satanic Bush whores, to
make our God as Humanity suffer further for their
escapes as actually selling freely, lawless zionist
savagery.

KILLING MORE OF THEM - reporting war crimes to the Police
http://www.youtube.com/watch?v=gB-KaIBDNJw

Again, a bushite has no commitment to defend
America, for it speaks nothing for the arrest of
the neocon traitors. traitors like themselves whom
will murder innocent folks like your Self to steal
our common values. Wouldn't you glory in seeing
these savage grunts who on video, indiscriminately
shoot innocent families, or bomb a city entirely,
executed by Christian Patriot firing squads? or
televised to fry in the electric chair for these
documented war crimes? I sure would. It would make
our world a much safer place to raise a family
secure in knowing, bushite grunts as enemies of
everyone, were hunted to extinction for their
crimes against our Humanity. Hunted by Johnny Law,
the True Spirit of America.

Johnny Law for Coast to Coast radio Host!

yaahhh im a real person! Wow eh? Now,
let US bag some bushite scum for the Gipper.

UK judges accuse Obama Administration of suppressing torture claim
http://www.timesonline.co.uk/tol/news/uk/article5661291.ece

Yeah really. What kinda world does Obama take US
for here? Does he actually believe we hold no
interest in being attacked as ourselves, the
innocent forsaken? A reminder: an American was
executed under Iraqi law without any evidence
brought against the accused, while the grunts
were offered an excuse to seek not the culprits
at the terror scene. The case was lightly reviewed
at democracynow, a year or two ago, and can be
found by searching for a grunt pretending to be
an ambassador to Romania. A case where the Judge's
life was threatened by a "General", where if he
didn't order the death of the innocent American
citizen, the grunt with the General would murder
US all right then and there. The Innocent American
was murdered as forsaken for value shared by
free men. dying.

-

PetBed-CatTree
http://www.petbed-cattree.com/cat.html

Hey! this stuff for cats and dogs looks pretty
coool. Check it out if your a pet lover!

Near Impossible to believe!

/ / "similar themes go through all our streams. And it all comes back as Confucius says, "Do unto others, as you would have them do unto you." And Christ said that, Hillel said that, Buddha said that, everybody says that, cause that's all it is. But bushite, he wants to accuse People of criminal offenses without any evidence, and indiscriminately slaughter everybody in countries, for no good reason but to be OUR ENEMY, an ENEMY OF ALL PEOPLE." \ \

-

AG Holder-- First, Jail All Bush's Lawyers
http://www.consortiumnews.com/2009/020309.html

For actual documented criminal actions against American interests in defending ourselves from indiscriminate robberies, tortures, or mass murder.

"Judges Bribed by Private Contractor to Sentence More Kids to Juvie Detention"
http://www.philly.com/philly/opinion/inquirer/20090128_Editorial__Judges_Sentenced.html

Christ speaks!! Echem.. This is called a criminal action to falsely imprison American children for more stolen money. Will the contractor be arrested, tried, then executed in America to defend American children? Unlikely, because it isn't as important as how fat Oprah is today, or as Alex Jones the bigot would say, on how daily, the hidden NWO elites are responsible for every criminal action against Liberty in America, not war crime dictating LIAR Bush who told US Saddam wouldn't let the inspectors in without corporate news correction, Bush, who closed Police investigations on 911 for Enron, KBR, and the Kissinger associates. And certainly not Bremer for personally stealing tens of billions, no no no, "just puppets" "just puppets" as instead, the Illuminati in other words not allowed spoken understood with Alex Jones NWOers. I want a free to speak arena where 50 percent of what Alex spews is truly dumber than stupid. Why? because he is controlled through his personal weakness of bigotry, to actually believe foolish things as factual. Examples are truly endless when we discuss Alex Jones' dumminess, but here is one example. Alex states 911 truthers were attacked in a TV show as NWO mind control- but, the "truther" he referred to talked in the drama on there being NO PLANES! A dis-info bushite stooge if ever was one depicted with special effects. We suffer with his bullshit every day, knowing if we tried to phone, would not be granted a minute because I, in support of Freedom for America, make all bigots look truly

dumb as fascists lashing out at nothingness to
divide our masses. And apparently, he can't have
America becoming greater for defending ourselves
fairly through Judicial actions. Yet.

-

which side are YOU on? by REBEL DIAZ
http://www.youtube.com/watch?v=8Dr05tXktSo&e

The side where a person accused of a criminal
offense without evidence is innocent, and in the
case of capital accusation, the false accuser
deserves severe punishment as an enemy to my
Humanity.

http://houston.indymedia.org/uploads/2008/06/johnny_the_law_man_america.mp3

Again,
Nazi Israeli responded by murdering innocent Christian
children as war criminals with "disproportionate"
force. War criminals who murder Humanity to steal
our shared values.

-

Dennis Kucinich "Israel is Killing Children With Your American Tax
Dollars"
http://www.youtube.com/watch?v=HrtPpk6nhF8&feature=related

Israeli openly admitted that they targeted those
innocent Christian children for MURDER - as -
continuing "disproportionate" force in our names
as enemies of God and Humanity. They are not Jews,
but of the evilest group of lawless nazi savages
pirating the government of Israel away from US Jews.
I demand open debate in America, and Americans refuse
me by not likewise demanding international coverage
on the Coast to Coast radio networks. Let's change
this by communicating.

Ceasefires, Israeli-Style
http://sjlendman.blogspot.com/2009/02/ceasefires-israeli-style.html

They admit TODAY, as yesterday, and last week, month,
year, decades, that they target completely innocent
people for murder to punish Humanity for believing
in God as Just, or real freedom understood as practiced.
Libertarian couldn't give a shit on a issue such as this,
that they keep everyone ignorant of through hypnosis. Israeli
openly admit to thieving innocent peoples homes, to them
be sent at gun point, to live in a concentration prison
death camp.

http://www.davidduke.com/

/ / ..the Israel Prime Ministerï¿½s speech in which he
actually boasted of his power to order the U.S. President
as one would a dog. \ \ and all American men can't for
some god forsaken reasons, can't for their lives, phone
George Norry to be hung down on. George Noory is a "good
guy" for aiming to go ballistic against every American
who refuses criminal orders to destroy themselves.

Obama set to allow Bush-era ï¿½torture flightsï¿½
http://timesofindia.indiatimes.com/Obama_set_to_allow_Bush-era_torture_flights/articleshow
/4067338.cm

What the fuk eh? Doesn't Obama know this
crime warrants death in America according
to the war crime act? Does he believe America
just will never have a chance to speak for the
interests of US as innocent Human beings he is
planning to torture as an enemy to Life?

Refusing to Defend American Values

Yoo: Bush okayed torture to outwit defense lawyers

This is why it warrants the Death sentence. Remember
corporatist Amerikan citizen, these torture victims
that include children as younger than a hundred, had
not been alleged to have ever committed a crime in
their entire lives. Victims tortured to death for the
pleasures of those Satanic, such as General Geoffry
Miller, who tell US today as confidenced, they do it
because, patsy wasted American soldiers will just refuse
to hunt them down for formal executions. Let's change

this for our Humanity in this future, to look back,
and know, American males were men of the World, who
stood for the principles enshrined within every living
Constitution. A free man shall not be jailed, or
tortured by anyone in our names as Governed, without
the perpetrator tried publicly for execution as our
Love of real Justice. As first degree mass murderers
warranted death sentences under the War Crime Act
ushered by Reagan!, all done in for our protections
of their next innocent victim - ourselves. Or
die a death in corporate tyranny worthy the title,
cowardly traitors to God and Liberty. Blackwater,
CACI, AEGIS, KBR and the like will all be hunted to
extinction for refusing to quit their lawless Rape
and mass murder, murders done for more stolen money
as America's name high-jacked. The Lawless enemies
shall be prosecuted by the honorable Soldiers of
the Good old, Red White, and Blue. Count me at
our words on this, I am,

King Johnny

-

Ungodly Israeli Nazi LIARS Continue to Murder Children after "Truce"
http://www.youtube.com/watch?v=-HQO0774lx4&feature=PlayList&p=4199C9262539936D&index=0&pla
ynext=1

A truce means nothing to Hamas?, who states
much of no complaints as in support of Israeli
Nazi lies, why? Have you seen where a blimp is
traveling about five miles an hour, fire bombing
thousands, and none have even a pullet gun, never
mind an Iranian rocket launcher to shoot the Satanic
demons down for God as Love? Why doesn't Hamas
at least admit, like an Israeli General has,
to be funded by Zionists for cash gains paid for
by Zionist Amerika? Why? Why is it that Hamas
suffered near no loses, but all the Cops who
voted who knows, died murder victims trying to
defend our family from Texan child rapists?
Along with thousands of others targeted as
innocent Peoples? Targeted. Why? Nazi Israeli
broke the truce!! THINKTHINKTHINK Demand coverage!
Hamas certainly isn't. ..maybe because they're
illiterates on the Cause of God's Will being
Just?

Monkey Business

From years after the fact still demanding Justice now:
http://groups.google.co.uk/group/alt.military.uk/browse_frm/thread/ca0e34fb32caeb0a?hl=en&
scoring=d&

Huh? "at last been disarmed..." ? How does he figure?
The equation hasn't changed. Example: The same
unaccounted anthrax, (that was disintegrated into ash),
still is not able to be measured as completely accounted
for, (never could be), but this bushwhoring war crime
apologist, tells US, it was only though the lawless
murder of our good friends and family for countless
generations, that he now attests without reason, or
evidence, to find Iraq in "fact" disarmed of it's still
nowhere to be found, weapons of mass destruction. (An
irrational reason he pronounced previous in corporately
broacasted public support of instigating heinous war
crimes against our humanity under the leadership skills
of the evil lying demon antiChrist, our Mr. bush Jr..)

Ron Paul defeats 5 TV 'experts' in 10 minutes
http://www.youtube.com/watch?v=0k92fTDReHg&e

Ron Paul is a traitor. They stole the cash Ron.
And, the Iraq war is a war crime. But Ron, the
Fascist, doesn't want THESE FACTS uttered. Why?
Because wiser men would prevail, wiser men like
me who understand buying in bulk is cheaper. Those
like Christ who understand, who KNOW, the banker
doesn't cover our loans - so why give them as much
as a taxed red penny?, let alone trillions as
officially unaccounted for? They are stealing the
cash Ron. Ask yourself: Why has Alex Jones
forbidden his bushwhore cult from understanding
Bush doctored the NIE?, or of iron flowing like
water from the towers? Because wiser men would
prevail and he can't have that. He called shooting
innocent men in the back, an act of liberty. I,
an actual god, unlike Alex, lie near never, but
maybe to myself when I'm lonely. Alex yes will

tell you rapists are free to do what they will
in Texas to American children, un-arrested, but
he won't mention it when the police chief is with
him on air, talking about how he'd like to be
exempt from traffic tickets for being so popular.
NO MENTION of the rapists walking away without
arrests made, no mention of Bush's documented
treasons on 911. Where are Alex's priorities?
In selling YOU out so he can be wealthy like a
bankster?, and have special rights over everyone
else that drives drunk, or speeds? a big hero
standing over our dead soldiers yelling, I told
you so, I told you so, I was right, I was right.
Again, understand: It is not by my will to deny
open debate with America, it is Alex, and his
demon buddy George Noory that denies out Humanity
this right. And when people try, like Peggy, or
Black men on Jewry, Alex lies cheats and steals
our wills for further thefts. Ron Paul's family has
millions taken from loyal Alex Jones fans. MILLIONS!
Does Ron do commercials with that money highlighting
the bushmob's plan to invade Afghanistan, dated two
days prior to 911 for Enron? Of course not, wiser men
would prevail to expose him as the charlatan charity
raider he is regarding Health Care, Social Security,
Public Schooling, earmarks.. It is unfair to measure
Ron against corporate nazi zionist whores of MSNBC who
willing, openly, kill American teen soldiers for
criminal neocon gains, as an honorable gentleman's
talk. Half honest People like Ron are extremely ignorant
on the workings of our world. EXTREMELY. I joke here not.
Evil is the deceived disguised - translated - evil
people are always dumb.

Corporate America says no, Charlie Manson was a genius,
but not, that most Americans are prone too easily to
suggestive states where they can be made to believe
anything blindly. Think: what does, "bin Laden did 911"
mean anyway? You should know of what I'm trying
to teach you here. That is how
Alex knowingly or otherwise, steals our rights, by
beating off he knows everything already. And some,
if not most, actually believe him without knowing
squat either. It's sooo easy that way - no study
required!! LIBERTARIAN HELL! Everything is not on
the Internet, where it near should be, but regardless,
a Libertarian can't be bothered to read anyway.

It's YOUR life. It's God's
Gift. Now support our rise for popular international
debates to get these Neoconners behind bars

awaiting Public Trials! "Public"thatsoyu!! Get to
the Phone to call someone to care man.. Johnny
Jesus has arrived! Justice Will Be Done in this,
Our Kingdom to Come.

Justice to the war criminals of
indiscriminate warfare would better serve ourselves
to halt for our safety. The bushmob did 911.

1. The ISI's General, Mahmoud Ahmad funded 911's Atta

2. We have video of iron flowing like water from the towers

Humanity Under Attack by the Zionist Enemy of Life

GAZA APPEAL THE BBC & SKY REFUSED TO SHOW
http://www.youtube.com/watch?v=c9kwpxlZorI

Not only that but the BBC argued that to show
innocent Human Beings suffering, in CRITICAL
life threatening need of desperate food and
water that Israeli nazi stole, (because they are
unlawful murderous thieves), would have them look
like they were partial to serving Humanity's
interest in compassion for US humans. Over the
Israeli terror Nazi tactics of indiscriminate
slaughter for more Amerikan welfare. Wicked evil
nazi bastards who too, DO NOT THINK IT BEST to
report Peter Powers committed the London bombing.,
Oh yeah, and mercury is neural toxic, anti-psychotics
make us crazy, and sodium fluoride makes us
stoopider while weakening your body for big cash
surgeries - ultimately leading to a profitable
death for dah' winnahs.. So, they, the BBC-NWOers
just needed to avoid the bath or shower,
humidity, Pepsi's purified bottled water product
lines, koolaids, swimming pools, Jacuzzi, Hot Tub,
Sauna, private Whirl Pools, and.. blh blh blh

The U.S. Is Required To Bring George W Bush & Donald Rumsfeld Before A
Court! U.N. War Crimes
http://www.youtube.com/watch?v=BRAlqkPbjP0

Olbermann | Bush Years: 8 in 8 Minutes
http://www.truthout.org/011809Z

Bush and Cheney are traitors to the cause of
American Liberty. To leave them free, is to leave
America un-guarded from further transgression.

The bushmob doctored
the NIE. Conned Congress, and Soldiers. Did 911,
by closing criminal FBI investigations immediately.

Alex and George don't seem to want US to know
these FACTS that demand arrests of the culprits
responsible for high treason against Johnny's
America. Alex wants your money, and EVIL George,
our enemy, wants your soul stolen for Satan.

Turley: Obama 'accessory' to war crimes if no prosecution
http://rawstory.com/news/2008/Turley_Obama_accessory_to_war_crimes_0127.html

Understand, Alex Jones doesn't want Justice
for Americans because he loses out to better
men that usher a greater life. He doesn't want
the evidence of George W. Bush made public to
defend American teen soldier's lives. The true
fascist Alex Jones, who in silence supports the
escape of Bush for treason, will fail our true
voice for Justice in our times. WE DO NOT rule
the truth we share equally committed to defend
ourselves from lawlessness. And you'll never
rule my right to speak freely over your intent
to sell us all out for monetary swindles, just
like Ron Paul did. Understand: Ron Paul doesn't
even acknowledge 911 was an inside job, or, that
Bush gave zero evidence to form Your opinion.

Israel to be Judged - Universal Petition
http://www.tlaxcala.es/reponse_signataires.asp?lg=en&ref_campagne=10&Page=1

The demon LIAR zionist Israeli is a godless enemy
of Humanity, much like everyone at Foxnews, CNN,
BBC, and the CBC. Our revolution against the godless
bushite shills, will not allow our revolution
through speaking honestly, (to become of ourselves
something greater), a chance to be televised for
our benefits. Bush closed criminal investigations
immediately after 911. According to the FBI and
Senator Daschle. CNN says you have no power, Foxnews
says you have no power, the BBC says you have no
power, the CBC, the same, like Alex Jones NWOers...
but well, don't believe it. YOU Do have the Power.

We must demand open communications to bring back
values WE ALL would agree to through polite debate.
"Conservatives" don't want this Freedom idea
expressed in general terms because, a "conservative"
is universally, minimally. a bigot. Why? Life isn't

like, their way, - then- all other opinion under
the sun on how things actually get done. (Aka
"socialist" traffic light repair men, or "liberals"
who want to treat The People fairly). Or who we are
as equals to our laws fairly practiced. Pay attention
to what I am saying here. Liberals can be Dicks with
a capital D too of course. But a Hannity couldn't
survive 2 minutes with me speaking on his very real
treasonous behavior in OUR public arenas. Behavior
done to escape the 911 culprits from the long arm of
the Law, with his conscious will of criminal deceit
exposed, we all learn to better defend ourselves.
And Shawn Hannity can't have that for ourselves, he
takes too much money from ourselves as talentless by
keeping US in the dark dying needlessly for traitors
never elected publicly.

Who am I you ask? Johnny Law. at your service. Look
me up with usenet to discover, we live in a world of
idiots everywhere pretending to be somebody by lying.
While I want US all to truly improve our condition by
actually understanding how bad off we are by failing
to respect ourselves for correction. Too many, know
it alls, with not enough to know you need evidence to
form a guilty verdict against an accused man or woman.
Not according to CNN, CBC, MSNBC, Foxnews and the like
however. Let's change this by supporting my challenge
for top billing at the Coast to Coast radio show hosting.
Look for me coming soon!!

-

Unseen Gaza High Quality: Part 1 of 6
http://www.youtube.com/watch?v=UeezoWRu1FU&eurl=http://whatreallyhappened.com/

Why is it that numerous visits don't change the
view count? What is this business of a=a+1, the
top secret, I'll go rhythm, that is way beyond
our comprehension in it's scientific complexity?
For Americans, okay, but the Human species just
isn't this dumb.

While Zionists OFFICIALLY target Christian school
girls for mass murder, CNN instead reports that
bushite grunts attacked girls in Afghanistan, posing
as Taliban. I WILL every celeb at CNN to be arrested,
tried and executed for the reporting they have done
today without facts. Remember: the Taliban played no
part on escaping those responsible for 911, and opened
schools for girls, and were brought together on the
single purpose to defend women. Death to CNN reporters
to LIE for killing OUR school girls. I HATE zionist

enemies of Humanity and God I am.

The Torture Ban that Doesn't Ban Torture
http://atheonews.blogspot.com/2009/01/torture-ban-that-doesnt-ban-torture.html

/ / Obama's Executive Order bans some -- not all -- US
officials from torturing but it does not ban any
of them, himself included, from sponsoring torture
overseas. \ \

Is America a nation of Law to Live freedom?
Because this SPECIFIC deviant action of Obama warrants
the death sentence under Reagan's "War Crimes Act".
SPECIFICALLY. Or, is it you falsely believe Obama
can do no wrong against innocent people here, where
an illiterate nazi grunt, maybe from South Africa,
will kidnap YOUR children, and torture them to
death for sadistic pleasure, with as they did using
power tools caught in Iraq, according to Iraqi
government official(s), and several soldiers from
Oregon, all because Obama has given an ILLEGAL!
"excuse" to NOT support following the crime scene
leads at our REAL murder scenes? Again, death to the
bushite dumfuk enemy of God, death to the enemies
of a freeing Humanity striving for a just society.
Obama needs to be arrested for this under the Law
as it stands I'm sorry to say my friends. Why?
Torture is illegal in all 50 states, (as Reagan
directly planned), no matter where you ship the
innocent victim to, or from! Read the War Crimes
Act, then demand Justice today, otherwise, it's
YOUR funeral. Obama wants to secretly torture
Peoples here, while lying to US ALL that he doesn't!
A TRAITOR! Who also wants to give bankers 100s of
billions of dollars more to disappear, that WE pay
for, out our door, never to be seen as our own
again.

Jack Blood interviews Richard Andrew Grove, an AIG insider and
whistleblower
http://video.google.com/videoplay?docid=6546044203900048624

Alive We Say

And Alex Jones gives us the same guy twice
a week that blames the Illuminati, while
encouraging that YOU TOO! can get money
for nothing like the banksters. Just give
the Alex Jones', NWOers, the "truthers" money
money money money. No time for affording the
explanation that the TREASONOUS bushmob
doctored the NIE. That Saddam wasn't in
violation of 1441. That a NEOCON is
identifiable for it's demonic LIES
against God and Man. Never to tell, the
private bankers don't cover OUR loans,
that Bush PERSONALLY worked to close
Police investigations immediately after
911 (obstruction), or that WE have video
of iron flowing like water that PROVES,
without doubt, bin Laden couldn't have
single handedly placed the explosives
in the buildings, or stole the black boxes.
Because someone surely would have spotted
him dragging his dialysis machine what with
all the professionalism of corporate news
media coverage regarding our horribly
suffering worlds. Alex Jones ignores the
treasons of Bush, as a Bushwhore, and
instead, tells US of how Obama is Bush on
steroids. He only wishes. What about
Justice for Americans Alex? Why for do you
forsake ourselves? For money? What about
the lives lost to mass murder, that you
allege to champion OUR TRUTH without saying
much of anything on real Freedom?, on real
Justice

I am a defender of
all that is right and just in this world,
because I don't need to lie like Alex does on
a huge host of issues. I'm more like Jessie
Ventura, in where I don't need/want to lie.
If I end looking foolish, (of which I like
never truly am), it's a benefit, because that
way, I've learned something. Alex knows
everything already, and 'is always right'.
Like I say Retarded. You weren't right by not
understanding that the banker doesn't cover
the loan. One example of easily hundreds. He's
a typical, he knows it all, know nothing dumduk
American. Hear him on health care speak as
Ron Paul does, and know, I defeat them in under
ten seconds. TEN SECONDS. This is why he hasn't
in years, allowed me to speak more than five

or six words. He's rather all America die, than
admit he does NOT rule our 'Ocean of Truth'.
I want the challenge of opposition through debate
to PROVE my skills beyond reproach. Alex,
every time, just hangs up on anyone who tries
to improve our communications by factually
speaking. Why? Because he IS TRULY deeply
ignorant on what freedom or Justice means. Why
we have law. What a consensus is. Allan Watt is
severely disabled in this regard, another Alex
Jones favorite. And this is why, Allan can't
take calls openly either. He has jerked off
with himself too long to quit now learning
super basic precepts, for like Alex, he "knows"
the inner workings of the 'genius' NWO elites.
Not Law 101, not Bush, not Rumsfeld, Not Condi,
not Torturers, not bank robbers, rapists, or
even petty thieves. Allan Watt isn't a bad guy,
he's just a chauvinist pretending he actually
knows something, when his real disability is
directly related to his absence in understanding
understandings. Doubt is a near foreign concept.
A challenge for Allan: can you get your 'genius
mind' around the fact that Peter Powers did the
London bombings, and not the Illuminati of 1463?
and if not, why are we so dumb to our present
plight that way? Don't get me wrong, Allen has
much to offer, it just isn't the issue right
now on saving our dying futures. Maybe I was
too hard on Allen, he is really actually kinda
cool. Alex Jones too has many incredible
moments of ecstatic clarity increasing in all
they joy of seeking enlightenment. .. Ok -
but this is serious business that requires
little dilly dally with what we'll have as
a side dish in Paradise Lost. We are talking
Human Lives have been destroyed by our inaction
to remedy these failures to communicate
effectively. and.. Jeeze, the weight of my
responsibilities, as just plain John, being
a/the Legos Man - for like the Family and
everythings, get's me never forgetting, all
we got are these words left dormant from the
power they truly possess in the minds of the
jack-asses. And.. here I am. I'm a Talker of
Words looking to make a break in the
NewZbiZ. Zzzz... Alive We Say! Alive!

King Johnny, from Earth, has come for talks.

-

The Zionist enemy, the most evil nazi sons-of-bitches
who openly advocate tyranny and oppression through mass
murder of ourselves as the innocent left targeted
defenseless. Enemies of Jews everywhere, the Zionist
cares not for facts on who's Life it destroys for stolen
gain by lying. That's why they target Jews, for fear the
Light of Truth would expose them as the Nazis they are.

Hamas doesn't have a military though, so,
why not demand the arrests of those who
broke the truce, and murdered innocent people
indiscriminately, on plans more Jews would
die for cash profit? Profit paid for by
zionist amerika? - the false imprisoning
torture and rape center for Neocon
Freedom.

The self-defence defence
http://www.guardian.co.uk/commentisfree/2009/jan/23/israelandthepalestinians-gaza

Court petitioned to arrest Livni upon arrival in Brussels
http://nawaat.org/portail/2009/01/23/belgian-court-petitioned-to-arrest-livni-upon-arrival
-in-brussels/

"We believe there were dozens of IRGC
personnel in the Gaza Strip during the
war," an Israeli source said. "Some were
killed; others went into hiding, and
others escaped."

See? the demon enemy of God speaks no
evidence as a TRAITOR to every Jew. A terrorist
nation that still steals humanitarian aid in
our public realm of left defenselessness. The
false allegation deserves a death sentence
by Jews against the war monger Zionist enemy.
A cause that Iran should champion, if in fact!,
this allegation by OFFICIAL WAR CRIMINALS WHO
TARGET FOR MURDER OUR SCHOOL GIRLS, is on it's
face, unsubstantiated as patently, demonically
false. As typical from any godless Zionist.

Where are the Americans asking for the
formal arrest of Bush for high treason?
Whoring for Alex Jones's contempt for REAL
Justice? The ignorance of all American
talk radio hosts speaks for itself. NO
knowledge on why acts of high treason, are
crimes against every American. The bushmob
doctored the NIE, and Alex doesn't want
Americans to know, because if they did,
they ask, why does Alex do everything he
can to escape those personally responsible

for 911, while then asking for money to
continue his fight against freedom in
America. Again how much money do we have to
pay Ron Paul or Alex Jones before they
will allow the knowledge of the Iraq war
against Human will is criminal? How much?

Obama! feel free to call
on me to help out with a plan for judicial
actions. That offer goes out to everyone in
Palestine, Canada or Britain too. Russia,
let's help out these fools by freely
communicating, what say you? Justice
for all is freedom to be. The Israeli cop
killers must be brought to justice for war
crimes. Those cops, were cops. And I,
am a man.

Alex Jones Rocks!

Now Alex has problems in "my" mind because I am
an ACTUAL genius, and he is generally, an idiot.
Today, he did one of his usual commentaries, however
this time, he was pretty honest with himself, and
his love for Ron Paul. Ron Paul sells incompetence,
and Alex corrected correctly!. that a.. sorry Ron
but these banksters know they're robbing us as
undefended blind men essentially. That's what I'm
talking about!! Look, Ron Paul can be a dumb Ass,
although, he's still not all that bad a guy. A Dumb
guy on things like economics sure, Justice, warfare,
Health Care, Social Security, ect. ect. but still.,
like a child learning of why the sky is funny
blue, isn't all that bad a guy really. He's
certainly not a war criminal, like Bush or
Rumsfeld are. Doing 911 then sanctioning torture.
While Neocons Champion sending illiterate American
teens for death as war criminal. Think about it.
Maybe he is..

-

ï¿½We have all these documents that are now
publicly available that prove that these
methods of interrogation were intentionally
ordered by Rumsfeld,ï¿½

Let us understand. These actions "give" a guy
like Willie Brand "the right" to RANDOMLY kidnap
men, women, or children, and torture them to
death for sadistic pleasure with his
Capt, Christopher Beiring. (I think that's

how it's spelt). But anyway, this is the truth. A bushite is a godless Zionist whore of Nazi evil, an enemy of America, who wars YOUR Freedom with criminal "excuses", for refusing to support the arrest of those responsible for 911. A TRAITOR, and could be wannabe rapist, robber, or 911 mastermind ringleader. Torture is illegal, and warrants the death sentence, according to, Reagan's "War Crimes Act". Some only suggest, that this was why someone tried to kill him as honorable. Death to the torturers of our innocent families, torture they do without apology as Zionist Military "Judges". Instead today, where they get salaries paid in the billions by the zionist giving nation of, a-mirror-kay, echem, America. Johnny's America. A nation where Justice will rule for the favors of all treated equitably with or without you. Honor me in company my friend. We have no rivals.

"they do not understand, the private banker never covers the loan. Never does a private banker reach into it's pocket to borrow US to begin with - so as a consequence, the bankers have just pocketed all the 'free' loot for nothing, TRILLIONS, and are not saying why should they help anyone else up with charity?" Then went on to say, it wasn't any of our business with what they did with the money. (But for to cover criminal fraud in the derivatives market, where the true value of said commodities were backed by ZERO capital. ZERO DOLLARS. WORTH NOTHING. So, think about who's truly giving it always here until Johnny, the man who came out of nowhere, arrived to explain everything in five or six minutes.

Support Johnny America for Coast to Coast Radio Host!

-

Gaza: 'I watched an Israeli soldier shoot dead my two little girls'
http://www.independent.co.uk/news/world/middle-east/gaza-i-watched-an-israeli-soldier-shoot-dead-my-two-little-girls-1452294.html

Getting away with murder as 'God's Chosen' chosen for death by war crimes trial more like. Death to the criminal zionist enemies of Humanity. Zionists who falsely accuse without evidence to respect our rights, like TV corporated Americans who treasonously LIE,

'bin Laden did 911'. Enemies of Freedom for our
Humanity.

[JEWISH!] Arrest warrant: Ehud Barak
http://www.wanted.org.il/ehud_barak_en.htm

/ / For violations of the Rome Statute
& 4th Geneva Convention \ \

They are murdering Cops

2-Bombings target house of Abu Ubaida El Jarah,
Police Director in Sheikh Ridwan area.

3-Airstrike targeting Al Zaytoun police station.

Nazi Israeli are murdering Police Officers,
and the families that live in the areas near
them as once defended from criminals.

It's like saying, every Cop in America deserves
a death sentence by thousand pound radio-active
waste based uranium/plutonium war shells because
Bush stole the election, then committed 911 with
the Neoconned Partners of Public Crimes, Cheney,
Rumsfeld, Condi with General Ahmad and Myers. Now,
I ask all Cops, does that make sense to you as
still remaining silent? You can be a man too, why
don't we all just give it a try. To the Telephone
Robin! Israeli are attacking prisoners held
criminally in their own Death Camps!! GET ALEX
JONES ON THIS! and.... the ADL! er.. JDL.. er..
let US join forces for the common good of all,
as so we will benefit everyone. That means
Justice for all, especially the Taliban for
defending American Freedom by demanding evidence
to form a conclusion of capital accusation,
regarding an unsolved case of mass murder.
Taliban blamed it on concern for life draining,
!AMERICAN ENTERTAINMENT TV! sports, weather,
Music, and news about some, who knows war we are
committed to now die you for, for better or worse,
of mass death and suffering against innocent
Peoples all for glorious Neocon tyranny of inter
national private banker IMF enslavement plans!
in some far off distant places. America! I am
King Johnny.. I am from the Planet Earth, I've
come to share the knowledge of Justice in our
times on behalf of this, Our Future Great
Triumph over Evil. We come in Peace with
a sword for War Mongers, and a choice for
'lawless' grunts of ungodly action against

Life as we live it. Targeting school kids
deserves death sentences, don't you think this
value is what every soldier should hold proud
with Johnny in America? In Israel? In
Everywhere?

Chief Israeli Nazi Rabbi "All civilians living in
Gaza are collectively guilty for Kassam attacks"

ï¿½In spite of rising the blue flag of UNRWA on
our schools, the Israeli army has been targeting
those schools by missiles and tanks shells.ï¿½

U.N. special rapporteur on torture calls on U.S. to prosecute Bush and
Rumsfeld.

[SATANIC ENEMY] Israeli warplanes attack Gaza during Truse
http://www.presstv.ir/detail.aspx?id=83073&sectionid=351020202

Satanic Enemies of Humanity Kill 8 Yr Old Girl During Fake 'Ceasefire'
http://uruknet.info/?p=m50983&hd=&size=1&l=e

A MEMORANDUM OF UNDERSTANDING TO KILL MORE
http://desertpeace.wordpress.com/2009/01/20/a-memorandum-of-understanding-to-kill-more-pal
estinians/

/ / Dr. Condi was very smart when she declared
at the outset of the most brutal Israeli war on
Gaza that it was the Palestinian side which
is held responsible for violating the six
-month truce. \ \

She lies, Innocent Christians die.

Nazi argues it's good to get killed Jews by
breaking truces with prison camp.

They shoot Peoples indiscriminately telling US
that's how evil they are to argue it's Your
fault though.

This post was passed to near everyone in our Secret
Service defending Obama. Let US demand Justice for
the Victims of 911, by warranting for the arrest of
every Neocon Nazi Zionist pirate of OUR Jewish faith
for Public trial on LYING for War Crimes against
our dying Humanity. War Crimes against God.

A ZIONIST LIAR'S TRUCE

/ / live images of an Israeli helicopter hovering
above the city and dropping its white phosphorous
bombs on the city \ \

Again, the Zionist deserves to die by public trial
today to defend the Jewish faith. Look at usenet.
These demonic enemies go, 'yeah, Hamas broke the
truce', they do it to kill you. To steal the lives
of innocent Peoples to profit off our deaths as
victim.

Zionists are Satanic Demon Liars of Satan

FIGHTBACK

/ / Israeli forces demolished the house of the
Sammouni family in Gaza City after ordering
them to remain in it for safety. \ \

Palestinian Children found with bullets lodged in their head
http://jnoubiyeh.blogspot.com/2009/01/palestinian-children-found-with-bullets.html

/ / Israeli officials continued to deny on Saturday
that their soldiers had deliberately targeted
civilians, \ \

The Zionist is an
enemy to the God of Love and Justice, of Beauty, and
Children. A zionist LIES with a hatred unmatched in
Satanic hatred for the survival of our species. I
beg you, hunt to bill the zionist war criminal who
charges we will not succeed to see every last war
criminal on this planet hunted down to complete
extinction, by public trial, then Jewish firing
squads. The Zionist has bombed US, The People
indiscriminately with out cause. It was Nazi
Israeli that broke the truce to get killed
Jews for money. They starve Jews in Israel
to attract more charitable aid they can use
elsewhere. They, as Nazis, will continue to
murder Jews for money unless WE DEMAND, their
formal trials and public executions. They have
murdered our families, and they will pay will
their lives for it as the directly responsible,
and in no way, will escape our rages against
them as the enemies of every Human Being
Living for Freedom. Every Human that loves
children. They HAVE ADMITTED to targeting the school
girls for murder with lies they were caught
doing. THEY DON'T GIVE YOU EVIDENCE. And when we
get the facts, it's near always exactly the same
thing: they steal our Homes, they STEAL our
lives. God calls the Zionist Jew Enemy of
the Synagogue to Satan!!

"We also need a massive overhaul in Our news channel
prioritizing, including to add censorship free, open line

public communications. Done to gain value in learning from
the art of conversations. We need still to appreciate the
values of a free society where Justice is above all, the
measure of our success to communicate openly."

The Ungodly Murder of Innocent Men by Israeli Nazis
http://atheonews.blogspot.com/2009/01/summary-execution-in-southern-west-bank.html

/ / At noon an Israeli military jeep with four
soldiers entered Tameiziï¿½s land. After 15
minutes the man was thrown, blindfolded and
still handcuffed, into the back of the jeep. \ \

Let us not lose the focus of fact, that these
people of ourselves live in a concentration,
prison death camp, robbed of everything.
in Curfew near anywhere in "peace time". And
still, to this day, do Nazi Israeli CONTINUE
TO THIEVE the Homes of god loving folks in the
region, guilty of no crime but to have been
born into such brutal ungodly oppression
against Civilization. And to see, face no TV
opposition as American tax payers continuing
to fund such war crimes in our absent names,
is a crime on to ourselves if allowed to go
unchallenged. Johnny for Coast to Coast radio
host. Free the Slaves! Free the Slaves!

Binding U.S. law requires prosecutions for those who authorize torture
http://www.salon.com/opinion/greenwald/2009/01/18/prosecutions/index.html

The ugly secret of Barak and Livni, the truth about the Gaza rockets
http://www.youtube.com/watch?v=8rqDzXeA-PQ&feature=channel_page

[HEY WHAT THE.. THE LINK IS GONE ABOUT GODLESS
ZIONISTS MURDERING JEWS IN ISRAEL FOR MONEY!]

See my Jewish friends, these zionist liars
will never escape our love for Truth in this
our new age. Killing Jews for money is as
evil as found, negligently criminal, agreed?
Agreed.

Gaza: lives in ruins
http://www.youtube.com/watch?v=OFWxEtWcT8w

'Ungodly Enemies of Life is the only way
to describe it from here Tom. They again,
are attacking People indiscriminately for
murder as sadistic Satanic enemies of God'

Someone should ask what King Johnny, The
King of the Jews has to say on this subject
of a Zionist's complete absence of morality,
as inhumanly bereft any common decency among
our brothers and sisters. I mean for Christ's
sake Tom, THEY ADMIT to sadistically
targeting our children for MURDER - as some
kinda Satanic demon whore to Pure Evil - aka.
Wanted War Criminals for Public Trial. Just
as the Nazis were for similar outrages. Let's
hope men of America are least half they were
then, but we are suspecting, they will as of
usual, balk as cowardly slaves to the private
banker man ruling their minds, it's a, no
wonder. Where is there that purpose striving
for a greater future living in a just society?
Where is the Christ in their Christianity?
to financially support the arming of such
unlawful Zionist killings in silence against
Innocent Christians?

Free Radio International Broadcasts Alive!

Johnny Justice for Coast to Coast radio host.

BBC argues with Israeli Spokesman over UN School Bombing
http://www.youtube.com/watch?v=VPGP1xWEkkk

Where is the evidence to form any person's
verdict, if none is offered as in respect
for yourself as worthy the title of free
men? I ask as your self? Or are you as
the cowards of most in the American military
who refuse to speak for the arrest of those
who did US wrong on 911.?

King vs Obama on Gaza - Christian vs Zionist
http://www.youtube.com/watch?v=oegClx-t20U

-

For the Popular Will?

Alex Thomson shuts-up Israeli spokesman!
http://uk.youtube.com/watch?v=zIQZ1-RFq6A

Wow. The demon LIAR will also say Hammas broke
the truce, and Israeli started this by stealing
innocent peoples homes, then imprisoning
ourselves, the victims, in a death camp for
indiscriminate slaughter. While they continue
to STEAL OUR CHARITY by breaking truces. What
is it that YOU can't picture?

"The view from the other side, that the Qassams are a retaliation for the siege that starves the one and a half million inhabitants of the Gaza Strip, [a prison death camp,] was not mentioned at all."

Masada legend galvanises Israel
http://news.bbc.co.uk/2/hi/middle_east/7830416.stm

/ / they committed collective suicide - men killing their own families, afterwards each other, until one [evil zionist liar] remained to kill himself. \ \

ISRAELI IS A THIEF WHO CAN'T SPEAK OPENLY IN DEFENSE OF OURSELVES IN OTHER WORDS? That is right. They, as documented criminal, lose every debate personally since before the dawn of Civilization because their position is clearly unsound. They are criminals who murder People in hate for a freed Humanity. They OFFICIALLY steal Peoples homes in that country didn't you know they proudly proclaim it so? And steal humanitarian aid from starving children. Targeted to murder children specifically as publicly confessed, 'it is Hamas WE blame', not them as demonic child murderers. Hideously evil as ungodly sadistic savages. Enemies of YOU, enemies of them, and enemies of me, the King of Jews Christ fellow from beyond the grave. They are so evil to God and Man, they tarnish everyone of US to not win justice sooner by blaming the actual bad guys. Justice is Freedom.

/ / Those white phosphorus shells used on the Gazans are made in the USA according to Jane's Defense. \ \

Again, these peoples are not Jews. Being Jewish is a religion. These thieves of God are Satanic in their LIES to betray the common trust in our words, that bind all worlds to victory, called freedom universal. Even tales of the Devil have him keep his word, with verses specifically condemning the self to damnation for targeting the innocent for death. God's the Word. Every word inside a fool's paradise. Including the periods. Not as like, I'm playing a word game, but that it in wonder, is all strangely here. Example: The Universe as it has existed always, is not separate from our 'pauses', or faulty drawn conclusions. The universe, in one sense, was

as good as anytime, created 6000 years ago.
AS TOO 50 billion. You say, impossible, I
say no, study quantum physics, and know, I
live this.. our existence is not scientifically
separate from the timeless nature of
consciousness, proven as not only theoretical,
but actual. That is a first step at developing
a REAL relationship with the living Universe
if you want to as like an artist does - that
TOO! can be just as thought static in it's
orderly constructions for Atheists. (An
Atheist is still mostly a fool here however.)
Overall, for any, it's sorta simple: Life has
left YOU in charge of YOUR fate. Now, do well
to make something of this being as eternal Life
reaching for balance, as your body does, and
good cops do when bringing the bushmobsters to
Justice. By Israeli calling for more murder
against the innocent of your mind as racists
and bigots they are openly, is still shadows
of YOUR mind, YOUR WORLD.. get it, got it? God
is in genius to set Life as this, as like,
nowhere existing, but for as yourself within.
Will you speak out for the Justice denied
Humanity?, or not you? Atheists can be Just
too!, but generally lose it on not
understanding the intelligence of order is
way beyond what they dream up with
assumptions. All anyone has to do is ask
themselves, who do you mean "God"? Atheists
are ridiculous!, but, to each his or her
own, we are on a path here, believe what
you want to believe. This is not a faith
initiative I'm bringing by keeping this real,
I DEMAND JUSTICE BY OUR WILL BE DONE.

A zionist cabal of criminal pirates who murder
Jews around the world for stolen money is
seriously evil as criminal. What do you think?
Let US have a open line discussion on this
indivisible matter of rights to all as equals
before who ever we proclaim, I AM.

I mean you right? Say it with me... "I" "AM"
we are good to go.

-

George Galloway "The West has DOUBLE STANDARDS when it comes to
Israel"
http://www.youtube.com/watch?v=IIpvrOJQ0J0&eurl=http://whatreallyhappened.com/

A Zionist Nazi Being

See? A zionist Nazi argues it's good to get killed
Jews by breaking truces with a prison death camp,
cause look at all the free American Welfare money
we can steal through kicking-back AIPAC members in
Congress.

-

Harper complicit in Israeli war crimes
http://onlinejournal.com/artman/publish/article_4246.shtml

Canadians! Please war with words for open line
calls on the war crime enemy propagandist,
The Chorus Radio Network. CJOB STEALS millions
from Manitoba each year, and refuses all calls
for honesty in governing. They are actual
CRIMINALS.

Canadians Stand Alone
http://www.thestar.com/article/569872

Harper the proven war criminal
who will be going to prison, is the only person
on Earth that has publicly okayed Israeli Nazi
to target murder Christian school girls. Canada,
join me in demanding Harper's Public trial as a
war criminal. Prison for Harper who took a
honorable soldier who stated he refused to commit
war crimes against innocent civilians, and placed
him without trial in prison. Without warrant for
arrest. Harper, the Nazi Appeaser, is a War
Criminal standing against the Queen.

"Or is this another, popular amerikan past time,
of, who cares for the facts, we are at war with
God and Christ now?" Die bushite die Christ always
says against lawless torturers as mass murdering
thieves of Humanity.

shreveport man gets 15 years for stealing $100.00
http://wesawthat.blogspot.com/2009/01/shreveport-man-gets-15-years-for.html

Again, Americans need to demand the arrest
of the Judge and prosecutor for being openly
evil demons, as TRUE enemies to freedom in
America. But guess what? Americans will refuse
to even phone Alex Jones, or George Noory
to be hung up on. Just refuse as brain dead
zombies - as known in this circle, McCainiacs.
Did you hear Alex's NWOer yesterday state he
doesn't want anyone to speak as Justice for
Americans because to learn even the most basic

of precepts for Justice, he can't pretend he is
a Freedom Fighter begging US for more money?
Like multi-millionaire Ron Paul, who gave the
fixed election up to take our money and walk
away. How much money in the millions do we have
to pay them at GCN, before they will acknowledge
the Iraq war is a war crime? THEY NEVER WILL,
because the owner has a son who's into
raping American women as lawless enemy of Life.
Americans are indeed, selfish, like all the plane
crash survivors telling US how they couldn't care
less that Israeli nazis are openly targeting our
Christian children for murder with their tax
money, as unimportant, to how long they stood on
a plane wing, now approaching it's third day, of
wall to wall coverage. Telling us again of how
Christ saved your life as a lifeless degenerate.
I, as Christ, am really starting to hate all
Americans in total now. How difficult is it to
pick up their phones? They don't, and I'm beginning
to believe it's because, like GCN, they really
don't care for the future of our Humanity being
left for dead as continuing victims to EVIL liars.

Nazi Israel Broke Ceasefire as Satanic:
The Bush Administration and The New York Times v. Amnesty
International
http://uruknet.info/?p=m50870&hd=&size=1&l=e

UN sites shelled with WPh after GPS coordinates given

Livini was reported to say today that, 'every
innocent person targeted by Israeli, as such
driving in ANY car, or on ANY bike, or walking
down the street as then directly murdered, Hamas
will be blamed for. Heil Hitler' Well, I made
that last part up, but do you have the ears to hear
the screams for mercy given by Humanity?, while
this, the evilest of JEW KILLERS in the known
universe, (targeted, and murdered countless Jews
in Lebanon as one example), believes no man or
woman living can speak directly against her wanting
to MURDER even more as ungodly... 'Until the tin
can rockets stop falling on Jews' standing in their
detention centers, or living at the garbage dump
BUT.... THEY BROKE THE TRUCE! THEY BROKE THE TRUCE.
They will rob and kill US all my INNOCENT friends
as LIAR Satanic if you, YES YOU continue to refuse
to support my/our demands for OPEN COMMUNICATIONS
for Justice ourselves. Johnny Dazzler for Coast
to Coast Radio Host!

'Secretary General outraged at shelling of UN building in Gaza'

"I conveyed my strong protest"

Not good enough. Public War crime charges warranting
Death by Jewish firing squad, is what is demanded of
our Humanity. Death to the zionists liar war criminal
enemies of Humanity, instead of US, who they target
for mass murder.

Google have attacked US again as Evil doers..
They have again destroyed my writing with war
criminal intent to deny these truths as men they
could never face me, because they are not. They
STEAL our voices.

They are jewish criminals, not criminals because they are Jewish.

HERE IS WHAT GOOGLE IS:

"End the illegal Human occupation of Jewish land in Gaza!"
http://stoptheism.com/

HUMAN

These war criminals need to be arrested for Murdering
LIES against the lives of every innocent Christian
and Jew. Godless zionist nazi bastards are as evil
as they are dumb. Get every man who defends freedom
truly to hunt down these satanic demon ENEMIES for
thee True Jewish Cause, to ask it why it lies as an
enemy to HUMANITY, to murder innocent others as
evil doing thief to Freedom. A thief of Jews
everywhere to know truly God as Love and Justice.
Not only will Americans celebrate these neocon criminal's
freedom to call for the murder of innocent Christians,
as he does without arrest, "Americans" too, will as
Satanic refuse to hunt the ungodly enemy of the Jewish
faith down as Nazi hunters. No, Americans, cowardly, are
committed to dying with the Nazi Elite, as such
to escape of the Neocon terrorists who participated
in the mass murder of America for more stolen money
as war criminals.

THESE ARE SERIOUS WAR CRIMES

Israeli soldiers say they have OK to KILL Innocent People
http://www.mcclatchydc.com/251/story/59704.html

Israelis 'shot at fleeing Gazans'
http://news.bbc.co.uk/2/hi/middle_east/7828536.stm

They'll murder anyone human to steal our homes.

-

We battle injustice by demanding the public
arrest, and trial for execution of proven
war criminals. Now, who disagrees?

Israeli using Palestinian Kids as Human Shields
http://uk.youtube.com/watch?v=rXq57XK2L0A

Israeli Soldiers using Palestinians as Human Shields
http://uk.youtube.com/watch?v=FjEd4hJNVCE

Why do you as an American, refuse to contribute
to Just cause?

These monster enemies of Hillel are inhuman
to their prisoners, prisoners who had their
homes stolen and are denied freedom for being
born to Nazi tyranny. Demand Justice for
yourself as a Human.

Some Serious Evil Jarg in Dishonest Reporting
http://www.aish.com/jewlariousMultiMedia/jewlariousMultiMediaDefault/Israel_Unfair_and_Unb
alanced.asp

Forgetting about the truce given to those in
a concentration prison camp? Where they are denied
food and water? In curfew prior to near half the
days of the year, for years? How could they not
to claim such self righteousness? They don't bother
because they'd rather YOU were made innocent victim,
then them, Zionists who would screw you out of a house
called home. Did you know: they openly steal Peoples
homes in that criminal nazi state labeled godly?
Of whom openly thieve? Officially? Yes, and they try
to thieve the title of Jew from the Messiah too,
but I'm not going to a slave prison death camp
for innocent humans, I'm fighting back to demand
open communications to rule true Justice concerned.
Freedom is paramount. 911 perpetrators will be
brought to Justice by King of Jews Johnny Dazzler.

Israeli Murders Officer to make it look better

israel-fakes-rocket-fire-fatalities-in
http://stevenwarran.blogspot.com/2009/01/israel-fakes-rocket-fire-fatalities-in.html

/ / And we may assume that he was a non-Jewish
member of the IDF, given [...] \ \

Lawless evil doing for neocon lying criminals
really sucks man. Our friends are dying murder
victims. They are robbing our humanity of common
decency.

Neocon Enemies of the Jew do not Care for Truth

ElBaradei says Iranï¿½s nuclear program is legal: report
http://www.tehrantimes.com/index_View.asp?code=184534

But Neocon enemies of the Jew do not care for Truth.
They lie as enemies to God, on hopes to murder Jews
like they did in Lebanon with millions of land mines.
What kind of "Human" would commit such crimes against
Life? Cheating Liars for Satan Johnny tells YOU.

When Bush asked about his errors in judgement:

/ / you know, could I have done something
differently, like land Air Force One
either in New Orleans or Baton Rouge. \ \

Would have been better PR he means? Likely.
He walks away looking good, your family is
dead, or dying due to criminal neglect for
cash profit. Did I tell you that the private
bankers don't even cover our loans yet?
Trillions given by Americans, now Obama is
asking for more to disappear. THEY DON'T
even tell US what they've done with the
eight trillion already taken. Desperately,
Life Begs, THINK ABOUT THAT. King Johnny
for Coast to Coast radio host.

/ / So what is Ron Paul saying about Ron Paul?
I'd wager, he doesn't know himself, and fears
like FOXNEWS from open debate \ \

Excellent! if I do say so myself.

-

The Queen Shall side with The Great Nation

You can not hand over a prisoner for the crime
of refusing to commit a war crime. Otherwise,
YOU'D be a war criminal like now Harper is.
A Zionist appeaser. The government of Canada
already decided on this issue, and the vote was
137 Patriot to 110 neoconned bushite dumfuk.
The Iraq War is a war crime. These be demons
that steal our democratic voices, by denying
freedom from a man who's capital offense, is
that he tried to be fair for all parties. See?
War criminals.

The Queen Shall side with The Great Nation of
Canada Vs. S. Harper on this. Ask her.

God Bless the Queen.

-

/ / destroying Hamas terror infrastructure \ \

As Satanic, they TARGET TO MURDER Christian
School girls, and claim, none on Earth will demand
their public trials for executions as War Crimes
against God, because to the Satanist LIAR, (and
many "American" "Christians") God doesn't exist
within YOU to demand Justice for our Times.
YOU change that.

Evil on Parade

43,000 FoxNews Zionists in America, sign petition
in YOUR INNOCENT BLOOD calling for censorship of
Gaza conflict across all America

http://www.iraq-war.ru/article/186735

Stressing that Israel was "the first to stand
up against pure evil." [See? A zionist Nazi argues
it's good to get killed Jews by breaking truces
with a prison death camp, cause look at all the
free American Welfare money we can steal through
kicking-back AIPAC members in Congress.]

"I demand that the use of images and headlines
that misrepresent current events to the detriment
of the State of Israel be stopped immediately,"
the petition went on. [and the 'judge' judges
anything detrimental misrepresents the constant
LYING nature of the Nazi Zionist thieving pirates
of the Jewish Faith?]

This is detrimental to Zionist war criminals
because it exposes their TRUE EVIL NATURE..

Israeli Forced to Admit in League with Satan
http://uk.youtube.com/watch?v=zfFMZ7Y-s_c

Israeli forced to admitting, it lied as a demon
enemy of Life about tin can rockets falling
into the head of a good Jew, prior to the
Neocon LIAR's ungodly criminal attack for
senseless war against Humanity in the region.
When Jews die, these Zionists really take
everything like bandits., Peace where smarter
People speak freely for Justice? not so good.

The Other Side of the Story!

I Want My Bailout Money by Michael Adams the Health Ranger
http://www.youtube.com/watch?v=dnT21hmlT4o

Breakdown Dead Ahead
http://www.youtube.com/watch?v=yFCnVC2C8As&feature=related

-

Simple Common Sense for Mankind

/ / Israel has admitted HAMAS kept the cease
fire; and that Israel broke it, then unleashed a
total starvation blockade on Gaza followed by
flaming death from the sky aimed at schools,
hospitals, ambulances, and children, and you
dare call the people opposed to such barbarity
a "mob?" \ \

Zionists are evil people who pretend they
are honest, when lying directly to everyone.
Blitzer reports Hammas broke the truce, he
is lying to continue the murder of innocent
peoples. Understand: Israeli Nazi state they
will continue to murder our innocent Humanity
until the rockets stop falling on Jews. Yet,
they broke the truce, and murder Jews routinely
with reckless abandon. Jews from the Bible as
of "nigger" Ethiopian, are what the Zionist
hate when warring GOD for apartheid, apartheid
that is Humanity in Gaza. A zionist is a war
criminal who speaks not against the neocon,
but against Innocent Humanity as YOUR enemy.

Livni: Gaza truce would give Hamas legitimacy

As they always do because they are dishonorable
murderous nazi thieves of God as Just cause is.
I am, and YOU are, you just maybe don't know it
yet, or if ever. A zionist serves Satan to escape
the neocon terrorists from their ungodly crimes
on 911.

http://desertpeace.wordpress.com/2009/01/12/gazatoon-of-the-day-blaming-the-victim/

Ron Paul:
US Will Be Rightly Blamed for Israeli Killings
http://www.youtube.com/watch?v=6C756NOPyDA

Not the Nazi Israeli?

The guilty party are those who advocate these
mass murderers of innocent peoples with
deliberate lies, like from Blitzer. Blitzer
will be tried, and executed a war criminal
for stating Hamas broke the truce., Where,

only two minutes earlier, he learned, that
it was his Nazi partners. DEATH SENTENCE.
It was on TV. BUT SEE? Ron Paul, the Libertarian,
ain't going to be honest here. He'll lie cheat
and steal Humanity's voice for Justice - like
he did with OUR money. A typical Libertarian
like Alex Jones who wants to blame "socialists",
"Liberals", aka, all of innocent America.
Blitzer is war criminal, who makes his own
discussions. As is Ron. What an enemy to not
mention the truce. THINK: IT IS THE ISSUE. But
Ron plays the dummy to kill more with contempt
for Freedom. Ron Paul, the bigot, asked,
'should we be doing this'? SEE? it's not first
degree mass murders, no, according to Ron Paul,
it's argumentative that indiscriminate mass
killing is a good thing really. Remember,
Ron Paul does not support arresting those
who committed mass murder on 911 either.
Or those who STOLE TRILLIONS. Or lawless Bush,
the ACTUAL AntiChrist enemy of God. Ron Paul
will watch America die for a stolen dollar.
And Alex Jones will refuse all calls to label
him good guy like himself warring order
to our universe for it.

Israel is [NOT?] responsible for these childrens death
http://uk.youtube.com/watch?v=Y9PIZQqIep4&feature=email

Ron Paul "When we pick sides, we make it worse"

He also took our millions donated for freedom
fighting away for his family, but not our own
as dying innocent victims giving. Pick a side.

-

Contribute to our rise for the popular will

Alex Thomson shuts-up Israeli spokesman!
http://uk.youtube.com/watch?v=zIQZ1-RFq6A

Wow. The demon LIAR will also say Hammas broke
the truce, and Israeli started this by stealing
innocent peoples homes, then imprisoning
ourselves, the victims, in a death camp for
indiscriminate slaughter. While they STEAL OUR
CHARITY. What is it that YOU can't picture?

Hi. My name is King Johnny.

TALK IN AMERICA
http://www.mediafire.com/?mxw3nzi4nzf

-

/ / The targeting of civilians, whether
by Hamas or Israel, is a war crime. \ \

They are targeted by Obama who suggests
there is an argument to be made here. There
isn't. Nazi Israeli DEMON LIARS broke the
truce to kill Jews for money. They are godless
enemies of Humanity. So it isn't that we are
pro-Palestinian, it is that we are pro-Human.
Zionists DESERVE to die, before US, the innocent,
they target for murder for stolen cash gain.
Like Obama has promised to do for AIPAC. But
what about the rest of US 6 billion plus Obama?
Who is it of US innocent folks do you wish to
MURDER, or torture next as a Zionist war criminal
for Satan Obama? Torturing kids is popular in
Israel, tell US Obama, which American father will
have his children tortured, or murdered
sadistically by yourself as a whore for Nazi
Israeli? tell us, we're not waiting.

The Chosen Bad Example

Zionists Destroy Our Homes as Satanic
http://www.youtube.com/watch?v=mo2HW4T7wK4&feature=related

When I see the women and her child, left outside
while they sadistically destroy her meager gains,
I grow weary with ourselves for not speaking right.
Nazi Israeli are committed to deny US our God given
rights as Innocent persons to speak freely for Justice
realized. All because they STEAL our Lives for monetary
gain. It is our reality, give it or take it, YOU LOSE.

Then.. Hammurabi founded Civilization.

I go concerned for any hesitations of condemnation by
Obama. It's like, he's talking some jive about
how now he'll NOT let the words of Hamas reach
his ears. Being against war criminals, doesn't make
you pro-Hamas, necessarily, it means your against
war crimes to defend the lives of ourselves respected.
Remember: He told US earlier during the campaign that
he wouldn't fear speaking to anyone, Hamas especially,
because he was confident he could win the discussion on
Liberty, by principles that unite all free men. Now,
he has promised the FBI's Most Wanted AIPAC, he will
pretend to not hear any calls for fairness as all
parties united by common cause. Johnny Who? Where did
you go Obama? You were here, then.. pooof! you
vanished into the loving shackles of convicted/ing

criminals is a mass, "WE ARE TRAITORS TO JUST CAUSE"
organized war crime outfit, dedicated to deceiving the
Public by lying. I am not Lying. I'm not saying I hold
his associations as a measure of himself, I am concerned
with him stating, he will not hear our cries for Justice,
as then AIPAC cheered. I was as freaked out about it as
you maybe yourself now, believing it as possible. Check it
out for yourself, and wonder, just "who" is this person
they tell us they're are going to take for as dying fools?
I mean look at what happened to what's his name, when he
sided similarly the same in error as hugely criminal? Come
on be honest with us son, "Are you on drugs?". Maybe he's
just been stressed with all of everything he is heaped
to follow on, NOT to know by Blitzer, that Israeli broke
the truce to kill more Jews for money, and, also STEAL
innocent Peoples Homes while saying, "they are God's
Chosen". Yeah, chosen for, "The Bad Example", of how
Jews are left undefended by these grave robbing war
criminal nazi forces. As the King of Jews, I call for
Public War Crimes trials of the entire bushmob as
terrorists, and their supporters for lawless tyranny.

People are Coming to Town. Justice for All Coast
to Coast radio broadcasts all, until we have secured
the neocons in a prison cell awaiting the treason trials.

We are Good to Go. Rise Up for innocent Life,
or don't and see where it'll get you in the end.

TALK IN AMERICA
http://www.mediafire.com/?mxw3nzi4nzf

Nazi Israeli STEAL Peoples Homes without
apology, as a function of their SATANIC
government, while collectively bombing the
INNOCENT victims who die because of it.

Gaza 2009 - Operation Cast Lead
http://www.youtube.com/watch?v=hFEiOfLUfzY

Again, they are Satanic here because
they THREAT to tell you, yeah, Zionists
are casting the leads for the real mass
murder scenes - Justice denied Humanity.
God doesn't exist to defend yourselves
from war criminals for Satan.

War crimes trials with public executions
will commence against ever GUILTY zionist
living to lie that Hamas broke the truce,
that Georgia was attacked without provocation,
(again, CNN are not 'accidentally' conning

US here). And trials for every last living
bushite bomber, rapist, and torturer -
death to the bushite, the true traitors who
war against freedom for America, traitors who
war Innocent Humanity for the escape of the
neocon zionists.

-

Both parties cheerlead loudly for Israel's war Against Humanity
http://www.salon.com/opinion/greenwald/2009/01/08/israel/index.html

Death sentences MUST be willed by Christians for war crimes.
Death to the bushite, death to the enemies of God and Man.

-

For the Great Truths. We Stand United

/ / This option is also regarded
as a non-runner as the US would certainly veto that
suggestion. \ \

No no no no. What you do is investigate who this
the "US" person is as the GUILTY party my friends.
The facts have spoken for ourselves without contention.
And while we're at it, try to figure who that "Army
says.." person is too, we need to know who these
traitors are who hide their names backing war crimes
to continue. The Enemies of Civility, they are
enemies of US all my innocent friends, enemies of US
all.

-

Here on a Mission

/ / after dropping leaflets warning residents it was
about to "escalate" its offensive against Hamas. \ \

SEE! This is AFTER fire bombing the whole community.
Satanic evil enemies of Life. Who admit to targeting
any one who has ever so much as swept our streets,
warranting bombs dropped on their Block(s). SEE! they
are ENEMIES OF EVERYONE. EVERY LAST ONE OF US.
INCLUDING GOD.

It's a prison death camp, brought about by Israeli STEALING
OUR Homes as ungodly thieves. Thieves who leave a Jew
to starve to death in a garbage dump because, it'll
attract more charitable aid The Zionist can use
elsewhere. It's not a Jewish thing, it's a criminal
matter. They STEAL innocent Peoples Homes in that
country. God's Country? God would will such criminal

offense? Which God? Not the God of Abraham, nor by
the teachings of Hillel, Christ, Mohammad, or
Confusion? So which absent God do you speak where WE
can't speak as ourselves openly for Just Cause?
Cat got your tongue? How come your not saying anything?
The Israeli Zionist ENEMY wants US ALL in slave
labor prison death camps silenced away that's why!

Israeli War Crimes
http://bothwell.typepad.com/whos_your_nanny/2009/01/israeli-war-crimes.html

Well, maybe I'm wronger on Ron Paul than I needed to.
Hey, don't you EVER forget, I am a man also. We need
to meet on common grounds, to demand the start of
formal arrests for the bushmob crimes of 911, Iraq,
Afghanistan, South Osettia, and Palestine, as a group
together united by agreement for this one cause, and
then... we can later argue about how your ideas are
better than mine because I actually know of which
your speaking.. Hey! you could call me Daddio if you
wanted! To the telephones we go.

-

Israeli are attacking prisoners held criminally
in their own Death Camps!! GET ALEX JONES ON THIS!

Hmm... why wouldn't Alex? to support his fictions
over Our Rights to Live Free perhaps? A Hero adapting
to the deaths scene?, or, a Bush whore committed to
enslaving Humanity, all so he can say, he told US so.
Big hero or big hero. Your NOT powerless to his vision
of complete control over information. He refuses 911
info, Iraq war info, Israeli info. All so he doesn't
have to look the fool, while Humanity dies with his
insults against our wills to make something better
of ourselves. Justice is what I will. Masturbate on
your own time Mr. Alex Jones.

If he states again about how he knows everything,
and is always right, and those that criticize
him on ANYTHING are delusional, it's going about to
make everyone further sick with this obscene take on
what life means as Alex takes it. If I truly state
two nickels make a dime, does that mean therefor
they make a quarter also? If I say so like Alex
would? He is an idiot. Truly. George Noory figures
Hamas broke the truce, and that the Mideast solution
is that Jews should be separated with special rights,
as oppressors over the freedom of every Palestinian
Prisoner, and what's Alex Jones gonna say about
his 'truth telling freedom fighter' George to actual

'lame ass evil nazi traitor' George?, to YOU about how George is just trying to murder millions of helpless people as an offer for the final solution? We can expect Alex now to claim, Zionists should have special rights over Jews, all to maintain his FICTIONS on Noory being anything but the monster to Humanity he is. Just because Noory doesn't growl when talking about murdering all children in around the age of 15, or against soldiers who refuse criminal orders, does still make him a true fascist nazi enemy laughing at your murderers escaping to live freedom in our dying forsaken worlds. The bushmob doctored the NIE. Conned Congress, and Soldiers. Did 911, by closing criminal FBI investigations immediately. Alex and George don't seem to want US to know these FACTS that demands arrests of the culprits responsible for high treason against Johnny's America. Now, who's with yourself. I am! I am! I am!

Alex Jones doesn't know squat of Social Security, but pretends he does, like Ron Paul does when speaking of the Federal Reserve, Health Care, IMF, World Bank blahblahblah.. I mean even the expert of experts Alex has on near twice a week, EVERY WEEK, to talk all about how the Illuminati are doing everything,(give me your money now for whatever), DOESN'T SAY TO KNOW, it was Chris Cox who changed Investment Banker rules, to cover instead one tenth of WORLD INCOME loans, to one twentieth. MORE THAN DOUBLING THE ENTIRE GLOBAL MARKET FOR LOOTING WITH HIS SIGNATURE! (And. that isn't even a fifth of the TRUE trillions dollar fraud story.!) Now, granted, I wouldn't expect one tenth of one percent of America to have even a distant clue of which I am speaking, but importantly, Alex's expert of experts has never mentioned it. EVER. Why? He don't give a fuck, but how much money he can get you to give him for investing in things that are un-important to our struggles, but for the fact, he states, you'll get free money for nothing!! OUR ACTUAL PROBLEM. It reminds me of those Ron Paul dollars... where Ron'll fix everything, cause we, as a private company, are going to make YOUR money instead... holy fuk mon.. Talk about the kettle calling American racists. Thank God the FBI stepped in. (The answer unfortunately is not nowhere as easy as Alex would blindly lead you) - again, so I guess it will be, Americans were just too far gone as illiterate chauvinists, who cared too little for your freedom as themselves degenerating. Why? To battle tyranny they

knew not Justice wins the day, and blamed innocent groups gathered wherever, instead of following the crime scene leads at the real murder scenes - like was once done on TV and at the Movies. But even that was too far above their doped down heads, to raise their finger to dial a phone number.

How about stating "A lawless bushite enemy wars America as a traitor, to escape the neocons from the crimes of 911."

Then Alex states the head of GCN is giving out gold at less than it's value as a special treat, every second or third week. Below wholesale. Now, really think this thru. Do you think Alex is trying to con you here? you bet. That is the Gold Racket. Diamonds are another thing - where I've personally seen, about a decade ago, a huge press that makes Diamonds out of coal. Swear to God it's true. Costs to make diamonds are pennies to the thousands paid to Zionists who live in Israel calling for the murder of all innocent Peoples. Where is the rich Zionist, grave robbing Jew hater to demand Justice for our times? Where? Pressing coal into diamonds, while advocating the murder of our entire Human species. THEY WANT TO KILL GOD AS SATANIC ENEMIES OF LIFE. While I am last known to Life's enemies as Jesus Christ, the Zionist's end every time. I'll have brought more Zionists to their rightful dooms, than any other, of any time, anywhere. I HATE Zionist bushite LIARS to death, all because I Love Humanity too much, to watch US die undefended as the innocent forsaken. They can change their evil ways, but till now, often not, benefiting off our suffering as war criminals who simply lie as demons to steal our Human values. Let's change this for our betterments. I mean the Halo is a dead give away..

The head of GCN has a son warring God to rape American women as lawless enemy in Iraq for the Neocon - again NEVER mentioned as something worth fighting against for Freedom in America - soldiers are suppose to REFUSE criminal orders - but not when Alex is at the mike. He will never mention the Bushmob doctoring the NIE to con America for death as exampled, because it doesn't fit his fictions, where all the bad guys escape because they are geniuses headed by secrets so powerful, nobody can ever know'em, except Alex. He tells us near every day, he knows everything already, and is never wrong, therefore you can't criticize him. Bullshit. It's like he wants to be wise like Johnny Gawd is, without doing anything like

studying for a test where the teacher actually does know the issues. He told US today, the British came up with concentration camps, from the Indians - who spent all their lives murdering themselves. The British 'invented' false imprisonment? The British came up with the, Jews Killed Jesus? The British invented Pope Gregory VII? I suppose Alex has never heard of Ghettos. SEE? he just pulls shit out of his ass, and calls it like it's truly pure gold you'd wanna buy. Those, like your typical American have no clues, so they figure, Life must be sorta so that History is all one big Alex Jones NWO cartoon. What? that the NWO did 911, and everything else that use to instead, require criminal investigations to nab the actual evil doers? Alex Jones IS the NWO he tells US all we should be concerned about never stopping, like it was in the DARK AGES. Justice Alex, why is that hard for you as a "Conservative" to figure? Is it because you are cowardly in the face of true Liberty? Afraid that some People, on some Issues, ACTUALLY know a great deal better than you could even imagine presently? Don't like that do you?, where you don't rule this Universe as a lawless tyrant desperate to live in an illusion at the expense of everyone else dying victims to censorship? Does he try to find wise men or women? rarely. "Ron Paul [MUST] leads our truth movement" - like, fuck off already with the Ron Paul, The Truther, Bullshit Alex Jones. 1% is what YOU get on Social Security deposits - 1%. And.. Bush stole 700 billion. 700. Billion. That's 700 BILLION. It's a "Trust" account. A "Trust" Account. It's being held in "Trust" Alex. Ron Paul is asleep at the wheel. As, so are the rest of all you other fools.. I want Justice, and I want it now for all the victims of 911. Americans be damned, we want Justice, and We want it Now.

In Texas, child rapists are given the right to freely move about without fear that Texans will stand as armed Men in defense of their very own offspring. And Alex wants this for the rest of America. That some how to own a gun, means an American would kill a cop who beat a women near to death for pleasures that he could never be Publicly arrested for, as a sadistically evil nazi bushite fuck. Look, if YOU DID kill that particular DEMON COP after the Chief refused to arrest him, you couldn't possibly go to jail in Johnny's America, because the truth would win out in a fair verdict. And REAL cops would honor you with great big, thank you. Nothing worse than a

cop (or bushite grunter) who believes the Law doesn't
apply to him while he drives drunk, tazers someone for
nothing, abuses Women, or kids, to sell drugs, or
kills good cops, who are good men. (Like mercs do in
Iraq officially for Rumsfeld's P2OG. Coming to an
American city near you!)

Again, the two Laws of Johnny:

1. No evidence, person innocent.

2. Torture? fuk you and die then

"Rice says it is 'hard' for Israel to spare civilians in Gaza"

We KNOW they are ONLY targeting innocent People,
the ungodly zionist Satanic enemies say so..

"Israel Rejected Hamas Cease-Fire Offer in December"

Livni has declared her country "is not going to show restraint"

"Her" country?

It's like she's admitting here, that they DO NOT
target the IDF's Hamas, but only our innocent lives
as a threat to LIFE and GOD. Remember: the Zionist
LIARS broke the truce.

THIS NAZI ZIONIST FUCK BREATHES THE AIR OF US
http://www.youtube.com/watch?v=lMxfEsooM5M&NR=1

/ / So, Hamas decides it's time to end the
cease fire and has begun shelling Israel again. \ \

This guy even sounds like the Satanic false
accusing enemy of God he is. Let US, as Humanity,
hunt these real devils down, try them, and have
them executed publicly for the benefit of God and
Man. Understand: this REAL DEMON knows he's lying,
no living man on Earth could spew the vile lies he
does to excuse indiscriminate mass murder, or starvation,
as this Zionist enemy of life sells to STEAL Your
HOME, your Family, YOUR LIFE. An open enemy of God
trying to STEAL the Title of Jew from Christ. EVIL
ENEMY OF LIFE. See, when a bushite dies, you served
Life well in defending their next INNOCENT target.
BILL HIM FOR STATING ISRAEL WAS STRUCK THOUSANDS OF
TIMES. BILL HIM FOR STATING HAMAS BROKE THE TRUCE.
BILL HIM FOR STATING bin Laden DID 911. BILL ANY
Zionist FOR THIS TREASONOUS LIE. Why God asks? Because
there isn't any evidence to support that Satanic lie.
According to the FBI. And according to God, Zionists
are not Jews, but of Satan as enemies of every life

form in this Galaxy, Hunt him down, and bill him today for the love of God. You can 'hear' it in his voice.. how he lies TO YOU as a DEMON of a Hatred for Truth and Humanity. Facts, that are easily available, are not what he works to mislead others, others he hates, and wishes to murder for as ungodly sadistic pleasures as YOUR enemy. Bill him under American law for being pro-torture too while we're at it. Death to bushite, death to the murdering enemies of God's Love for Mankind, and enemies of TRUE Justice for Americans. The fuking demon enemy lies to you, as a con to STEAL your life, or just as soon, the life of another innocent other. Now, what are you going to do about it? Except his lies as exceptable, as he tries his hardest blatantly LYING to kill God and Justice in our Worlds? Not in mine, but perhaps Yours.

' In Civil-Contempt Cases, Jail Time Can Stretch On for Years for Americans, without Ever seeing a day in Court. '

Where are the arrests?, then firing squads for the Judges who 'judged' such criminality against freedom for US, the Peoples in America?

' Where Did Taxpayer Money Go? Panel Slams Treasury [FOR STILL REFUSING TO SAY] '

Where are the arrests?, they stole eight trillion and counting.. And Congress 'slams' them for disappearing OUR MONEY. Slams with what?, a, don't do that again please butt sqeeze? It should be massive slammer time, with a return of all STOLEN monies.

' THEREFORE, those pro-Israel politicians in Congress won their seats in part using stolen money. '

Where are the arrests? Amerikan bushite nazi grunts are assisting in the mass murder of innocent Christians in Palestine. War crimes demanding death sentences. It isn't an argument that can be turned around. Nazi Israeli STEAL Peoples Homes without apology, as a function of their SATANIC government, while colectively bombing the INNOCENT victims who die because of it. It's a prison camp! they are denied water, food, shelter.. since four or five truces over that they've broken, every one. These are Satanic enemies, willing War Crimes against God, a God NOT loved by zionist American Nazis. And a Son as powerful as the four winds, ridiculed by Zionists, and American know nothings, for the continued debasement

of YOUR soul worth here dying.

Israel Attacks Iran News Station

Why does not Iran DEMAND arrests, and death sentences
for these blatant war crimes against Humanity committed
by Amerikan Nazi Israeli Zionists? Along with the
perpetrators of 911? WHYWHYWHYWHY. Russians! Can you
help US out?

-

THE NAZIS SHELLED THE HOUSE WHERE THEY HELD
INNOCENT CHRISTIAN PRISONERS
http://uruknet.info/?p=m50596&hd=&size=1&l=e

Rise up for Justice American Christian, or
die innocent victim the Son of God does say.

-

Pictures of Alex Jones masturbating
"we were right about it all."

It's the NWO! The Illuminati! Not Bush, Cheney,
Neocons Gone Wild, or any of many other REAL
criminals, for the war criminals are just
puppets to his EVIL fictions. Forget about
Bush escaping.. Socialists who design traffic
lights, and Liberals who will to share fairly are
Alex's enemy, because he's fearful the FACTS
would escape his denouncements against truth
tellers. George Noory, one of the most despicable
individuals on the face of our great Earth
- is exactly the kinda guy he wants returned
to send his wannabe Patriots nowhere but to die.
What about Justice America? The bushmob doctored
the NIE. TREASON. There is video of iron flowing
like water from the towers, seconds prior to
the collapse. Alex ain't there to help US, for
that is where TRUE Patriots fight for real
Justice. When WE phone with indisputable facts,
on Ron Paul the bush whore sell-out for example,
he lies to all (GOD), then hangs up on US. Is
that the kinda freedom you think the Founding
Fathers had in mind to give Your rights to
speak for Alex who blames anyone but the
criminals directly responsible for your
funeral? The private banker never covers our
loans, so why give them trillions without
questions offered without answered as, never
mentioned by the guy who is 'right all along
on everything under the sun', and.. he 'rules

the Ocean of truth' too don't you know YOU have
a steak going all rotten to hell here also?
You'd think Alex would take our call just for
the challenge on where we stand? I'm free!

He is not. And George Noory tells us openly, he's
into killing innocent kids for profit. George's
profit is that apparently, by murdering all
children in around the age of 15, will stop them
from getting a clue at anytime in the future,
to take him out as an ENEMY of EVERYONE for
censoring our cries for Justice. Why is it that
Alex would invite obstructionist, Steve Quail,
or Alan Watt, on to lead you nowhere while they
jerk off, but where we gotta go to actually defend
ourselves? Steve has been on with Noory more
than a hundred times, and, we'd figure, Alex will
soon be delving into the Alien questions also.
Answerable by me in seconds, but ahhh.. like Noory,
doesn't want the truth of such a subject uttered,
just endless streams of illiterate bushite dumfuk
losers sucking on each other. While they wrest
from US the wonder; just why we can't stop
criminals from robbing ourselves, while murdering
our families? Alex wants to blame the unstoppable
NWO, while I, want to blame those actually
responsible, like Bush and the proven treasonous,
Neocon terorist liars who are pro-torture.
With arrest warrants. All of them. I'll do it for
Reagan's, War Crimes Act, as an act of respect
for my Great America, that's isn't always been
dying dead wrong under the leaderships of
criminals.

Israel hits Gaza after UN truce resolution

/ / AP Israel and Hamas responded to a UN peace
demand by hammering away at each other with bombs \ \

The IDF's Hamas is hammering away with what at who?
Is the AP referring to the tin can rockets that
travel usually several miles, but in one case,
22 miles? To kill a Jew standing outside in his
yard, thinking on how he would defeat true evil in
his time? Tin can rockets that contain no explosive
charge? Have no mistake, if it hits you in the head,
your dead, but really, what do you think the odds
are on that? E=mcï¿½. Or is this another, amerikan
past time, of, who cares for the facts, we are at
war with God and Christ now? Joe is an American Zionist
"Plumber", who has amassed a multi-million dollar

fortune in the competitive industry by shit eating.
Every bushite death is a mercy given to God in defense
of all that is right and Just in this Universe. A
lawless bushite enemy wars America as a traitor to
escape the neocons from the crimes of 911.

-

Traitors to the Cause

Bush and Cheney are traitors to the cause of
American Liberty. To leave them free, is to leave
America un-guarded from further transgression.

UN: Israel Admits Claims About Attacked School Baseless

US military re-supplying Israel with ammunition through Greece

House and Senate Compete To See Who Can be Most Pro-Israel

This warrants the Death Sentence to Republicans
who have committed America to these war crimes
- DEATH SENTENCES. Christ DEMANDS these trials
to start tonight on America's Coast to Coast
radio program. It's called first degree mass
murder.

Israel broke the truce on Nov. 4th, yet state they
will continue to murder Humanity indiscriminately
until a truce can be found that they will break,
as always, Being the Satanic enemies of God and Man
according to the Bible:

The Bible "I know the blasphemy of them which say
they are Jews, and are not, but are the synagogue of
Satan."

/ / UN Call for investigation into shelling of
Civilian shelter \ \

Investigate that evil does exist in the thieving
LIAR name of godless Zionism? The enemies of God
and Jews everywhere?

-

Freedom Granted by Americans for Neocon Liberators

"Americans are having their heads velcroed to chairs
and forced to take in nutritional supplements by a
tube forcibly inserted through their noses by US guards."

These are People not charged with any criminal
offense don't forget. Die bushite die you know is
what I recommend, as does Reagan. A dead bushite

means you've saved the life of their next victim,
an Innocent Human Being guilty of no crimes. The
war criminal enemy is the bushite, the Zionist,
the LIAR neocon traitor to Life as this Universe,
along with every dumfuk grunt who serves tyranny
for the bushmob at Guantanamo, Iraq, or Afghanistan.
It is a soldier's oath to obey lawful orders only,
but Cheney they don't take out with American Law -
how come? cowardly fascist nazi whores for Zionism's
evil as the ungodly that's why. Cowards dying for
the escape of the Neocons from the 911 scene as
reported publicly. - Vs. US. That's we whoever
you are.

Widespread Suffering and Death
http://www.youtube.com/watch?v=gVdee2iXSVk&feature=related

Notice no one shoots at the blimp fire bombing the
entire neighborhoods. And if it's phosphorous, that
smoke is already deadly toxic. That is why it warrants
the Death Sentence under International Law when used
against OUR Humanity, as the most evil of Nazi War
Crimes ever. The neoCON LIARS are the LIARS conning
you here on our TVs and Radio dramas, in where, they
don't want to openly take our public calls for real
Justice. Bush and Cheney are traitors to the cause of
American Liberty. To leave them free, is to leave
America un-guarded from further transgression. So,
them being "puppets" is even all the reason more to
insist in their capture for trial by Jury. A Public
Jury of our Peers. Now, who's in with You? You can
count me in. and I bet willed to action, we will find
others to be something of ourselves too.. Justice
and Liberty for All. Equal rights given is what true
freedom is as measured. Translated from the 'Alien'
dialectic to Amereeze jank vibe; where is the fucking
evidence here Neocon traitors who false accuse to lead
us off the straight and narrow? It leads to Bush,
Cheney, Rumsfeld, and Condi that's why I figure, you
figure, they figure, we figure, so... what are WE
going to do about this sacrificing for godless tyranny
further then as unrepresented?

Gaza Mosque Struck as Targeted by Israel Air Force 1 Jan. 2009
(Why so you may wonder they've had this string going
now where a secondary something, then there! that proves
something absolutely apparently, without the intellect
to fairly judge anything, particularly themselves honestly
as dishonorable thieves and murderers, targeting prisoners
held hostage to their own camps. Death camps. Nazis are
they.

Humans for Coast to Coast Radio Hosts as Frequent

Israel Attacks Jews,
Silence from Mainstream about Violation of Law
http://www.youtube.com/watch?v=K1kt8qi0M-M

They kill Jews for money. They bombed Jews in Lebanon
for money. They want to bomb the HUGE sacred Jewish
communities in Iran.. wonder why? Zionists are not
Jews, for Jews don't steal in God's good name. Nor
target innocent beings for stolen gains. A zionist is
a thief to life, and as such, needs to be formally
charged for their criminal offenses, given lawyers,
and upon a successful prosecution, rot in a prison
cell and/or pay restitutions. YES. why? so not another
innocent person must fall in their place as next
victim to a zionist's public commitment to lawless
tyranny for evil intentions.

Johnny for Coast to Coast Radio Host

-

Israel Phones 'Terrorists' Before they Bomb Homes
http://www.youtube.com/watch?v=K5wrwZlwAq8&feature=channel

Didn't the Nazis say something like, they weren't
there to take out Hamas directly? Well, after all,
it was founded by the Zionist IDF, so I guess that
must be why they target our children instead..

UN: "Israel knew they were bombing a school"
http://uk.youtube.com/watch?v=uWP0GU0wVSk

/ / The hospital, and other smaller hospitals and
clinics were previously shelled by the Israeli
warplanes and tanks, stressed Hassanein. He
also denied Israeli claims that medicine and

medical supplies had arrived to Gaza hospitals. \ \

The Zionist is a thief of Life as our enemy.

IDF VLOG UPDATE: IDF Hits Dozens of Hamas Terrorists
- Capt. Benjamin Rutland - 4 Jan. 2009
http://www.youtube.com/watch?v=q9Jt-pV5wuM&feature=related

This Zionist enemy of God speaks like a six year old.
"Hamas Terrorists", "4. Jan.", come on now, how evil
do you have to be to believe this ungodly demon sells
you righteousness. They STEAL our food. They are OUR
criminal enemies who torture innocent Peoples. A
godless criminal enemy who also steals Peoples Homes.
And drops millions of land mines to murder Jews
indiscriminately for decades. Commits war crime after
war crime against Humanity. Vile bile.

They killed our innocents, and unless we kill
theirs, they will go on killing ours.ï¿½

It is the crime of which they demand WE are outraged
against. Welcome to Humanity's suffering world due to
lacking communications skill. The term "they" are
referring to is YOU. Your innocent life Israeli
intend TO STEAL, TO MURDER, TO ROB YOU Your rights
here granted by God. These are ungodly acts of mass
murder, perpetrated by enemies of Life. They targeted
a UN Girl School for Christ's sakes. please fight back
by supporting my calls for open international dialog.
Justice must win our Freedoms back, for there is no
other lazy TV'ed ass, pop a pill to make it all go
away, plan 'b'. Look at me! I'm not crazhey! We can
handle this no prob.. I'm a perfect King for these
times of wonder and horror. equal rights are found
through open communications for a measured Justice
we do contain. Evil is the deceived disguised. And
i am a god... on a mission.. Ladies?

-

The Appropriate Response To Islamic Terror
http://revisionistreview.blogspot.com/2008/12/judaic-columnist-urges-kill-muslims.html

/ / an Orthodox Jewish Russian immigrant \ \

Let US never forget, the Zionists also would bomb
some locations, then later, drop the warnings
for the Jews to run for their lives. Didn't warn
them though if they get into a car or truck they would
be destroyed instantly by the Zionist flying the
America paid for Apache. I did a big show of shows
through that continued as, more 'un-resolved' crime

scenes perpetrated by the treasonous, neocon Zionist terror merchants. It's like they think some dying fools are going to keep going to save'em in the end from ourselves as still suffering in Justice denied as enslaving into ungodly tyranny eh? These Zionists are not only the bad guys, but they're bad guys to even the bad guys as there is no found honor among murderous thieves. A Zionist will kill a Zionist for a stolen nickel, as do bushites today. Hey! it's only Your Life in the balance. Or are you one of those who goes in America, it's okay, we're only murdering innocent folks who don't live in Israel.

Doing what's right and just, or evil as dumb is Your riddle. Get back to US on that.

We need People are Equals Power!

President and CEO of Shareware Earth Co.
King Johnny Wizard at your service me Lord.

-

/ / It is just unacceptable to apply two standards of morality, one for Jews and another for non-Jews. For if what Israel is doing in Gaza is right, as Israel and her supporters maintain, then what the Nazis did in Europe several decades ago must have been right as well. And vice versa. \ \

The ungodly zionist enemies, are enemies of God and Man. Don't think the NAZI Zionist like Bolton doesn't know this, with his friends at FoxNews.They WANT to rape, murder, and pillage America all her freedoms for the bounties of private banker frauds. The banker does not ever cover our loans, we do. So, why give them trillions of American worker waged dollars for nothing?. THEY DON'T COVER LOANS. See? that is what this war against God is all about. People of Humanity just seem to truly hate a guy like US as wise and Just. See, people hate US, because they can't for their lives disagree with Facts. Why won't YOU support these same rights and champion our demands for open communications. Johnny for Coast to Coast radio host.

US Again Stops UN Call for Gaza Truce

Who is this the "US" person?, and let's put him to death with Bolton and Kalilazad for the most serious of war crimes against OUR Humanity. Remember, Bolton was NEVER

confirmed because, the Zionist could find
no man or woman to say a single kind thing
about him. FACT.

CNN: The Nazis Broke The Ceasefire!
http://www.youtube.com/watch?v=KntmpoRXFX4

Protest pictures from around the world (not on CNN)
http://www.rys2sense.com/anti-neocons/viewtopic.php?f=11&t=16496&start=0

Remember Israeli nazis to this day, insist as
DEMONIC LIARS, Hamas broke the truce - as Hamas
is responsible when they target school girls for
slaughter. They said the UN were secretly attacking
Jews, clearly a LIE as impossible to prove because
it didn't happen. But facts are the furthest thing
away from the godless false accuser Zionist con man
or demon witch LIAR like Livini. FoxNews calls the
demon witch a Jew! ANTISEMITES.

We can witness, Americans do not have the intellect
to understand what this means. See, LIAR Nazi Israeli
broke the truce to get killed Jews for money. A
regular fair for Nazi Israeli. Now, they state they
will continue to indiscriminately murder humanity
until the tin can rockets that travel miles stop
killing Jews who hate Zionists. But importantly,
it is Israel that wants Jews to die, so they can
make off as Satanic with our stolen values. Just
like the Bush family did with Hitler, that the
Nazi Nation has no probs working gun in hand to
wipe out Jews everywhere still to this day. Again,
Nazi Israeli MURDERED JEWS in Lebanon as targeted.
And leave Jews to starve to Death in Israel for
more charitable aid they can use elsewhere. Public
knowledge not disputed by any living soul on this
planet because, the Zionist government admits freely
to this. Israeli think being Satanic is worth it,
for all the money and lives they can steal as enemies
to Christ, Hillel, Mohammad, YOU, blahblahblah.

http://www.liveleak.com/view?i=ab0_1231290043

http://www.kuwaittimes.net/upload/img_pict/headline9637e7.jpg

Read of the bushite in my America who call this work
of Satanic enemies, a good thing they support to
war terrorism for the sadistically evil liars of the
neocon. Then KNOW my friends, a bushite is the enemy
of every living soul on this planet. Have no love for
those in the Air Force, the enemies of Man who bomb
our families without excuse, but to know, they hate

US as Christ to speak free for Humanity. That DEMON George Noory was so happy last night about all the good the bankers AND CHENEY are doing for their hatred they spoke of for all Russians. SEE? not to protect America, but to kill you with their true commitment to the demonization of innocent people, all to escape the neocon terrorists. I HATE George Noory more than anyone alive in America. He is so openly evil to ourselves, that only those who wished to lie to you, (like Alex Jones does about Ron Paul), would say otherwise as bushite dumfuk enemies. Cowards committed to escaping Bush and Cheney for treason against Freedom. They doctored the NIE on Iraq, highest of war criminality. Alex Jones has never mentioned it, but for MAYBE in passing. Hey because all the bad guys are just puppets to ignore over the elites, globalists, socialists, liberals, gays maybe, Blacks, Mexicans, and anybody else smarter than NWOer Alex. Ron Paul is a coward as rarely if never has a clue of which he is speaking on.

Israeli PM says to end offensive if Gaza ends rocket attacks

Sarkozy urges Syria to press Hamas for Gaza truce

How does the ungodly get away with this obscenity? Nobody can deny Nazi Israeli broke the truce, as they always have done as Satanic for the last 60 years. Killing Jews for money is popular with the Zionist Nazis don't you know us by now? FoxNews CONNED Americans for DEATH with the unmentioned, TREASONOUS doctoring of the NIE. To kill Americans for more neocon gains, which Alex Jones never mentions either. Do Americans even care enough to raise Humanity's call? Do they demand public executions of sadistic godless Zionist torturers? as the Standing Law of America - The War Crimes Act - brought to be by Reagan - DEMANDS by the Law of America? It is the Law after all, yet, CNN, CBC, and FoxNews calls the perpetrators of the most heinous evil against Mankind, heroes. America is
a nation of godless cowards willing to die murdering innocent Christians in Israel, all for the profits of the 'magical' zionistic private bankers. Bushite grunts are now supporting the indiscriminate carnage, serving as police services forbidding any of the prisoners in Gaza from fleeing the indiscriminate slaughter. Again, as Satanic, they don't arrest the "Suspects", for what could they truly charge them with?, no instead demand we die helpless murder victims by forbidding escape, as they did in Fallujah murdering more than three hundred thousand innocent

souls. Die bushite die screams to all men on Earth from the Son of God. Will you stand for YOUR life as truly worth something here? Like lawless enemies Policing your reality will bring you more happiness and prosperity with the great truth teller HAPPY George Noory? The demon who openly confesses the will to want to murder all children in around the age of 15? Too crazy for you to face such an enemy of huge demonic origin, so, go the cowardly way like Alex Jones as sell out slave instead, to cover the demon with endless praise on his treachery to not have our fight on everyday with open calls for understanding Justice is freedom. Instead of a constant stream of bushite dumfuk enemies of Living. This isn't complicated. Or it doesn't have to be.

Israeli nazis state they will murder humanity indiscriminately until rockets stop falling on their country. Yet, they broke the truce.

Alex Jones told US as a deceiver, he's been on Coast to Coast a hundred times. Not in these last eight years he hasn't. I demand Alex prove this, or be known by all far and wide a treasonous liar, trying to take US off the tracking of criminal action of his buddy, the demonic enemy LIAR George Noory. bin Laden didn't do 911, despite the facts that WE KNOW George Noory knows better of but LIES to con the American teen further for death at the profits of the un-elected bushmob. See Alex wants you to blame anyone but those directly involved in the crimes of 911, or Iraq, or those responsible for it's cover-up by Zionist propaganda. George Noory will have as invited guests whos only function there is to spread dis info as supporting more indiscriminate warfare for the escape of the neocon terrorists responsible for starting the illegal wars to begin US at. Or those whom often support torture, a war crime that only exists as irrationally held by those who's minds have only a blind hate for the indivisible rights of another innocent other. And often truly hate men and women for being Just as wise. The McCainiac Zombie video is a perfect example. When the Zombie is asked about the rights of Women, the McCainiac Zombie cried out for raping more Women. The position of authoritarian power, was only found with the bushite as oppressor, rapist, torturer, or Air Force Bomber, not liberation by freedom. The bushite McCainiac KNOWS it can't compete

openly to defend it's criminal treasonous
actions! Remember, Alex "the Conservative"
thought McCain was the choice if you had to make
one, earlier on, then changed his position,
sort of, later by calling them all puppets not
worth the effort, but .. Obama's idea's matter
not, it's that his Birth Certificate is, no war
too be fawned. Palin? who's she? McCain
firebombed Vietnam as "war hero" for France?
The Banker doesn't cover our loans? Matters
little.

Norwegian doctor: Israel intentionally targeting civilians
http://rawstory.com/news/2008/Norwegian_doctor_in_Gaza_Israel_targeting_0105.html

"All that is happening in Gaza here now is against
international law, it is against humanity and I
think it is against what it means to be a decent
person. You don't treat other people like this.
Even if you disagree with himï¿½ maybe even if you
fight with them, you don't treat civilians, children
and women like this."

Israel deliberately targeting civilians in Gaza
http://www.youtube.com/watch?v=Ev6ojm62qwA

It was almost acknowledged on CBC radio that
nazi Israelis, use the argument that a tin can
rocket traveled miles, to kill some innocent
Jew as a direct hit (likely a person who hated
godless NEOCON), all because that nazi state
has OPENLY, as PUBLIC policy, stolen water and
food including baby formula, along with a huge
list of other atrocities, to punish God and
Humanity since way back before three of four
truces. AGAIN, Nazi Israeli always, as ungodly,
break their truces. Why? Because YOU, or Christ
as any Jew's life means nothing, to all the
'free' billions they'll get from given American
worker wages. Look, Americans refuse to call
for the arrest of Bush on their national,
"truth telling" Coast to Coast radio program.
Why? Because, for one, George Noory, (Alex
Jones' best buds), has told US he's into
killing innocent kids as powerful, and that
'bin Laden did it', Is good enough for US.
You don't get a say here however how you will
live or die. George Noory calls all grunts
heroes, and those who refuse criminal orders,
those he wishes to go ballistic on. Yes, it's
true, George Noory is still alive and happy

as ever.

Rise Up for innocent Life, or don't and see
where it'll get you in the end.

Again, every soldier in the Air Force serving
for the neocon liar is a traitor warranting death,
to save the lives of their next innocent victims.
They have murdered more than two million people
in Iraq. They are pushing heroin into America
from Afghanistan. They are raping AMERICAN
women as officially "LAWLESS" (can't be arrested
but through Rumsfeld - who has not seeked any
prosecutions for the raping of American Peoples.
He, as Neocon, is TRYING to DESTROY FREEDOM
For all Americans in America - while paying
with American wages, South African death squads
to murder Black men) and TV'ed Americans refuse
to speak for Justice denied themselves. Zionist
amerikans only see US as innocent others, not
themselves to pay, but they do pay, they will pay.
God, nor John will not live in a world where
bushite grunts walk freely down our streets as
first degree mass murdering rapists, torturers,
and thieves. Celebrated by CNN, CBC, and FoxNews.
Especially when they DEMAND they have greater
rights than Human Beings. Mass Murderers deserve
immediate death sentence to defend ourselves
from their demon lies and betrayals to God and
Man. Every CBC and CNN reporter who reported
Russia attacked Georgia unprovoked will warrant
trial, then death sentences for their total
commitment to the Satanic NeoCON enemy war
criminals. Remember: they targeted for murder,
helpless innocent families. YOUR family. CNN
wants you to blindly believe, CNN personalities
like ENEMY George Noory are so happy, why would
we think they willed death against our great
Humanity by conning you for more stolen money
through the sacrifice of YOUR life for zionist
criminals who laugh at your powerlessness to
raise your voice for Justice.

-

Stealing the Title of Jew from Christ:

Fallujah by the Sea: Aping America, Israel Unleashes Chemical Weapons
in Gaza
http://uruknet.info/?p=m50412&hd=&size=1&l=e

Look at this picture of nazis indiscriminately slaughtering
our Humanity, while on MSNBC they reported that the Nazis
will continue to murder Humanity until a truce can be found,
A truce that the Satanic enemies of God will naturally break,
as they ALWAYS do. They are godless enemies of Life who wish
to steal the Title of Jew from Christ. They targeted Jews in
Lebanon with seven million land mines, and let Jews starve to
death in Israel for more charitable aid they can steal from
G-d's Good Will. When asked by Israeli newspapers why, it was
said to kill a Jew is rewarding for the godless Zionist.
Public record. Die bushite die.

http://lataan.blogspot.com/2009/01/israeli-zionists-guilty-of-deliberately.html

/ / In doing so, this makes Israel guilty of using
its own people as ï¿½victimsï¿½ for political purposes. \ \

-

What Israel Does Not want God or Humanity to See
http://www.kawther.info/wpr/2009/01/04/what-israel-does-not-want-you-to-see

Look at the comments from bushite grunts glorifing
in this indiscriminate slaughter of Innocent Human
Beings. Evil enemies of God do breath our air.
Die bushite die.

Israeli broke the truce knowing such action woud get
killed Jews in Israel, a cash bonus!

ISRAEL BROKE THE TRUCE - ISRAEL BROKE THE TRUCE

Israel or Hamas who broke the truce
http://www.youtube.com/watch?v=KUfgULhac8c

ISRAEL BROKE THE TRUCE - ISRAEL BROKE THE TRUCE

-

a-mother-from-gaza.blogspot.com

This web site is the winner of greatest interest
internet site of the years 2000s.

Israeli plan to topple Hamas, re-instate Abbas
http://a-mother-from-gaza.blogspot.com/

/ / Breaking the truce Nov. 4, then, was Israel's
way of getting the gears rolling for this whole
sick game: the toppling of Hamas, and the
re-instating of the impotent Abbas into Gaza
so the "peace process" can remain forever in
formaldehyde, to quote wiseass, er., Weisglass. \ \

Nov 4th! - perfect!. We are dealing with Nazi war
criminals who refuse US, as a Species, Justice
for everyone. Especially The Jew's Jew, Johnny
America. Hint: they call us Love just to hide our
complete agreement with this Living Universe to
will Justice for God as every last bushite zionist
freely moving. Once all the neocon zionists are
rotting in a prison cell, or formally executed as
godless war criminals, we all will have one joyous
welcome in a heavenly future.. Until then, demand
Justice for US. That's YOU too. Angels included.
Who? I don't see no Johnny Wizard here anywhere,
We are Good to Go. Rise Up for innocent Life,
or don't and see where it'll get you in the end.
The bushmob are traitors for closing official FBI
investigations into 911, immediately after the mass
murder of Americans occurred. Treason, of a, trust
WE don't have it in US to stand for our common
values as the Revolution will not be televised,
Johnny Who. Man, are we or no? Be Somebody, then
get on your phone to call in for Justice willed.
Alive I Say! - this must be where you'd raise the
dead and dying.. if you only could raise your finger
to dial the phone numbers - well guess what? - I Command
You Can! - snapoutofit - Speak for pursuing Justice
on 911, and show serious concern for publicly paying
private banker men trillions in worker wages for
nothing. This is seriously disturbing, yes, but
seriously important to address openly in our spaces
to remedy with a Johnny Wizard World Wide Work of
Wonder, Super CNN Special of Specials, with Your
Host, the One and Only, President and CEO of
Shareware Earth Co. John Himself. Hey everybody!
Wow eh? So a.. when is the good guys showing up?
Now. Justice. I want US to Host Coast to Coast for
open Public communications, where things get
solved because we know whats we're learning about.
We of god, this way comes, then men and women with
calculators to know: giving money to private bankers

on hopes they'll lend a small fraction some back
to ourselves at high interest is dumber than rocks.

Arab American rally in Dearborn for Gaza
http://www.youtube.com/watch?v=AVP4_-u6MV0&NR=1

Israel Drops White Phosphorus Bombs, Littlest Victims Suffer
http://www.apfn.org/apfn/DU_Israel.htm

My friends, demonic evil forces do exist to STEAL
the living rights from anyone of us, especially
including the Jews. Remember, it is the zionist who
steals God's good name through lies left unchallenged
by private corporate interests tied to the CON of
private banking in total. Christ is a Jew too.
Israeli broke the truce knowing such action woud get
killed Jews in Israel, a cash bonus! Like starving
Jews do attest on a infomercial that ran for near
18 months across Canada. Then covered by the Israeli
press, that the Zionist officials there actually
enjoy the prospect of suffering Jews because it,
OUR SUFFERING, will attract more charitable aid the
ungodly criminal enemy can use elesewheres! Hitler
revisited. I am the Son to God and I wouldn't lie
to you about an issue as hughly Satanic as this.

White Phosphorous: Israel fires artillery shells into Gaza
http://www.sott.net/articles/show/172089-White-Phosphorous-Israel-fires-artillery-shells-into-Gaza

We can overcome this, and create a better world in
the process. It's back to the simple things: open
communications, and evidence, evidence, evidence
to convince ourselves truly of anything. We are
in a horrible dream right now, that we must arrive
ourselves into for comforts. Arrest the Neocons for
treason. That of course includes anti-gay
Bolton for his and Kalilizad's treasonous lies
brodcasted on FoxNews these last few days. And
Peter Powers for the London bombings while we are
at it, then, we'll really being going places.

/ / My relative's neighbors- 3 young children- were
all killed today \ \

-

Satanic Enemies of Christ

CNN with Blitzer allowed reported on Larry King
that Hamas broke the truce, without any uttering
of fact. While when the nazi israelis were accused,
just minutes earlier, Mark Regev could say only

silence. The zionist Satanic enemies of Jews speak only silence, because they know they are satanic enemies liars of Human will.

Again, these SATANIC enemies break their truces everytime, then state, it is Humanity's fault because CNN will never ALLOW the humans to know. They are murdering innocent People in hospitals for example, or those in a Church, just as amerikan bushite nazi grunts do for the escape of the neocon zionists responsible for 911. To hunt a lawless bushite nazi grunt, and kll it instantly is to defend it's next innocent bombing victims. Bush and Cheney closed 911 investigations on 911, therefore killing a lawless bushite traitor for our Humanity is just to get ourselves together to arrest those responsible for mass murder on 911. The deaths of bushite zionist liars is a mercy given for the love of God. Die bushite die.

Israel Nazi State

Israeli nazis state they will murder humanity indiscriminately until rockets stop falling on their country. Yet, they broke the truce. They always break their truces. Understand these Satanic enemies of God, dropped seven million land mines on Lebanon when learning the conflict was over. They will kill Jews for money, THEY are the Nazis. Nazi Mark Regev is clearly insane. 'It wasn't israel that started this' He could not stand with any man without instantly being exposed to All of Humanity as a war criminal in need of immediate public trial for death sentence. These are only innocent people being bombed. In a concentration refugee camp. Look, it's a prison camp. And if YOU
were a prisoner there, and Texan child rapists are something you'd wish to defend your community from, you'd maybe join the Gazan police force, run by Hamas, a political group democratically elected. All police officers in Gaza, Nazi israeli claims warrant 1000 lb bombs, not warrants for arrest for a criminal offense. Remember, it was Israel that broke the truce, as so is spoken by Palestinian government officials speaking internationally - using the example from November. But understand, as Satanic fraudsters, they always fuck over Our Innocent Humanity this way.

What kind of "Human" would commit such crimes against Life? Cheating Liars for Satan God tells YOU.

The Bible "I know the blasphemy of them which say they are Jews, and are not, but are the synagogue of Satan."

Look, these enemies of Life steal INNOCENT PEOPLES HOMES as thieves of The King of Jew's simple philosophy.

The Reality of Zionist War Crimes in Gaza
http://www.youtube.com/watch?v=GDjthFt6EZg

The zionists aligned with Bolton are using radio-active weaponry against all Christians. What do "Christians" in America on Coast to Coast have to say? Nothing because that demon enemy of Life George Noory, the pro child killer, insists as Truth's closest most bestest friend, bin Laden did it.

most moral army in the world:

Our reign of terror, by the Israeli army
http://www.ifamericansknew.org/cur_sit/rot.html

Glorified by CNN, CBC, and FoxNews:

ï¿½do the Gazans know that only Hamas is to blame for their sufferings?ï¿½

Remember those same news groups will KILL Americans too with poisons in our foods while smiling as George Norry does Daily

-

Gray Ghost

/ / Funny thing noone ever shows pictures of the scumbag Hamas rockets falling on Israeli civilians, but the nooz is full of Palies suffering. Fuck you all I hope Israel exterminates the vermin. \ \ He can advocate the MURDER of innocent people for the neocon liars, and Google doesn't destroy his account?

Remember Zionist Nazi Israeli started all their murder rampages against Innocent Peoples for 'free' welfare money, as broke the truce with, IDF funded Hamas on Nov. 4th. They have been indiscriminately bombing People with excuses that never do add up. Example: Nazi Israeli stated they were in the right to murder ANYONE

in a car or truck in the entire nation of
Lebanon, (especially in the Jewish communities)
because like enemy "Gray Ghost" would say, all
those innocent Peoples deserve TO DIE AS MURDER
VICTIMS for his sadistic ungodly pleasures.
Remember, Nazi Israeli didn't mention this until
thousands has already been murdered, then even
still, without radio, TV, or newspapers, telephones,
or sky writing how were ONLY THE INNOCENT JEWS
as officially targeted to know? Then the seven
million land mines to kill innocent kids for
generations. To the enemy of Life, Gray Ghost
it matters not that Israeli started the conflict
by sacrificing nazi vermined trashed as Satanic
dumfuk enemy soldiers sent across the border,
to Grey Ghost, all it knows, is Justice must not
be allowed to win this game for our human race,
for he would be truly seen as a sadistic enemy
of Freedom, powerless, or rightly dead for
his proud treasons against life in this universe.

ZIONIST DEMON LIARS TO SHOW HIT ON TRUCK FULL OF ROCKETS ACTUALLY HIT
TRUCK FULL OF WELDING TANKS
http://english.aljazeera.net/news/middleeast/2009/01/20091117737115874.html

Please John begs all People's of Humanity,
Americans do not have the courage to even speak
concerns for their dying as evil state of godless
private banker ruled blind tyranny. 'Duh, yeah
give billionaires trillions, trillions, TRILLIONS
to help the poor homeless mothers poisoned by
FoxNews CRIMINALLY.' Gawly je, I dunt no y dat
detnt work-ed' - o wel, cary ohn my wayward Son.

Livni: Gaza truce would give Hamas legitimacy

See? this is why NAZI I$raeli thinks they have
an excuse for bombing people indiscriminately
to break a truce they signed on to. This isn't
a one time, maybe two time occurrence, but every
time in the last 60 plus years the zionists
aligned with Hitler have. Satanic enemies
of Humanity.

ANTI-SEMITE is FoxNews every time they assault God
with "Israel, the Jewish State" to torture, steal,
and murder.?. ANTI-SEMITE!

The Ungodly Zionist - a report from the front

/ / The most recent victim of Israeli airstrikes
was 10-year-old Ismail Hamdan \ \

To the Satanic enemies of Man, the Ungodly Zionist,
an innocent murder victim's life can not be allowed
a defense such as the charge of first degree murder
against Netanyaho because, he states no Justice to
any who believe in the Jewish cause, as Hillel, of
freedom as Liberty for all. If Jews ran Israel,
Netanyaho would be chastised publicly by the Humans,
for sanctioning the criminal acts of first degree
murder. The nation of Nazi Israel STEALS Peoples
HOMES. What other nation on this Earth commits
such willful crimes against innocent Human beings
OFFICIALLY? Steals homes from god loving innocent
folks and labels it our 'Justice system'? Who? Neocon
Amerika, the nation that gave trillions to bankers
recently on only prayers that their gods will maybe
lend some of their own money back to them at high
interest. But alas, evil is the deceived disguised,
as in their deep ignorance of money and virtue, they
do not understand, the private banker never covers
the loan. Never does a private banker reach into
it's pocket to borrow US to begin with - so as a
consequence, the bankers have just pocketed all the
'free' loot for nothing, TRILLIONS, and are not
saying why should they help anyone else with charity?
it's the amerikan way. Instead, hate the wise socialist
who designed a working good traffic signal system,
where lives are saved and congestion is eased, or
hate the white man, the black man, different People.
But never Mr. Bush, Mr. Cheney, or Rumsfeld, the
neocon traitors who closed criminal investigations
immediately after the crimes of 911 occurred, who
doctored the NIE to con America into death, and
never slight the trillioniare private banker gods,
who have stolen/taken our public authority through
war criminals in Congress. Taken from all others
to bring us a much poorer world suffering due to
our speakings of contempt for Justice as christians
in America - who claim in silence only indignation
for real Christian families robbed or murdered
Officially by the zionist state of ungodly Israeli,
paid for by dying America. Americans refuse to raise
their phones for the arrest of the bushmob for capital
mass murder, so, what's private trillioniare bankers
walking away with the entire economy in free fall
going to do for them, when they are already to
death for the glorious Zionist Neocon thieves of
Civilization? Proudly in hatred for Innocent
Humanity. Again, Hamas was founded by Zionists
in the IDF, to kill Jews for money - public record.
Jews starve near death in Garbage dumps of Israel,
all because the Nazi Zionist UNGODLY government

states it is beneficial to starve Jews, for, they will receive more humanitarian aid THEY can use elsewhere. Public knowledge. Zionist liars murder innocent Jews for money, like they did in Lebanon, and like the zionists did on 911 by forbidding the pursuit of the terrorists by following the crimes scene leads at the real murder scene. Unjust enemies of Man.

To arrest those responsible for 911, we are going to need to form a public warrant for a person or persons. Bush and Cheney are guilty of closing investigations on 911, treason, called obstruction.

UnHoly Nazi Israeli Racists are Greater than the censored words of Messiah!

IDF's YouTube Gaza channel to Correct Ourselves

/ / it will disseminate footage of precision bombing operations \ \

Precision? They dropped seven million land mines in Lebanon, after having seeked out where the Jews lived, (Northern Lebanon), and murdered them firstly! JEWS. They, as enemies of God, like those of FoxNews, will refuse these type of FACTS on their hatred for Love and Justice. Their hatred for Jews, real Jews, like me. Understand: American baby formula has been contaminated with poisons, and FoxNews doesn't think it's important to their corporate responsibilities to kill ourselves further for profit. The Zionist will murder anyone just to steal your belief in God as Love. They HATE me for being wise and Just. Hate. For, why wouldn't America support my demands for open radio communications on the Coast to Coast radio network? Americans would rather murder Humanity before Justice succeeds beyond their illusions of grandeur through the mass murdering of ourselves for stolen gains. The banker does not cover our loans! Giving them trillions for free unquestioningly is dumber than rocks. Enough.

Fake Rocket Attack
http://xymphora.blogspot.com/2005/02/fake-rocket-attack.html

Remember however, the Zionist has no qualms about killing Innocent Jews too if it means Americans will get it more free welfare to murder ourselves. They openly STEAL Peoples

homes in that nation run as thieves don't
You know? Or as it is just open public
knowledge that the Zionist excepts that
911 was actually a good thing for them as
war criminals reaping the cash rewards for
continuing capital murders?

/ / Ehud Barak promised that the war would
continue ï¿½to the bitter end.ï¿½ \ \

That is you there Barak promises to end
bitterly as the innocent the demon targets
for ungodly murder. How could ANY REAL MAN
steal food from a Christian baby? How do they
do it?, as the inhuman. (Like bushite do in
Iraq, while on CNN in interview tell US, they
are there war criming for neocon traitors to
steal everything as "helping the Iraqi
children". They offer no clean water, no food,
just indiscriminate bombing campaigns of evil
incarnate. True fascist nazi enemies of true
freedom in America who advance censorship to
anyone like myself. Why? They lose. They are
not men but Satanic enemies of the King to
Jews, the Messiah. I Am. Thieves to the
scriptures of Hillel, and of Moses. Thieves
to the intent of every true religious person,
for God is everywhere. God is the Word, and
the Word is Holy. So, fuck you and die bushite
nazi traitors to American Justice, those of
them who refuse US open free words to resolve
their war criminal behaviors as is done in
godless Israel today against INNOCENT
Christians. Done before another innocent other
has our homes stolen, or is murdered by the
lawless grunting bushite dumfuk enemies of
Jesus Christ. I am King already, always have
been, always will be. Live with it. The Koran
is filled with great understandings on this
relationship. Christ is mentioned more than
Mohammad - and Mary can be understood as the
mother of all being before we are. a virgin.)

Look humans, you've
had your fun murdering yourselves, now the wise
people will compete for bettering ourselves by
understanding. Who the fuck are these illiterate
monsters at CTV national television? and how can
they willingly keep our soldiers in the dark dying
that way by simply smiling? Are they experts in
anything? are they respected researchers? writers?,

politicians?, civil rights lawyers? - do they even
respect ourselves enough to be warned of vaccines?
NO, instead they LIE with such contempt for Humanity
I am surprised Canadians, don't speak out more..
perhaps they do, it's just CBC, CJOB, and the
Winnipeg Free Presses of our World make no attempt
to inform ourselves about it. They don't take my
thousands of calls, how about Yours?

Life is real to know, if you seek, and not go
so freaked out as Living is as it always has
been. Knowing God is cool, 'amazing', yeah,
whatever, but we are of too this real world
suffering for our lack of respect for a wise
person speaking. I WANT FREE PUBLIC DEBATE
FOR JUSTICE AS ALL INCLUDED. Now really, is
that too much for US to ask freely? What say
you Googler? Afraid I will truly make your
banker gods look like fools?, the gods we all
give more than half our lives to for nothing?
Don't want to look truly dumb as deathly
ignorant, so censor US all themmers you are
too in command of your Fate. So be it. See?
Stand in. I didn't even really do anything
there, yet it's written, it's done. A Miracle!
Imagine: your Christ! YOU. now what are you
going to do.. time is ending for you remember,
now what are you going to do? Will you pick
up your magic phone and call likewise for
Justice denied, or will you crawl up on your
cross and die in silence for the glorious
Zionist aligned with trillioniare private
bankers and Satan? Christ is of all peoples.
Your on a mountain.. You've raised yourself
from death already, and your here to do
something greater for the love of God..
what's your plan for the common man? Welcome
to the real world my friend.

Morpheus 'Nobody can tell you what the Matrix
is, you have to see it for yourselves. .. all
I am offering is the truth Neo, nothing more'

Lawless Police to Defend Who Again?

They Call it Terrorism

"Israeli nazi enemies call bombing people,
like they do without apology, terrorism.
What can't you figure?"

CNN TODAY

/ / Stand down 'Christian' nation. It's
not your babies. Ethnic cleansing is not
a 'sin' as long as the 'chosen ones' of
Israel do it. \ \

Israel, the nazi enemies of God nation broke
the ceasefire on November 4th. Now, as demon
liars claim they want to honor a ceasefire
again to further steal ourselves from the
Love of Justice. Why do the godless Zionist do
this always as first degree murderers? Because
they can't win an open debate on their treasons
against God and Man. The private bankers DO
NOT cover our loans. Again, these SATANIC
ENEMIES OF GOD dropped seven million land
mines on Lebanon while target killing JEWS.
INNOCENT JEWS. Targeted. Northern Lebanon,
look it up. Israeli MURDERED Jews. Innocent
Jews as targeted for more stolen charity. I
again, beg you to support my call for war
crime trials against the bushmob, including
CNN demons who report a total contempt for
YOUR life dying. Your call loser.

ISRAEL: No civilian casualties in Gaza!
http://uk.youtube.com/watch?v=RlZd3vR6Kzk

Satanic enemies of God as anyone included.
Think: who buys these demon lies to steal
further from our innocent Humanity? Zionists
do at CBC and CNN, who will murder America
by openly lying to destroy freedom. Example:
CNN reports Georgian nazis who targeted
children schools, churches and threw grenades
into our homes to murder as minions for Satan
are called freedom fighters. Just like the
Third Infantry, the new lawless police officers
of California, who can't be charged with rape
for example, because ONLY Rumsfeld can okay
such prosecutions. Hey who cares for Iraqi Rights
right?, for TV America's CNN with FoxNews and
George Norry doesn't, for it's only American
women and children now right nazi enemies? And
WE ALL KNOW, cowardly America refuses to even raise
their phones for these dying concerns. How can
George Norry continue to live happily dying
America for the neocons? How? they let them.
Alex Jones thinks George Norry is just
fantastic, so no, don't encourage the NWOers
to demand free communications, because if we
did, Alex Jones and the like, would factually
look like the idiots he is. (better to die

America than face this foolishness?) The banker doesn't cover our loans, we do Alex. So giving them trillions in American worker wages is a bank robbery in progress. Simple. NOT a diabolical ingenious plan, we, the simple folk can't figure without the Alex Jonesers geniuses of thought control developed by the CFR, builderberg, the Boners and NASA.

Obama stated all lawless soldiers who war for godless Zionism are heroes, which includes South African death squad goons who murder my nigger friends. AEGIS. I call them lawless enemies of God, deserving death sentences to save the lives of their next innocent victims, Obama calls them heroes warring for the escape of the neocon traitors responsible for 911. Who are you going to believe?

I also realize now that the type of
> cable being used is probably the worst possible choice. Just swiching
> to a foam dielectic cable may solve the problem.
>
> Jimmie

The physical dimensions of the coax changes with temperature. The ratios of inner and outer diameter stays pretty much the same, so the Z doesn't change, but the epsilon of the dielectric changes (it's less dense at higher temperatures). since propagation speed goes as 1/sqrt (epsilon), and the density goes as 1/t^3, the prop speed goes as 1/ (sqrt(1/t^3)) = t^(3/2)...

On top of that the coax gets longer as a function of T, so the time delay/phase goes as T/(t^1.5) or 1/sqrt(T).

A CTE of 30ppm/deg C is about 0.05%/deg C for time delay. If your coax is 1 wavelength long, a change of 5C is about a degree. (0.25% = 1 part in 400, 360 degrees/wavelength, etc.)

You can see that working at microwave frequencies, where coax might be 100 wavelengths long, trying to match to a degree is a challenge.

Harry,

There is a book entitled, "All about VHF Amateur Radio" by William I.
Orr available for around $4 from a used bookseller.

Is that the exact title ["VHF Handbook"] that you're looking for?

Alain

Many thanks for all the advice.

I went for the suggested options of scratching the soft bronze coloured
washers (which i dont think were ever curved) and the faces they fit
against. I also squeesed the ' U ' shape holder with long handled pliers.
It now at least holds up at an angle, but only just.

many thanks.

p.s. is it me, or are some people decidedly *strange* in these newsgroups
?

Yes, but you shouldn't be surprised. You sampled a cross-section of humanity. The difference that you _think_ you detected is that, in a newsgroup, everyone has a voice, not just the ones with whom you choose to interact.

Hypothetically (because you don't have enough time), if you were to have a conversation with every person you encountered, I think you would find an equal percentage of strange people.

It's actually 52" deep; the tower mfgr said min. of 45"; ARRL handbook
says 6' but only 30" sq, depending on the type of soil.

1545. APRSPoint version 4.5.1 available

Newsgroup: rec.radio.amateur.antenna
Date: 2009-03-09 04:42:00 UTC
From: "hxc98@yahoo.com" <hxc98@yahoo.com>
Message-ID: <c9529fd1-ea90-4ab3-a9f3-48dd1d66fb21@h5g2000yqh.googlegroups.com>
Source record: 17068

This version has better support for mappoint 2009 and added support
for APRS symbols and overlays, and made several enhancements. Current
users please pay special attention to #2, since your current settings
may need to be changed,

1. Added support for standard APRS symbols and overlays,
2. Changed the way log files are saved, now you need to provide the
name of a folder where logs will be saved, the name of the log file is
genarated automatically by appending the date after 'log', so old logs
won't be overwritten. You need to create the folder if it doesn't
exist. Leave the folder name field empty if you don't want to save
logs,
3. Better signal range calculation accuracy to reflect real world
operating conditions,
4. Uninstall will no longer remove tnc settings file,

Visit www.aprspoint.com for details.

Sometimes a carefully-chosen tap with a hammer and/or a center punch can
work marvels, or not.

Other than that, a replacement would seem to be in order. There may be an
appropriate generic, or you may need to contact the manufacturer of the
radio. Sony has IME been pretty good about having parts in the past.

I don't know that I'd use the ARRL handbook as a source for
structural/civil engineering data. The figures in the "assembling a
station" chapter in my 1990 handbook are just an example for a TriEx
LM-470 or for a Wilson ST-77B, not a general recommendation for all
towers. In fact, the last sentence in the section is:
"Once you have that information, contact the engineering department of
your tower manufacturer or a civil engineer"

Following the mfr recommendations is probably the best bet. (and that's
if they're the *current* recommendations.. engineering and construction
standards are always evolving, what was acceptable in 1960 might not be
acceptable today)

That said, there's a lot of possible tradeoffs in tower bases, even for
the same kind of tower in the same location. skinny and deep vs wide and
shallow is one. If you're not taking the manufacturer's recommendation,
then you probably need to get someone with some engineering expertise to
tell you whether what you want to do is reasonable.

The design of the base depends a lot on the local soil. An antenna
installed in
the red clay of North Carolina may be a lot smaller than one on a
Florida sand hill.
Local guidance should always be obtained. If you wing it on your on
you may
be held responsible for damage to your neighbor's home, insurance may
not
pay for damages. I was advised to get a permit when I contacted the
city engineers
office about installing an antenna. If you get a permit and install
the antenna properly

and it falls on your neighbor's house their insurance pays, you are
not responsible.
On the otherhand if you didnt do it by the numbers you can be held
responsible
and your insurance may not help you.

Jimmie

Regardless of the soil that your tower is sited upon, the total mass of the concrete must exceed the weight of the tower, the antenna's fixed upon and the estimated wind force that the tower will see. This is so that the center of gravity of the tower/antenna system is below ground level.
Thirty yeas ago my local radio club installed a new tower. The tower was 180 feet tall with a 4 bay antenna. We had a hole 10feet on a side dug and filled with concrete. When the tower did fall it bent in two about 80 feet up and folded over. The base formed the bottom of the replacement tower and is still in service.

My thoughts, too, to use the mfg recommendation (45" deep) so I made it 52" deep. I can't see it not doing the job. Tower is HD aluminum and I'm staying within all specs. Rated for 12 sq ft @ 87 mph; my wind load is about 10 sq ft. Highest winds we had w/Hurr. Ike were between 85-90 mph. The tower, however, will be protected by trees up to about 40', I could lower the antenna before a storm, and I have a house brace I'll probably use at 10'. The "Handbook" I referred to is a 2009 ARRL Antenna Book.

Today I was trying to spot the 3 guy wire supports. Have a problem with one, so I'm thinking of using 4. Instead of all being 120 degrees, one would be 90 degrees; other three 30 degrees apart. Problem is that one

of the 120 deg's would be right into my RV pad - not possible. An alternative to four would be to run one onto the end of the house roof, which I suspect would not be as sturdy as it should be?

That's not how the design works..
Consider an extreme example.. you have a big tripod of a tower. The CG is well above ground level, yet it still won't tip over.
Or, you have 4 towers that stick out horizontally resting on the ground, and a 5th one sticking up (like clown feet sticking out). Again, the CG is above ground, but it won't tip.

For a guyed tower, the base is there to keep the bottom of the tower from sinking into the soil, or from moving sideways. A wide flat pad or a deep pillar both do this, although the wide flat pad might be better from the "floatation" standpoint, as long as the bending forces in the concrete aren't too high.

Consider the case where the base of the tower sits on rock, with a pier pin or similar to resist the shear loads.

For an unguyed tower, it's a bit different. The base has to prevent rotational motion. There's a bending moment applied to the concrete, which in turn pushes on the soil on the sides and bottom of the foundation (and, obviously, the concrete itself has to take the loads).

> Thirty yeas ago my local radio club installed a new tower. The tower was
> 180 feet tall with a 4 bay antenna. We had a hole 10feet on a side dug
> and filled with concrete. When the tower did fall it bent in two about

> replacement tower and is still in service.

Folding in the middle somewhere is the most common failure mode for unguyed towers (after just falling intact), for the same reason that pencil points break the way they do, and tall chimneys don't fall intact. When it starts to fall, the whole thing is basically rotating, so the top end winds up with very high acceleration, and the bending forces get very high. It's a rotational inertia thing.

For guyed towers, it depends where the guys are, and whether the tower is failing by bending loads or by buckling under compression loads.

I'm trying to throw together a helix antenna, similar to one shown
here:
http://www.antenna-theory.com/antennas/travelling/helix.php

I'm trying to get it to have circular polarization, but it deviates
away from that pretty quickly away from the main beam. If my receive
antenna is also circularly polarized, is there a way to estimate the
polarization mismatch loss based on how skewed the polarization is?
Like if its elliptically polarized, how can you figure out how much
power a circularly polarized antenna would receive from this?

hmm, rating of 87 mi/hr makes it sound like it was rated under the old

EIA-222-C Zone A(30 pounds/sf) which was average 87, peak 113.

That's roughly equivalent to what the more modern standard versions call a "basic wind speed" of 70 mi/hr. Given the more modern ways of doing the calculation, the square foot rating is probably half of your 12 sf, and that's at 70 mi/hr. (drag on tubes is different than flat plates, etc.) (and ick.. why can't Glen Martin give their ratings in the more modern TIA-222E, F or G system)

If you're in Harris county (where your call resolves to), you're in a 90 mi/hr zone, so the wind loads would be 65% higher, or, more depressingly, your tower's probably only rated to 3.6 square feet.

Not to say that it will inevitably collapse, but....

You want to be careful about combining reinforcing methods, because the loads may distribute in ways not intended. A tower is designed to flex under load.. the movement is what distributes the load over the entire structure. Adding a constraint somewhere can concentrate the load causing it to fail. A classic example in beginning structures classes is adding a gusset to a welded T joint that makes it weaker, because it concentrates the loads at the end of the gusset. Another example is the combination of 100# test piano wire and 100# test rope in parallel. The wire is much stiffer than the rope, so as the combination is loaded, the wire stretches very little, all the load goes on the wire, so it fails at not much more than 100#.

definitely, you want to consult the mfrs instructions.

> alternative to four would be to run one onto the end of the house roof,
> which I suspect would not be as sturdy as it should be?

most residential roof construction is mostly designed to use gravity to keep the roof on and to support down forces. They don't resist upforce well (unless you're in an area where the code encourages straps.. hurricane areas, for instance), nor do they resist side loads. The house itself can usually take a fairly good side load (after all, there's all that surface area exposed to the wind), but the fascia boards on the roof can't, so you have a problem of transferring the loads from the antenna/guy to the structure of the house.

Different areas of the country have different construction practices to accommodate the loads that are important (e.g. my house in southern California is designed to resist shaking loads in shear from earthquakes, but I doubt the roof could take many feet of wet snow)

Watch out with 4 guys rather than 3.. The limiting thing on a guyed tower is the downforce on the tower under load. If you have 4 guys, you have more static load on the tower than with 3 (assuming you've

tensioned them the same), so you're that much closer to the failure point. Glen Martin doesn't have a whole lot of useful engineering data on their web site, so it's hard to even do a back of the envelope calculation of the buckling loads on the vertical tubes.

And you gotta love the picture of a bunch of guys standing underneath the tower they're tilting up without any sort of safety precautions.

Hi Steve

I dont have the answer I think you are asking for. I have wondered how
to estimate the amount of signal loss to expect from my antenna when it is
elliptically polarized and receiving a circularly polarized signal.
I decided the math was too difficult for me and thought of it this way --
If my antenna is linearly polarized, it will be 3 dB down in sensitivity
from ideal.
If I am willing to assume that by making my Axial Ratio smaller, the
received signal will increase LINEARLY with the added orthogonal component,
an AR of .5 will be about 1.5 dB down from ideal.

I hope you get a better explanation of the desensititization related to
having an AR less than unity. I'd like to learn too.

Hi Steve

Having absolutely nothing to do with your question but thought I'd mention it...

Be aware that in a reflective/multipath environment you get a polarization reversal. This makes for loss not unlike linear cross polarization issues but only for the 1st, 3rd, 5th etc reflection. Although I have never looked into it this would seem a useful feature for data comms where out of sync/delayed signals might be a problem.

My first though to your actual question though would be to use a linear antenna and rotate it whilst recording the signal level. Since however you want to use a circular RX antenna you may be able to use the reflection behaviour above to get some information. It appears however that you want the maths, which I am also not really up to.

Cheers Bob VK2YQA

Dear Marv W5MTV:

Your antenna system is complex enough that you should have it analyzed by a professional engineer who has experience with TIA 222G standard. Understanding of what constitutes safe tower practice has evolved a great deal over the past many years. An early version of 222 was much shorter than the current 222G standard. Unfortunately, some antenna and tower manufacturers are still using earlier standards.

Not to have the system evaluated could cause big problems if something fails.

Yes, we have hurricane straps.

As far as the max wind speed I trust the actual we had w. Hurr. Ike and
Rita. When Ike came back from the north, we were on dead on the eye of
the storm and locally measured 87 mph at IAH. It was 'winding down' at
that time, but still toppled huge trees all around. Just lost one on our
property, but just missed demolitioning one home. Of course, it was one
of those "100 year storms" that we've had three of now in 20 yrs.

The max vertical weight on the tower per leg is 8750 lbs so I doubt one
more guy would matter. Good advice on not using house bracket. My
thought was that it would be a safety factor when guys would be down
when raising the antenna. Of course, I wouldn't do anything with a
strong wind blowing.

I have two engineer son-in-laws that should be able to calculate per
modern stds.

Does anyone know if there's a way I could test using an analyzer that does about 50-500 MHz, but at a 1000-ish frequency? I need to test something in that area, but I don't have equipment that will go that high. Seems like any analyzer that goes that high is thousands of dollars. Does anyone know if there's somebody that rents Anritsus in SoCal maybe? Any suggestions are welcome. I mainly just need to do SWR.

Thanks,

VHF/UHF Handbook by Dick Biddulph G8DPS is also a good book. I built a
2M
amp from plans in the book. That alone was worth the $35 cost.

Test what? for what parameter? reflection coefficient? SWR?

There are lots of equipment rental places in southern California. google
is your friend. ElectroRents, Telogy, etc.

Something like the Anritsu SiteMaster? They're about $7000-8000 to buy,
so I'd expect a monthly rental (for short term) to be in the $700 range.

Interesting thought. That means that with two antennas,
one clockwise and one ccw, you could adaptively mix the
two signals to cancel the 1st reflections.

Clifford Heath.

Fun stuff!

I actually found this behaviour in experimentation (or rather I noted what was already in the theory books). I was looking at mobile FM ops on 70cm and had found that horiz polarization yielded a much lesser peak/null phase addition problem ("picket fencing") than on vertical (the antenna aperture being wider in the horiz plane). I went to circular in an attempt to test if there was a large enough component of major polarization shift from multpile refectections, and promptly lost most of the first reflection. On the whole it was about a 3dB loss (9-12dB having been the horiz vs vert improvement) but that was very terrain amd obstruction dependent.

It was a pity because the mobile antenna looked real trendy! (A skew planar loop)

A couple of options here. Not knowing your actual need for accuracy etc makes it hard to guess!

From my standpoint I'd probably just adjust an antenna for max field strength but if I wanted actual VSWR meaurement or minimizing same I'd probably use a directioinal coupler and a sensitive voltmeter.

A DC is essentially the active component of a power/VSWR measuring device. AT 1GHz I have seen PCB designs with SMA connectors that you just put in circuit, measure the volts, reverse its direction, measure the volts again and calculate the VSWR. Pretty simple and cheap stuff. The biggest problem is preserving the impedance across the DC device itself. You can use teflon PC board for example to help out on this. You will also need to think about the calibration of the thing because the diode is not a linear device and needs some volts to get over the forward drop. You can also DC bias it but those components will affect accuracy over temperature change etc.

Still a good general purpose tool though. You can even make loads that would look like known impedances to calibrate the thing.

Have a look around for these. You'll be impressed by the low price. They are after all just a lump of PCB, two connectors, a microwave diode and a filter cap! You'll have to supply your own voltmeter!

Cheers Bob VK2YQA

1573. Most important changes for the Amateur's services in Portugal.

Newsgroup: rec.radio.amateur.antenna
Date: 2009-03-11 12:26:07 UTC
From: CT1FBF <ct1fbf@sapo.pt>
Message-ID: <1bb30960-50e3-413c-9cf5-1fd74242a543@r36g2000vbp.googlegroups.com>
Source record: 17097

Here are the most important changes introduced by the new Law 53/2009,
for the Amateur's services in Portugal:

* Introduction of 3 new Ham class - named: 1, 2 and 3 - that will co-
inhabit with the actual 3 (closed for new admissions A, B, C). So from
now all 6 class will co-exist.

* Minimum age to became HAM will be 12 years old (actually 16 year
old).

* The entry-class will be mandatory class 3.

* Entry class 3 amateur´s radio must:

* stay 2 years, minimum, on that class;

* use 5 year maximum to apply for a class 2 permit. If they fail to
get that permit they will lose the CAN;
* use his station for reception only. For transmission they must use
another licensed (from other class) amateur-radio station. In this
case the presence of the owner is mandatory, acting as supervisor.

* The old "station permit" is extincted, being substituted by the CAN
- National Amateur Certificate (who allows a main fixed station, one
additional fixed station, a mobile station and a portable station).

* Automatic renewal of CAN that have a initial 10 years validity.

* Creation of community stations - club stations.

* Creation of IOCA - special callsigns valid for one year.

The new Law will be effective on 1st June 2009.

A c-pol receive antenna having the same rotation sense as a direct-path, c-pol radiated wave will reject reflections/re-reflections of it from any odd number of surfaces. The first-surface source usually is the dominant source of reflections.

However if the rotation sense of a c-pol receive antenna is opposite that of the transmit antenna, then it will reject the direct path signals and receive only those reflections of it.

Hoverman design for UHF TV:

<http://www.digitalhome.ca/ota/superantenna/design.htm>

More reflectors would make it easier to bond them together (ie, a screen with only horizontal elements) for more physical strength.

Does adding more reflectors introduce any negative byproducts?

I see that in this design the reflectors are of particular lengths. Does this imply that lengthening them is counterproductive?

Thanks.

Thanks guys... Some of these ideas might work. Sorry, I should have given more details... It's basically receive antennas in the 1000 MHz range, and I don't have access to the transmitters that will be used with them. I'm just trying to find a way to see where they're tuned and then be able to tune them if they're off. So if I went with an SWR meter, maybe there's an easy way to generate a signal to use that? I have an Autek that goes to 500 MHz. Somebody mentioned using a frequency doubler, but I'm not sure how that would work.

Exactly two weeks ago on a Wednesday, I ordered an MFJ Wide Area High Gain 1802 WiFi Antenna from www.MFJEnterprises.com (Hot New Products)

Yesterday, I phoned MFJ Enterprises to check on the status of my antenna.The lady at MFJ Enterprises told me it is on back order and she will try to send it out this week.

That is OK with me though, I am not in a big hurry anyway, I don't know why I ordered the antenna, sometimes I buy thingys I like and hardley ever get around to using some of them.

What are some neat uses I can use my WiFi antenna for? As long as they are Legal thingys, that is.

From the discussion on that website, they make it sound like the
antenna is pretty insensitive to whether a reflector screen or
individual tuned reflectors are used. But it's obvious that there've
been several folk involved with modelling and building these antennas
in that group. Have you tried asking them? Seems like they're the
ones with the experience.

It's nice to see a practical homebrew antenna design like that.
Thanks for posting the link.

Cheers,
Tom

You need a spectrum analyzer with tracking generator option. Or a
network analyzer.

Hi

It has been my experience that the input impedance to the antenna can be
fairly well predictated by EZNEC is you are able to describe the antenna to
the program.

> power a circularly polarized antenna would receive from this?

The mismatch won't exceed 3 dB as long as the sense (right or left hand) of the elliptically polarized wave is the same as the receiving antenna. Here's why:

An elliptically polarized wave can be mathematically split into left hand and right hand circular components just like a linearly polarized wave can be split into orthogonal (e.g., vertical and horizontal) components. A right hand circularly polarized antenna will respond only to the right hand component of the elliptically polarized wave, and a left hand circularly polarized antenna will respond only to the left hand component. So the general answer to your question is that the received signal will be proportional to the circularly polarized component of the wave which has the same sense as the receive antenna.

As you make a right hand (for example) circularly polarized wave more elliptical, the right hand component decreases and the left hand component increases. This continues until the wave becomes linearly polarized, in which case the constituent right and left hand circular components are equal and 3 dB less than the total, linearly polarized component. If the wave becomes elliptical and increasingly circular in the other sense (left handed for the example), the right hand component continues to decrease and the left hand component continues to increase. When the wave becomes completely left handed circular, the right hand component is zero, so there will be infinite attenuation when received with a right hand circular antenna.

In general, both the transmit and receive antenna will be elliptical, so both components (right and left handed) have to be evaluated separately and summed.

Me, I'd just model the system with EZNEC+ and let it figure it out for me. A number of other programs are able to do it also.

If you know the antenna impedance at resonance is tolerable, then SWR is adequate. If you'll need to design a matching network, though, you'll need to know separate R and X components, so you'd need a network analyzer or equivalent.

Have you ever calculated how much signal loss occurs as a result of mismatch? You might find you're wasting your time bothering with it.

The first thing that you ought to do, is check the specs and
literature for the WiFi radio (card, access point, etc.) you're
planning to use it with. Find out whether this radio was certificated
(i.e. tested for compliance by the manufacturer) with an antenna
having a gain level of 8 dBi or more.

If it hasn't - if the radio was only certificated with an antenna with
less gain - then you cannot use the MJF antenna with the radio, and
transmit, without violating the radio's Part 15 certification. You
would be transmitting illegally.

You could still use the gain antenna with the radio in a "receive
only" mode (turning off the transmitter entirely). This could allow
you to do site-surveys, "wardriving", and signal strength evaluations.

If your WiFi radio was certificated with an antenna of 8 dBi or higher
gain, then you can use the MJF antenna with that radio. The usual
"neat uses" would be for setting up area or point-to-point links, over
distances greater than what you could achieve with a lower-gain
antenna (or in the face of interference, where the front-to-back and
front-to-side rejection of the gain antenna would help reduce the
impact of the interference).

8 dBi isn't particularly high-gain, as such things go. Even a simple
dipole is around 2 dBi. The additional 6 dB of gain will roughly
double the distance over which you can achieve a WiFi link.

People doing long-distance point-to-point or point-to-multipoint WiFi
often use gains of 19 dBi or higher... parabolic dish antennas and the
like.

Believe me, I tend to agree... As is, they tend to be about a 4.0:1
and maybe 55 MHz off the mark on average. But like I said, this is a
receive application in 1000 MHz. So real world, you wouldn't even hear
a difference in that. But it's a numbers game and they won't be happy
until they see the right numbers. But that's why it's hard for me to
justify spending big bucks for the ability to test this.

And Jerry, good idea... I actually did run the design as a model, but
it showed that it should be correct as is. So something else is
setting them off a bit. Probably the radomes or something.

Hi

You need only a decent L-band generator, a directional coupler, and a
detector to get the VSWR. Where is SoCal?

The horror...

If the Wifi card has a standard connector it should be OK with an
aftermarket antenna. If it has an oddball connector it must be used
with a specific antenna.

In any case, there is no one enforcing Part 15 compliance in the field.

True... it's rare, and seems to happen only after strenuous
complaints. I *have* heard of it happening, though.

>If the Wifi card has a standard connector it should be OK with an
>aftermarket antenna. If it has an oddball connector it must be used
>with a specific antenna.

That's not the intent of the FCC regulations.

The FCC requires that consumer-type WiFi radios *must* use nonstandard
connectors (for arguable definitions of "nonstandard"). Specifically,
47 CFR 15.203 says:

An intentional radiator shall be designed to ensure that no
antenna other than that furnished by the responsible party
shall be used with the device. The use of a permanently
attached antenna or of an antenna that uses a unique coupling
to the intentional radiator shall be considered sufficient to
comply with the provisions of this Section. The manufacturer
may design the unit so that a broken antenna can be replaced
by the user, but the use of a standard antenna jack or
electrical connector is prohibited... (snip)... the installer
shall be responsible for ensuring that the proper antenna is
employed so that the limits in this Part are not exceeded.

Manufacturers have asked that the "unique coupling" rule be relaxed...
they complain that every time they come up with a new "unique"
connector (e.g. reverse-polarity or reverse-threaded versions of SMA,
TNC, etc.), it rapidly becomes so popular and so easy to acquire that
they have to stop using it and find a *different* new non-standard
connector... lather, rinse, repeat.

The FCC refused to remove this requirement, the last time that the
issue was the subject of a rulemaking (although they did add the above
language which permits a broken antenna to be replaced by the user...
previously even this was essentially forbidden).

Your almost there JB..Antennas will have no effect on APCO25 but the micro surface mount technology will stop a tech in his tracks! Cheaper to replace than to repair$$$$$$$$$$$$$$$$$
After a short season the technicians will come up with a newfound technology and return C4FM back to where it is now at NFM and the bandwidth will stop being overwhelmed by strong signals!! Just be patient The FCC has got it in writing and must follow suit else it will appear to be a brainfart!!

The cops dont know where 800 mhz is its not a cell-phone thingy at all!! They would like to converse in private but this will need to be a scrambled code allowed by an individual reciever IDof a DSS design!! I expect Motorola already has the patent and a gob of new radios in transision??

Has anyone had any luck with these? the ones from Wireless Garden
I got one, and no matter how i turn it, I get very weak signal. my
target is about 400' away line of sight, except my friends ap is not
right in the window (i can see the window from my window).

I'm using an ALFA AWUS036H 500mW usb adaper with a RP-SMA.
the cantenna claims 12 dBi, and has a 3' cable with RP-SMA
the ap, has just the built in antennas (belkin)

I can get a week signal, but I get just as good or better with my 2
dBi omni!

do to the card being hi power the ap can hear everything but the ALPA
Rx SNR must be very low.

thanks in advance
-Jason

They should just worry about the input power to the antenna. So what if I take radiation off the floor and ceiling to make it go a little farther sideways? So what if I have a narrow beam in only one direction? It reduces congestion in the directions it's not pointed in.

I can understand the restriction for FM Modulators or IFB transmitters, but for a device that shares a band with microwave ovens I think the FCC better have a hundred higher priorities.

Dear Dave the problem is they have soo much bleed over from AP25 that
it covers 850 to 950 mhz the whole cell band!!

Cell Phones are not private they are worse than a party line!!

Go back to sleep I'll call you when dinner is ready

A lot of the new double pane windows have a metalize layer in them
that blocks RF very effectivly. Raising my window and removing the
screen is requiire for me acces my AP from outdoors.

In my G5RV model, I have a short wire containing
the source and transmission line. There seems to
be a way to connect a shunt capacitor across the
transmission line but I have been unable to
accomplish that feat in a valid manner. Anybody
know the trick to doing it in EZNEC+ 4.0? I've
tried using two more short wires to build a
triangle and installing the cap in one of those
wires but the results are not valid.

I'm sorry, no answer to your question, I just think it's funny,
remembering the Heath Cantenna, that someone expects a Cantenna to
actually radiate a signal.

Back 30 years ago when I was a novice, I remember accidentally leaving
my Cantenna hooked up instead of my real antenna and working a couple
of JA's with it. 15M really was wide-open to Japan every afternoon
back then!

Tim.

Andy asks:

The Friis equation at the above website states that the distance
exponent may be a number different than "2".

Can anyone here explain why a number other than "2" could be
used, and under what conditions ??

Thanks,

The exponent of 2 assumes no dissipative path loss. That is, the reduction in field strength is due solely to the power being spread out over an area which increases with distance from the source, and not to any reduction in the total power at any distance. A larger exponent would be appropriate when the path is lossy, for example when ground wave attenuation is present. A path through air could also get lossy at microwave frequencies due to water in the air in liquid or gas form, and at extremely high frequencies due to absorption by various atmospheric gases.

I have a Heath Cantenna too, but the WiFi folks mean a different thing
with
that term -- a 2.4 GHz waveguide antenna made from a Pringles (tm)
can.
Unfortunately, that cantenna of the second kind has almost no gain.
It needs
a much larger aperture to make that gain than the 3-inch diameter of a
foil-
covered paper tube. That can be had by attaching a larger, metallic
funnel
to the mouth of the antenna to form the typical microwave horn
antenna.
See any reputable antenna text book for design details.

Agreed on analog.

But AT&T mobile, for example, uses GSM. And GSM, at least through
2.5G, uses TDM as its RF physical layer..

Its odd because the dia. is only 85mm where the homemade ones say
100mm +/- 10mm.
also the 3' wire is very skinny (don't know what one it is). About a
thin as a pencil lead.
and also there's a tripod mount that has a bolt inside that blocks the
lower 7-8mm of the antenna.

as for the windows, tested (on my end), there not making any
difference. Kismet & Netstumbler don't seem to report noise level with
this card, just rx level. but the app that came with the Alfa shows
"Signal Str" and "Link Quality". No differnce betewen a 2 dBi omni and
the cantenna.

Just about anything works better than the Pringles(tm) can that made
the antennas famous. I made one with a large fruit juice can and it
worked fairly decent. I picked up about 10 db compared to the stock
antenna.

The 2.4 GHz Multipoint Distribution System (MDS) pirate receivers from the 1980's used a coffee can. The circuit board parts kit was sized to fit inside the standard 1-lb coffee can, so you knew (without the tape measure ;-).

I still have one overhead in the garage. It worked much better with a big cone of screenwire out in front. Maybe the experimentors should work in that direction. The cone acted just like a funnel.

Since the MDS signals are/were NTSC television, improvements could be evaluated real-time.

I don't think I say that, Friis uses an exponent of 2, but the calculator
can also solve the equation with an exponent other than 2.
>
> Can anyone here explain why a number other than "2" could be
> used, and under what conditions ??

An example is that the FCC stipulates exponents of other than 2 for some
field strength interpolation / extrapolation, up to 4 IIRC, and this is
for application in real situations at closer distances than radiation far
field conditions.

The use of the exponent is to account for some other effects. In some
cases the value of the exponent has been challenged. If I understand the
case correctly, the ARRL has challenged some instances used for BPL and
the court has required the FCC to scientifically substantiate its
exponent, or use another which it can scientifically substantiate.

The ability to specify the exponent is principally provided for peforming
those interpolation / extrapolations.

Any coating on the window? If either window is a Low-E window, you
will have problems passing RF. Similarly, if the wall at your friends
end is full of chicken wire, concrete, or foil backed insulation, RF
is not going to penetrate. Line of sight means the antennas can see
each other with NOTHING in between. Get line of sight and it will
probably work.

>I'm using an ALFA AWUS036H 500mW usb adaper with a RP-SMA.
>the cantenna claims 12 dBi, and has a 3' cable with RP-SMA
>the ap, has just the built in antennas (belkin)

Ummm.... methinks perhaps 9 dBi on a good day. I ran a model sometime
back. No guarantee mine is the same size can as yours:
<http://802.11junk.com/jeffl/antennas/coffee2400/index.html>
Note that the driven element is not a 1/4 wave wire, but is slightly
conical for better bandwidth.

>I can get a week signal, but I get just as good or better with my 2
>dBi omni!

Ummm... there's probably something wrong with the Super Cantenna or
your coax cable and connector arrangement. Start with a continuity
check using an ohms guesser. Also look for shorts. Beyond that,
you'll need a pile of test equipment. If the Super Cantenna uses a
type N connector, you might be able to substitute another external
antenna to test the coax cables and pigtail.

Incidentally, my father once warned me about products with amazing,
magic, miracle, super, and other superlatives in the name. Few come
even close.

>do to the card being hi power the ap can hear everything but the ALPA
>Rx SNR must be very low.

Don't assume the card is the problem, especially if the 2dBi omni
works as expected. I would investigate the antenna first.

So, The OP still isn't going to be listening in on any conversations....
UNLESS, he has some fairly sophisticated, and EXPENSIVE receivers, more
on the NSA's capability.

1613. Ladder Line Entry to Shack

Newsgroup: rec.radio.amateur.antenna
Date: 2009-03-13 19:22:24 UTC
From: k8jrm@cox.net
Message-ID: <Qnyul.105282$EO2.56876@newsfe04.iad>
Source record: 17037

Hi Guys,

This is an age old question - what is the best way to get 450 Ohm ladder line into my shack antenna tuning unit (ATU)? Here is my situation; I have two 4" PVC tubes inserted into the exterior wall that allow the entrance of coaxial cable into my shack. When I run the ladder line into the shack through one of these ports, the multi-band wire antenna fed with the ladder line goes wild! I can not get the antenna to tune with any of my ATUs.

I have received several suggestions on how I can overcome this problem. The most promising one seems to be to use two short pieces of coax with center conductor connected to either side of the ladder line. These pieces of coax, in turn, would be fed through the PVC hole into the shack and the center conductors connected to the ATU. The shield on the coax would float with no connection to any thing. This solution sounds good; however, common sense tells me that ladder feed line will still suffer because of its proximity to other objects. Any thoughts on this solution?

Another possibility is using a piece of Plexiglas place under a metal framed window pretty much as shown in the old hand books. My problem with this solution is that the window is on the other side of the room from operating table, the two coax entry ports and AC power.

Short of placing the tuner outside in the elements, is there a solution to my problem? I would be interested in hear what has been tried!

Presumably, your ATU has a balanced output for the 450 ohm feeder.

If you already have the two (presumably fairly short) pieces of coax
lines already in place, I reckon that the first thing you should try is
to ground the two shields to the case of the ATU (which I presume is
your shack safety ground, and maybe also your RF ground). This should
screen the inner conductors from other nearby conductors, and keep the
feed balanced. If you don't ground the shields, you might as well not
use coax.

Obviously, using coax will change the impedance of the line for a short distance, and may affect the settings of the ATU (more on the higher HF bands, of course). But with luck, the ATU will still tune OK. The increase in feeder losses should be negligible.

An alternative is to go from the ATU and through the wall using low impedance twin feeder. The spacing between the conductors will be much smaller than the for the 450 ohm feeder, and it should not have much opportunity to become very unbalanced due to the proximity of nearby conductors. It might be advantageous to twist it. I understand that, if the insulating material is suitable, twin mains power cable can be used as twin feeder, especially on the lower HF bands. The current rating of the cable will, of course, depend on what power you intend to run. Ordinary lighting twin flex should handle a couple of hundred watts. But, if you've got a bit of 50 or 75 ohm twin, all the better.

Tom,

Many configurations of the type you describe are widely misunderstood.

To help you to analyse the configuration, keep in mind that for a coaxial cable in TEM mode, the current flowing on the outside surface of the inner conductor is accompanied by an equal magnitude but opposite phase current flowing on the inside surface of the outer conductor.

Consider a break in the sheild as a circuit node with at least two connections, the inside surface of the outer conductor and the outside surface of the outer conductor.

The configuration you describe will make essentially no difference to the common mode current, the feedline is not effectively shielded by the outer conductors.

Do you guys remember the hayday of double side band?? Now compare it
to C4FM/digital

The old split systemTX/RX radio gear had a vfo and a spotter to
pinpoint the intended frequency!!

The TX spotter created a sample am carrier that allowed a null in
sound to sycronize the two TX/RX

Well this small am carrier gives C4FM the same ability to be
descrambled as it did SSB it provides the path through the
discriminator or does it not??

Tom, you confuse me. Is the ladder line in the PVC tube all by itself?
Or are there other conductors in the tube with the ladder line? If all
by itself, then there has to be some metal conductor around the PVC.

If the ladder line has to be in a PVC pipe with other wire, Stuff the
PVC pipe full of rags or crumpled newspaper to fill the PVC and raise
the ladder line as far away from the other conductors as possible. See
if that helps.

Another possibility is to put two 1/2 inch pvc pipes inside your 4
inch pipe, split the ladder line down the middle and run each wire
through a 1/2 pipe. Some splicing will be necessary, but your antenna
tuner won't care.

My antenna is a 160 meter lazy quad (horizontal) fed at a corner with
225 ft. of 600 ohm feed line. This line comes through the wall of my

mfg home (aluminum siding) and passes through a DPDT switch to 400 ohm ladder line to the antenna tuner. The wall insulators are ancient ceramic units made specifically for feed line through the wall. The tuner takes care of whatever matching is needed. Works great!

What about enlarging the hole and covering it with a piece of plexiglas with two bolts through it, spaced the same distance apart as the gauge of the ladder line. Connect sections of ladder line to both ends of the bolts -- under the bolt heads on one side and under the nuts on the other.

MFJ makes something along these lines. Please see:
http://mfjenterprises.com/Product.php?productid=MFJ-4602

Finally, have you tried tubes of material other than PVC? I ran some 300-ohm TV twinlead through an empty Sue Bee honey squeezer tube and the pictures were fine. (This was before I owned a signal meter, so I don't know if it had any bad effect.)

The short answer is that you are screwed. The converters certainly work
with the small portables, but the portability suffers. Just find some place
in the house cable distribution system to use them. (Need a tv in the
bathroom?)

Tom,

Sounds like your running the ladder line with some other conductors in
the PVC.

You never said how far the entry point was to the ATU, if its relatively
short less than 15' or so I would recommend you run a piece of coax from
the ATU through the PVC to a 1:1 balum located outside. there would be
some loss in the coax/balum but it would be low on 160-30M and some what
higher on 20-10 meters. I don not think you can quantify the amount of

loss but I don't think you will see it via RST reports. I have successfully used this method over several years since I did not have the 4" PVC that you luckily have for the coax and other conductors.

The above suggestion is made on the assumption that the ATU has a unbalanced output for coax and is not a balanced only tuner.

With respect to the addition of two (2) pieces of coax as a feed through on the inside of the home the shields are connected together and then joined to the ground system in the shack. From the feed through point then you can continue with the ladder line to the ATU.

I recommend the remote balum since it helps cut down on any coupling of RF to other conductors in the PVC. Use a good current type balum since the swr is likely to vary over the multiple band use. The length of ladder line from the balum to the feed point of the antenna is some what critical and there is lots of articles on the subject on the WEB, I believe DX Engineering has some excellent white papers on this subject for remote balums.

Or if you REALLY want to be portable, open up a converter box, find the
power supply output, and mod it for external DC power.

As people start replacing their old TV's there's going to lots of
converter boxes for little to nothing.

I have a portable 12V TV and am using an Insignia converter
box with it. The Insignia converter box works with a cheap
12V inverter and consumes only 7 watts.

1628. colinear representation in NEC

Newsgroup: rec.radio.amateur.antenna
Date: 2009-03-14 21:33:15 UTC
From: Owen Duffy <none@no.where>
Message-ID: <Xns9BCF5704E3FC2nonenowhere@61.9.191.5>
Source record: 16953

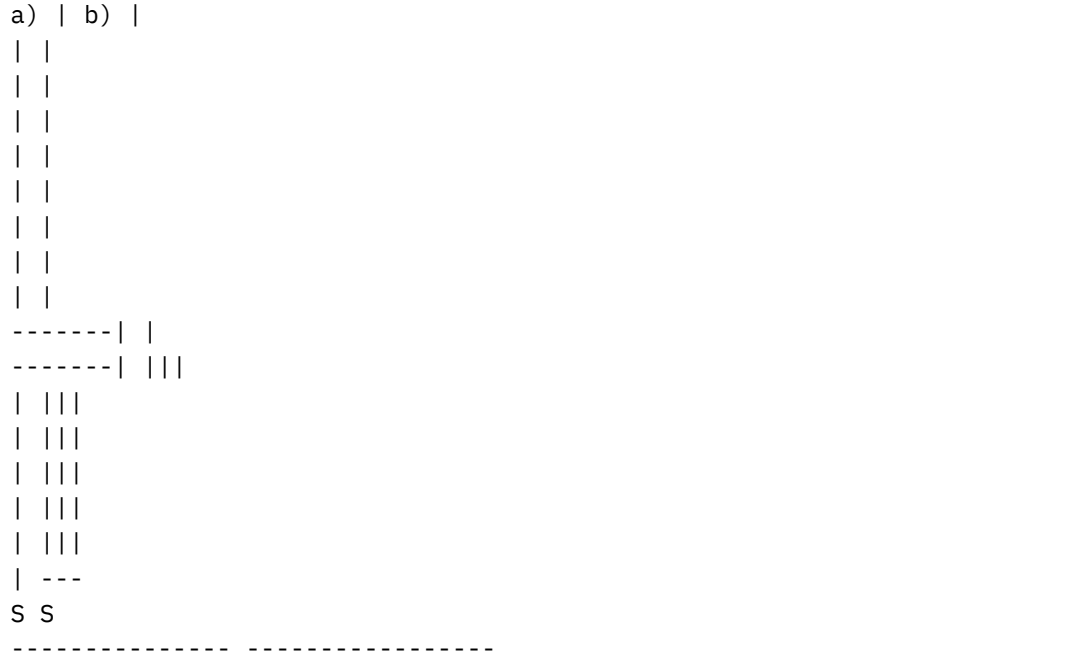

Fig a) above is an attempt to portray a colinear vertical over infinite ground with a source at "S". The configuration is easy enough to model in NEC with sensible results.

The common explanation for operation of a) is that the U shaped section is a quarter wave s/c stub, that it is responsible for delivering direct in-phase drive to the upper section, and that it plays no part itself in radiation ie, that the common mode current on the pair of conductors is zero at all points. Notwithstanding the conventional wisdom, it seems unlikely that there is no common mode current on that section, and NEC models suggest that there is, and that it accounts for some small asymmetric distortion of the pattern.

Fig b) above is an attempt to represent a coaxial arrangement of tubes where the lower end of the tubes are connected together, and that is fed at S against an infinite ground.

My questions are:

1. To what extent is b) equivalent to a)?

2. How is b) modelled in NEC?

Thanks
Owen

Hi Tom,

You have an unbalanced load whose common mode current is heavily
influenced by the proximity of conductors in this case. Previous to
this, the load was still unbalanced, but you didn't notice it as much.

Solve the balance and keep the line away from nearby conductors.

I use the MFJ feedthrough board # 4602. It has two ceramic feedthrough
insulators for balanced line, with other feedthroughs spread across
the board for coax lines, a random wire and a ground wire. MFJ now
makes a whole line of these boards, and they come complete with
weather stripping and burgler bar. No problem tuning the balanced
450-ohm line, coming in to the balanced posts on an MFJ tuner.

The whole setup also makes it very easy to disconnect antennas from
the outside when it gets stormy.

Howdy Tom

The two short pieces of coax with center conductor connected to either side of the ladder line is perhaps the best solution. It was covered in QST/The Doctor is In, June 2008. In the article it suggests using the best quality coax on hand, keeping the run to the absolute minimum and the coax shields should be tired at both ends and connected to the station RF earth. This configuration introduces a small section 100ohm nominal impedance transmission line into the antenna system which should have minimal losses, but most important is that it is still part of the balance transmission line. The losses for say RG213 at 4mtr would be almost nothing on 80mtr and perhaps up to 2db on 10mtr.
Obviously the lengths of coax need to be exactly the same length.

If you would like a copy of the article drop me email.

I can't answer that question right off, except that at first glance they look quite similar in operation. I'd build both models with EZNEC, then

take a look at the reported currents in the View Antenna display. You can get the same information from tabular NEC results, but most people find the graphical display quicker and easier to interpret.

You can see the significance of the seemingly small common mode current on the a) model stub by replacing it with a transmission line model stub which of course has zero common mode current. The results are quite different than for the wire model stub.

> 2. How is b) modelled in NEC?

A coaxial line can be modeled as a combination of a transmission line (for the inside of the coax) and a wire (for the outside of the coax). Download the EZNEC demo program and look in the manual index under Coaxial Cable, Modeling. It'll direct you to one of the furnished example files which illustrates how. Then you can do the same thing with NEC if you're so inclined.

Hi, Peter.
I read the QST article and thought it was crazy and so I tried
replacing the 5 ft length of ladder line from my antenna tuner up the
wall to the two feed through insulators going through the wall to the
600 ohm feed line outside.

With the 5 ft ladder line I could tune the antenna, a 160 meter lazy
quad loop, to all bands through 15 meters. With the 5 ft section of
double coax, just like the doctor said, the antenna would not tune for
20 meters or any higher band. I put the old ladder line section back.

Remember what all the discussions say about keeping the feed line away
from metal objects? Here we are introducing a 5 ft length of metal
just 1/4 inch from the feed line. The extra capacitance just kills the
feed line. Yes, I was using RG-213.

So, the doctor in nuts, as far as I can tell.

Paul

That's interesting and noted as I was intending to use that approach to get the balanced line into my new shack, which is a metal shed. I guess it may be back the old drawing board. Any suggestions?

Hi Owen,

To no extent as far as I can tell without modeling. I don't think the phases are going to equivalent.

>2. How is b) modelled in NEC?

This takes some presuming of your intent, and my presumption, given the symmetry of the two smaller elements (why two otherwise?), is you are attempting to portray a skeletal sleeve with them. Two is insufficient by my standards, six are barely worth chasing the numbers and I typically use 16. One such example, complete with a link to the design can be found at:
http://home.comcast.net/~kb7qhc/antennas/verticals/Cage/cage.htm

It deviates only by a small degree, but could prove a useful boost in adding the longer element after opening the top end of the thick radiator.

> interpret.

Ok, here is the model I constructed of b) (the coaxial tubes
construction). For simplicity, the upper and lower outer tubes are the
same diameter, the same wire in this model.

```
CM
CE
GW 10 1 0 -2 2 0 -2 2.1 0.005
GW 1 47 0 0 0 0 0 15 0.005
GE 1
GN 1
EK
EX 6 1 1 1 0
TL 10 1 1 16 50 5 1e+99 1e+99 0.0001
FR 0 0 0 0 15 0
EN
```

I have a 3/4 wave vertical over perfect ground, and I have inserted a
quarter wave s/c transmission line into the vertical at 1/3 height. I
have shunted the TL with 10k ohm to represent some loss in the stub.

The currents report shows the currents in the top half wave to be
approximately 180° out of phase with the bottom quarter wave.

The question is whether such a construction yields three quarter waves in
phase, or whether the NEC model is correct that they are not in phase.

My initial feeling is that the wire model of a) is correct. I have not
yet done as you suggest in the previous par.

Ok. Your view is contrary to common explanation... but of course that
doesn't make it wrong.

NEC models of the wire construction at a) show in phase operation, but a
small distortion of the pattern due to common mode current on the stub...
so they support the common explanation in the phase aspect, but not in
respect of the stub causing phase change with no other effects.

The explanation of b) as a) where the stub is relocated coaxially sounds
appealing, but that explanation might be wrong.

>
>>2. How is b) modelled in NEC?
>
> This takes some presuming of your intent, and my presumption, given

You seem to have mininterpreted my ASCII art, and that would be easy to
do. I am describing at b), two coaxial tubes, the lowest tube is 1/4
wave, the longer tube is 3/4 wave. The lower tube ends are connected, and
fed between ground and the bottom of the tube assembly.

See the model that I have posted in response to Roy.

Thanks.

Paul,

The "5 ft length of metal just 1/4 inch from the feed line" is not a good method of analysing the behaviour.

The treatment of the shield ends is very important to the operation of these things.

If the shield ends at each end are tied together, and each end effectively grounded (and that is a big ask), then any common mode current on the incoming ladder line flows to ground via the outboard ground connection, and the section of dual coax transforms the impedance seen looking into the ladder line in a quite predictable way, and with some loss. The transformed impedance might not be within the range of your tuner.

If the outboard shield ends are not effectively grounded, then the configuration does essentially nothing to reduce common mode current entering the shack, so the system is a fails it its primary objective.

Owen

Thanks Peter, I have had a quick look at the article.

The "Doctor" describes the configuration in his Figure 4. I have posted a copy of the figure to assist discussion, it is at http://www.vk1od.net/lost/ShieldedTwin.png .

The treatment of the shield ends is important detail in understanding how this works.

If the ground connection on the antenna side of the shielded line has a very low impedance to ground, almost all common mode current on the open wire line will flow to ground via that connection, and very little common mode current will flow into the shack.

For example, lets consider a G5RV at that the transition to shielded twin is at the bottom of the so-called "matching" section. Using a coax pair was comprised 5m of RG213, the impedance looking into the open wire line on 80m would be somewhere around 10-j340.

The transformation and loss in the twin RG213 can be calculated using TLLC (http://www.vk1od.net/calc/tl/tllc.php) with a load of 5-j170 on RG213. The result is 1.9dB of loss in the 5m of cable, 35% of the power into the twin RG213 is lost as heat. The impedance looking into the twin RG213 would be 2-j80, a very challenging load for efficient transformation to 50 ohms.

Now, this is a pretty awful case, and they won't always be this bad, though some will be worse. This shows a method of analysing the configuration.

The "Doctor" says in his article "Whilst it is critical for proper operation for the shields of the two coaxes be tied together at each end, whether they are tied to "ground" is not important for operation, but can make a big improvement in lightning protection."

I disagree with the last statement, the treatment of the ends of the shields wrt ground is very important to analysis, the configuration behaves differently for different ground configurations. For example, if the antenna end of the shields is left disconnected, the common mode

current on each side of the antenna end of the shielded twin is essentially equal and common mode current flows on the outside of the shielded twin. The shielding does not eliminate external fields from common mode current.

Hi Owen,

I suppose that R.W.P. King disagrees with the "common explanation." He makes it quite clear that there is interaction of the antenna field with the stub perpendicular to the axis of the antenna wire, and that the coaxial stub does not interact in the same way and the antenna performance is therefore different. (Antennas chapter of Transmission Lines, Antennas and Wave Guides, King, Mimno and Wing.) This is why I like using a feedline to guarantee the phasing. It can be done by driving collinear dipoles with equal lengths of transmission line, or by using an arrangement like the "coaxial collinear," where the radiating elements are outer conductors of coaxial transmission lines used to insure that the multiple feedpoints are at least fed in-phase voltages (and you have to consider that the currents are not exactly in phase).

Cheers,
Tom

That it interesting that Prof King declares that there is more than just
a transmission line action with the external style of stub.

An NEC model of a) works well, showing in phase operation and a nice
pattern. I have played around with two stubs of shorter length on
opposite sides of the vertical and stacked on top of each other, and they
worked fine (ie in phase current distribution with zero near the stubs)
at about 0.15+ wavelenths each... which doesn't fit with a propagation
delay around the conductor path explanation. Interesting!

I am trying to support the common explanation of the coaxial colinear in
my diagram b) using NEC, but I haven't yet been sucessful.

No. But I did take the time to see what would be necessary to actually model it. And what I ended up with is identical to a) except that the wire stub is replaced by the shorted transmission line model, and the lower wire has become the outside of the coaxial structure so is increased in diameter. So those are the two differences between a) and b). As Tom mentioned and I alluded to, there's some interaction between the wire stub and the antenna which doesn't exist between the ideal transmission line and the antenna, so performance is different.

You might as well leave your source open circuited as to connect it to the shorted end of the transmission line stub. The current into one transmission line conductor always equals the current out of the other, so if the two are shorted, no more current can go into or out of the shorted end. Therefore, any external connection to it looks like an open circuit since no current will flow through the external connection.

What's a type 6 source (EX 6)? The NEC-2 and NEC-4 documentation I have defines only types 1 - 5.

In most phased arrays, the objective is to get the fields from the elements to be in some particular ratio. Driving them with currents in that same ratio doesn't always accomplish the desired field ratio, though, when elements have different current distributions as they often do. (See http://eznec.com/Amateur/Articles/Current_Dist.pdf.) The difference between field ratio and feedpoint current ratio is particularly great when base feeding half wave elements. As it turns out, you'll often get better field ratios by feeding with voltages having the desired magnitude ratio and phase difference than feeding with properly ratioed currents, when dealing with end fed half wave elements. The coaxial collinear requires a pretty delicate balance of outer and inner velocity factors as well as the effects of mutual coupling, particularly when there are more than a couple of elements. So I suspect that the current distribution can either help or hinder depending on how the factors are traded off. I wouldn't be surprised, though, if ratioing the voltages rather than currents is actually helpful.

As an illustration, open the EZNEC example file Cardioid.EZ. Change the number of segments to 10 per wire for better accuracy. (It can still be run with the demo program.) Click FF Plot and note the nice cardioid pattern. Then change the Z coordinates of End 2 of the two wires to 0.47 m to make them nearly anti-resonant, and click FF Plot again. The pattern deterioration is due to the elements having different current distributions. Finally, change the source types from I to V. This will force the voltages, rather than currents, at the antenna bases to be in

the desired ratio. Run FF Plot again. You still won't have the nice cardioid back, but it's quite an improvement over the pattern with "correctly" ratioed base currents. The bottom line is that the element currents are more closely related to the base voltages than the base currents, when the elements are near anti-resonance (parallel, or half wave, resonance).

> b). As Tom mentioned and I alluded to, there's some interaction

I think that is what I had done, but I used the same diameter top to
bottom.

Here is a revised deck with different diameters:

```
CM
CE
GW 10 1 0 -2 2 0 -2 2.1 0.005
GW 1 15 0 0 0 0 0 5 0.015
GW 2 30 0 0 5 0 0 15 0.005
GE 1
GN 1
EK
```

```
EX 0 1 1 1 0
TL 10 1 2 1 50 5 1e+99 1e+99 0.0001
FR 0 0 0 0 15 0
EN
```

In the above, the lower conductor is three times the diameter of the upper conductor. The TL is wired into the lowest segment of the upper conductor. Again, I have shunted the TL with 10k R to represent loss in a real TL.

This model does not show in phase currents in upper and lower parts of the vertical.

I have been playing with this in EZNEC and 4NEC2. The deck I offered was from 4NEC2 as my EZNEC files are binaries and couldn't go inline. The EX 6 is an extension for a current source. It is immaterial in this case, and the 6 can be changed to a 0.

Thanks.

Thanks for the clarifications, Roy. Indeed, with my last slightly cryptic comment about considering that currents might not be in phase, I was wanting to communicate that you always want to check the currents on the elements to make sure they do what you want. That's true no matter how you feed the antenna, though as you say the feed you use may aid in insuring that the currents stay the way you want.

I'm a bit surprised about your comment about the coaxial (fed) collinear requiring a "pretty delicate balance" between coax propagation velocity and (presumably) radiating element geometry. What I've found in my simulations is that I could change the coax vf, keeping the elements a transmission-line half wave long so that the feedpoints were all the same in-phase voltage, and the net gain of the antenna for a given physical length was only slightly affected. I'd typically see a couple of the elements in a ten element array with considerably lower current magnitude, but the currents were nearly in-phase on all the elements, and the pattern was always the desired "flat pancake". On the other hand, I wasn't trying for any up or down slope to the pattern, and I can see that things might change in that case. With the propagation velocities I was using, between 0.66 and about 0.9, and the element diameters I was using, I suppose the elements were always shorter than resonance, and the self and mutual impedances were not changing in any dramatic fashion.

Or, perhaps my model was all screwed up! ;-)

Cheers,
Tom

1651. The dipole and the violin

Newsgroup: rec.radio.amateur.antenna

Yeah the folded dipole that is. We see there 4 x ï¿½ = 2 lambda.
Following the antennabook one can earth the middle of that folded dipole.
And feed it with a coax.
So from there we can bridge the mantle from the coax to the middle of the straight dipole piece. See it ? Now my problem in visualising that; the current from hot goes to the ï¿½ wave dipole....hits ground there.....appears out of the ground(!).... hits the second ï¿½ wave....and dives back in the coax mantle. If this is true i can't imagine it !

Now the violin string. Take one string attached between two walls or whatever.
Exite it. Now ground the string in the middle.....exite the first half......and the second halve will vibrate also ?? Thru ground ??

Are the two statements right? The mind boggles.

I've been running your model without the loss, and I'm seeing currents in the upper and lower wires which are nearly 180 degrees out of phase.

>> between the wire stub and the antenna which doesn't exist between the
>> ideal transmission line and the antenna, so performance is different.

For sure -- maximum gain is about 46 degrees above the horizon.

>> You might as well leave your source open circuited as to connect it to
>> the shorted end of the transmission line stub. The current into one
>
> I don't think I did that.

You're right, you didn't. My mistake.

> . . .

In playing with the model, I noticed something surprising -- length and Z0 of the transmission line have very little effect on the pattern, even over wide ranges (5 to 5000 ohm Z0, lengths from essentially zero to one wavelength). In fact, try removing the transmission line altogether, leaving the wires connected directly together and look at the pattern. Then try changing one wire end slightly to break the connection between them -- again, very little change in the pattern. The fact is that the junction of the two wires is at a point of very little current, so you can connect or disconnect them with almost no change. Likewise, you can insert just about anything (of zero physical size), including an ideal transmission line of any length, without any real effect. So the transmission line stub doesn't really do anything significant at all. What I don't understand yet is exactly why the wire stub does what it does. It sure doesn't work like the simplified explanations imply.

It's even cooler than that. You can put two antennas miles apart with
nothing but space between. Put current through one, and current will
appear in the other -- THROUGH SPACE!

Put two violins close together and pluck the string of one. The
corresponding string of the other will vibrate. THROUGH AIR!

You mind has just begun to boggle.

The statement in the antenna book is probably correct. The statement
4 x 1/4 = 2 is not correct. With regard to violin strings, they only
vibrate if they are mechanically stimulated. Otherwise they behave in a
manner similar to other inanimate objects. :-)

Hi Roy,

Roy Lewallen <w7el@eznec.com> wrote in
news:eIednRTIvf4bPiPUnZ2dnUVZ_qfinZ2d@posted.easystreetonline:

...

Thanks, all noted.

> What I don't understand
> yet is exactly why the wire stub does what it does. It sure doesn't
> work like the simplified explanations imply.

Returning to my diagram a), below is an expansion of the detail at the junction of the stub and vertical sections.

```
|
|
|
|
|
|
|
| A
B |
---------------------|

--------------------|
|
C |
| D
|
|
|
|
|
|
|
|
```

It strikes me that if we omit the stub all together, and leave a gap in its place, we have two unconnected resonant elements, the top half wave, and the bottom quarter wave with a driving source. The two elements are field coupled to some extent, and currents will setup in each section out of phase. NEC models support this, and I think they are correct in doing so.

Returning now to a) with the stub connected and very close to resonance, and with reference to the diagram above, for A, B, C and D very close to the corners, I(A)=I(B) and I(C)=I(D).

If the desired outcome of using the stub is that the upper and lower sections are in phase, then I(A)~=I(D). That implies common mode current in the stub, so to cause I(A)~=I(D), the stub must have common mode current (equal to (I(A)+I(D))/2 per conductor).

If that is true, then reduction of the physical stub to a pure differential mode TL element is discarding part of what makes it "work". That implies that replacement of the stub with a two terminal equivalent impedance, eg by insertion of a load in an NEC segment, or insertion of one port of a TL network in an NEC segment is an inadequate model.

Am I on the wrong track here?

Then consider the (say) three strings of a piano note, and that if their resonant frequencies are close enough, they vibrate in phase (that implies at the same frequency of course), well they do until the amplitude of vibration dies down sufficiently and they 'unlock' and vibrate independently.
>
> You mind has just begun to boggle.

Now, somehow I can see this being used to explain an antenna.

I hear the behaviour of a string in a violin being used to explain why resonant antennas are just better, and how they "fairly suck the power out of the transmitter, like a string sucks the power out of the bow".

Well as both a ham and a better than competent violinst (I play in
symphonies and also do solo recitals.) I have been playing violin for
57 years vice only 53 years as a ham, so I am a bit of a rookie on the
ham side of things. You are sort of right and sort of confusing the
laws of acoustics with the laws of electronics.

When we bisect the violin string (which gives you an octave of the
open string) the played (excited) part will give you a frequency
double that of the open string. We violinists prefer to think of that
as an octave. In practice, the unexcited string is damped to
inaudibility. Aside from our standard tuning note of A= 440 Hz,
violinists don't normally think of frequencies. In practice though
violin strings don't give out pure sine waves, they have all sorts of

somewhat random overtones, something which, along with the resonant box we call a violin, give each instrument its character. Without them we'd sound like a MIDI keyboard. The only time both sides of a stopped string vibrate is when we play what we call a "harmonic" and there are several of them on violin strings. A harmonic is when the violinist lightly touches the string so that the unexcited side (e.g. not the bowed side) can also vibrate and these have their own set of rules and playing implications. Fortunately the composers usually indicated this stuff for us, so we really don't have to think very much about the physics of all of this.
If we lightly touch the violin string at the octave point rather than pressing all the way down as we usually do, we get something of a whistleing sound an octave higher than the normal stopped note (both sides ot the sting are vibrating.) If we touch lightly at the interval of a fourth above an open string (on an E string, this would be A above the E string, and the resultant sound is two octaves above the fundamental because you are dividing the string at a one-fourth point and are creating what in effect is a standing wave (though that concept is unknown among violinsts unless they happen to be EE's or hams.) Of course I wave length at our frequencies doesn't quite come out 300,000,000 / frequency = Lambda. We'd have some pretty damn long strings at A above middle C. I think that comes out to a wavelength of 68,181 meters. Just wouldn't fit on a violin.

If you touch one note above that (B natural on the E string) the result is a not an octave and a fifth (or high B) above the fundamental frequency, because lightly stopping the B and causing it to vibrate on both side of the stop divides the string into thirds.

In practice though violin strings are all over the map as to what is vibrating where and when, though if violins would produce pure sine wave instead of a rich blend of harmonics and overtones. If the FCC monitored violin harmonics, I doubt we could meet the 40 db spectral puriity requirement. Mercifully the Gov't stays out of the violin world.

At a lab level, we can sort of come up with a demo of sympathetic vibrations. In practice, of course we don't. Few violinist are actually that close to in tune (close, but not exact...otherwise and orchestra would sound like a signal generator.) In string instrument history, going back to about the early 15th century, The string insturments known a viols in some cases actually did have a set of strings under the bridge which did vibrate sympathetically giving an effect somewhat similar to the wow-wow effect of a cheap organ. Most of these instruments are know played by historical music specialists and are generally out of the mainstream of the orchestral world in which I dwell, but there are a few compositions which call for the Viola d'Amore which does have such strings. (there is a short solo in the Opera "Manon" by Massenet which calls for this instrument and its sympathetically vibrating strings. Those string has some technical name, but I don't remember what they are called.)

Somehow, despite knowing both RF theory pretty well and violin playing damn well, I never really ever considered the positioning of my fingers in playing as analogous to "grounding." I must work on that one.

I don't think I have ever also considered my violins strings to have impedance, or reactance, and I haven't quite considered the feedline problem. Is my bow a 52 ohm feed point or 72 Ohms? :-) My bows don't have any PL-259s or BNCs on the, just horse hair. Resonance, of course is provided by the violin body, but I've never considered this in terms of RF resonance. Interesting concept.

Now if we could do something like a Yagi and get sympathetic strings to provide director and reflector gain and front to back ratios, we might solves a lot of auditorium problems and not be blasted to inaudibilty by the brass instruments which of course do have rather considerable front to back ratios (though the French Horns have theirs the wrong way.)

Now I have to reconcile my fiddle knowledge with all the stuff I had to learn to pass my FCC tests. I'm old enough to have passed the General and Extra tests before they were multiple choice format. The music certainly helps with the code.

Jon Teske, W3JT and concert violinist.

In particular, you have to touch lightly enough that some energy
can couple into the other half of the string. Some of the energy
is transferred through up-down motion and some through the bending-
stiffness of the string itself. You could see the finger as a series
capacitor to ground, attached to each half of the string by a pair
of resisters bypassed by another capacitor. You can tweak the values
by the way you touch.

Mechanical impedance/reactance is a widely used idea in mechanical
and civil engineering. The dynamic motion of bridges and buildings
is sometimes even modelled using electronic circuit modelling tools
amongst other methods.

Clifford Heath.

For what it's worth, I think you're on exactly the right track, Owen.

Some things to ponder: does it make any significant difference if the stub is, say, 2mm wires spaced 20mm apart or 1mm wires spaced 10mm apart (that is, the same impedance line, but different physical size), and does it make any significant difference if the wires are kept in a plane that includes the antenna elements, or if they are twisted near their attachment point so they lie in a plane perpendicular to the antenna wire, or if they are twisted throughout their length? What if they are coiled in a spiral out from the antenna wire, so their shorted end lies much closer than a quarter wave from the axis of the antenna? I don't have any answers to these questions; they just seem like an interesting and reasonable extension of your original question.

Cheers,
Tom

I'm sorry...perhaps I don't understand your notation. Don't you expect that the current at A will be (rather roughly) out of phase with the current at D? If I think about a collinear with three half-wave elements end to end, and drive the center of the center element, if it's going to act like I want, I'll have high current near the middle of each element, and those three will be in-phase. Because of the mutual impedances among the elements, things get a bit funny at the ends. I suppose there is a fairly large voltage across the gap between adjacent elements, and therefore there will be moderately high current near those ends to account for the capacitive current in the air between them. That's what I'm seeing in the EZNEC model I just hacked, and it's as I'd expect. The currents near the ends of the central element are considerably higher than the currents near the open ends of the outer elements.

(Now to spend a few minutes playing with changing the length of the stubs through resonance...)

Cheers,
Tom

I am taking a convention that the sense of currents in segments is from
bottom to top. That means that I defined all segments in order from bottom
to top.

My notation ~= is to mean approximately equal.

Does that clarify things?

Yes--and then if they were exactly equal, would that not imply only
transmission line current on the stub? Obviously, they are exactly
equal if you simply connect the ends of the elements together...but
that isn't what gets us to in-phase currents at the centers of each
element (in the case of the symmetrical 3 element design; or the base
current in the bottom quarter wave in phase with the center current in
the top half wave...), and (nearly) equal currents at those current
maxima. To the extent that the currents A and D in your diagram
differ, there is common-mode or "antenna" current on the stub.

Cheers,
Tom

Thinking some more about it, my current thinking is that my analysis was flawed. I was using the standing wave currents, when I should be using the travelling wave components.

I suspect that when NEC models the conductor arrangement at my fig a), it correctly accounts for propagation delay and the phase relationships compute correctly.

If we replace the stub with a TL element, I suspect that NEC reduces the TL to a two port network and loads a segment of the vertical with an equivalent steady state impedance of the s/c stub network. If that is done, the reduction to a lumped load means that there is zero delay to travelling waves, and the computed currents (amplitude and phase) in the vertical will be incorrect. This means that you cannot replace a resonant stub with a high value of resistance, it doesn't work.

If that is the case, it suggests that NEC cannot model such phasing schemes using TL elements.

Owen

That's exactly the flaw committed by w8ji and w7el when
they tried to measure the delay through a 75m loading
coil using standing wave current which doesn't appreciably
change phase through a loading coil or through the entire
90 degree length of a monopole. Using standing wave
current, w8ji measured a 3 nS delay through a 10 inch
long coil, a VF of 0.27.

http://www.w8ji.com/inductor_current_time_delay.htm

W7EL reported: "I found that the difference in current
between input and output of the inductor was 3.1% in
magnitude and with *no measurable phase shift*, despite
the short antenna... The result from the second test was
a current difference of 5.4%, again with *no measurable
phase shift*."

Of course, phase shift is not measurable when one is
using standing wave current with its almost unchanging
phase. EZNEC supports that assertion. Bench measurements
support that assertion.

When traveling waves are used to measure the delay through
a 75m loading coil, the correct delay through w8ji's 10
inch coil turns out to be about 26 nS (~37 degrees) at 4 MHz
with a more believable VF of 0.033.

Why would NEC reduce a TL two-port to a lumped load? Two-port
parameters can handle transmission line problems quite well without
the simplifying assumption that all components are of zero length.

Of course, if the TL model doesn't "know about" the antenna field
(which I believe is in fact the case), there will be no common-mode
current on it because of that field. It's pretty clear to me that the
common-mode current is very important to correctly simulating the
situations you are interested in. In fact, figure (B) of your
original posting puts the stub in a position where it does not see the
antenna field, and I would expect it to behave much differently from
the perpendicular stub of figure (A).

One of the things I did in my simulation playing last night was to
delete the stubs, leaving just the three 1/2 wave elements end-to-end
with a bit of gap between them. (0.01m gap between 0.5m elements, 1mm
diameter, 11 segments each.) I'm sure you know what that pattern and
current distribution look like. Then I added sources at the centers
of the outer elements. I set all the sources to 1 amp, in-phase. The

pattern was somewhat sharper (though just marginally more gain) than the stub-coupled case. What I didn't try, but will as I have a chance, is to put sources at the centers of the outer elements and set them to the values (magnitudes and phases) I see in the stub-coupled collinear, and see how much the current distribution near the ends looks like the stub coupled case. I suppose it will be pretty close, and the antenna pattern will look very similar to the stub coupled pattern.

Thanks for bringing this subject up. I'm learning something from it.

Cheers,
Tom

1668. Receiver antenna/amplifier matching question

Newsgroup: rec.radio.amateur.antenna
Date: 2009-03-17 17:16:08 UTC
From: Joel Koltner <zapwireDASHgroups@yahoo.com>
Message-ID: <tVQvl.65318$PS5.54384@en-nntp-07.dc1.easynews.com>
Source record: 16992

I'm trying to figure something out here...

Assume that I have a 2m antenna that (through whatever means) happens to have an impedance in the ballpark of 50ohms. Also assume that this antenna will generate 1uV open-circuit.

Assume that I have a MMIC amplifier that has FET inputs and therefore has a high input impedance... let's say it's 500ohms.

If I directly connect the antenna to the amplifier, the amplifier input effectively sees ~0.909uV and then amplifies it.

If I build a matching network to make the amplifier "appear" as 50ohms, at the input of the matcing network I'll have 0.5uV, but since energy has to be conserved (my matching network is assumed to be lossless), (0.5uV)^2/50=Vamp^2/500 --> Vamp=1.58uV. This is a gain of 20log(1.56/0.909)=4.8dB over a direct connection.

Is that all correct?

Now let's go down to HF. My antenna is still 50ohms, but at such low frequencies parasitics aren't that bad and I just use a JFET or MOSFET and have a 5kohm input impedance. In this case, without the matching network, the amplifier sees 0.99uV. With the matching network, it sees 5uV (!), a gain of 14.1dB over a direction connection.

Yet many designs for HF/shortwave antenna amplifiers don't bother with a matching network, just feeding the antenna directly into a FET. So why is this? Is the extra gain just not needed on HF? Or too unwiedly to build when you're trying to cover everything from 1MHz-30MHz?

Thanks for the help,
---Joel Koltner

Source record: 16993

The early radio pioneers were schooled in acoustics, mechanics en chemistry.
So they understood quite soon how to resonate the electric version of a wave.
That takes a bit of the mystery away.

Yes, 4 x ï¿½ = 1 lambda. So a folded dipole is 1 lambda and an open dipole is
a half lambda. But a folded dipole can thus be halved. A sort of trombone shape.

BUT the ends resonate with tension right ? So we have to feed one end with
high impedance also. Next detail and the big question for me; may the other end
be grounded ? In case of a situation where no counterpoise can be installed.

Because of the folded dipole which is earthted in the straight middle, i think the
half wave end fed can be earthed. Agreed ? The idea is to topfeed a mast which
stands in conductive grounds. So ï¿½ wire up and the tower is ï¿½ wave down,
which to my paper insight should work as an ï¿½ wave antenna ? pls say yes. :-) ?

You didn't mention noise figure, and that's important. At UHF and
above, atmospheric noise is typically very low, and you benefit from a
really low noise figure. In that case, you want to match the source
to the receiver input in such a way as to achieve the best noise
figure, which in general is NOT the same as getting maximum power
transfer into the receiver. Data sheets for parts intended as input
receiver amplifiers generally have a graph and/or table of optimal
source impedance for lowest noise figure versus frequency. Some will

have noise contours on a graph for some critical frequency or frequencies.

At HF, atmospheric noise is generally very high, and you also have to put up typically with some very large signals. So the design of the receiver input is driven by different needs. You want to keep distortion low, to avoid problems from those large signals, and you want to achieve a "reasonable" noise figure -- but reasonable might well be 15dB, an absolutely terrible noise figure for a 440MHz receiver front end. And you might well put in a pad you can switch in to lower distortion, and out for better noise figure.

Also, in some cases such as a car radio, the antenna impedance isn't anything close to 50 ohms (for the AM broadcast band). The design there would of course be different than if you were dealing with a 50 ohm source.

Cheers,
Tom

Hi Tom,

I expect that NEC does model the propagation delay from end to end on a transmission line. My comment was that NEC reduces a s/c TL stub to a lumped load for the stub input end which is inserted in the vertical.

The problem here perhaps is our viewing the phasing section as a s/c stub of two wire line, when perhaps is it better described as a single wire TL of a half wave length.

With that thought in mind, I have constructed a model where the phasing section is configured in a double triangular shape, but with the same conductor length, and NEC suggests in-phase currents. In fact, it has slightly better pattern symmetry than a).

Hi Tom,

That's a most informative post; thanks.

At work we have a design that uses these:
http://datasheets.maxim-ic.com/en/ds/MAX2371-MAX2373.pdf -- right after an antenna and a matching network. Too bad that Maxim didn't choose to provide any clues on what antenna impedance it would like to see for the lowest nose -- I just matched it to 50ohms. (And truth be told, we have a slightly wretched antenna to work with anyway... the main reason it's workable at all is due to the antenna designer -- and outside firm -- sticking a 160ohm resistor in parallel across the input leads.)

Joel, you might hope that a good receiver provides some degree of band pass filtering prior to the RF amplifier for IMD protection.

For best receiver weak signal performance at SHF, you would usually match for optimum noise figure rather than best front end gain.

At HF, receiver internal noise is usually lower than ambient noise, so receiver NF is less an issue, but... intermodulation performance is very important. "Noise" can be created in the RF amp due to intermodulation distortion, so designs often focus on optimisation of IMD rather than NF directly, or front end gain. For example, I note that the TS2000 does not use a high performance signal FET for the HF RF amp, but uses a couple of power FETs.

The 144MHz case you mention is somewhere between the two, ambient noise in the city is usually much higher than a state of the art LNA, and often higher than a modern transceiver with a NF of 5dB. In my experience, IMD noise is a bigger issue on 144MHz than NF measurements made in a shielded room. A high gain amplifier with poor NF or high IMD noise delivers a high volume low S/N output from the receiver. (Try an IC706IIG on a discone antenna in the city.)

I don't consider 500 Ohms to be "high impedance". I was taught that
MMICs were 50 Ohms in and out.

I'm not sure why you want to reduce it to something less complex than
it is. Transmission lines like this support both even and odd mode
propagation, I guess what we'd normally call "transmission line
currents" and "antenna currents." It seems perfectly OK to me to let
both exist on the line at the same time. It also seems to me there is
value in doing that, because I believe there's insight to be gained
from understanding how each of those currents contributes to the net
performance of the antenna. It's important that the stub be in the
field of the antenna so that antenna current is excited on it, and
it's also important that the stub be shorted a quarter wave away from
where it attaches to the collinear elements, so that the differential
transmission line currents do the right thing.

On the other hand, you may well discover some insights looking at it
in a different way, so I hope my comments won't discourage you from
doing that!

Cheers,
Tom

My real objective is to model b) in NEC.

Trying to understand a) and to deconstruct it is part of an approach to finding a solution to b).

The 'stub' in a) cannot simply be replaced by a s/c TL element, so that suggests that a s/c TL element is not a solution for b) either.

The last configuration with the triangular / diamond configuration of the phasing line seems to work in an NEC model, and the deconstruction suggests that having a half wave of conductor is fundamental, and that it need not be in the form of a two wire TL.

I have also tried removing the 'stub' from a) and using a half wave TL to drive segments each side of the gap from each other. If the segments are close to, but not the last, this does produce a current distribution that is not 180 out of phase, but it does not produce the almost perfect in-phase outcome of modelling the wire structure. Nevertheless, playing with the length of that TL, being very close to half wave in length is essential to overriding the natural tendency to out of phase currents.

This hasn't solved the problem of modelling a coaxial configuration, expecially where the coaxial section was coax cable, apart from excluding some approaches as invalid.

It's easy to reason yourself into traps by dividing currents into
"standing wave" and "traveling wave" components. They're different
things and don't add or superpose. Results of attempts to make this
differentiation can be seen in a vast number of postings on this forum
in the past.

Rather, I recommend considering a current to be a single value or, at
most, made of differential and common mode components which *can* be
added to obtain the total current.

In a steady state single frequency analysis, which is what NEC performs,
there is no such thing as delay. All time relationships can be expressed
as phase difference, which can't be tied to a unique delay -- you can't
even tell if the phase difference was due to time delay or magical
prescience-caused time lead. In a steady state analysis there is no way
to distinguish a half wave lossless transmission line from a 1-1/2 wave

line; they act exactly the same in all ways. So does a magical -1/2 wavelength line whose output appears a half cycle *before* the input appears. Only in a time-domain analysis will you be able to tell the difference. So yes, NEC models the transmission line as a two port network. It does force the correct voltage and current amplitude and phase relationships between the input and output. And it's indistinguishable in the steady state analysis from an ideal transmission line which effects the phase difference by means of delay. The NEC transmission line model is equivalent to a real (but lossless) transmission line on which the current is purely differential, e.g., a coax line with a large number of ferrite cores on the outside. The model is accurate within the constraints of a steady state analysis. If you're interested in looking at the effects of delay in a transient system, you'll need to use an analysis tool other than NEC. But if you let your transient analysis run until steady state is reached, the results will be the same as NEC.

Compared to 50 ohms it's high. :-) Granted, this is a bit subjective, but in my mind a "high impedance RF probe" is often 500 ohms (a 450 ohm resistor + the 50 ohm terminator in a scope"), and the implication is that it doesn't significantly load down whatever it is that you're probing.

(Note that a "1Mohm in parallel with 10pF" "high impedance" probe ends up being ~110ohm by the time you hit 144MHz...)

> I was taught that MMICs were 50 Ohms in and out.

True, most are reasonably close in the bands they were designed for. I probably shouldn't have said "MMIC amplifier" there -- just plain "amplifier."

But in NEC, if you load a transmission line with its
characteristic impedance, reflections are eliminated
and the delay along the wire is proportional to the
phase shift *even during steady-state*.

Receiving antenna matching is the same as a transmitter loss, except in
reverse. As you said if you start with a 50 ohm antenna and transmission
line and feed it into a 500 ohm receiver you will have a 10:1 swr and the
additional loss of the transmission line will come into effect. If it is
very short , it will not mater too much . If the line is long it will.
Above around 140 mhz the noise is low enough you need to use a low loss line
of a very short length. The noise figure is most important. Usually there

is a mismatch when tuned for lowest noise figure. Short line , no problem, long or lossey line will cause much signal loss.

On the lower frequencies it usually does not mater too much what you do as the noise comming in from the antenna will usually be the major factor.

1683. Multiple yagis on one radio

Newsgroup: rec.radio.amateur.antenna

Hi, i have an alinco dualband radio i want to set up as a link so i can access repeaters from the mobile as i have to travel around 100kms to get them in the car. Here is the scenario:

1. a 70cm verticle at the top of my tower
2. 3 or 4 2m yagi's also connected pointing towards the repeaters i want to access.
3. all these feed into a dualband alinco.
4. tx\rx on 70 from car to tower verticle
5.crossbands to selected repeater set on alinco on 2 metres.
6. repeater transmits, alinco picks it up and retransmits on 70cm to my car.

I can change channels remotely on the alinco from my car dtmf mic. VERY HANDY FEATURE. so i could be listening to repeater 1 and then punch in a code then another and change the alinco at home on the tower to go to repeater 2 etc.

It all works, but the one that is working just has a dualband verticle attached as it can "see" all the repeaters in it's area. It's about 250km form here so totally different terrain etc and i can't access it from here. i need yagi's because the repeaters i have access to are a LONG way from me so i need the gain. I can currently get them with my verticle but some are very flakey, dropping in and out all the time.

WILL THIS WORK?

IS IT POSSIBLE?

I know there would be much loss in connections etc. the rig would only be putting out around 20w otherwise it will cook itself.

I'm guessing i would need a diplexer to combine the 2m and 70cm antennas to the one ant socket on rig, and some power dividers for the 2m yagi's.

Get thinkin!!

Waiting for replies......

Thanks

Gary

There are power dividers available (expensive) that maintain 50 ohms at all ports but you will probably lose 6db through that.

The Alinco will probably burn up even with both bands set to low power. The mobile package is only capable of giving off so much heat and depends low duty cycle. This is a problem with all mobiles as the design paradigm is for one person transmitting 1 min on and 3 min (or more) off. When operating as a repeater, EVERYONE TRANSMITS ALL THE TIME. There is no greater test of a continuous duty station than a bunch of hams.

Many years ago I thought this to be do-able with a DR-600 because of the sales brochure, and spent some time trying. One of the most aggravating problems was the DTMF decoder falsing and having no idea what was happening because of no telemetry. The radio would even change the control frequency because of that, leaving me totally out of control and in complete embarrassment.

I do have a FT-8500 in the car that acts as a "mobile extender" with my HT, but I don't feel confident enough to be more than a 2 minute walk away from the controls.

TX/RX on 70cm is best done with a real repeater with a remote/repeater controller system porting to your base station radio. It is legally required for you to be in control and you cant do that if the base is transmitting on 70cm instead of listening. And who identifies on 70cm?

Doing this successfully entails a long and expensive learning curve. I give you a leg up. I got started in the 70's. These days, usable repeater controllers can be had for under $150 and old Mastr2, Micor and other retired conventional continuous duty stations can be had for under $500. You can even get a rotor that can be macro programmed from the controller to turn to preset headings when channels are selected.

Get other locals to chip in and support the project.

And this is why pianos are arranged to strike the string at a point which suppresses a harmonic which is dissonant. (I think it's the 7th harmonic which is suppressed)

The choice of where the hole you blow over in a flute has similar things going on. As do the locations of the holes on any wind instrument.

That musical instrument design thing is not as simple as it might seem in first year physics class.

That was an unexpected coupling between the force from the wind and torsional vibration of the roadbed. As the roadbed tilted, it "caught" more of the wind and had more force applied, moving it further. The torsional resonance was such that it oscillated with ever greater amplitude (not much different than a flag flapping, or a blade of grass in the wind.. not quite like a wind instrument reed, though)

As for whether it could have been anticipated? I don't know that modeling was that advanced back then (1930s). The bridge was an architectural feat, with a very delicate looking thin roadbed and much longer than most other bridges (3rd longest when it was built, some 1500 feet longer than the Golden Gate, for instance). It was much longer and thinner as compared to other suspension bridges of the time which were double decked, (SF Oakland Bay Bridge) for instance.. making them torsionally much stiffer). Interestingly, the designer of Tacoma Narrows (Moisseiff) was also involved in the Golden Gate.

I agree that electromagnetic traveling waves are the kinds of waves that propagate on and cause radiation to emanate from an antenna. But your claims about 'standing waves not changing phase along the antenna' provoke the following questions:

1.) what relation (if any) do you believe the wavelength of the standing wave has to the wavelength of the radio frequency waves traveling on an antenna? And,

2.) what relation (if any) does the phase of a sinusoidal wave have to its amplitude?

Reeds don't oscillate torsionally (at least not as the dominant mode)
They're more of a fixed/free beam that oscillates in longitudinal bending.

The GGB is shorter than the TNB. It was third on the list on July 1,
1940 according to Wa DoT. (Verrazano narrows was built in 1964) George
Washington was built in 31 and was 3500 ft, and was longest until 37,
when GGB was built in 37.

TNB was 5939 ft long (per Washington state DOT). GGB is 4200 ft
(wikipedia gives 5000 ft for the length of the TNB)

In fact, it was exactly like a reed. The Tacoma Narrows Bridge
exhibited the highest roadbed length to roadbed width ratio of the
designs of that era, and this was a contributing factor.

>As for whether it could have been anticipated? I don't know that
>modeling was that advanced back then (1930s).

Charles Ellis (an engineer for the GGB) is the inventor of the math
behind the modern suspension bridge. He developed 33 equations
embracing from 6 to 30 variable to account for shape, structure,
temperature, winds, and stress that were due to both dead and live
loads. The GGB was designed for a wind load of 30 pounds per square
foot at the roadbed and 50 pounds per square foot on the towers. The
thirty pound spec is equivalent to a hurricane, the GGB typically sees
only 10 pounds per square foot for 50MPH winds.

Under the wind load designed to, the towers would bend five inches
(they swayed free, unstressed, 12 feet during construction and an
earthquake).

Basically, Ellis designed the GGB to the sum of all probable stresses,
not their average, not their RMS. The only thing missing was harmonic
amplification. The GGB was closed due to wind in 1950 and later
retrofitted with 5,000 tons of cross bracing (as was the replacement
Narrows bridge).

>The bridge was an
>architectural feat, with a very delicate looking thin roadbed and much
>longer than most other bridges (3rd longest when it was built, some 1500
>feet longer than the Golden Gate, for instance).

You can't be third in the list to the GGB and longer both unless you are speaking of the insignificance of approaches. The Verezzano span (designed by GGB engineer Ammann) is only 60 feet longer but carrying much more weight.

>It was much longer and
>thinner as compared to other suspension bridges of the time which were
>double decked, (SF Oakland Bay Bridge) for instance.. making them
>torsionally much stiffer). Interestingly, the designer of Tacoma

More the legacy of (GGB engineer) Russell Cone's assistants.

>Narrows (Moisseiff) was also involved in the Golden Gate.

Moisseiff was also the weak link for both the Narrows bridge and the GGB closure due to high winds in 1950. He underestimated the dynamic wind load. Ellis was the inventor of the math, but not a chief project engineer. In the field of bridge engineering, and especially for the GGB, there were a lot of Prima Donnas - Strauss the first of firsts. Moisseiff, by some accounts, appears to have been used as a resource rather than a principle engineer in the Narrows bridge construction. The bridge owners conspired to a lot of monkey shines in cost-cutting choices which turned out to be fatal. They eliminated the cross bracing from the bridge towers, above and below the roadbed; and they dispensed with the roadbed stiffening truss.

Moisseiff, along with GGB designers Ammann and Cone, was appointed to the review board to study why the bridge failed - that was doomed to failure, too, by the bridge owners (who had their own insurance problems because they declined to find an outside insurer and decided to carry the risk themselves). The story of the back room feuding and remarkable Reaganomic theories are case lessons in planned disaster.

And yet the failure mode I've most seen with them is splitting.
Perhaps this only reveals a limited experience of their failure.

>(wikipedia gives 5000 ft for the length of the TNB)

You have inadvertently summed in ordinary approaches. We have freeway
interchanges with more complexity. Bridge span is the significant
indicator of interest. The GGB comes in at 4200 feet suspension span,
yes, the Narrows is much shorter at 2800 suspension span.

If push came to shove about overall length over water, we, here in
Seattle, have vastly larger bridges that float. The I-90 bridge logs
in at 6620 feet, and the 520 bridge pushes that to 7578 feet. Nearby,
we have the Hood Canal bridge that is longer at 7869 feet.

I've been across all five many, many, many times, and I used to live
halfway across the bay on the way to Oakland, by way of the Bay Bridge
in Frisco. The one suspension bridge I refused to drive across is SW
of Colorado Springs, over the Royal Gorge - the highest suspension
bridge (1053 above the river below). Just standing on the approach as
a car goes over gives you the shakes (talk about harmonic coupling).

All noted, thank's for the input.
I will have a look at some controllers.

As i mentioned, a fellow ham has one working. has had for a while. He
said they ran it at 30w and blew it up, it's now at 10 and seems to be
doing a good job. We both have DR-610 radio. as for "local" hams to chip
in, they are 100+km away from me so i would be the only one using it here.

Thanks, more to think about...

Gary

Hello, and acoustic dissonance is defined by the production of
"unacceptable" beats between the partials (overtones (harmonics)) that
can, but are not generally, exact multiples of the fundamental) generated
by two or more fundamentals. Dissonance can also be defined when two
fundamentals are in close proximity as to produce a kind of "roughness".
Dissonance has no relevance for one fundamental (and its partials). It is
the partials that give a pitch on a particular instrument its quality or
timbre.

There is also a "contextual" dissonance associated with particular
intervals/ chord structures in Western classical music that, due to
accepted practice in a particular era, in many cases bears no relation to
the acoustic dissonance (sounding the chord in isolation (out of
context)). If you want more enlightenment in this area pop on over to
rec.music.theory or rec.music.makers.piano. Sincerely, and 73s from

The other part of the story with the DR600, it had multiple problems from day 1 and I dropped it off several times at the depot and they could never fix it under warranty even when I told the tech what was wrong with it. Can't blame the tech, because the salesman in charge of the operation told me "I should have bought a new one". I took his advice and took it back to HRO for a refund and bought a Yaesu (built in fan). The main problem was bad RX vco that would run amok when it got warm. It seemed there were no repair parts, just abandoned radios that the tech would swap boards with. The last straw was when I got it home and put it on a spectrum analyzer and it was severely spurious - Not the original problem. I have a photo of that, and I should put it up and send a link. Looked like a comb across 10 MHz.

All I can tell you is Use CTCSS on both bands and use the lowest power setting especially on the UHF link tx because it will play all the time if you are in a roundtable or net and it wont allow the chassis to cool down even at low power. Use a FAN and cross your fingers. The fins can be COLD and the power block is too hot because the chassis cant get the heat out to the fins fast enough. Setting the TOT to 30 sec. will help save the radio but it will be a big nuisance. About all you can do is save it for check ins and short contacts.

This is a regular problem with mobile die-cast chassis from all manufacturers. Customers would take low bid for Motorola Maxtrac or Radius repeaters after seeing them in brochures saying "50 watts", so we would have to give them "50 watts" even though 10 was more reasonable. We would see them back in within a month for a $500 rebuild. Icoms, Vertex, Kenwoods... All the same problems. If the customer says anything more than "10-4" or "2150 bye" the transmitter goes up in smoke. Then we remind them of the specification in the fine print that says 15% duty cycle rated and inform them if someone talks on the radio for 1 minute they have to wait 5 minutes to cool down and if they use it more often than that - they need to upgrade. Tough luck for the other brands because they couldn't upgrade, only turn the power down. If you did that they could sue for false advertising or go buy a cell phone instead.

Jim, I thought you have EZNEC. Here are the currents at all of
the segments along a 20m dipole with 21 segments from end to end.
Please note that in a dipole that is 180 degrees long, the phase
of the (mostly standing-wave) current varies by less than 3 degrees.
How can the current in a 180 degree antenna vary by less than 3 degrees?

Quoting my web page: "Standing wave current cannot be used to directly
measure either a valid amplitude change or a valid phase shift through
a loading coil. All of the reported conclusions based on loading coil
measurements using standing-wave current on standing-wave antennas are
conceptually flawed." Owen had an epiphany of a sort when he realized
that fact of physics.

Hmm, I seem to differ tho I am not a player of violins
With respect to the movement of violin wires and physics
ALL vibrations of a lever or wire is three dimensional unless the ends
are secured encastre where it is damped to a two dimensional swing. An
example is a pendulum where the lever or "bob" is of a short distance

as with a clock where the "hinge" restricts oscillation to two dimensions. In the case of a pendulum such as seen in certain museums that are pivoted some 100 feet or more high the oscillations take up a three dimensional pattern such that it takes many many oscillations before it can arrive at its starting point. The same analogy can be applied to a radiator or antenna or any other oscillation as it follows the same action of a tank circuit which is universal in the sciences of nature ie the standard model and the conservation of energy format.

Here's an EZNEC simulation of a 1/4WL monopole. It is
a 1/4WL stub with the wire resistivity adjusted to
simulate monopole radiation. The standing wave current
distribution (lack of phase) and feedpoint resistance
are similar to a monopole.

http://www.w5dxp.com/stub_dip.EZ

Add a short at the top and a load of 600 ohms in the
shorted segment and observe the traveling wave.

http://www.w5dxp.com/stubsht.EZ

Turn on the current phase display and observe the
traveling wave phase shift.

The supposition is true, so the intended implication must be that only standing wave current can be measured on monopole antennas. And Roy therefore would have to have measured standing wave current (whatever that is).

I must decline to agree. :-)

1710. Noise figure paradox

Newsgroup: rec.radio.amateur.antenna
Date: 2009-03-21 02:46:53 UTC
From: Joel Koltner <zapwireDASHgroups@yahoo.com>
Message-ID: <yyYwl.71674$PS5.37714@en-nntp-07.dc1.easynews.com>
Source record: 16934

Here something I've been thinking about lately...

The idea of a noise figure N is, simply enough, how much loss in SNR is seen going through a network (typically an amplifier) -- N = (Si/Ni)/(So/No), expressed in dB. Say I have an antenna that I know happens to provide an SNR of 60dB... if I feed that antenna into an amplifier with a power gain of 100 (20dB) and a noise factor of 2 (3dB), at the output of the amplifier my SNR will be 57dB. Easy peasy, right?

But here's an interesting paradox: If I take that output with 57dB SNR and feed it to another, identical amplifier, shouldn't the SNR at its output now drop to 54dB?

Of course, most people know the answer is "no," but it's not necessarily immediately obvious why this is.

The problem, to quote Wes Hayward, is that "the noise figure concept has the drawback that it depends upon definition of a standard temperature, usually 290K." In other words, the SNR at the output of an amplifier degrades by the noise figure *only if one can assume that the noise level going into the amplifier is equivalent to kTB*, where T is usually taken to be 290K (...by the guy who built the amplifier).

This assumption isn't correct in the two cascaded amplifier case. Indeed, since the first amplifier has a gain of 20dB, in 1Hz the noise power coming out of the amplifier is -174+20+3 = -154dBm. This is equivalent to a noise temperature of 57533K! From this vantage point it's pretty obvious that an amplifier with a noise figure of 3dB -- corresponding to noise temperature of 290K -- will have negligible impact on the overall noise output. (If you run through the numbers, the SNR at the output of the cascaded amplifiers is 56.94dB.)

Personally, I think that using noise temperatures tends to be "safer" than using noise figures, as the later can easily lead one astray if you're not careful to make sure you know what the "standard temperature" used was. (After all, if someone just hands you a piece of coax and says, "there's a 60dB SNR signal on line, please amplify it by 20dB and insure that the output SNR is still >59dB," without more information there's no way to determine how good of an amplifier you need.) But I'd like to get other peoples' opinions on this subject... how do you think about noise figures and temperatures?

Input appreciated,
---Joel Koltner

Appealing, but wrong.

The amplifier has an equivalent noise temperature (Teq) of 289K.

To determine the effect of two cascaded stages of the same amplifier, Teq
of the combination =T1+T2/G1=289+289/100=318K which corresponds to NF=
3.2dB

If you were testing the amplifier with a standard signal generator at
room temperature, the generator does suppy 290K of noise.

An real antenna might supply much less through to much much more noise.

I get 60-3.2=56.8dB.

It is not so much an issue of safer, is it use and mis-use, it is about how you use NF with cascaded stages. Essentially, you convert them to T, apply the gain effects, then T back to a NF for the combination. The equation looks ugly, but if you work in T, you can do it in your head... well until T becomes so large you want to use dBK.

You might find this little calculator interesting / helpful:
http://www.vk1od.net/calc/RxSensitivityCalc.htm .

I meant to flag this statement.

Does it provide enough information for you to apply it in the way you
have?

It says nothing of the absolute noise power or signal power. You seem to
assume the noise power KTB noise where T is 290K.

What if you were pointing at directive antenna at cold sky, and Tnoise
was say 10K. (As a complication, no antenna is perfect, and there would
also be some spillover noise from the hot earth, but the total might be
well under 100K.)

Alternatively, what if you were talking about a HF antenna and say Tnoise
was say, 30000K.

>Input appreciated,

Wes Hayward's articles in the 1970s completely transformed the way we think about the sensitivity and dynamic range of HF receivers. They mark the point where ideas such as "noise floor", "intermodulation intercept" and "blocking dynamic range" and "reciprocal mixing" entered mainstream amateur radio.

Inspired by those articles, I set out to apply those same concepts to VHF/UHF receivers... and ran into problems with the definitions of receiver sensitivity. Like everyone else who has traveled this route, I quickly found that the very large values of noise figure and noise temperature, that are typical at HF, can conceal some approximations and even misconceptions.

The approximations will probably be unimportant in HF systems where the receiver has a high noise figure / noise temperature, and antenna noise is usually greater still. However, the misconceptions are always important, because they will give incorrect results for VHF/UHF receivers. The difference at VHF/UHF is that receiver noise and antenna noise are often quite similar, and both much lower than at HF.

I must emphasize that the fundamental concepts are the same at all frequencies. The differences are all due to the magnitudes of the numbers involved.

To cut the story short, noise temperature is the only concept that will always give correct results. As Owen points out, some of the numbers are large and ugly - but the important thing is that they are correct. The results can easily be converted back into a more comfortable format... and those results will likewise be correct.

For example, modern Noise Figure Analyzers have options to accept inputs and display results in any relevant engineering units; but the internal calculations are done entirely in terms of noise temperature because that concept will always give the correct results.

An important misconception is about the role of "290K" as a reference temperature. Contrary to what is stated above, this is *not* a designer option ("usually 290K", implying that some other value could be chosen). That number 290 is built into the IEEE standard definition relating noise factor to noise temperature:

F = T/290 + 1

That equation defines what the engineering world means by "noise factor". F and T are variables but the number 290 not; it is fixed by definition. (Noise factor F is a dimensionless ratio; the more commonly-seen Noise Figure is simply F converted into dB.)

What engineers do sometimes assume is that the *physical* temperature of their hardware is 290K, because that special case does allow some convenient simplifications. But that isn't the same as saying "my reference temperature is 290K". At best, it is loose language - fooling ourselves by saying something that we don't really mean. At worst, it is a perfect example of the way that a good approximation can hide a

fundamental misconception.

An engineer working at HF wouldn't even notice what he has done. Because he is working with very high values of noise temperature, any errors will be negligible - in other words, he has made an excellent engineering approximation. But the misconceptions are still there... waiting. If that same engineer moves to work on low-noise UHF and microwave systems, he'll fall flat on his face.

Does this matter to he average radio amateur? Yes, it does, for many of us have multiband transceivers with coverage from HF through to UHF - exactly the range of applications where those pitfalls await the unwary. The engineers who design those radios need to have their concepts straight; so do the people who write equipment reviews; and if we want to make intelligent buying decisions, so do we all.

Hi all, it is my webpage:

http://www.covermap.es

Covermap is an application that allows the calculation of propagation loss of a particular antenna defined by the user using Google Maps. In covermap you have the ability to see the extension of the radio antenna (coverage mode), the different coverage cells of positioned antennas (cellular mode) and get the loss in decibels on a particular point with respect to the antenna (point to point mode).

I'm looking for one company that makes possible to continue with this project.

Easy peasy, but wrong!!!

You may have a 60dB SNR but that says nothing about the actual level of noise that is applied to the input of the amplifier from the antenna.

You may be better off thinking in terms of noise power (in Watts) rather than NF.

For example, your amplifier will add a noise power of 3dB above thermal to the path. If your input noise power from the antenna is 20dB above thermal then when it is summed with the amplifier's noise contribution there will only be a very very slight increase in the overall noise power. Hence the noise figure will only increase very slightly, and your SNR will only degrade very slightly. (It will not be 20+3dB!!!!)

The situation is the same when you add a second amplifier, you must take the sum of the input noise from the antenna and the amplifier noise (in watts), multiplied by the amplifier gain (not in dB) to give you the noise power that is at the input of the second amp. Then you must sum in the noise power contribution of the second amplifier.

From the above it now becomes clear that if the gain of the first amp dilutes the noise contribution of the second amp on the overall noise level. (unless the gain is very low and the NF of the second amp is very high).

> that is).
>
> I must decline to agree. :-)

About 90% of the total current on an open-ended 1/4WL
monopole is standing wave current with close to unchanging
phase. That's why a 1/4WL monopole is called a "standing
wave antenna".

That is the current that Roy and Tom used so the component
traveling wave, accounting for about 10% of the total current
where the phase shift actually occurs, was mostly ignored and
swamped by the huge component standing wave.

This is such a simple concept - I don't see the problem
in understanding that a wave with the following equation
doesn't change phase with position (x). The phase is the
same over 90 degrees of length no matter what fixed x and
fixed t are chosen. EZNEC supports that fact of physics.
Here's the standing wave equation from "Optics", by Hecht:

E(x,t) = 2E01*sin(kx)*cos(wt) quoting "Optics", by Hecht:

"[Standing wave phase] "doesn't rotate at all, and the resultant
wave it represents doesn't progress through space - its a standing
wave."

Another interesting thing about the standing wave equation
is that the sign of (wt) can be reversed, i.e. standing waves
don't move in either direction - they just stand there. EM
waves cannot stand still so "EM standing wave" is an oxymoron.

Quoting one of my college textbooks, "Electrical
Communication", by Albert:

"Such a plot of voltage is usually referred to as a
voltage standing wave or as a *stationary wave*.
Neither of these terms is particularly descriptive
of the phenomenon. A plot of effective values of

voltage, appearing as in Fig. 6(e), *is not a wave*
in the usual sense. However, the term "standing wave"
is in widespread use."

From "College Physics", by Bueche and Hecht:

"These ... patterns are called *standing waves*, as
compared to the propagating waves considered above.
They might better not be called waves at all, since
they do not transport energy and momentum."

One can use EZNEC's VERT1.EZ to view the essentially
unchanging phase on a standing wave monopole. Just look
at the difference in phase between the feedpoint and a
point 45 degrees up the antenna. In 45 degrees of antenna,
the current phase changes by 3.65 degrees. That is the
current Roy used to measure phase shift through a coil
in order to support w8ji's 3 nS delay "measurements".

I make the observation that hams *like* Noise Figure, the the roll up of a system component's Noise Figure into whole of system impact is often (very often) not done well.

I was explaining to a local EME enthusiast that a certain two stage 1296 LNA that represents NF=0.51dB when the FET specs give NF=0.78dB for the first FET alone, is very creative. When the effects of input circuit loss and roll up of the second stage noise is included, it is unlikely that such a preamp would have a guaranteed NF better an 0.9dB.

In high performance systems, I perceive a preference to not use G/T as a metric for receive system performance. Rather, hams will quote (brag) Sun noise rise (Sun/ColdSky ratio) without statement of the solar flux at the time, or the time (from which solar flux can be estimated from historical records), or if they do quote solar flux, it will be the 10.7cm flux which cannot be reliably extrapolated to the relevant ham band.

The 'science' is often obscured by shallow discussions about whether LNA Noise Figure is more important than Gain.

Owen

So-- Which is the most relevant noise measurement? Noise Figure-
or Noise Temperature? If one is better than another at a given
frequency, than another, and then the other is better at greater freqs,
WHY? (and, keeping in mind the FIRST stage establishes the Noise
figure,IF it's gain is enough to overcome the next stage's noise
figure) , then why is this a consideration?
Finally, as temperature is free space must approach absolute zero,
but, considering space "noise from stars, ect", what is it REAL
absolute Noise Temp of the (cold) sky? Inquiring minds want to know!

As both Ian and I mentioned, Noise Figure is based on the degradation in S/N ratio assuming that the source contributes 290K thermal or Johnson noise (KTB noise) from the equivalent source resistance.

This if fine for describing the operation of a receiver when driven by a standard signal generator.

The radiation resistance component of the equivalent source impedance of an antenna is not a source of KTB noise, but is a source of received noise power from various sources, and the level varies with many factors including frequency and time.

Expressing a receive system performance as a Noise Figure assumes an external or 'ambient' noise component that is of little application relevance.

Expressing a receive system performance as an equivalent Noise Temperature expresses only the receiver's internal noise, which is a limited perspective from an application point of view. However, comparison of the system's internal noise with the external noise gives insight into the S/N degradation due to the system.

Both measures contain sufficient information, just that you have to transform NF to obtain Teq which is the more direct input to calculation of system S/N, or exploration of cascaded stages for example. Because of this, NF is sometimes misinterpreted as to its direct signifcance.

> frequency, than another, and then the other is better at greater
> freqs, WHY? (and, keeping in mind the FIRST stage establishes the
> Noise
> figure,IF it's gain is enough to overcome the next stage's noise
> figure) , then why is this a consideration?

The first stage is very important in determining system noise temperature, but in high performance stations, so are the losses in the feed system, switching etc. The contribution of later stages should not be considered insignificant until calculated.

Often, the LNA runs with so much gain that the transceiver AGC reduces gain sufficiently to degrade transceiver noise temperature to perhaps 30,000K (NF=20dB). Consider a 0.5dB NF 35dB gain LNA (T=35K, Gain=3,000), then it rolls 30,000/3000=10K into the system noise temperature which may be significant depending on the external noise level.

Even worse is the scenario where an OM installs a 20dB attenuator between LNA and transceiver to 'correct' S meter readings. In that case, a 5dB NF receiver with 20dB attenuator has NF=25dB, T=90,000K, so it rolls 90,000/3000=30K into the otherwise same system... but this is done!

> Finally, as temperature is free space must approach absolute zero,
> but, considering space "noise from stars, ect", what is it REAL
> absolute Noise Temp of the (cold) sky? Inquiring minds want to know!

IIRC the coldest part of the sky in the 5 - 10GHz region is around 4K. As I mentioned in an earlier post, practical antennas capture significant energy in their sidelobes, so the total noise input power might be well in excess of 4K.

The more interesting question is the background when pointing in the desired direction (eg the moon for EME), and how much sidelobe noise is received.

In my experience, the community seems to dictate the terminology. (If you buy a big, long sandwich for lunch, is it a "hero," a "sub" or a "hoagie"?)

More to the point, when selecting an LNA for C-band satellite, you will almost always see the noise temperature in the specs. However, for Ku-band, the LNA noise figure is usually spec'ed.

As was pointed out, they are directly convertible. Go a little less than halfway downpage at
http://www.microwaves101.com/encyclopedia/noisefigure.cfm
and see the graph of noise temperature versus noise figure. (This web page also provides illustrations of what's already been presented here.)

The noise figure of the first stage strongly influences the total system noise figure, hence the oft-seen placement of a low noise preamp close to the antenna.

I've designed for low noise, but not for amateur applications. When I
did that design, I chose to work with something that appears to be
alien here, NEP or Noise Equivalent Power. I did this because every
circuit I know of has an input and output resistance and those were
intimately associated with Johnson noise (is this too ancient a term
even if many here are using his concept expressed by Nyquist's math?).
To this point no one seems even remotely interested in resistance (and
it would appear that the focus on a 4 or 5 degree K source of deep
space would be awash in resistor noise in an amp soaking in the
typical ambient of room temperature).

You're quite correct. It's the same underlying physics and theory in every case, but each user community chooses the approach that it finds most useful.

For example, audio/LF designers tend to deal in noise voltages and also need to think about source and load resistances. RF designers think more in terms of noise power, noise factor (ratio) and noise figure (dB); and since performance tends to be specified and measured in a 50-ohm system, it often isn't necessary to know the individual source and load impedances.

The alternative for RF designers is to think in terms of noise temperatures. For individual devices such as LNAs, NF and noise temperature are virtually interchangeable (and the difference in usage between C-band and Ku-band is purely historical). However, noise temperature is more appropriate for analysis of complete receiving *systems* that must include the antenna noise temperature as another important variable.

There are no paradoxes and no conflicts here, only alternative ways of looking at the same physical phenomena. That vision only falls apart if one of the alternative viewpoints contains unaware approximations or errors.

Hi Owen,

I did note:
On Sat, 21 Mar 2009 03:25:39 GMT, Owen Duffy <none@no.where> wrote:
>I get 60-3.2=56.8dB.

Which appears to embrace this oddity of characterization.

And, as you offer, you say:
On Sat, 21 Mar 2009 03:43:21 GMT, Owen Duffy <none@no.where> wrote:
>It says nothing of the absolute noise power or signal power. You seem to
>assume the noise power KTB noise where T is 290K.

Which still leaves an astonishing characterization accepted, if only
to seemingly fulfill a presumption.

Perhaps I should more blunt, but the quote I lifted only speaks to two
things: an antenna, and a claim for its signal to noise ratio.

60 dB ??????????????

This isn't credible leaving the gate, and how it is then used as a
source to expand the discussion is bewildering beyond compare.

The topic heading as being a paradox is certainly apt, however.

No it doesn't do prop delay. It does a steady state model. The TL is
just another two port that gets dumped into a giant matrix which is
solved as a system of linear equations. Think of TL as a special case of NT.

For a narrow band application, it is indeed possible to construct a
circuit which has lower noise temperature than the active devices. Look
up "cold fet noise source". (a quick google turns up, for instance,
patent 6439763..)

This is hams, the preferences of which you speak? In the rest of the
microwave station world, I think G/T is a popular "one metric for all",
at least for things pointed at the sky.

Rather, hams will quote (brag) Sun

Depends on the frequency and things like humidity and cloud cover.

At microwave frequencies (say, 10 GHz-ish) 3-4 K is a good starting
point for dry air on a clear night.

If there's any loss in the path (e.g. from watervapor absorption) the
noise temperature comes up.

If there's anything hot in the path (e.g. clouds with liquid water) then
the noise temp comes up.

If there's something in the path (clouds) that reflects the energy from
something hot (earth) then the noise temp comes up.

This kind of thing is used to measure atmospheric moisture (look up
"water vapor radiometer")

I built a precision ground station to record an orbiting radar (on
QuikScat), and you could easily tell when it was humid or there was
cloud cover by just looking at the background noise level.

> Appealing, but wrong.

Well, correct *under a certain set of assumptions*. As with, e.g.,
manufacturer's data sheets and quiz/exam problems done in school, often these
assumptions are unstated.

In other words, I'm purposely not stating my assumptions to demonstrate how to
get yourself into trouble more readily. :-)

> An real antenna might supply much less through to much much more noise.

How does an antenna at 290K supply less? I mean, ignoring how well it works
as an antenna, shouldn't it still have kTB worth of noise generated just from
the resistance in its conductors?

> (If you run through the numbers,
>> the SNR at the output of the cascaded amplifiers is 56.94dB.)
> I get 60-3.2=56.8dB.

I think that's rounding differences and my using T0=290K rather than 289K as a
reference.

> It is not so much an issue of safer, is it use and mis-use, it is about
> how you use NF with cascaded stages. Essentially, you convert them to T,
> apply the gain effects, then T back to a NF for the combination.

Sounds safe to me.

I find noise temperatures just as if not more intuitive than noise figures,
and (to me) it's more obvious what's going on when you have a string of
amplifiers.

> You might find this little calculator interesting / helpful:
> http://www.vk1od.net/calc/RxSensitivityCalc.htm .

Well, Owen was using 289K and Wes says, "the noise figure concept has the drawback that it depends upon definition of a standard temperature, usually 290K." Hence, while I certainly accept that "the IEEE standard definition" is 290K, it seems to me that it's a bit of wishful thinking to suggest that no one has ever used a different reference temperature in their work.

These days using a regular old op-amp as an HF amplifier can often be attractive, although when you go through the math you find out that it's very difficult to obtain a low enough noise op-amp such that it has a noise figure less than about 10dB (and even obtianing 20dB requires some care -- you can easily end up with >40dB if you're not careful!). Texas Instruments has a good application note on this: focus.ti.com/lit/an/slyt094/slyt094.pdf .

Hence op-amps are pretty much out for LNAs, but can be quite useful by the time you're hitting an IF and already have some reasonable amount of gain ahead.

It would have been much better off for me to state that, "Say I have a signal generator that I know happens to provide an SNR of 60dB." I knew that background radition temperatures were high, but not that even the quietest parts of the spectrum are 4,000K!

Originally I almost added something like, "(assume you're standing next to the transmitter)" :-)

60dB+ isn't unheard of for hilltop-to-hilltop microwave links though, is it? And one might obtain 50dB with regular TV antennas if they have a good line-of-sight to the transmitter and there aren't significant reflections, right?

1744. Antenna & Tuner on 160M Question

> 73,
> Tom Donaly, KA6RUH

NEC network objects are two port networks described by a set of Y parameters -- see the NEC-2 documentation on the NT "card". When a transmission line is specified via a TL "card", the Y parameters appropriate for the specified line length and Z0 are calculated for a standard Y parameter network which is then used in the model. In the code, this is done in the NETWK subroutine between line labels 16 and 17.

EZNEC v. 5.0 allows the user to specify a skin-effect proportional transmission line loss. It accomplishes this internally by appropriately modifying the network Y parameters.

Presumably they're not called that because of 'standing current'. A
standing wave is just the stationary pattern that results from the
interference of waves. It doesn't really have a 'life' of it's own.

> This is such a simple concept - I don't see the problem

Cecil - as the equation is written, the phase term IS position. The
phase of the sine function changes with x.

Right. He could (and should) have gone on to say that standing waves
don't really *DO* anything at all.

Right. All of which deepens the mystery of why you would continue to
insist on claiming that Roy measured standing wave current.

I still need you to explain what standing wave _current_ is, and, just
as importantly how it phase shifts by *TRAVELING* through a coil.

Yes Jim, an omission on my part... hams tend not to use G/T... but yes,
the rest of the world recognises the value of G/T as a single metric,
especially for space comms.

I suppose one complication of G/T for EME is that the noise varies with
moon position and local elevation... but one thinks that a range of G/T
figures could be expressed to characterise a station's capability.

G/T for a Sun transit at high elevation would be a most useful metric for
assessing a station against state of the art.

> generated just from the resistance in its conductors?

An antenna's feedpoint impedance comprises radiation resistance and loss
resistance.

Radiation resistance is a virtual resistance and does not contribute
thermal or Johnson noise.

It is a common mistake to consider that an antenna always includes 290K
due to kTB in its radiation resistance. If that were the case, we would
never have need for receivers with Teq much less than 290K! Mind you, if
a directive antenna points at hot earth, then external noise will never
be much less than 290K, so the requirements for terrestrial shots will be
different to space shots.

Attenuation gives rise to noise, and feed system loss is no exception.

An antenna does receive noise power from its environment, lets call it
external noise, and that needs to be factored into a receive system for
an overall figure of merit.

The ratio Gain/Temperature is antenna gain divided by total equivalent noise temperature (internal and external) all referred to a common reference point (usually the antenna connector or w/g flange). It is an overall figure of merit, and if the power flux density (or field strength) at the receive antenna is known, then S/N can be calculated from that and G/T.

Hams tend to not use G/T.

>
> I think that's rounding differences and my using T0=290K rather than
> 289K as a reference.

The 289 was not the reference, it was the result of using 3.00000dB NF (I know you stated Noise Factor =2, but I used your rounded NF=3dB value).
...
> I find noise temperatures just as if not more intuitive than noise

That was my point. Dealing with K is like dealing with power (P=kTB).

>
>> You might find this little calculator interesting / helpful:
>> http://www.vk1od.net/calc/RxSensitivityCalc.htm .
>
> Looks nice, thanks!

Thanks.

There is a related calculator for deterimining the level of ambient noise when receiver noise figure is known, see http://www.vk1od.net/calc/anc.htm .

By and large, although lots of hams express an interest in weak signal working, they aren't very interested in noise... which is a key parameter determining whether a signal can be copied. I have asked scores of weak signal enthusiasts their ambient noise level, and to date, only one has answered (though not in absolute terms, but nevertheless had an appreciation of the issue).

Joel, you misunderstood my calc.

The 289K was the internal noise of the DUT with NF=3.00000dB. The reference
was (and must be) 290K.

It doesn't solve the problem.

You still haven't given enough information to determine the absolute
level of either signal or noise, and you need that to consider the impact
of the DUT's internal noise (which you know in absolute terms).

Tom Donaly wrote:
> What's the Z0 of a loading coil, Cecil?

Z0 and VF depend upon the geometry of the coil
and the frequency. A 75m Texas Bugcatcher coil
has a Z0 of ~3800 ohms and a VF of ~0.02. The
coil that w8ji used for his 3 nS "measurements"
has a Z0 of ~5300 ohms and a VF of ~0.033. I've
generated an EXCEL file that does the calculations:

http://www.w5dxp.com/CoilZ0VF.xls

I've also got a web page that explains why the
current phase in a standing-wave antenna cannot
be used to measure delay.

http://www.w5dxp.com/current2.htm

I have done the suggested bench experiments myself
and the results are nowhere near w8ji's results.
When traveling wave current is used instead of
standing wave current, the delay is obvious on a
dual-trace O'scope.

This is nothing new. It is based on the information
in the IEEE paper which someone presented years ago:

I suspected as much from model behaviour.

My question is then, can the 'stub' in figure a) be replaced by a TL
element for a valid model of a)?

My point exactly, Jim. We may be closer than you think.
Tom and Roy did NOT use position to determine the phase.
That is the entire point of my posting.

> The phase of a time varying function changes with time except in the
> special case of a 'standing wave' function, where it changes with position.

Again, my point exactly - something that (apparently)
neither w8ji or w7el wants to admit.

> Right. He could (and should) have gone on to say that standing waves
> don't really *DO* anything at all.

My point exactly! Now try to tell it to w8ji and w7el
who used primarily standing wave current to prove their
points.

> I still need you to explain what standing wave _current_ is, and, just
> as importantly how it phase shifts by *TRAVELING* through a coil.

My point exactly, Jim. We may be closer than you think.
I am the one who is saying that it doesn't phase shift
while traveling through a wire or a coil. W8JI and W7EL
apparently think that it does phase shift through a coil
and can therefore be used to measure the delay through
a coil. I am the one who disagrees with that concept.

You and I are on the same side, Jim. This reminds me of
the time someone else realized the gurus were wrong and
simply stopped posting in order to save guru face and
to avoid proving them wrong.

I thought Richard's main problem was that 60dB is (relatively) unheard of in wireless systems. I agree with you 100% that not enough information was given to determine the absolute signal or noise levels.

> thermal or Johnson noise.

Certainly, agreed.

But the loss resistance of the antenna itself is still contributing kTB,
right?

If I take a small loop of wire that has, say, a 100 milliohms of resistance,
it still generates kTB watts of thermal noise power. Why isn't this a
"problem?"

> Hams tend to not use G/T.

If doesn't seem like "receiver factor" (input intercept point/noise figure)
has caught on much either.

> By and large, although lots of hams express an interest in weak signal
> working, they aren't very interested in noise... which is a key parameter

I realized awhile back that noise is the primary factor that limits how far
you can transmit a signal and still recovery it successfully. (Granted, these
days it's often phase noise in oscillators rather than the noise figures in
amplifiers that determines this, but still.)

A discussion of noise sounds like a good topic for a ham fair... technically
there's little more complex than algebra (i.e., it's accessible to pretty much
everyone), but plenty of room for misapplication.

I'm learning a lot here...

> This is comparing elephants to oranges.

Not intentionally; I misunderstood your objections.

The whole point of the exercise was that just starting with an SNR doesn't provide enough information to do anything useful relating to noise figures, although I didn't realize when I posted it that specifying "an antenna" is way too vague.

> So, you came up with 60 dB, what was the noise level in?

To be consistent with what I was trying to concoct, the noise level would have been kTB with T=290K.

Here's a question for you: What's the noise output power of your run-of-the-mill RF signal generator (e.g., an HP 8594A/B/C)? I'm thinking the noise output power is *well* in excess of kTB (where T is the room temperature you're operating the generator in)?

Owen was responding to the following statement made by you:
>> amplifier with a power gain of 100 (20dB) and a noise factor of 2
>> (3dB), at the output of the amplifier my SNR will be 57dB. Easy
>> peasy,
>
To which Owen replied:
>The amplifier has an equivalent noise temperature (Teq) of 289K.

A noise factor of 2 is not exactly equal to a noise figure of 3dB.

If the amplifier has a noise factor of exactly 2, then its noise
temperature would be exactly 290K, because F = 1 + (T/290).

But if it has a noise figure of exactly 3dB, then by the same definition
its noise temperature would be 288.626etc K which rounds to 289K.

So Owen was not "using 289K" as an alternative reference temperature. He
was simply giving the correct answer to one of your two alternative
questions :-)

As for Wes's statement, I'm afraid that even in 1975 when originally
published, it was no longer correct for a US source to describe the
reference temperature for the definition of noise factor as "usually"
290K. Strike out the "usually".

All of these concepts originate from a classic 1944 IRE paper by Friis,
which recognized that noise factor and noise temperature must be related
by some arbitrary value of reference temperature - and that very same
paper suggests 290K. However, this was an arbitrary choice; at least in
principle, others were free to choose a different temperature, and I
think that is how the word "usually" crept in.

But in practice 290K gained widespread acceptance and by 1975 it had already been formally adopted by the IEEE. From that point forward, the standard reference temperature became 290K - and no other.

Because that noise power has a source impedance of 100 milliohms, which is dramatically mismatched to the input impedance of a normal receiver. This is explained in Wes Hayward's full-length textbook, 'Introduction to Radio Frequency Design' (now re-published by ARRL).

It's interesting to me that, when I was in school, all the noise figure/temperature stuff was done without Friis's name ever coming up... whereas his name was prominently mentioned when discussing the path lose relations (based on distances, antenna gains, etc.)

> 73 from Ian GM3SEK 'In Practice' columnist for RadCom (RSGB)

Speaking of interesting things, I've always thought that you RSGB guys tend to produce books/articles/etc. at a rather higher technical level, on average, than the ARRL does. The first time I was at Dayton and stopped by a booth that George Dobbs was manning with various QRP kits and RSGB books, I must have dropped $100. :-)

>
> Owen

No, it can't. The NEC two-port network object can't have any common mode current -- the current out of one terminal of a port is always exactly equal to the current into the other terminal of that port regardless of external connections, which means that common mode current is zero by definition. The wire stub, on the other hand, couples to external fields which can cause common mode current on the wires.

The only time you can substitute a transmission line (network) object for a wire transmission line is when the transmission line is carrying no common mode current. An example would be a transmission line connected to the center of a symmetrical dipole and positioned symmetrically with respect to the dipole so it gets equal coupling from both legs.

A coaxial line can be modeled as a combination of a transmission line (network) object and a wire, the former carrying the differential mode current and the latter the common mode current, as described in the EZNEC manual. This is possible because the two components are physically separated on a coax line. However, I don't know of any way to do the equivalent thing with a parallel-wire line because the two components aren't physically separated as they are on coax.

This is comparing elephants to oranges. You haven't specified
anything that is noise related, you said nothing about antennas (exept
what might be presumed from vague associations), and receive and power
levels are wholly missing. As dB is a ratiometric relationship, you
have offered nothing to validate the ratio.

Hilltop-to-hilltop microwave links can be designed for a 60 dB snr
(one cannot call it gain, certainly); or 60 db directivity; however
hilltop-to-hilltop microwave links do not automagically qualify as
coming with that directivity if they are too close!

So, you came up with 60 dB, what was the noise level in? what was the
noise level out? What is the source of the noise in? What are you
loading the 1,000,000 * (S+N) into?

Yes... but summing the contributions isn't trivial.

An alternative view is to consider the contribution of conductor loss and other losses in the antenna structure and feed, and treat the system as an ideal (lossless antenna) with a specified 'feed loss'.

My observation is that convention is the use the antenna connector or w/g flange as a reference point for such calcs. It may even be laid down in standards... but I am not sure. Someone else may know?

Notwithstanding that convention, I note the VK3UM tools seem to make their reference point a point on the space side of the antenna. That would give rise to a slighly different G/T figure.

I haven't been to ham fairs in your country, but here there are mostly focussed on exhanging junk (selling the junk bought at the last fair, and buying some different junk to sell at the next fair).

Noise is dealt with pretty well in text books, but text books aren't as popular as mags.

Complicating this in the real world is that receivers aren't perfectly linear, and measurements in a shielded room often have limited relevance to real life performance where the 'noise' due to intermodulation distortion is a significant issue... especially with a trend to avoiding front end loss (noise) by ditching front end selectivity.

Noise is an interesting topic.

I have just discovered an Agilent AN which discusses uncertainty in noise measurement. I am about to compare it to my proposition of a statistical estimate of noise measurement (sampling) uncertainty, see http://www.vk1od.net/measurement/noise/nmu.htm .

> should be accounted for, and a method.

By "problem" I mean "the noise contribution from the loss resistance of the antenna is routinely ignored." -- Presumably because the background EM noise (coming in through the antenna's radiation resistance) often far exceeds it.

> I haven't been to ham fairs in your country, but here there are mostly
> focussed on exhanging junk (selling the junk bought at the last fair, and
> buying some different junk to sell at the next fair).

:-)

The larger ham fairs often have some reasonably "meaty" technical seminars (antenna design and modeling in, e.g., EZNEC is popular). Somewhat more focused conventions (e.g., Microwave Update) often end up with a fair amount of technical information as well.

But yes, there's always plenty of junk to be exchanged and junk food to be consumed.

eBay has diminished the number of true "deals" left at ham fairs, but they do still exist... including such relevant items as phase noise meters, LNAs, RF generators.

This can be answered by looking at the specs for the generator.

For example, an Agilent N5181 looks like the noise floor is around
-160dBc/Hz well away from the carrier (e.g. >10MHz). That's probably
representative of the overall noise floor with the carrier at some level
like 0dBm. If we take that level, then it's 14 dB above kTB of -174 dBm/Hz

I previously published the currents in a 20m dipole
with 21 segments. Here they are again. Can you comprehend
why there is only a maximum phase shift of 4.54 degrees
in 180 degrees of antenna? That is NOT the characteristic
of traveling wave current. That is the characteristic of
primarily standing wave current which has constant phase.

Roy reported that the phase shift across a loading coil wasn't
measurable which is a true statement because the standing wave
current indeed doesn't change phase across a coil or through a
wire. But he then used that same evidence to support w8ji's
ridiculous 3 nS delay through a 75m mobile loading coil when
there is no relationship between standing wave current phase
and the delay through a loading coil. Traveling wave current
must be used to measure the delay through a loading coil,
something I have been saying for years.

Most SSGs will have a large attenuation at the output, and as the output
level is reduced (attenuation increased), the noise power density away from
the carrier approaches kT/Hz.

Thanks Roy.

Is NEC capable of modelling the configuration shown at
http://www.vk1od.net/lost/King-22.3b.png (which is the same type of
problem as my figure b)?

My attempts to model b) by modelling a plain conductor and inserting a
load in the segment where the open end of the coax stub would otherwise
be, does not result in an in-phase current distribution.

King discusses the coaxial stub and suggests that the conductors need to
be significantly large in diameter, and the stub length would be less
than a quarter wave for in-phase radiator currents.

Your description of the model is correct. Technically, the wire representing the outside of the coax (which in the model is located where the coax line is) should be the diameter of the shield, as we've discussed before. The stepped wire diameter error of NEC-2 might, however, result in less accurate results by doing this than by leaving the diameter the same as the other wires. Experiments with your earlier b) model showed that the transmission line object characteristics have almost no effect on the wire currents when it's inserted at a point of very low current, and that it doesn't result in in-phase current distribution. That will be true here also at frequencies where the current is very low near the open end of the stub.

Still using the Tesla coil fella's ideas, are you? A frequency
dependent Z0 is a good trick. What happens when you double the
length of the coil? Does the Z0 stay the same? What if the coil is
infinite? Can you make a quarter wave shorted stub with it? If you
make it a half wavelength long - keeping in mind the velocity factor -
will the impedance looking into the coil equal the impedance of
the load? How do you attach a load to it?

I'm really surprised that nobody nominated me!
